U. S. Engineer Coxsetter of Jacksonville was a prominent visitor to town this week. He came down to look after matters pertaining to a new survey of the Crystal river and the deepening of its channel. Some talk has been made concerning the establishing of a turning pool for boats of all sizes near the sandsprit and the building of a public dock out to same, one that will accommodate the visitor as well as the home folks. This would be a much appreciated water front improvement, and would no doubt materialize were it not for the fact that the property on which these improvements would be place is owned by individuals, and unless these owners are willing to donate said lands, nothing can be looked, because permanent improvements of private property by the government is a thing of the past. It is the hope of all pnblic spirited citizens of Crystal River that this project does become reality, as it would mean a big boost to our town and a long felt want would be supplied. This is a matter that will probably be decided in the next few days and every effort should be made by our citizens to get favorable action in the matter.
