

DLC Statistics

This document contains templates and examples of statistical reports required of the DLC for internal, state and national reporting.

Included are:

- All Collections Report (Monthly Summary)
- All Collections Report (Annual Summary)

and

- Group Report (Monthly Detail)
- Group Report (Annual Detail)

and

- Collection Report (Monthly Detail)
- Collection (Annual Detail)

Programming written around the Group Reports, both monthly and annual, should support the selection of a particular Group, multiple Groups, or all Groups, preferably using a check-box selection method.

It would be preferable – but only in a second version of a DLC Statistics package – that this check-box selection method be expanded to a collapsible list extended to collections and subcollections for detailed reporting at lower levels.

Future development of statistics should anticipate pie charts and graphs, as well as, comparative statistics (e.g., change since last month, change since last year, etc.).

The templates below deal only with completed items. Future development of statistics should anticipate examination of in-process items, volumes, images and text.

Reports should be generated automatically as PDF/A documents. They should be listed in inverse chronological order on a Statistics web page.

ALL COLLECTIONS REPORT (Monthly)
