

Time for a time change

Daylight Saving Time kicks in Sunday

State legislation could lead to year-round DST

By MARC VALERO
STAFF WRITER

SEBRING — It's nearly "Summer Time," which is the term some countries use for Daylight Saving Time when the clocks spring ahead in the spring providing more evening sunshine and endless debate.

Some prefer either Daylight Saving Time or Standard Time, others don't mind the twice-a-year clock adjustments, while others wish it would stay one way or the other year-round.

Dairy farmer Joe Wright prefers it to stay one way or the other year-round, but makes a case for Standard Time.

"I am in an industry where we like mornings," he said. "I don't like it being dark until 7 or 8 a.m."

Also, from a safety standpoint, earlier daylight is safer for students who are getting on school buses in the morning, Wright said.

"If they leave it one way or the other, I am OK," he said.

Data shows people will spend more

money in the evening when there is daylight though the original rationale for Daylight Saving Time was to save fuel during World War I, Wright noted.

The Florida House and Senate passed a bill recently that could put the Sunshine State on year-round Daylight Saving Time.

HB 1013, by Rep. Jeanette M. Nuñez, R-Miami, and Rep. Heather Fitzenhagen, R-Fort Myers, notes that currently, DST is not observed in Hawaii, American Samoa, Guam, Puerto Rico, the Virgin Islands, and most of Arizona.

According to a summary of the bill, states may exempt themselves from observing DST and remain on standard time year-round, but they may not remain on the "spring forward" time

The Energy Policy Act of 2005 extended Daylight Saving Time one month to the current "spring ahead" on the second Sunday in March to "fall back" on the first Sunday in November. About one-third of the countries in the world

MARC VALERO/STAFF

change in March without making the corresponding "fall back" time change in October unless the United States Congress changes federal law.

HB 1013 creates the Sunshine Protection Act, which provides that the Legislature intends to adopt DST as the year-round standard time if the United States Congress amends the law relating to Daylight Saving Time.

Because a current Florida Legislature

Florida Hospital closing LP Baker Act facility

By PHIL ATTINGER
STAFF WRITER

SEBRING — At a time when Legislators debate how to strengthen Baker Act laws, a local facility to house people who present a danger to others is closing.

Florida Hospital Lake Placid, as of April 1, will not accept any more patients at its Baker Act facility for 55 and older patients.

That ward will then close April 30, with the intention of reopening it later to provide a different type of service. The hospital is citing costs as the primary reason for closure.

"There's been just a steady decline. It hasn't been used to its capacity," said Cathy Albritton, marketing director for Florida Hospital Heartland Division. "It's been experiencing a lot of financial losses. It's not utilized as well as could be given the space."

Albritton couldn't quote exactly how much financial loss the hospital has had from the facility, and by her

Inmates give pups a new leash on life

By KIM LEATHERMAN
STAFF WRITER

SEBRING — Over the din of barking dogs, Lt. Clay Kinslow's passion for his new K-9 program is evident in his voice. Kinslow and his staff at Highlands County Animal Services have taken

on a new project called Prison Pup Program.

The Prison Pup Program is still in its infancy at just three weeks old and Kinslow is taking baby steps

with it. The program is an eight-week commitment that will pair dogs and low-risk state prisoners together in an effort to increase the dog's adoptability and provide new skills for the inmates.

Kinslow was planning a program similar to this but was waiting until the year mark when the Highlands County Sheriff's Office took over animal control last April. He was

Businesses reopen six months after Irma

By JAY MEISEL
STAFF WRITER

SEBRING — Six months after Hurricane Irma forced the relocation of Goin' Postal and Bolo Tactical, the businesses are finally reopening at their original location near Sun 'n Lake Boulevard.

"It's good to be home," said Gale Decker, the owner.

However, there's a couple of changes. Bolo Tactical is now occupying the larger spot that formerly housed Goin' Postal and Goin' Postal has become Quik Print and Copy.

With all the work inside on flooring, fixtures and painting, the businesses look brand new.

Bolo Tactical sells uniforms, outdoor gear and other related items and accessories. Quik Print offers copying services, printing and graphic design.

They are set up to print brochures and photos, as well as provide other services.

Work continues on parts of

the plaza that house Subway and Salon 16.

Decker recalled that she was prepared to reopen after Hurricane Irma, but was shocked at the condition of the building.

"It was horrible," she said.

The storm pulled insulation, caused a hanging ceiling and dumped panels on the ground.

Decker said she prepared for the storm by moving items to the back and attempting to protect the window. But, with the ceiling damaged and the roof gone, the store suffered considerable water damage.

"The roof was laying on the back parking lot," Decker said. The problems got worse with the rains that followed the hurricane.

Until they could find someone to repair the roof, the business was at the mercy of the weather.

"Anytime we had rain, we had rain in here," she said.

They reopened Goin' Postal, but more rain left the

store flooded with water more than an inch deep, she said.

All that caused a lot of black mold and Decker said, she was advised "don't go back unless I have a respirator."

Chairs and other fixtures soaked up water and began falling apart, she said.

They had a lot of trouble finding warehouse space to

store what they could save, she said.

"It was quite an ordeal and not one we would want to go through anytime soon," she said.

Decker said she gave up the Goin' Postal franchise because so much of her inventory was destroyed and due to changes in the industry.

Two named officer of the year for 2017

By JAY MEISEL
STAFF WRITER

SEBRING — A retired sergeant and a police officer were named co-police officers of the year Tuesday for their response to a Sebring fire that claimed the life of one man and injured his wife.

Retired Sgt. Mike Warner and Officer Shannon Strenth were recognized for discovering on April 13, 2017, the fire at 521 Summit

Drive. Their actions ultimately saved a life, said Sebring Police Chief Karl Hoglund.

In letters to both, Hoglund said, "Your actions on this call were directly responsible for saving a life and serve as positive examples to your peers. I am proud of both your actions and the leadership characteristics you exhibited during this call for service. It is important to me you know your actions are appreciated."

The fire claimed the life

JAY MEISEL/STAFF

Retired Sgt. Mike Warner and Police Officer Shannon Strenth.

of George Krain. His wife,

Miriam Krain, survived after suffering smoke inhalation, Strenth said.

Strength has been a police officer for 10 years. She said her father and her uncle were police officers.

Warner retired earlier this year after working for 26 years with the Sebring Police Department. His career included community policing.

He said earlier this year he became a police officer because he thought the job would be exciting.

1. African Hair Braiding is an ancient art, handed down from generation to generation in Africa.
2. The origins of the art form can be traced back to Egypt as far as 3500 BC.
3. Each region of Africa has its own traditional

styles, and each tribe its distinctive aesthetics.

4. In many West African countries, hair braiding developed into complex patterns signaling one's social status, age group, and village affiliation.

5. Hair-braiding is often an immensely time-consuming activity: some styles can take an entire day or more to create.

Cause of AP Manors fire likely electrical

By MARC VALERO
STAFF WRITER

AVON PARK — An early morning blaze last month that displaced residents from three housing units likely started as an electrical fire.

The Feb. 24 fire at the Manors, 1400 Block of Wray St., near North Lake Avenue, damaged three units and displaced a number of people, Avon Park Fire Chief Brad Batz said Wednesday. The department was paged out

to the blaze at 1:59 a.m. It is a multi-unit housing complex with five units in each building, he explained. The fire started in one of the end units and traveled through three of the units.

"We were able to stop it before it got to the fourth one, but it displaced all the residents that were in those three units due to the fire damage," Batz said.

The last update he received from State Fire Marshal Greg Bubb is the fire was electrical in its origin, Batz said. An

extension cord behind the couch that was plugged into a deep freezer, which Bubb was studying as the possible cause.

The fire started in an enclosed front porch area, Batz said. One of the residents in the first unit woke up to go to the restroom and saw the flames through the window. The bedroom was directly on the other side of the wall from the front porch.

The resident woke up his family and got them out and woke up his neighbors

and everybody got out by which time the flames spread to the roof area, Batz said. The blaze proceeded through the attic space spreading to the other units.

The resident received a minor burn on his face from the flames, but was not transported by EMS.

The fourth and fifth units were OK and did not incur any smoke nor fire damage, Batz said. The Red Cross assisted all the people who were displaced in the three units.

**- 21st Annual -
WELLS MOTOR COMPANY
CLASSIC CAR SHOW
SATURDAY, MARCH 10TH - 9AM - 2PM**

Wells Car Show features Jack Ingram's famous number 11

Avon Park – For the 21st consecutive year Wells Motor Company in Avon Park has created the excitement of speedweek, culminating with the internationally famous 12 Hours of Sebring. Even though this family owned and run automobile dealership has been in business since 1931, the event started with a celebration of the new Wells facility 21 years ago on US 27 at the south end of Avon Park. Every year the event has grown bigger and bigger with over 200 pre-1990 cars and trucks on display and thousands of people enjoying a free family outing. This year's event is on Saturday March 10th from 9am-2pm.

One of the things that sets the Wells Motor Co. car show apart from most others is the special attraction in the showroom. Former NASCAR drivers such as the late Marvin Panch and Frank Warren have been signing autographs and bench racing with whoever wanted to visit with a legend. Famous race cars have also been on display including the Le Mans winning Dodge Viper, Richard Petty's 1975 Dodge, and Harry Hide's K & K Dodge.

This year carries on the tradition of excitement. They are privileged to have three restored race cars from Fred Strickland's classic race car collection. He will be displaying a midget and sprint car from the past along with Jack Ingram's famous race winning 1972 Chevrolet Monte Carlo. This superspeedway Late Model Sportsman car sat on the pole at Daytona and carried him to victory at both Daytona and Talladega.

The car is perfectly restored. In 2014 it was in the NASCAR Hall of Fame in Charlotte, the year that "Iron Man" Jack Ingram was inducted into the Hall of Fame along with Dale Jarrett, Maurice Petty, Richard's cousin and engine builder, Fireball Roberts and Tim Flock. There will be videos showing you all the tricks that were incorporated into the building of the car. It sits on a Banjo Matthews chassis but Jack himself built the car around the chassis.

Jack Ingram won the National Championship in 1972, 1973 and 1974 driving this car. Donnie Allison and David later drove it and to show you how successful it was, it was raced six years and still winning.

A video of the 1975 Permatex 300 at Daytona will also be shown in the showroom, allowing you to see the car in action.

The Wells Motor Company Classic Car Show is Saturday, March 10th, from 9-2, at 1600 US 27 South in Avon Park. Food trucks will be present and there is plenty of free parking with free shuttle service from parking to show.

What better way to start Speedweek than a free family day looking at famous race cars and hundreds of other cars from the past. Show the grandchildren what real cars were like.

OBITUARIES

Marguerite Ruth Hitt

Marguerite Ruth Hitt, 73, of Sebring, Florida, passed away Tuesday, March 6, 2018. She

was born July 18, 1944 in Minneapolis, Minnesota to John and Eloine Selby.

Ruth is survived by her husband of 54 years, Richard; three sons, Rick (Jayma) of Sebring, Florida, Scott (Gina) of Sebring, Florida, and Harold (Ginny) of Oveido, Florida; six grandchildren, Cassidy, Sydney, Jake and Olivia of Sebring, Florida, and Dalton and Andi of Oveido, Florida; four nieces, Terri, Kelly, Pam and Chrissy; and three nephews, Billy, Devin and Ladson.

Ruth was preceded in death by her parents, John and Eloine; sister, Kathy; and three brothers, John, Albert and Harold.

Ruth moved to Sebring with her family in 1976

from Fernandina Beach. She was employed in the banking industry and also in the newspaper advertising sales at the former Sebring News. She was also a lawyer's assistant in Sebring and a crew leader for the census bureau.

Ruth was very active in the community serving as president of the former Sebring High School Booster Club for many years, was active in Cub Scouts state wide for many years, assisted in local Dixie Youth baseball for years as her sons played and husband coached, and assisted with the Faith Lutheran Church day school for years. She was a word master and loved to do crossword puzzles, especially the challenging New York Times Sunday puzzle.

Ruth was a huge Tampa Bay Buccaneers fan with her husband Richard.

They started attending games in 1976 and continued for many years. She was also a long time Sebring Blue Streak

and South Florida State College fan and supporter. Ruth enjoyed bowling and fishing with her family and was a terrific dancer.

She attended Bible Fellowship Church and was a friend to all she came in contact with.

A celebration of life will be held at 11 a.m. Tuesday, March 13, 2018 at the Stephenson-Nelson Funeral Home. In lieu of flowers, memorial contributions may be made to Faith Lutheran Church Day School in the name of Ruth Hitt.

Services entrusted to Stephenson-Nelson Funeral Home, 4001 Sebring Parkway, Sebring, Florida 33870. Online condolences may be left at stephensonnelsonfh.com.

O.L. Taylor

O.L. Taylor, 97, of Sebring, died March 5, 2018. Services are at 11 a.m. Saturday, March 10 at First United Methodist Church.

CLOSING

FROM PAGE 1

estimate, the facility has been in place more than 17 years.

"It was a very difficult decision and yet an obvious decision," Albritton said.

Albritton did say that current staff would be given the opportunity to transfer to another department and be given training if necessary.

The Lake Placid Hospital Baker Act facility takes patients 55 and older whom police have detained under state law that allows arrest of someone who poses a danger to themselves and others. The law provides for that person to be committed involuntarily for examination for up to 72 hours, if the person is suspected of having a mental illness.

Despite the age limitation, the Lake Placid facility remained crucial to local law enforcement. Sheriff Paul Blackman released a statement Wednesday calling the loss a blow to the Highlands County Sheriff's Office and the community in general.

"It is frustrating because at a time when we are needing more beds we are instead losing a large number of beds," Blackman said in an email. "It will be a hardship for our agency because instead of having a local facility, we will

now have to transport those patients to Lake Wales."

Donna Titus, a volunteer guardian advocate at the Lake Placid facility, said she had not heard any announcement to the public about the change — only to people who work within the facility.

Titus' role is that of a spokesperson for the patient in legal matters and medical treatment, she said, such as handling paperwork when or if the attending psychologist prescribes medication. It may also mean sitting with the patient in a judicial hearing to determine if the patient needs to stay longer for treatment.

It depends on the patient, Titus said, whether or not they attend the hearing.

"If they're fine with staying, they generally won't go," Titus said.

The only place now for them, mostly senior citizens in their 70s, will be in Polk County, which is a far drive for most people, elderly or not, Titus said.

"These are some frail people. They need care," Titus said. "Why are we stepping backward to have them go to Peace River (Center in Polk County) when we have this unit?"

Highlands County law enforcement officials have tried for years to get a local Baker Act facility for patients of all ages, for logistical reasons as well as for better treatment. Blackman's predecessor, Susan Benton, made getting such a facility a goal of her 12 years as sheriff, and got close a few times.

In October 2013,

Benton, Highlands County Government and Tri-County Human Services applied to the state for a joint Criminal Justice, Mental Health and Substance Abuse Reinvestment Grant for all patients. It was denied.

She applied again in late 2016 as part of a \$10 million Department of Children and Families program for a statewide Central Receiving System. DCF would designate receiving facilities or providers to accept people for evaluation or stabilization under the Baker and Marchman Acts. Marchman Act cases involve drug addiction.

That application also was denied.

Highlands County still needs a Baker Act facility, now for all ages.

BREAKING NEWS!

major changes on Earth. We will visit several places of strategic interest and will discuss possible collaborative efforts. Among other things will also discuss new measures on global security. This time this meeting will be productive and I will have many major changes.

OUR VIEW

Wildfire season is upon us

The little bit of wind and the shifts in direction of an evening have felt good to most of us.

However, to those men and women who protect our homes and property from fires, even a slight breeze or shift in the wind can become dangerous.

Saturday evening, a small wildfire broke out around Mini Ranch Road. It was 40 acres at the onset and grew to 300 acres by Tuesday, by which time four homes were voluntarily evacuated. Highlands County Fire Services kept the homes from catching fire.

Whether shifts in the wind are expected or unexpected, even the slightest breeze can fan the fire and redirect it from its current path.

The fire is in a swamp bayhead inaccessible to heavy equipment. State Wildland Firefighters have been working to establish and secure bulldozer containment lines in preparation of any other wind shifts. The bulldozer will also be removing burning material along or near the control line and dead trees that are burning.

One of the dangers of a muck fire is that since it burns underground, it is burning tree roots and that can cause instability in trees. Some of the trees could fall, either on a piece of equipment or firefighter, or they could fall and block an entrance point used.

The Mini Ranch Road Fire is not the first muck fire to get started. Late last month, State Wildland Firefighters worked to suppress a 70-acre fire off Lonesome Island Road, four miles east of the town of Lake Placid and about two miles north of State Road 70.

"A muck fire is just like coals burning in a barbecue pit," Forest Area Supervisor Joe deBree said. "You might not see the fire, but you know it's down there. Sometimes you can feel the heat being released, and sometimes it can be smoke, but most of the time a muck fire is not visible."

A muck fire can burn for weeks or months, and is very hard to extinguish. Muck is actually decomposing organic material and can be several feet deep on the ground.

The only thing firefighters can do is try to pump as much water as possible into the ground to saturate the soil. What is needed is a constant steady rainfall, more than we saw Wednesday, to alleviate the dry conditions and help firefighters in their suppression efforts.

Until then, residents will have to deal with the distinct odor that lingers, especially of a morning, as well as the smoke. Motorists should remember that when the smoke mixes with fog it will create low visibility issues and dangerous conditions for driving. Those who suffer with respiratory problems have no way of knowing how long their struggle under these conditions will last. Muck fires can go on for days, weeks or even months.

Typically, fires get larger as the dry season continues. That's because grass, plants and trees lose water. The drier the vegetation gets, the more the susceptibility to wildfires, she explained. And that also means more fuel for the fire to encompass a larger area.

Some of the best tips to prevent blazes includes removing debris from your property, particularly from on roofs and in the gutters.

There are a number of things one can do to make your home firewise, and to protect your property from wildfires. Check out www.freshfromflorida.com and click on the Forests & Wildfire button to learn more.

JOIN THE CONVERSATION

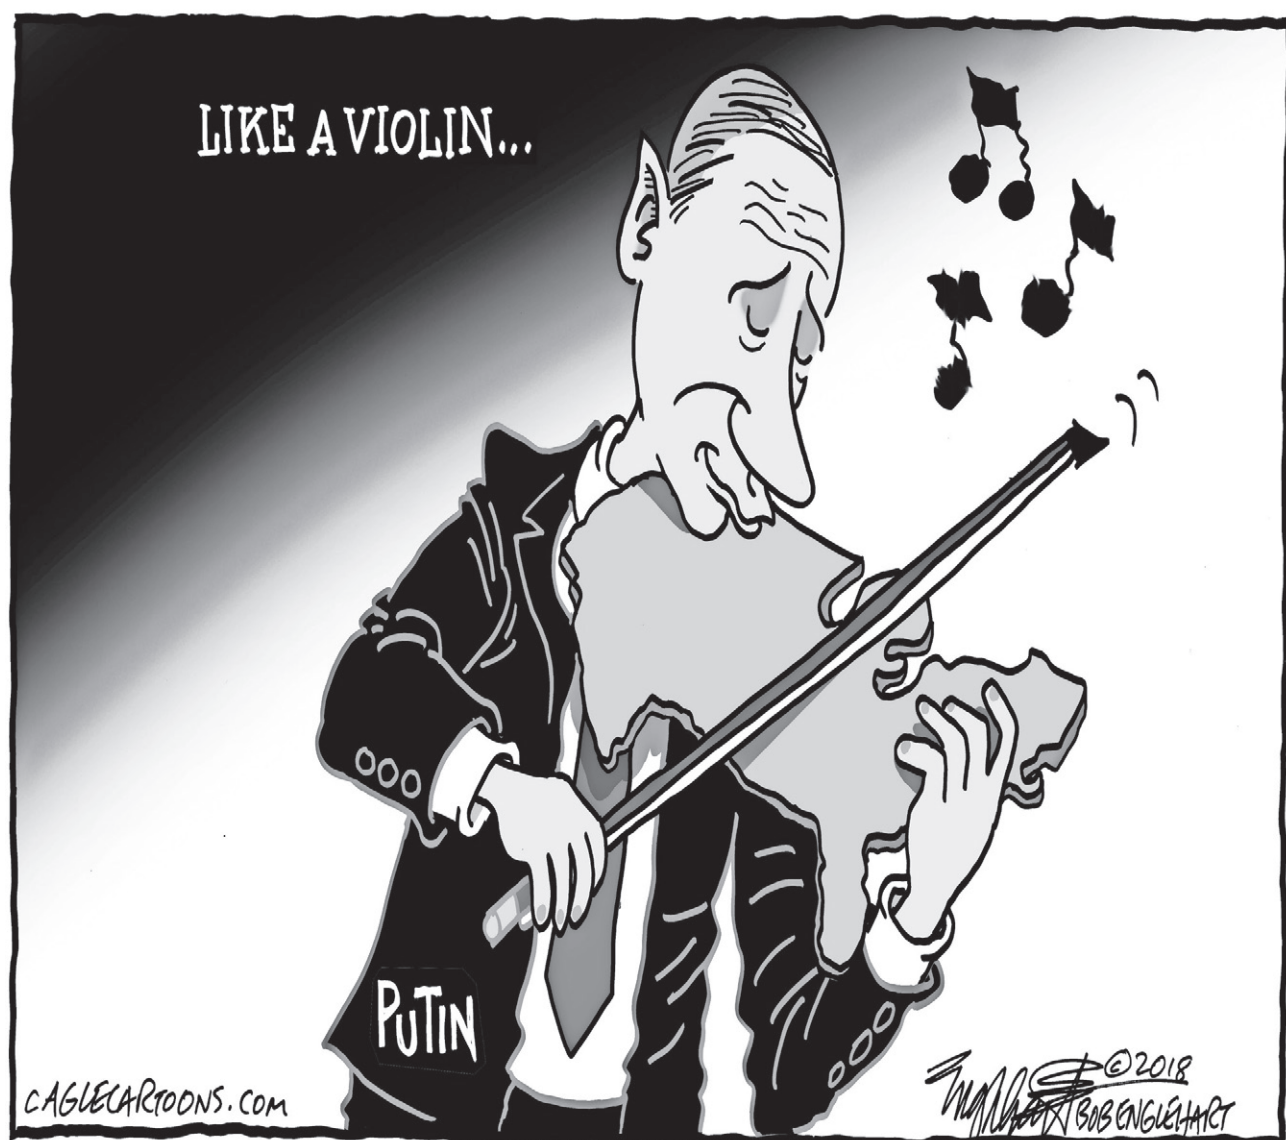

Letters are welcome on virtually any subject, but we do have some rules. We will not accept any Letters to the Editor that mention a business in a negative tone, as they have no means to defend themselves. Please keep Letters to the Editor to less than 250 words. Letters will be edited to length as well as for grammar and spelling. All letters must be signed with full name – not initials. An address and telephone number must be included. The phone number and address are not for publication, but must be provided. In the case of letters that are emailed, the same rules apply.

Due to the number of letters received, we are able to run only four letters per person per month.

The Letters to the Editor section is designed as a public forum for community discourse, and the opinions and statements made in letters are solely those of the individual writers. The newspaper takes no responsibility for the content of these letters.

Please send or bring correspondence to the Highlands News-Sun, Letters to the Editor, 315 US 27 North Sebring, FL 33870, or fax to 863-385-1954. Readers may also email Letters to the Editor to editor@newssun.com.

LIKE A VIOLIN...

Wishing for one more burger

Years ago, if there was a restaurant synonymous with the 12 Hours of Sebring races it was Alex's. The little restaurant was located in one of the Circle-facing storefronts. If you were able to park in front, you were lucky. The Sabos and their sons were the faces who greeted you when you squeezed into their tiny space ... and squeeze you did, because there just weren't better burgers and fries to be found. Not enough tables and chairs occupied this hole in the wall (and I say that most affectionately) to seat everyone, ever. The Sabos kept the food coming and kept the folks moving. Their wait staff were light on their feet, and just the best at what they did.

Anyone who grew up in Sebring will remember that Alex's walls were covered, covered with

WHERE LIFE BLOOMS

Ladonna Rodriguez

race photos. If they raced at Sebring, chances are good that their picture was proudly displayed there. While I never saw a famous race driver dine there, I am quite sure that many did. It was the race restaurant of the day.

The Sabos were a dear couple. Mr. Sabo's white chef hat was matched by his equally white mustache. He always had a twinkle in his eyes,

and I never heard a cross word from him, though with the quantity of food they produced every day for the masses who descended upon them, he surely would have been forgiven that. Mrs. Sabo, as I remember her, was fairly quiet, but she had a sweet smile and a calming effect in all the chaos that comes with a restaurant. Their two sons, Alex Jr. and Jim, could be found helping out as well, but it was Mr. and Mrs. Sabo always at the helm.

How could Alex make a burger taste so good? How did he make those perfect fries? It was a treat to sit on a barstool and watch him create his magic. You could count on taking the aroma with you (on your clothes) when you left, and surely when you got back to work someone would know where you had been and wondered

why you didn't bring something back for them.

The tradition of "mom and pop", of "family" restaurants is something to be cherished. Much blood, sweat and tears, as the saying goes, went into their business. Their success was a tribute to doing it right.

While the Sabos have passed on, including their son, Jim (Alex still lives in South Florida), they are certainly missed and are permanently ingrained in the memories of us all. What we wouldn't give for another lunch at Alex's Restaurant.

Ladonna Paedae Rodriguez is owner of Hobby Hill Florists in Sebring. Columns are the opinion of the writer, not necessarily that of the Highlands News-Sun. Email her at hobbyhill@tnni.net.

Just don't read the strip

I am so sorry some people are offended by "Mallard Fillmore" however I am offended by "Doonesbury." I would never ask that a newspaper discontinue that comic strip but I simply don't read it. Problem solved.

And please don't use the children as an excuse for condemnation of "Mallard Fillmore" unless you speak out against the dirty and disgusting music these same children are exposed to. Also the suggestive TV shows, including those specifically directed towards children, ie cartoons.

Peaceful protest planned

Highlands County Invisibile stand with the courageous students in Parkland. Like them, and like Ronald Reagan, we believe that weapons of war should not be in the hands of civilians. Readers who agree are invited to join us in a peaceful, patriotic protest on March 10, 11 a.m., at the intersection of Kenilworth Blvd

and Sebring Expressway. We have chosen this time and place because vendors will be selling guns in the Highlands County Fairground.

We will gather to make signs on Friday, March 9 at 7 p.m. at La Hacienda, 825 N. Ridgewood, Sebring.

Lois Schlabach
Sebring

Ban the sale of AR-15 style guns

According to the Declaration of Independence, citizens have certain rights among them are the right to life, liberty and the pursuit of happiness. The right to life and happiness were denied to the little children of Sandy Hook, the students of Parkland, the patrons of the night club in Orlando and families that were at concert in Las Vegas. What is more important than the lives of our children and students? Students should be able to go to school without fear. Young people, and families should be able to go entertainment, a concert or church without fear of dying in a spray of bullets. I believe that banning the sale of AR-15 will result in maintaining those rights

of life and liberty for many more people.

Owning guns and hunting were a part of life as I grew up. I am not opposed to sane citizens owning hunting rifles, but the AR 15 style guns are not hunting rifles. These guns are people killing machines. They are designed to kill the maximum number of people in the shortest amount of time. This might be acceptable on the battlefield but not in our schools, churches and entertainment venues. These semi-automatic guns, that can be turned into automatic guns, should not be sold to the general public. Crazy people may still get hold of other guns but the number of people killed would be greatly reduced.

With the modifications (bump stocks, large magazines and special gun powder) the AR-15 can spray out 700 to 1,000 bullets a minute. These high velocity bullets can go through four 2x4s. The bullets can break apart a brick wall. There are many more deaths from wounds of AR-15 because of the velocity of the bullets. The hole of a normal bullet from most handguns is a straight thin line that is about the size of the bullet. There is some bleeding and damage but many of the

shooting victims survive. The organs of victims of high velocity bullets from guns like the AR-15 looked like a "ripe melon smashed by a sledgehammer." These bullets acts like a motor boat; it sends out shock waves as it rockets through the flesh. The death rate for those wounded with high velocity bullets is greatly increased compared to bullets with lower velocity.

Does a ban on semiautomatic guns save lives? Yes! In 1984 to 1994 there were 155 gunfire deaths in mass shootings (more than 6 deaths). In 1994 to 2004, during the semi automatic rifle ban the deaths dropped to 89. After the ban ran out, from 2004 to 2014, the number of semiautomatic deaths jumped to 302.

I know that many people want to protect the right to bear arms, but how about the right to life, liberty and the pursuit of happiness. I believe that we must chose to protect our children, our teachers, and all of our other citizens whether they are in school, church or an entertainment venue. A ban on semiautomatic weapons would be a big step in cutting the number of deaths and severe injuries due to gun fire.

Sidewalks repairs to finish this week

By KIM LEATHERMAN
STAFF WRITER

LAKE PLACID — Walking the sidewalks in the town of Lake Placid will be safer after this week. Several sidewalks are under construction for either curb cuts, ramp slope adjustments, ramp retrofits and extensions.

The sidewalks were identified as weak in areas of Americans with Disabilities Act or identified by Town Council members as being high risk areas for liability.

The sidewalk construction began Monday according to Town Administrator Phil Williams and should be finished sometime this week. One area of concern was the abrupt end to the sidewalk behind the Woman's Club building at 10 N. Main Ave. Council Member Ray Royce had a few complaints of people tripping during the Caladium Festival last summer. He voiced those concerns to Williams and now the sidewalk runs in a continuous pathway to Stuart Avenue, behind the facility.

In Stuart Park, a ramp

A ramp was installed in an existing sidewalk that previously ended abruptly. This is on the northwest corner of Stuart Park.

has been retrofit on the northwest corner of East Park Street and Stuart Avenue and the ramp on the northeast corner of the park complies with ADA standards.

Other areas under the chisel are by the town's schools where cuts were made in the existing concrete sidewalks in order to create a sloped area.

These improvements have been in the works for about a year now.

During the February Town Council meeting, the council gave Williams the green light to start construction.

Williams would like to see a sidewalk run alongside of Waldo Aliff Avenue (previously Eucalyptus Avenue) because it is a popular road that is heavily traveled by foot. It already has grade issues so it will take more engineering and construction to complete.

Council, CRA negotiate over move

By JAY MEISEL
STAFF WRITER

SEBRING — When it comes to the Community Redevelopment Agency moving its office to the downtown Circle, the ball is back in the court of the CRA.

The Sebring City Council on Tuesday night made a counter offer to the CRA's proposal regarding the move.

The CRA, which is currently located in Sebring City Hall, wants to take over the current Chamber of Commerce building so that the CRA would be more visible in the core area of downtown.

The CRA had proposed that in exchange for a \$1 a year lease, the CRA would pay for power, liability and content insurance, phone and internet. The CRA would also reimburse the city for property insurance; pay for water, sewer and garbage expenses; and contribute half the cost to replace the roof, or about \$5,900.

However, the council proposed a \$1-a-year, five-year lease in exchange for the CRA picking up the full cost of the roof for \$11,750. The city would also keep any reimbursement from the Federal Emergency Management Agency for hurricane damage to the roof. The CRA board will consider what the city offered.

Liz Barber, CEO of the Greater Sebring Chamber of Commerce, said that if the chamber continued leasing, the city would have to pay the full cost

Sebring City Council — How They Voted

	Lenard Carlisle	Mark Stewart	Charlie Lowrance	Scott Stanley	Tom Dettman
Voted to not proceed with paving of Hawthorne Drive and to instruct staff to keep road right-of-way closed as it currently is at Simpson Avenue on one end and at Elizabeth Avenue.	YES	YES	YES	YES	YES
Voted to not proceed with paving of 565 feet of Elizabeth Avenue road right-of-way and to instruct staff to keep road right-of-way closed with appropriate barricades at each end of Elizabeth Avenue.	YES	YES	YES	YES	YES
Approved Rockin' 50's Block Party.	YES	YES	YES	YES	YES
Approved Food Truck & Flicks.	YES	YES	YES	YES	YES
Voted to offer the Community Redevelopment Agency a lease for the current downtown Chamber of Commerce building for five years at \$1 a year in exchange for the CRA paying for a new roof for the building. The city would keep any reimbursement from the federal government.	YES	YES	YES	YES	NO
Approved first reading of ordinance amending lien reduction language.	YES	YES	YES	YES	YES
Approved first reading of ordinance regulating non-conforming docks and boathouses.	YES	YES	YES	YES	YES

of the roof.

She urged that any reimbursement money go to the CRA.

But, Councilman Lenard Carlisle said that the city will lose money since the CRA leases its space at City Hall.

The original CRA offer, he said, "doesn't make good business sense for us."

Sebring Police Chief Karl Hoglund said the city could lease the City Hall space to someone else.

When asked if he would like to lease the space, Hoglund replied: "No." "We have to watch the taxpayer's money," Carlisle said.

The offer of the \$1 lease for five years was approved by the City Council. Only Councilman Thomas Dettman opposed it.

In other matters, the council approved on first

reading amending an ordinance so the Code Enforcement Board has more flexibility to offer lien reductions.

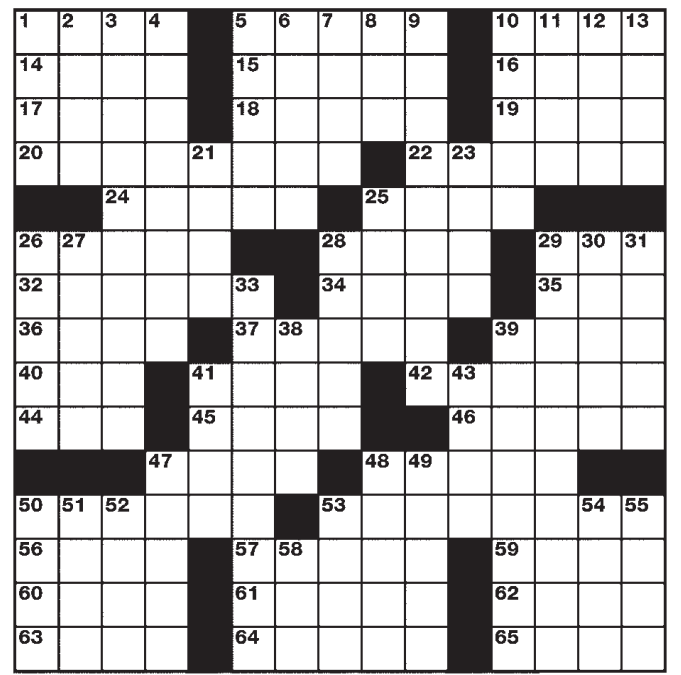

The board, which is most concerned about getting buildings up to code, currently can only offer a code enforcement lien reduction once. A case occurred where one property owner asked for the reduction offer a second time, but the board couldn't comply because of the ordinance.

The council also approved on first reading an ordinance that allows people to rebuild docks and boathouses as the structures were before Hurricane Irma. That includes if the docks and boathouses did not conform to the city's ordinance, which was adopted after many of those docks and boathouses were completed.

DOGS

FROM PAGE 1

approached sooner than he had planned but ran it by Sheriff Paul Blackman, who gave it a green light. Kinslow wanted to make sure that Blackman was on board because of liability issues of pairing an unknown dog with anyone.

The Highlands County inmates are currently feeding the dogs, cleaning out their cages and exercising and socializing them daily. Kinslow said the program will take what they are doing to a new level. The animals

will be going to a state prison in a few weeks.

Deedra Brown is an inmate who works at Animal Services with the dogs.

"It's one of the best jobs that we can have," Brown said. "It is the most fun."

Kinslow explained how the program will work.

"The dogs live in the pods with the inmates," Kinslow said. "They have some restrictions on the prison side, like the dog cannot be in the bed with the inmate, so we have to supply a crate for them. Each pod is a communal area and each inmate has a cell where the dog stays with them.

Each pod can handle up to five dogs. There are three pods, so our goal is 15 dogs."

Kinslow will be starting with five dogs because the program is new. He wants to work out any kinks before committing to 15 dogs. He is in the process of finding a trainer to help the inmates weekly and vetting the dogs that will be chosen for the eight-week course. Aggressive dogs or dogs that are known to bite will not be accepted but there will be no breed discrimination. All of the dogs will be vaccinated, micro chipped and spayed or neutered before going to the inmates.

Animal Services will be funding everything for the food, crates and veterinary services. Fundraisers are being planned. Donations can be dropped off at 7300 Haywood Taylor Blvd. between 8 a.m. and 4:30 p.m. Monday through Friday and 9 a.m. and 1 p.m. on Saturdays.

"The goal is that after 8 weeks, the dogs will be crate trained, have some obedience training, know how to walk on a leash," Kinslow said. "Right now that's just not happening. Many of these dogs are strays and have never even been on a leash."

The animals can be adopted by family members or prison employees; those that are not adopted will receive a certificate of completion and put up for adoption at Animal Services.

The dogs benefit from the training, and the inmates and guards do as well.

"I think that being successful means that you have graduated several classes of dogs," Kinslow said. "On the prison side of it; studies show that when prisoners' minds are working and they

have a mission or a goal, they don't get into as much trouble.

"When they introduce dogs into a pod that may have been having 10 problems a month, the numbers go down to none or maybe one problem a month. The prisoners may learn a new skill like dog training that they didn't have

before," he said.

Kinslow said that working at Animal Services is one of the most popular work jobs and the county inmates have made great progress on the grounds and buildings. Since taking over animal control last April, inmates have painted buildings, spread shell rock on the roads and landscaped. The

only tax payer money used were for items such as gas for the weed whackers, Kinslow said. Of course, they also help with the animals.

Kinslow and staff are proud of the 89 percent adoption rate at the facility. He is hopeful that the adoption rate will be even higher with the Prison Pup Program.

Highlands County Jail inmate Deedra Brown is seen here near the dog cages at Animal Services. She said she enjoys working there.

TIME

FROM PAGE 1

may not bind a future Florida Legislature, even if the United States Congress amends the law, a further action may be required by the Florida Legislature to adopt DST as the year-round standard time in Florida.

If approved by the governor, these provisions take effect July 1, 2018.

American inventor and politician Benjamin Franklin proposed Daylight Saving Time in 1784, but it was more than 100 years until the first country, Germany in 1916, implemented the clock-forward strategy to save fuel.

The U.S. implemented year-round daylight saving time as a fuel-cost-saving measure for four years during World War II. Britain, where it is more commonly called British summer time, did a double and turned clocks two hours ahead during World War II.

To alleviate confusion, particularly with transportation schedules, with the various time changes across the nation, Congress approved the Uniform Time Act of 1966, which designated Daylight Saving Time

MARC VALERO/STAFF

Great storylines for 12 Hours of Sebring

Historic endurance race offers plenty of excitement

Special to Highlands News-Sun

The 66th Mobil 1 Twelve Hours of Sebring Presented by Advance Auto Parts scheduled for Saturday, March 17 features a 43-car IMSA WeatherTech SportsCar Championship entry list. The field includes 16 Prototypes, nine GT Le Mans (GTLM) cars and 18 GT Daytona (GTD) entries.

Live FOX Sports television coverage of the race begins at 10:30 a.m. on FS1 and the

entire race will be streamed live on FOX Sports Go with FS1 authentication. Live IMSA Radio coverage is available on IMSA.com, RadioLeMans.com and via SiriusXM Radio. Tickets are available now at SebringRaceway.com.

This year's Sebring field includes 39 drivers with one previous win in the Twelve Hours. No. 4 Corvette Racing Chevrolet Corvette C7.R driver Oliver Gavin is the winningest active driver with six Sebring wins. His teammate,

Jan Magnussen in the No. 3 Corvette Racing Chevrolet Corvette C7.R is second among active drivers with five career wins. Magnussen will be making his 20th Sebring start this year.

Eleven of the 12 class-winning drivers in the 2017 Twelve Hours are entered for this year's race. Ricky Taylor will drive the No. 7 Acura Team Penske Acura ARX-05 DPi; Jordan Taylor returns in

Red Devils trample Titans

Avonn Park routs Tenoroc in district baseball

By JIM TAYLOR
CORRESPONDENT

AVONN PARK - The Avonn Park Red Devils came out swinging when they faced the Tenoroc Titans on the diamond in a Class 5A-District 10 contest on Tuesday night at Head Field.

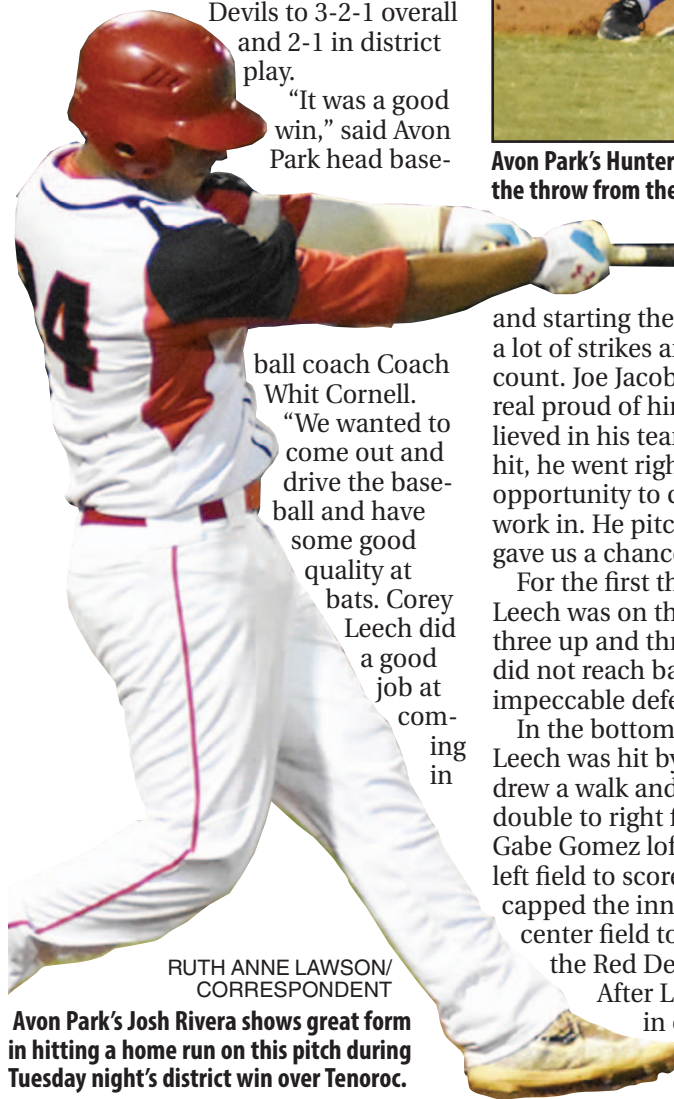

Avonn Park jumped out to an early lead and never looked back in cruising to a 12-1 mercy-rule win in five innings over Tenoroc.

The victory improved the Red Devils to 3-2-1 overall and 2-1 in district play.

"It was a good win," said Avonn Park head base-

Avonn Park's Hunter Vanderpool (17) steals second base as Tenoroc's Jameson Teel can't handle the throw from the catcher during Tuesday night's Class 5A-District 10 game at Head Field.

RUTH ANNE LAWSON/
CORRESPONDENT

Avonn Park's Josh Rivera shows great form in hitting a home run on this pitch during Tuesday night's district win over Tenoroc.

ball coach Coach Whit Cornell. "We wanted to come out and drive the baseball and have some good quality at bats. Corey Leech did a good job at coming in

and starting the game for us. He threw a lot of strikes and got ahead in the count. Joe Jacobson came in and I'm real proud of him. He came in and believed in his team even after giving up a hit, he went right back at it. He took the opportunity to come out and put some work in. He pitched with a lead and gave us a chance to win."

For the first three innings Avonn Park's Leech was on the mound and it was three up and three down. The Titans did not reach base against Avonn Park's impeccable defense.

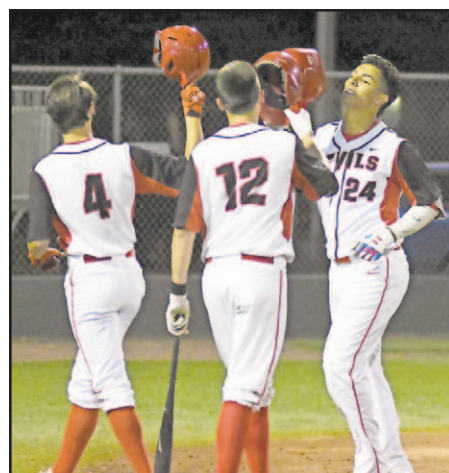

In the bottom of the first inning, Leech was hit by a pitch, Josh Rivera drew a walk and Trent Lewis lined a double to right field to plate Leech, and Gabe Gomez lofted a sacrifice fly to left field to score Rivera. Johnny Perry capped the inning with a single to center field to drive in Lewis to give the Red Devils a quick 3-0 lead.

After Leech retired the Titans in order in the top of the second inning, Avonn Park went back to work

in the bottom half.

Luis Perez reached second base on a Tenoroc infield error, Mason Huertas drew a walk and Leech was hit to load the bases. Rivera stepped to the plate and hit the ball back to the pitcher who dropped the ball and then threw wildly to first base to allow Perez

Browning wins with positive attitude

Veteran angler first in Bassmaster Central Open

Special to Highlands News-Sun

RIDGELAND, Miss. — A never-give-up attitude paid off with the win for Stephen Browning at the Bass Pro Shops Bassmaster Central Open on Ross Barnett Reservoir.

"On most days I only had one fish in the livewell by noon," said Browning of Hot Springs, Ark. "Every day I caught my fifth bass about 10 minutes before having to leave."

"It was very tempting to give up about midway through the day, but that also was the turning point in my mind to stay focused, bear down and grind it out," he said.

The longtime Bassmaster

Elite Series pro also staged a come-from-behind win after rising from fifth place on Saturday. His score after three days of fishing was 15 bass weighing 44 pounds.

Browning stole the lead from Japanese angler Ken Iyobe, who finished second with 42-13. Brad Whatley of Bivins, Texas, took third place with 41-10. Blake Betz of Baton Rouge, La., earned fourth with 40-9. Finishing fifth with 40-7 was Luke Palmer of Coalgate, Okla.

Browning's hot spot was a dense growth of eelgrass on a large spawning flat, he said.

"The key was marking those very thick spots of grass on my GPS and then grinding it out until the fish moved in," he explained. "It was the largest spawning flat

JAMES OVERSTREET PHOTO

Stephen Browning with his family after winning the Bass Pro Shops Bassmaster Central Open on Ross Barnett Reservoir.

on the lake, so I needed the recall of the GPS to keep me on the spots."

Browning's intent to target prespawn fish was a good

idea. The biological clocks of those bass were ticking, and a move into shallow water

Mezza golf group posts low scores

Special to Highlands News-Sun

Monday's Mezza golf group played at Golf Hammock Country Club and used Pro-Am points.

There were a total of 76 golfers who played. We want to thank everyone for their participation in the round and ask that everyone that would like to play call one of the numbers listed below, if you have not signed up already.

Group A saw George Beringer and Don Brewer with scores of a plus one to tie for first and second place in this group.

Group B had Jim Gulick run away with the win in this group with a plus four score. Les Campbell took second place with a plus one score this week.

Group C saw Mike LaJiness, who has been hanging in the shadows, and pull out in front with a plus one for the win. Dick Woods finished in second place with a minus two.

Group D had Roger Culberson take first place with a plus five score. Second place went to Gary Fivecoat with an even score.

In Group E, Paul Doud took first place with a plus two. Then we had MJ Kloet hot on his heels with a plus one for second place.

Group F had Terry Yandle waltz away in first place with a five plus. Bob Trier was close behind with a plus four for second place.

Group G had a tie for first and second place between Joe Hyzny and Dave Hankinson with scores of plus three.

In Group H, Jack McLaughlin came in first place with a plus four. John Reiss placed second with a plus three.

Group I saw Jim Bilowith finish first with a score of plus two. Roy Clark and Gary Galle tied for second and third place with a score of plus one.

Group J had Danny Riddle with a plus six to smoke his competitors for first place. Ken Spencer scored even for second place in this group.

Group K saw Loretta O'Linn run away with the first place in this group with a score of plus seven. Ellis Noris came in second place with minus two.

In Group L, Larry O'Linn pulled out a plus five for the first place. Second place went to John Bohnert with a plus two score.

Group M saw Jack Bardelli pull the win with a plus three score. Second place was Paul Brown II with a score of plus one.

In Group N, Norm Owers was the big scorer for the day with a plus seven in this group for the win. Paul Skidmore came in second with a great score also but a little shy of the win with a plus five.

Group O saw Jerry Patterson with a great score of plus four for the win, what a great recovery for Jerry! Lagging behind but taking second place was Julie Bohnert with a score of even for the day.

In Group P, Bob Wimmers had an excellent score of seven plus for the win! Elaine Berringer had a great day on the course bringing in a score of five plus for second place.

Group Q saw Ginny McVey take first place with a plus two. Glen Miller lagged behind a little with a minus two

FROM PAGE 9

the 2017 race-winning No. 10 Konica Minolta Cadillac DPi-V.R; the No. 38 Performance Tech Motorsports team that won the Prototype Challenge (PC) class last year returns with the same driver lineup – James French, Kyle Masson and Pato O’Ward – in its new No. 38 ORECA LMP2 Prototype-class entry; the No. 3 Corvette again features Magnussen alongside Antonio Garcia and Mike Rockenfeller; and in the GTD class, Ben Keating and Jeroen Bleekemolen again will share the No. 33 Mercedes-AMG Team Riley Motorsports Mercedes-AMG GT3, while their 2017 co-driver Mario Farnbacher has moved to the No. 93 Michael Shank Racing with Curb-Agajanian Acura NSX GT3. Only Alex Lynn, whose lone WeatherTech Championship start to date came in the overall-winning No. 10 Konica Minolta Cadillac DPi last year, is missing from this year’s Sebring field.

The No. 22 Tequila Patrón ESM Nissan DPi is the only car in the field that has three previous overall Sebring winners in its driver lineup. Season-long teammates Johannes van Overbeek and Pipo Derani previously won overall in 2016, while endurance

Chip Gannasi Racing will be competing with two cars in next week’s 12 Hours of Sebring at Sebring International Raceway.

racing teammate Nicolas Lapierre won overall and in the P1 class with Peugeot in 2011.

There are six cars with complete driver lineups that have at least one class win at Sebring. In addition to the No. 22 Nissan DPi, the No. 38 Performance Tech Motorsports ORECA LMP2 car and the No. 3 Corvette; the No. 54 CORE autosport ORECA LMP2 features a trio of past class winners with two-time PC class winners Jon Bennett and Colin Braun and 2008 P2 and overall winner Romain Dumas. Other complete driver lineups made up of previous class winners include the No. 4 Corvette of six-time winner Gavin and two-time Sebring winners Tommy Milner and Marcel Fassler; and the No. 66 Ford Chip Ganassi Racing Ford GT with three-time Sebring winner Dirk Mueller and two-time winners Joey Hand and Sebastien Bourdais.

Bill Auberlen, driver of the No. 25 BMW Team RLL BMW M8 GTLM, will be making his 25th

Sebring start this year, the most of any active driver. He has three previous Sebring class victories.

Corvette Racing is the winningest active team in this year’s Twelve Hours with 11 Sebring victories, including the last three consecutive GTLM races. If the team wins its fourth consecutive Twelve Hours this year, it will match its previous-best run of four-straight GTS class wins from 2006 through 2009.

Two storied sports car programs returning to Sebring this year after sitting out the past several years are each looking for their fifth victories in the Twelve Hours. They also both won in their most recent Sebring races. Joest Racing – which now fields the two-car Mazda Team Joest program – last competed at Sebring in 2013. Two of the team’s three winning drivers that year, Fassler and Oliver Jarvis, who will drive the No. 77 Mazda DPi, are competing in this year’s race. Penske Racing will field a two-car Acura Team.

DEVILS

FROM PAGE 9

and Huertas to score. Leech ripped a single to center field to score two more runs to make it 7-0.

Tenoroc had no luck against Leech in the top of the third inning.

Avon Park went back on the attack in the bottom of the frame as Perez walked, Huertas reached on an error and Leech stroked an RBI single.

A run scored on another error and Rivera stepped to the plate and hammered the ball over the left-field wall for a two-run homer extending the Devils’ lead to 11-0.

Avon Park brought in Joe Jacobson in relief of Leech in the fourth inning.

Jacobson did a solid job on the mound only allowing one run on a solo home run by Tyler Gunter to put the Titans on the scoreboard.

Avon Park struck again in the bottom of inning as Zach Thomas reached on an infield hit, Xavier Holdman singled to left field and Jorge Martinez lined a single up the middle to load the bases.

Abe Cervera hit a sacrifice fly to score Thomas to make it 12-1. Avon Park’s Jacobson got the final three outs he needed in the top of the fifth to put the mercy rule into effect.

“It’s good to see these guys maturing and we are going to keep working them hard and hopefully good things will happen,” Cornell said. “I thought as a team they did a really good job. A lot of the guys gave us good quality at bats and we have been preaching

RUTH ANNE LAWSON/CORRESPONDENT

Avon Park’s Corey Leech allowed no hits in three innings of work to earn the win against Tenoroc on Tuesday night.

that.

Trent Lewis drove the ball that got us going. Some of these guys have not gotten as much playing time. We have a good solid team and what strikes me most about this team is that the guys that are not on the field are rooting for them and encouraging the team. The thing that made me most proud tonight was how we progressed as being good teammates and making the players around us play better than they should play and not how we are playing individually.”

Avon Park has the desire to improve.

“I think it was a good game,” said Red Devil catcher Dalton Whitman. “We had a good team effort. We had a lot of guys come off the bench that don’t always get an opportunity to play and

they got to help out the team today. I think we have a better team than we did last season. I think we get better each year and the team chemistry gets better. I think we have a lot of guys that can make big plays this year. The past four years have been fun.

I have been able to play a different position each year and meet new players and new coaches every year. I have learned a lot, not just about baseball but life lessons also, like how to be a leader. This season I want to go farther in the playoffs and I want the other players to look up to me as a senior and I want to set an example for the younger players.”

Avon Park played county rival Lake Placid on Thursday night. Results were not available at press time.

for second place.

In Group R, Boots Callahan walked away with the first place with a plus five. Great round Boots! Jack Hazelwood tried to close the gap with a plus one for the second place.

Group S had Bill McShane playing well

with a plus three for the first place. Jim Reed was close behind with a plus one for second place.

The Mezza Group also plays on Wednesday and Friday mornings at the Harder Hall Country Club with tee times of 9 a.m. and 8 a.m. respectfully each day.

If interested in playing with one of our groups call one of the individuals below or the Harder Hall Country Club. We

are at Golf Hammock on Monday with a 7:45 a.m. shotgun start. Come join the fun! This is a great way to meet other golfers in the area.

Newcomers are welcome! For more information, call Joe Hyzny at 863-318-7960 or Julie Bohnert at 812-887-1267.

Our Luncheon will be at Homer’s at 2 p.m. on March 26th. Players that have played ten times or more will be reimbursed.

FISH

FROM PAGE 9

to spawn came next. Spawning bass tend to weigh heavier, making his decision even better.

“Prespawn fish also tend to be eager to bite, more aggressive,” he continued. “They are more committed to moving shallow, and rarely do they completely shut down when bad weather comes through an area.”

Browning used a 3/8-ounce Z Man ChatterBait Jack Hammer, with 4-inch Z Man DieZel MinnowZ trailer. He chose black/blue for the morning bite and switched to white during the afternoon.

The lures used by Iyobe were key with keeping him in contention to win. He started the tournament using a 1/2-ounce homemade jig to coax slow biters. When the fish turned on, he switched to crankbaits of his own design marketed by Shimano Japan. The Bantam Macbeth diver and Shimano Bantam Rattlin Sur-Vibe lipless crankbait were the choices.

Iyobe flipped the jig to isolated shoreline cover, while a fast retrieve with the diving crankbait worked for prespawn fish moving into shallow water. The vibrating action of the lipless crankbait produced strikes at mid-depth ranges. He rotated through four areas using the same lures.

“On Thursday the bite slowed and the fish stayed close to the brushpiles on the

shoreline,” he said. “The crankbaits worked best on riprap warmed by the sunshine.”

Browning’s winnings included cash and a Triton Tr19 with Mercury Outboard and factory accessories worth nearly \$50,000. He also advances to the 2018 Bass Pro Shops Bassmaster Opens Championship, Oct. 18-20, at a location yet to be announced.

Co-angler Justin Leet won the co-angler division with a total weight of 26-11. The Memphis, Tenn., angler did so in his first Bassmaster Open. Prior experience on the lake influenced his decision to use a bladed jig. Coincidentally, that lure was popular among the top pro anglers.

“I knew coming into the tournament that lure would give me the best shot, especially after learning the grass was

already coming up,” he said.

Quentin Cappo of Prairieville, La., earned the Phoenix Boats Big Bass Award of \$750 in the pro division by catching a largemouth weighing 8-6 on Friday. That same day Ronald Robbs of Ironton, Mo., caught a largemouth weighing 7-1 to win the Phoenix Boats Big Bass Award worth \$250 in the co-angler division.

Cappo also earned the Power-Pole Captain’s Cash Award of \$500 on the pro side for being the highest-placing angler who is registered and eligible and uses a client-approved product on his boat.

The next Central Open is April 19-21 at Muskogee, Okla., on the Arkansas River. The 2018 Opens season features four events apiece in the Central and Eastern divisions.

Saltwater fishing clinics are for everyone

COURTESY PHOTO

Bob and Shelly Stowe of Jupiter loved their saltwater fishing clinic.

FLORIDA FISH WILDLIFE

Bob and Shelly Stowe of Jupiter, knew plenty about freshwater fishing from their years living in Michigan, but when it came to saltwater fishing, they weren't quite sure where to start.

That's when they found out about a local Family Saltwater Fishing Clinic being hosted by the Florida Fish and Wildlife Conservation Commission (FWC).

"We had no experience with saltwater fishing," said Shelly Stowe. "That class was so complete. It was A++. I learned how to set up a pole, how to unhook

a fish from the line, how to cast correctly and how to bait a hook. Every single person involved in teaching that class was so friendly, helpful and knowledgeable that if they had it again, we'd take it again."

The FWC hosts fishing clinics for everybody. For years we've hosted kids' and women's fishing clinics across the state, and in 2017, we added adult saltwater fishing clinics.

These free, one-day educational events are for anyone 18 and older, male or female. After all, who doesn't want to learn how to saltwater fish?

Participants learn everything they need to know to fish on

their own while conserving Florida's marine resources, from knot tying and fishing tackle to conservation efforts and marine habitats.

Need one-on-one attention? Clinic class sizes are kept small in an effort to implement a structured hands-on approach. Local professionals also participate, providing local knowledge -- a resource every angler needs.

At the end of the day, you'll also get to try catch-and-release fishing firsthand. Bring your own gear or FWC will provide some for the day. And

A refueling tanker takes off.

Most of us while driving our cars and trucks will keep an eye on the gauge that tells us how much fuel we have in our tanks. Airplanes also have multiple gauges monitoring fuel levels in multiple fuel tanks, most commonly a left and right-wing fuel tanks. Some aircraft have additional tanks that the pilots need to keep track of, not only to determine how much fuel, or time in the air remains, but fuel adds weight. As fuel is burned, the weight is reduced, and if the fuel flow is not balanced between the tanks, the plane's center-of-gravity will be out of balance possibly causing the to be hard to control.

So, when see our fuel level in our land vehicles get low, we look for the lowest price, and /or our favorite brand. In an aircraft, you plan your fuel burn for your flight and determine if there will be fuel available at airports along your route. Modern GPS units for our cars and aircraft will let us know where fuel is available and some even indicated the price per gallon. We have come a long way with technology.

Our military aircraft have different needs. For example, the B-2 stealth bomber is based in the center of the continental United States at Whiteman AFB in Missouri but is sent on missions all over the world. It carries large quantities of fuel and has very efficient engines, but they are not that good. Fighters that are sent overseas don't have large enough fuel tanks to give the range to make it over the ocean. How does that happen? Air to air refueling.

It is a dangerous and serious procedure accomplished by highly trained professionals, and it has been going on for over 70 years. The U.S. Airforce has air refueling "wings", but a great majority of the refueling missions are flown by U.S. Air Force reserve units.

The Air Force Reserve is celebrating its 70th anniversary at EAA AirVenture Oshkosh 2018, bringing part of its impressive fleet of military refueling aircraft as part of AirVenture's "Year of the Tanker." The 66th annual Experimental Aircraft Association fly-in convention is July 23-29 at Wittman Regional Airport in Oshkosh, Wisconsin.

The Air Force Reserve Command, which encompasses nearly 70,000 Citizen Airmen, will bring operational aircraft to Oshkosh in 2018 and

FLIGHT | 4

Music from science at Okeechobee festival

ARCHBOLD BIOLOGICAL STATION

Last weekend Archbold Biological Station had a wonderful opportunity to participate in the Okeechobee Music Festival, now one of the top destination music festivals in the state.

Okeechobee estimated about 35,000 music lovers from around the world descended on the beautiful Sunshine Grove Ranch, about twenty miles north-east of Okeechobee.

The four-day festival featured a diverse array of headliner music and also promoted the "collection of communities brought together to create a neighborhood, nourishing the mind, body and spirit and inspiring creativity,

community, and connectedness."

Archbold Biological Station was one of eleven non-profits invited by the sponsor Soundslinger, to share our work for the regional community with festival-goers.

All the non-profits, ranging from Archbold to the Humane Society of the Treasure Coast, Big Brothers and Big Sisters of Okeechobee County, Martha's House, and others, set up our booths in a special non-profit area known as Participation Row.

Dustin Angell, Archbold's Education Coordinator said, "We have taken the Archbold booth to many festivals before but this time we had a very different approach. We decided to feature 'Music

from Science' to attract people to our booth with music. It worked! Everyone including Archbold staff, students, and our visitors had an authentic experience together. We inspired our visitors to join our drum circle gathered around a table made from the cross section of an ancient pine tree. The relaxed musical setting gave us a chance to introduce the concept of creating music from 'data rhythms': for example the years of fast growth verses slow growth captured in tree rings over the decades. Angell added, "Visitors also really loved our video clip of the TED talk given by Dr. Evelyn Gaiser, from Florida

Help nesting sea turtles

Keep beaches dark, free of obstacles at night

FLORIDA FISH WILDLIFE

Keeping beaches dark at night and free of obstacles will help sea turtles during their nesting season, which begins in Florida on March 1 and lasts through the end of October.

Bright artificial lighting can misdirect and disturb nesting sea turtles and their hatchlings, so beachgoers should avoid using flashlights or cellphones at night. Turning out lights or closing curtains and shades in buildings along the beach after dark will ensure nesting turtles are not disturbed as they come ashore and hatchlings will not become disoriented when they emerge from their nests. Clearing away boats and beach furniture at the end of the day and filling in holes in the sand are also important because turtles can

Loggerhead Marinellife Center PHOTO

Nesting loggerhead sea turtle.

become trapped in furniture and get trapped in holes on the beach.

Florida's beachfront residents and visitors taking these actions will help conserve the loggerhead, leatherback and green sea turtles that nest on the state's

coastlines.

"Keeping Florida's beaches dark and uncluttered at night can help protect sea turtles that return to nest on our beaches," said Dr. Robbin Trindell, who heads the Florida Fish and Wildlife Conservation Commission's

(FWC) sea turtle management program. "Many agency partners, such as nature centers, marine turtle permit holders and local governments, contribute greatly to sea turtle conservation. But caring beachgoers can also make a significant difference in helping nesting and hatchling sea turtles survive."

Exactly when sea turtle nesting season starts depends on where you are in Florida. While it begins in March on the Atlantic coast from Brevard through Broward counties, it starts later in the spring, in late April or May, along the northeast Atlantic, the Keys and Gulf coasts.

Wherever you are, other ways to help sea turtles include properly disposing of fishing line to avoid

TURTLE | 2

CLINIC

FROM PAGE 1

don't forget your recreational saltwater fishing license (unless you are exempt that is).

"We absolutely loved it," said Bob Stowe, who went out fishing with his wife the very next day after the clinic. "I'd recommend it to anybody who wants to learn. They did a top-notch job." So far, the pair have caught and released quite a few catfish and snapper, and even some pompano.

Want to find a fishing clinic near you? Visit our MyFWC.com Calendar for upcoming dates and locations. You can also learn more at MyFWC.com/Education by clicking on "Outdoor Skills."

For women and adult saltwater fishing clinics, you'll need to register in advance, either on the

calendar, or by calling the Division of Marine Fisheries Management Outreach and Education subsection at 850-487-0554 or emailing Heather.Sneed@MyFWC.com.

Already know how to saltwater fish? Help contribute by purchasing fishing equipment, boats, motorboat and small-engine fuel. Funds from these purchases go to the national Wildlife and Sport Fish Restoration Program, which in turn, helps fund these and other Florida fishing education programs.

Have a burning question about marine fisheries regulations or fish handling? Send your questions, photos and fishing tales to Saltwater@MyFWC.com.

Make sure your photo meets our photo requirements by visiting MyFWC.com/Fishing and clicking on "Saltwater Fishing" and "Submit a

Photograph" under "Get Involved." Don't forget to record all of your catches on the iAngler phone app.

Get rewarded by submitting your catches to our Saltwater Angler Recognition Programs at CatchaFloridaMemory.com.

The quarterly Gone Coastal column is one of many ways the FWC Division of Marine Fisheries Management is helping recreational anglers understand complex saltwater regulations and learn more about saltwater fishing opportunities and issues in Florida.

We are also available to answer questions by phone or email anytime, and we would love the opportunity to share information through in-person presentations with recreational or commercial fishing organizations.

People also can donate \$5 and receive an FWC sea turtle decal.

Go to MyFWC.com/SeaTurtle for more information on Florida's sea turtles, and click on "Research," then "Nesting" for more data on sea turtle nesting.

MUSIC

visitors, often well into the night, talking with the public about music, science, and conservation. I was so proud of their ability to connect with this new audience and also glad they had the reward of stepping out to listen to some of their favorite bands during the festival."

Deborah Pollard, Development Director at Archbold, was excited about the new opportunities for Archbold to engage with community. "Watching

attendees enthusiastically participate at our Archbold booth among the non-profits of Participation Row was so rewarding. Our booth was very well-aligned with the image of the festival: sustainability, love of environment, beautiful music, and joy. After a very long weekend, the overall comradery and outreach into the community was well worth the effort." Archbold hopes to be invited to attend the Okeechobee MusicFestival again.

Strength training important to improve women's health

METRO CREATIVE SERVICES

Women's bodies are built different from men's to accommodate the changes of pregnancy and childbirth. Although women may store fat differently and have less muscle mass than men, it's still important that women include weight resistance training in their exercise routines.

Lifting weights is an important part of staying fit. Yet many women do not pick up weights out of fear of bulking up and gaining weight. In a 2011 opinion poll conducted by the U.S. Centers for Disease Control and Prevention, less than 20 percent of women said they accomplished the CDC's recommended 2.5 hours of aerobic exercise and two periods of strength training each week.

Contrary to popular belief, women who weight train will not turn into the bulking behemoths of competitive weight lifting. The Women's Heart Foundation says that high levels of estrogen make it quite difficult for women to become overly muscular. When they strength train, rather, women's muscles will improve in tone, endurance and strength instead of size.

Resistance training provides an efficient way to build strength and burn calories. A study from researchers at the University of New Mexico found that the body will

METRO CREATIVE SERVICES

Women need strength training to stay in the best possible shape.

take between 15 minutes and 48 hours after exercise to return to a resting state. That means that a person continues to burn calories after exercising, a phenomenon known as after-burn or excess post-exercise oxygen consumption. The more intense the workout, the longer the after-burn may last.

Studies performed at the Quincy, Mass., South Shore YMCA found that the average woman who strength trains two to three times a week for two months will gain nearly two pounds of muscle, but lose 3.5

pounds of fat. With that lean muscle addition, resting metabolism increases and more calories can be burned each day.

The following are some additional benefits of strength training.

- Reduces risk of heart disease by lowering LDL cholesterol and increasing HDL cholesterol.

- Builds stronger muscles and connective tissues that can increase joint stability.

- Improves the way the body processes sugar, which can help reduce the risk of diabetes.

- Reduces rates of depression.

participate in a unique display showcasing the past, present, and future of tanker aircraft.

"We are honored that the Air Force Reserve will mark its 70th anniversary at Oshkosh, as it is a perfect place to showcase the Reserve's aircraft and Citizen Airmen," said Rick Larsen, EAA's vice president of communities and member programs, who coordinates AirVenture features and attractions. "Its presence will make the 'Year of the Tanker' possible, but it will feature other aircraft and programs during the week."

Air Force Reserve Command aircraft will participate in the daily air shows at AirVenture 2018 and be displayed on Boeing Plaza throughout the week. Reserve Citizen Airmen will also participate in WomenVenture, creating opportunities for all to meet and connect in an event designed to encourage and inspire the next generation of women in aviation. In addition, there will be special forums and

programs highlighting the Reserve's mission around the world in support of military and humanitarian operations.

"The 70th anniversary of the Air Force Reserve is a superb time to tell the story of our Citizen Airmen who provide a tremendous amount of operational experience to the Air Force mission and for aviation fans, there's no better place to demonstrate that than at Oshkosh," said Lt. Gen. Maryanne Miller, Chief of Air Force Reserve, Headquarters U.S. Air Force, Washington, D.C., and Commander of Air Force Reserve Command, Robins Air Force Base, Georgia. "Innovation is in our DNA, and it comes from the diverse experience our Reserve Citizen Airmen bring to the mission from various communities across the nation."

Aerial refueling has many things that must go right in a variety of conditions. Night flights in bad weather or refueling over the ocean will challenge any pilot and can cause a serious "pucker factor" when fuel needs to be taken on now or the flight will end as the tanks run dry.

The two aircraft will have to match their speed, and in the case of a large tanker, a crew member in the rear of the tanker looks out a window, and then "flies" the boom down to the aircraft to be refueled.

The extended boom has fins attached to help maneuver the fuel nozzle into the receptacle on the aircraft. Some aircraft have the receptacle behind the pilot and the boom operator needs to maneuver the boom to the receptacle. As fuel is transferred, the weight of the plane being refueled will increase and the pilot needs to adjust the throttle to keep the plane in position. It is quite a neat aerial dance done by very skilled professionals.

Our EAA 1240 monthly pancake breakfast is tomorrow, so come and join the fun at the Sebring Airport, through gate 24. Of special note. Our April breakfast will be moved up one week, on April 7th, due to the Sun-N-Fun airshow in Lakeland. So, mark your calendars. For more information, contact John Rousch at jhr@stratemail.net, call or text 863-273-0522.

Strategies to protect coral reefs

FLORIDA FISH WILDLIFE

A Coral Reef is an epibenthic community; a concentrated topographic complex of massive corals and other sessile organisms (algae, bryozoans) that build calcium carbonate (limestone) skeletons. The structural complexity provides habitat for a highly diverse flora and fauna that live all or portions of their lives on Coral Reefs.

Two major Coral Reef types are recognized: patch reefs and offshore bank reefs. Bank Reefs are further defined by zones (e.g., reef flat, spur and groove).

The types of Coral Reefs found off the coast of Florida include the shallow-wave resistant reefs in the region from Dry Tortugas to Martin County; deeper (30-130 ft; 10-40 m) reefs in the same region; the Oculina Banks seaward of Palm

Beach to Vero Beach. Deep water (165-265 ft; 50-80 m) structures such as Pulley Ridge and the Florida Middle Grounds occur along the west Florida shelf break in federal waters.

What is being done to conserve Coral Reefs?

Florida's Wildlife Legacy Initiative recently funded a coral reef mapping project through the State Wildlife Grants Program. Dr. Brian Walker from the National Coral Reef Institute at Nova Southeastern University, in partnership with the Florida Department of Environmental Protection and the Fish and Wildlife Research Institute, will characterize and determine the extent of coral reefs in Southeast Florida.

Little data, and thus limited knowledge, exists about the reef resources of Martin County.

To fully understand and manage these benthic resources, it is important

to map the marine benthic habitats and to characterize and quantify the distribution of the coral and other benthic communities.

In December 2008, scientists began by conducting a high-resolution Light Detection and Ranging (LIDAR) bathymetric survey to image the sea floor.

The next step, habitat mapping, will outline and define the features within the survey area. The final phase will map the densities of organisms within the features.

This project will create maps that will provide critical information scientists need to understand the extent of the coral reef habitat throughout Martin County and Southeast Florida.

They will enable managers to enforce impact-avoidance and assist in developing strategies to conserve reef resources for future generations.

Florida offers great quality of life

FLORIDA FISH WILDLIFE

“Quality of life” generally refers to the degree of well-being felt by an individual or group. Unlike standard of living, which is a basic economic measure, quality of life is difficult to measure directly. It typically is viewed as having a physical and psychological component.

The physical aspect includes health, diet, protection against pain and disease. The

psychological component includes such things as stress, worry, pleasure and other emotional states.

Social researchers assume with some confidence that a higher average level of diet, shelter, safety, personal freedoms and rights a general population has, the better overall quality of life will exist.

Moreover, the quality of their environment clearly impacts both aspects as issues such

as water and air quality directly affect health, and the aesthetics and recreational values associated with the outdoor environment clearly impact psychological well-being.

Leadership Florida concluded their second annual Sunshine State Survey in November 2007 and reflected that most Floridians feel their quality of life is slipping. 43 percent of Floridians feel the quality of life has declined in the past five years. The results

represent a 7-percent increase over the 2006 survey findings.

The trend looks to continue as 37 percent of Floridians imagine Florida becoming a worse place to live over the next year, - with only 24 percent saying they think it will get better. Focusing on conservation of our natural resources; therefore, is fundamental to improving the quality of life for our citizens and visitors.

A 2005 Survey by

Responsive Management documented the public perception that water quality/pollution (22 percent) was the top-named fish and wildlife issue facing Florida, followed closely by habitat loss (17 percent) and urban sprawl (15 percent).

Moreover, respondents were read six statements about land use and wildlife management and asked if they agreed or disagreed with them. The statement with the highest percentage in

agreement was that the use and development of land should be restricted to protect fish and wildlife, with which 87 percent agreed.

The other two statements with which a majority agreed were that hunting and fishing are part of the scientific management of fish and wildlife populations (71 percent agreed) and that the respondent can make a significant difference in conserving fish and wildlife habitat (64 percent).

Raising backyard chickens offers family bonding

Can be educational as well for the family to learn from

Special to Highlands News-Sun

Sebring – Backyard poultry ownership is a growing phenomenon in recent years as Americans have taken control over their family meals with an all-natural, homegrown food source. Now experts say more and more people are making the jump into backyard poultry for an added benefit: family time.

Raising poultry is the perfect activity to promote bonding and interactive educational experiences for the entire family. “I’ve been raising chicks with my family for the past year, and I can already see the benefits it’s instilling beyond our backyard—just like what I repeatedly hear from our customers,” said Neely Green, a mother of three and Tractor Supply Company’s national marketing manager.

“In addition to creating opportunities for our family to have fun, unplugged time together, this experience has taught us important lessons in responsibility, reaping the rewards of

hard work, and how to eat well and live sustainably.”

To help families get started raising poultry, Tractor Supply is hosting Chick Days at stores nationwide, including the Sebring location, through April 29.

The 10-week spring-time event features live baby chicks and ducklings along with the supplies and expertise needed to begin or grow a backyard flock.

“As parents, it’s our job to teach our children personal responsibility and healthy behaviors,” said Green. “Raising backyard poultry provides parents with so many teachable moments, like collecting the eggs, caring for live animals and proper handling guidelines—including the importance of washing your hands—to ensure the safety of your flock and yourself.”

New this year to Chick Days, families can get started with backyard poultry by purchasing a minimum of four chicks in select states with the flexibility to mix and match with ducklings. In addition to purchasing chicks and ducklings

on-site, the event features a one-stop shop for all the items needed to begin the process, including starter kits, feed, bedding, heat bulbs and lamps, coops, and more, along with the guidance of expert Tractor Supply team members.

Outside of Chick Days, Tractor Supply stores are stocked year-round with the items needed to properly raise and care for backyard poultry. Enthusiasts can visit TractorSupply.com/Poultry for an expanded selection and year-round availability of poultry products and live birds.

Visit TractorSupply.com/Chicks for expert information on safe handling and care for poultry, building a chicken coop, and more. Backyard poultry rules and regulations vary by city, county and state, so check with your local government before purchasing. Learn more about in-store chick and duckling arrivals by following Tractor Supply on Facebook or visiting your local store, which you can find at www.TractorSupply.com/StoreLocal.

Dog ownership – the rewards of winning!

By SUZANNE SIGMUND
SPECIAL TO HIGHLANDS NEWS-SUN

Have you ever had the joy of earning a special achievement or winning something that was beyond your expectations? Or what about a parental experience while watching one of your children excel in a sporting event or earning their position on the school’s honor roll? The win can be quite rewarding!

That broad range of emotions is pretty much the same when your dog wins first place in a competition. After attending numerous training classes and practicing and practicing at home, it is an ecstatic and confident feeling when the judge calls out your name or your number for first place. Long hours on the grooming table and time waiting for the big waltz around the ring takes a level of patience and willingness that not every dog has.

Heartland Dog Club members Linda Pheasant and Kathy Rose have experienced that wonderful thrill of victory when showing their dogs in various shows.

Linda’s furry friend is a 2-year-old Kerry Blue Terrier named Charm.

COURTESY PHOTO

Charm the award-winning dog.

Linda says her secret for success has been “dedication to the breed and having a dog that is specimen of the Kerry Blue Standard.” Linda remembers her first big win and describes it as “so exciting and rewarding for the hard work the dog and I accomplished together.” Over the years she has won with her Kerries 3 Championships and a Grand Championship. In the 2018 Clearwater Kennel Club Show, Charm won Winners Bitch (major win) and an Award of Merit at the Central Florida Kerry Blue Terrier Specialty.

Kathy’s best friend is 7-year-old Rascal, who is an Australian Shepherd. In addition to Rascal’s training, his calm and polite demeanor have benefited Kathy in classes such as obedience,

agility and rally. Kathy attributes her success to “patience, lots of practice, a strong bond and of course luck.” She describes her emotions when she won her first blue ribbon as being in St. Petersburg at an agility trial and being “surprised and thrilled.” Over the past several years Rascal has won many first and second place ribbons in agility with Canine Performance Events (CPE).

Mark your calendars for upcoming training with the Heartland Dog Club: March 20th AKC Trick Dog Training and March 22, AKC Obedience. Both trainings will begin at 6:00 PM and will take place at the Sun N Lake Elementary School. Start to work on your future rewards. It is a great way to bond with your furry 4-legged friends.

Worm Farming Composting Workshop

Special to Highlands News-Sun

The UF/IFAS Extension, Highlands County, is offering a class on composting with earthworms at the Bert J. Harris Agricultural Center in Sebring. The event will be Thursday March 15th from 6 p.m. until 8 p.m.

Master Gardener Peggy Davis has been a sporadic worm farmer in both Maine and Florida for several years. In this class she (and the worms who will accompany her) will demonstrate the way that worms are part of an intricate ecosystem which results in the transformation of food wastes into super fertile soil which can enhance the our sandy.

Peggy will show a variety of worm growing habitats.

To sign up for the workshop go to <https://hcagtours2018.eventbrite.com> or call the Extension office at

(863) 402-6540. There will be a \$5 charge for the workshop at the door. Also check out our other Eventbrite offerings including our South Ag Tour and Florida-Friendly Talk and Tour coming up the following week.

NOTICE OF MEETING 26

NOTICE OF REGULAR MEETING
Notice is hereby given that the School Board of Highlands County, Florida will hold a Regular School Board Meeting on March 27, 2018. The meeting will be held at 5:30 p.m., or as soon thereafter as may be practicable, in the Garland Boggus Board Room, 426 School Street, Sebring, Florida. All interested persons are invited to attend.

If a person intends to appeal the Board's decision with respect to any matter, or has any thought that an appeal may be taken, the person has the responsibility to ensure that a verbatim (word for word) record of the proceeding is made and that the record includes all testimony and evidence upon which an appeal is to be based.

The School Board of Highlands County, Florida does not discriminate upon the basis of any individual's disability status. This non-discrimination policy involves every aspect of the Board's functions, including one's access to, participation, employment or treatment in its programs or activities. Anyone requiring reasonable accommodation in order to attend the School Board Meeting please call 471-5565 not later than three days before the meeting.

HELP WANTED 2001

Wayne County Blueberry Growers Association-Name and location of each member of the association can be obtained from the SWA of the states of MS, AL, FL, and LA. 19 temporary workers needed in Wayne and Covington counties in MS and Washington & Mobile counties in AL from approximately 5/1/2018 - 7/4/2018. Foremen needed to drive Mechanical Pickers. Must be bilingual, speak fluid English and Spanish, and have a valid driver's license. May also drive workers to grocery store. 3 months commercial experience on a licensed farm needed for planting, harvesting, packing blueberries, and driving Mechanical Picker. All work tools, supplies & equipment will be provided at no cost to the worker. Workers will manually plant, cultivate, harvest, process and pot, blueberry plants. Wash hands before entering work areas as detailed by government regulations. Obey all farm rules posted on farm. Jobs may include: Loading fruit lugs on Mechanical Picker, monitoring the lugs, pick debris out lugs, lift and stack filled lugs into stack until picked up by ATV. May take buckets to field to pick fruit. Place carefully in bucket; place a top cover over tem to get them ready for transporting. Transport to processing facility unload and place on pallets. May pick sort and package blueberries in the field. May use wind tunnel, packing machine, or hand pack fruit for process. Loading containers of culled fruit for removal, build boxes for packing clam shells, vacuum, sweep, mop, pressure wash, sanitize, (clean/sanitize processing facility and equipment) Unload Processing Facility packing materials (clam shells, boxes & etc.) Pressure wash (clean) lugs/buckets and processing line equipment. Pick up trash/debris around Farm/Housing/ Fields. Inspect and Prune Fruit bushes and remove wood debris from field. Pull grass, weeds, mow grass, trim, spread mulch around plants, and disperse fertilizer in fields. Operate and inspect field irrigation systems, repair and replace as needed. May construct and repair trellises, farm fences, buildings replace damaged posts using wire stretchers, hammers, paint, brushes, etc. Clean, adjust and repair machinery and implements. The majority of the day is spent on one's feet and outdoors and involves exposure to all weather conditions. Workers must be able to stand, sit, squat, kneel, crouch, bend (from waist), push, pull, reach, lift and carry items from 5 to 60 pounds in the course of performing required activities. Blueberries are perishable and must be picked and packed within a limited time of harvest. Workers should expect periods of little /no work because of weather /crop/other conditions beyond the employers control. We will reimburse the worker for transportation cost (including travel insurance) and subsistence to the place of recruitment upon completion of 50 percent of the contract period. If the employee is unable or unfit to perform the duties listed after the 3 day pre-trial, the employee will receive warnings, hours may be reduced to the minimum allowed in the certified petition or terminated. The company may conduct background checks. A copy of the work contract or a copy of the ETA 790 in lieu of a work contract, and any modifications, will be provided to the worker on or before the day the work commences. Workers performing General Farm Labor will be paid the highest of MS \$10.73 - AL \$10.95 per hr., or applicable piece rates depending on crop activity, 3/4th guarantee, 35 hrs. per week. Housing and transportation provided at no cost to workers who cannot reasonably return to their permanent residence at the end of each workday. We participate in the E-Verify program and workers must have valid identification for I-9 preparation when they begin work. Complete job description can be found at your local SWA/Job Center. Apply for this job at the State Workforce /Job Center office in your area, please call for the nearest office in your area MS 601-584-1202, AL 256-259-1835, LA 318-676-7705, FL 863-385-3672, using job order # MS 249333.

Wild hogs are aplenty in the Sunshine State

FLORIDA FISH WILDLIFE

The wild pig (Sus scrofa), also called the wild hog, wild boar or feral pig, is not a Florida native and may have been introduced by Spanish explorer Hernando DeSoto as early as 1539.

They occur in all of Florida's 67 counties within a wide variety of habitats, but prefer oak-cabbage palm hammocks, freshwater marshes and sloughs and pine flatwoods. Wild pigs can reach weights of more than 150 pounds and be 5-6 feet long. They usually travel in small family groups or alone.

Wild pigs are omnivorous (eating all kinds of foods, both plants and animals) and feed by rooting with their broad snouts. They may

cause disturbance of the soil and ground cover vegetation and leave the area looking like a plowed field.

Trying to prevent wild pigs from coming onto your property is usually futile, but adequate fencing can keep them out of small yards and gardens.

On private property, nuisance pigs may be trapped using pens with trap doors and baited with acorns or old corn. Trapped animals may not be released on public land, and can only be released on private property with landowner permission. See the Florida Department of Agriculture and Consumer Services' Regulations for Transporting Feral Swine External

Hunting

Wild pigs are legally defined as wildlife and are the second-most popular, large animal hunted in Florida (second only to the white-tailed deer).

On private property with landowner permission, wild pigs may be trapped and hunted year round using any legal to own rifle, shotgun, crossbow, bow, pistol or air gun (including

airbow). There is no size or bag limit, and you may harvest either sex. Also, no hunting license is required.

A gun and light at night permit is not required to take wild hogs with a gun and light on private lands with landowner permission.

Florida's Limited Entry/Quota Hunt Programs offer quality public hunting opportunities and prevent overcrowding, while controlling the harvest of game on wildlife management areas.

On wildlife management areas, hogs may be taken during most hunting seasons, except spring turkey. But, if it's during archery season, you must use a bow - during muzzleloading gun season, you can only use a muzzleloader.

You need a management area permit and any other necessary permits to hunt wild pigs during particular seasons on WMAs - where on some, daily bag limits on wild pigs do apply, and on a few, there's even a minimum size limit on what you can take.

On wildlife management areas, you may not use a gun and light at night.

Hobbies for different personality types

METRO CREATIVE SERVICES

Hobbies can provide a welcome respite from the hustle and bustle of everyday life.

Finding the right hobby requires the consideration of a host of factors, including one's own personality.

The following are some common personality types and the hobbies they might find rewarding.

The Athlete

Athletes can pursue a host of potential hobbies or activities that will foster their love of sports. Men and women who still have a hop in their step can sign up to compete in adult sports leagues. Depending on the sport, leagues might be available to adults of various ages and skill levels, and some may even be more focused on fun than competition.

For athletes who can no longer lace up their cleats, coaching youth sports or volunteering to coach at a nearby school provides a chance to stay involved even if competing is no longer possible.

The Reader

Book lovers also can channel their passions for the written word into a rewarding hobby. While reading might not seem like the most social activity, readers who want to use their love of books to grow their social networks can start a book club. People of all ages and backgrounds love to read, so starting a book club can be a great way to meet an array of people.

Readers also can call their local libraries or schools to ask about reading programs for children. Volunteer to read to youngsters, helping the next generation discover the wonders of reading.

The Executive

Men and women who have experienced great success in the world of business can pursue a host of low-stress opportunities with a goal of sharing their experiences with the next generation

of business leaders.

Teaching a course at a local college or university is one such avenue, and executives can even offer to work with high school students interested in pursuing careers in business.

Teaching and mentoring might be less traditional hobbies than crocheting or woodworking, but they still provide a way for adults to pursue their passions away from the constraints of the office.

The Traveler

Men and women who love to travel can begin writing travel blogs where they share stories of their domestic and international travels. Use the blog to offer an insider's insight into certain cities, offering advice on obscure eateries or activities that might be off most tourists radars. Include photos with each blog post to attract more readers.

Roosevelt's WPA had big impact on Highlands County

BY MELISSA MAIN
CORRESPONDENT

SEBRING — What impact do President Franklin D. Roosevelt's programs have on the lives of Highlands County citizen's today? David Schmidt, Roosevelt scholar, answered that question with his presentation at Highland Hammock State Park on Feb. 20 that discussed the legacy of President FDR's Works Progress Administration (WPA), with a special focus on how the WPA impacted Highlands County.

Highlands Hammock State Park, the Civilian Conservation Corps building and the original post office, which has since been converted to the Police Department, were built by local citizens as part of the WPA projects. These projects are still serving Highlands County today. The Civilian Conservation Corps building no longer houses young men working in our state park, but it was turned into a museum that educates people about the history of our country during the 1930s and 1940s.

Approximately 80 years ago, FDR urged Congress

MELISSA MAIN/CORRESPONDENT

From left; Carla Sherwin, from Highlands Hammock State Park, David Schmidt, speaker for the FDR lecture and curator at the CCC Museum, and Alex Buell, program coordinator for the Florida Humanities Council.

to pass the WPA, the largest and most ambitious of the New Deal programs, to provide jobs for unskilled laborers who weren't making enough money to feed their families. People were hungry and desperate for jobs, and FDR decided that people throughout the United States, including Florida, should be given jobs to build post offices and town halls, construct dams and bridges, repair historical sites and buildings, and produce works of art and travel guides. According to Schmidt, some skilled labor was used, but the focus was on providing employment to

chronically unemployed breadwinners.

Young unmarried and unemployed men, from ages 17-28, often worked with the Civilian Conservation Corps and earned \$30 a month. They were housed and fed at the CCC camps. They only kept \$5 a month for spending money. The other \$25 was sent home to feed their families. Schmidt said, "We know that the \$25 sent home from CCC enrollees' pay saved almost 20 million Americans from chronic hunger or starvation."

Each county seat or major city was usually awarded some type of

MELISSA MAIN/CORRESPONDENT

Highlands Hammock State Park participated in the Florida Humanities Speaker Series, and David Schmidt spoke to the crowd about the legacy of President FDR's WPA projects in Florida.

project or improvement for the community. Schmidt stated, "The WPA worked in conjunction with states and local communities, which usually provided 10 to 30 percent of the cost. This came in the form of land, trucks or materials. In 1938, its peak year, the WPA employed 3 million men and women."

Each building project usually had a piece of artwork, such as a mural, carving or sculpture. The Sebring post office had a

mural painted by Charles R. Knight, a nationally-acclaimed artist who specialized in painting dinosaurs and prehistoric animals. He was famous for producing artwork for the American Museum of Natural History, the Smithsonian, the Bronx Zoo, the Lincoln Park Zoo and National Geographic.

The mural he painted for the post office entitled "Prehistoric Life in Florida" was moved and is now displayed at the

Sebring Library. Throughout Florida, there were approximately 156 major WPA projects. The money for the projects came from major reductions in the country's defense budget. However, when the war in Europe began, Congress began decreasing funding for the WPA projects. After Pearl Harbor was attacked, funding stopped for the WPA, but existing projects were finished.

How to become an eco-friendly pet owner

Metro Creative Services

Pets provide much joy to their owners, who are often willing to do whatever it takes in an effort to reciprocate the unconditional love they get from their pets. While toys and treats make pets happy, one of the best things pet owners can do to express their love for their four-legged friends is to make an effort to be more eco-friendly in regard to caring for their furry, finned or feathered friends.

An eco-friendly approach to pet ownership can protect pets health and the planet at the same time. Pet owners may be surprised to learn just how easy it can be to incorporate eco-friendly practices into their pet care routines.

Avoid using pesticides in the yard. The Pesticide Action Network notes that pets can absorb pesticides through their mouths, noses and eyes when walking through lawns and gardens that were treated with pesticides. Powdered pesticides also may stick to pets fur, and dogs may absorb chemical residues

METRO CREATIVE SERVICES

Pets are wonderful as companions.

by chewing or eating plants that were treated with pesticides. Thanks to their grooming habits, cats allowed to roam free in yards may be especially vulnerable to lawns treated with pesticides. When

tending to their lawns, pet owners who want to be more eco-friendly can embrace organic lawn care practices, such as composting and using organic fertilizers.

Be mindful of waste and waste cleanup. The feces of dogs contain bacteria that, if left on lawns and/or walkways, can ultimately find its way into and contaminate bodies of water due to runoff. So it's important that pet owners routinely pick up their pets waste. Biodegradable, plant-based pet waste bags are eco-friendly options that can help reduce the environmental impact of pet waste.

Use natural cleaning solutions when cleaning up after pets indoors. Chemical-based cleaning solutions may be especially effective at cleaning up pet stains and eradicating pet-related odors, but such products can have a negative effect on indoor air quality.

Various consumer advocacy organizations have noted that

chemical-based air fresheners and general purpose cleaners are major sources of volatile organic compounds, or VOCs, which the U.S. Environmental Protection

Agency notes can produce various short- and long-term adverse health effects. When cleaning up after their pets, pet owners should use only chemical-free cleaners

that won't adversely affect indoor air quality. Eco-friendly pet ownership can be simple and protect the lives of pets and their owners.

International Women's Day

PHOTO PROVIDED

McDonald's has temporarily flipped its famous golden arches to look like a "W" — a move it says it made to recognize International Women's Day. The upside-down logo appeared Thursday on the fast-food giant's website and social media accounts. It also flipped the arches at one restaurant in Lynwood, California. McDonald's says that at about 100 of its 14,000 restaurants, packaging and worker uniforms will have the flipped logo. McDonald's also says six out of 10 of its restaurant managers are women and it wanted to honor their accomplishments.

Bones found in 1940 seem to be Amelia Earhart's, study says

By MALCOLM RITTER
AP SCIENCE WRITER

NEW YORK — Bones found in 1940 on a western Pacific Ocean island were quite likely to be remains from famed aviator Amelia Earhart, a new analysis concludes.

The study and other evidence "point toward her rather strongly," University of Tennessee anthropologist Richard Jantz said Thursday.

Earhart disappeared during an attempted flight around the world in 1937, and the search for an answer to what happened to her and her navigator has captivated the public for decades.

Jantz's analysis is the latest chapter in a back-and-forth that has played out about the remains, which were found in 1940 on Nikumaroro Island but are now lost.

All that survive are seven measurements, from the skull and bones of the arm and leg. Those measurements led a scientist in 1941 to conclude the bones belong to a man. In 1998, however, Jantz and another scientist reinterpreted them as coming from a woman of European ancestry, and about Earhart's height. But in 2015, still other researchers concluded the original assessment as a man was correct.

Now Jantz weighs in with another analysis of the measurements, published in January in the journal *Forensic Anthropology*.

For comparison, Jantz used an inseam length and waist circumference from a pair of Earhart's trousers. He also drew on a photo of her holding an oil can to estimate the lengths of two arm bones.

Analysis showed "the bones are consistent with Earhart in all respects we know or can reasonably infer," he wrote in the journal article. It's highly unlikely that a random person would resemble the bones as closely as Earhart, he wrote.

In a phone interview, Jantz noted that some artifacts found on the island also support the possibility that the bones came from Earhart.

"I think we have pretty good evidence that it's her," he said.

Protests, a strike, a Russian's apology

By DAVID CRARY
AP NATIONAL WRITER

A 24-hour strike by millions of Spanish women. A crackdown in France on companies violating gender-equal pay policies. In Russia, a candid apology from a powerful legislator to women he sexually harassed.

Many of the International Women's Day events on Thursday powerfully echoed the #MeToo movement that has mobilized women against sexual violence and workplace harassment.

Demonstrators filled the streets in several Asian cities, including Manila, Seoul and New Delhi. Clad in pink and purple shirts, the activists in Manila lambasted Philippine President Rodrigo Duterte, calling him among the worst violators of women's rights in Asia. Human rights groups have condemned Duterte's sexist remarks, including a suggestion that troops shoot female communist rebels in the genitals.

In Pakistan's largest city, Karachi, a throng of activists was joined by a victim of one of the acid attacks frequently

perpetrated in the country by embittered men. Black glasses covered part of her badly burned face.

Hundreds of women gathered in Afghanistan's capital, Kabul, to commemorate the occasion and urge more progress on women's political rights, education and safety. During Taliban rule, many women would have been afraid to leave their homes.

In Spain, major unions estimated that 5.3 million people joined the strike, which targeted gender violence and unequal pay. The day culminated with street protests in scores of cities. The theme was "If we stop, the world stops."

Social services worker Teresa Sonsur, protesting in Madrid, said she wanted to end workplace discrimination at her agency.

"The women are doing all the hard work, dealing with the customers, but in the positions of management it is always men," the 38-year-old woman said.

French companies that treat women unequally may soon face new pressure and penalties. President Emmanuel Macron says his government is going to

name and shame such companies. He predicted positive changes "because no one wants to be the worst student in the class."

Another government initiative would fine companies with more than 50 employees if there is an "unjustified" gender wage gap.

The left-leaning French daily *Liberation* said that for one day only, men would have to pay 50 cents more than women for the newspaper, a reminder that women in France, on average, are paid 25 percent less than men.

In a striking development in Russia, the head of Parliament's foreign affairs committee apologized after being accused of sexual harassment by several female journalists. Noting it was International Women's Day, Leonid Slutsky said on Facebook, "I am using the occasion to ask forgiveness from those of you whom I freely or involuntarily caused suffering."

The apology came after

North Korean leader invites Trump to meet and Trump has agreed

By BRIAN BENNETT
and TRACY WILKINSON
TRIBUNE WASHINGTON
BUREAU

WASHINGTON — President Donald Trump has accepted an extraordinary invitation by North Korean ruler Kim Jong Un to meet this spring, a senior South Korean official announced at the White House Thursday, signaling a potential diplomatic breakthrough in long-stalled efforts to end the nuclear impasse on the Korean peninsula.

Any face-to-face meeting, if it takes place, would be historic — the first ever between the leaders of two longtime adversaries that fought one bitter war and have repeatedly threatened to fight another.

Chung Eui-yong, South

AP PHOTO

South Korean national security director Chung Eui-yong, center, speaks to reporters at the White House in Washington on Thursday as intelligence chief Suh Hoon, left and Cho Yoon-je, the South Korea ambassador to United States listen.

Korea's national security director, said the North Korean ruler had expressed "his eagerness to meet President Trump as soon as possible" and that Trump had agreed to do so by May.

Chung made the announcement after

briefing Trump's top national security advisers, including national security adviser H.R. McMaster, Defense Secretary James N. Mattis, Director of National Intelligence Dan Coats and Deputy

Trump orders stiff trade tariffs, unswayed by grim warnings

By KEN THOMAS
ASSOCIATED PRESS

WASHINGTON — Unswayed by Republican warnings of a trade war, President Donald Trump ordered steep new tariffs on steel and aluminum imports to the U.S. on Thursday, vowing to fight back against an "assault on our country" by foreign competitors. The president said he would exempt Canada and Mexico as "a special case" while negotiating for changes to the North American Free Trade Agreement.

The new tariffs will take effect in 15 days, with America's neighbors indefinitely spared "to see if we can make the deal," Trump said. He suggested in an earlier meeting with his Cabinet that Australia and "other countries"

AP PHOTO

President Donald Trump holds up a proclamation on aluminum during an event in the Roosevelt Room of the White House in Washington on Thursday. He also signed one for steel.

might be spared, a shift that could soften the international blow amid threats of retaliation by trading partners.

Those "other countries" can try to negotiate their way out of the tariffs, he indicated, by ensuring their trade actions do not

harm America's security.

Surrounded by steel and aluminum workers holding hard hats, Trump cast his action as necessary to protect industries "ravaged by aggressive foreign trade practices. It's really an

Israel, US troops train together to counter missile threats

By JOSEF FEDERMAN
ASSOCIATED PRESS

HATZOR AIR BASE, Israel — If war breaks out in the Middle East, U.S. and Israeli forces are preparing to one day fight alongside one another to defend Israel against missile attacks from across the region.

Nearly 5,000 Israeli and American troops have been training together in Israel for that very scenario. The “Juniper Cobra” exercise includes field training, computer simulations and live-fire drills of sophisticated missile-defense systems. “We will practice, train shoulder to shoulder, the same as we will fight in crisis times,” Brig. Gen. Zvika Haimovich, chief of Israel’s air defense command, told reporters at a briefing at the dusty Hatzor air base in southern Israel.

Israel has made missile defense a priority since

Iraqi leader Saddam Hussein bombarded the country with 39 Scud missiles during the 1991 Gulf War.

Today, the threat is far more formidable. The Lebanese militant group Hezbollah is now believed to possess well over 100,000 rockets and missiles capable of striking virtually anywhere in Israel.

Hezbollah and Iranian forces are also active in neighboring Syria, backing President Bashar Assad. Gaza’s Hamas rulers have a vast arsenal of rockets, and Iran has developed long-range missiles that can reach Israel.

These threats are concrete. Hezbollah rained some 4,000 rockets into Israel during a month-long war in 2006, while Hamas and other militant groups in Gaza have fired thousands of rockets into Israel from the south. Last month, Israel intercepted an Iranian drone

AP PHOTO

Israeli Defense Forces Brig. Gen. Zvika Haimovich, right, and U.S. Maj. Gen. John L. Gronski sign an agreement during a ceremony at the Bishlach Air Base, near Mitzpe Ramon on Sept. 18, 2017.

launched from Syria during a clash that caused an Israeli F-16 warplane to crash, and Israel shot down a Syrian anti-aircraft missile last year.

Haimovich said Juniper Cobra is not aimed at any particular adversary. Instead, it is meant to simulate “very complex scenarios” that include simultaneous attacks from

enemy countries and militant groups.

“We practice that because this is a real scenario,” he said.

He said the threats include multiple salvos, more accurate rockets and missiles and a “multidirectional threat.”

“Those are our main assumptions,” he said. “It doesn’t matter if it’s

from south, north, east or others.”

Israel, in cooperation with the U.S., has developed a multilayer system of missile defense. This includes the “Arrow” system, which can intercept long-range missiles before they enter the atmosphere, the “David’s Sling” system for medium-range threats and the “Iron Dome,” which has been successful at intercepting short-range rocket fire. Israel also uses the American-made “Patriot” system.

While Israel takes pride in its ability to defend itself, Haimovich said the cooperation with the Americans provides additional depth to its “tool box.” About 2,500 American forces are participating in the drill, which began on March 4 and will run through the end of the month. There is precedent for such cooperation. During the 1991 war, American

Patriot missile batteries were deployed to Israel to defend against Iraqi Scud missile attacks.

Lt. Gen. Richard Clark, commander of the U.S. troops, said American forces are ready to deploy in Israel at Israel’s request. Once Israel gives the green light, he said American forces could start moving from Europe within two or three days.

Juniper Cobra has taken place every two years since 2001, adjusting each time to cope with ever-shifting battlefield.

With literally “thousands of threats” to prepare for, Clark said the drill is an opportunity for the two allies to improve communication and coordination.

“The ballistic missile defense mission is a very difficult one, very technical one, and it requires precise integrated effort to make it work, and that’s what we’re developing here,” he said.

INTERNATIONAL NEWS BRIEFS

Arrests in Greece over violent robberies around Acropolis

ATHENS, Greece (AP) — Greek police have arrested six Pakistani men accused of a string of violent knife-point robberies in parkland around the ancient Acropolis Hill in Athens, one of the country’s top tourist attractions.

The suspects were detained on Tuesday and charged with membership of a criminal organization, attempted murder, armed robbery and weapons law breaches.

Police also arrested 12 other Pakistani migrants accused of receiving goods

stolen by the gang. A police statement Thursday said the gang is believed to be behind the attempted murder of a tourist during a robbery, and at least three robberies that targeted a total of ten people.

Israeli leader opens Jerusalem exhibit, rebukes opponents

UNITED NATIONS (AP) — Israeli Prime Minister Benjamin Netanyahu has opened an exhibition on Jerusalem to reinforce Israel’s claim to the historic city as the Jewish people’s “eternal capital” — and rebuke over 125 countries

that support Palestinian claims to east Jerusalem as the capital of their future state.

Netanyahu’s U.N. visit Thursday follows President Donald Trump’s recognition of Jerusalem as Israel’s capital in December. The U.N. General Assembly voted soon after that denouncing the U.S. leader’s announcement and declaring Trump’s action “null and void.”

The exhibition traces Jews in Jerusalem back centuries before the Christian era. Netanyahu said that Jews’ place in the city “is being denied by those seeking to erase the history of our people, our connection to our lands, and our connection to our

eternal capital, Jerusalem.”

Mattel in dispute with Frida Kahlo descendants over doll

MEXICO CITY (AP) — Toy-maker Mattel is in a dispute with some distant relatives of Mexican artist Frida Kahlo over the rights to a Frida Barbie doll released as part of its Inspiring Women series.

Kahlo’s great-niece Mara de Anda Romeo says Mattel doesn’t have the rights to use Kahlo’s image.

A lawyer for de Anda Romeo says his client wants Mattel to talk to his client about redesigning the doll.

Mattel said in a statement that it worked with the Panama-based Frida Kahlo Corporation, “which owns all the rights.”

A lawyer for the corporation said it got the rights through Kahlo’s niece, Isolda Pinedo Kahlo, more than a decade ago.

Critics say the doll doesn’t reflect Kahlo’s heavy, nearly conjoined eyebrows, and her signature Tehuana-style dresses.

European Union law enforcement agency Europol gets new chief

THE HAGUE, Netherlands (AP) — The commissioner general of

the Belgian Federal Police has been appointed as the new executive director of European Union law enforcement agency Europol.

Catherine De Bolle was appointed Thursday, which is International Women’s Day, by the European Council. She replaces Briton Rob Wainwright, whose term at the head of Europol expires May 1.

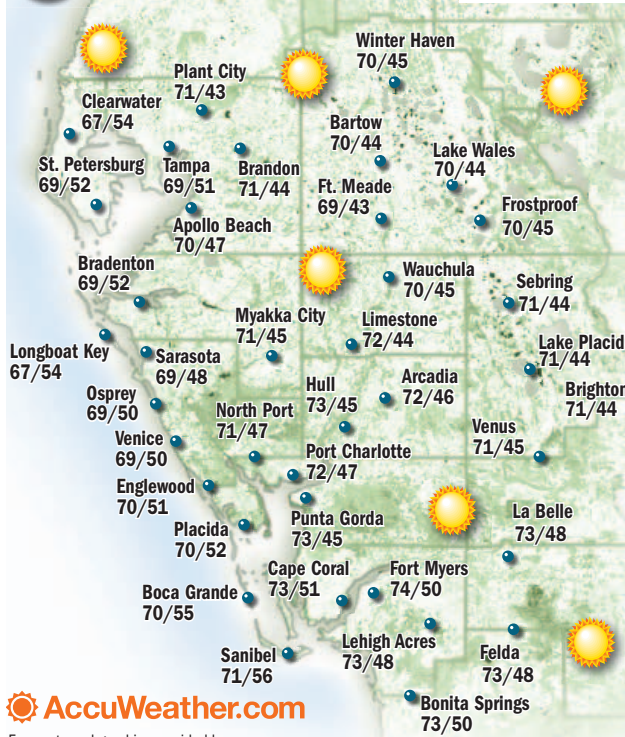

With a staff of more than 1,000, Europol coordinates and supports police operations throughout EU nations, using experts based at its headquarters in The Hague to help tackle cross-border crime such as terrorism, people smuggling and cybercrime.

11 nations sign Pacific trade pact as Trump plans US tariffs

By **EVA VERGARA and LUIS ANDRES HENAO**
ASSOCIATED PRESS

SANTIAGO, Chile — Trade ministers from 11 Pacific Rim countries signed a sweeping free trade agreement Thursday to streamline trade and slash tariffs just hours before President Donald Trump announced his plans to impose new tariffs on aluminum and steel to protect U.S. producers.

Trump withdrew the U.S. from the Trans-Pacific Partnership last year, causing fears that it would not prosper without its most influential country. But the remaining 11 members pressed ahead, saying they were showing resolve against protectionism through global trade.

The ministers dropped key provisions that the Americans had required on protection of intellectual property, among others. The renegotiated pact signed in Chile's capital was also renamed the Comprehensive and Progressive Trans-Pacific Partnership, or CPTPP.

"Despite the diverse and difficult challenges, the CPTPP is a historic achievement that creates

free and fair 21st century rules in the Asia-Pacific region," Japanese Economy Minister Toshiyuki Motegi said in a news conference after the signing of the deal.

The pact that covers 500 million people includes Australia, Brunei, Canada, Chile, Japan, Malaysia, Mexico, New Zealand, Peru, Singapore and Vietnam, which together account for 13 percent of the global economy. Its success highlights the isolation of the U.S. under Trump's protectionist rhetoric on trade and his "America first" philosophy. "It leaves the U.S. at a disadvantage from both a trade and a broader strategic perspective," said Joshua Meltzer, senior fellow in the global economy and development program at the Brookings Institution. "It is now a trade bloc that discriminates against the U.S."

Meltzer said the United States' ability to shape the rules of trade in the Asia-Pacific region "is very much diminished."

The U.S., originally the biggest TPP economy, was one of the trade deal's strongest supporters before Trump took

office. Trump has said he prefers country-to-country deals and is seeking to renegotiate several major trade agreements, including the North American Free Trade Agreement that includes the U.S., Mexico and Canada.

This is "a strong sign against the protectionist pressures, and in favor of a world open to free trade, without unilateral sanctions and the threat of trade wars," Chilean Foreign Minister Heraldo Munoz said.

The European Union said this week that it is ready to retaliate against Trump's tariffs — of 25 percent on imported steel and 10 percent on aluminum imports — with counter-measures against iconic U.S. products like Harley Davidson motorcycles, Levi's jeans and bourbon.

The EU threat and Trump's impending announcement on the tariffs were expected to escalate the risk of a trade war, in which nations try to punish each other by hiking taxes on traded goods. Experts say that tends to harm both exporting nations as well as importing countries' consumers, who face

Jayasiri, Canada's Minister of International Trade Francois-Philippe Champagne, Australian Minister for Trade and Investment Steven Ciobo, Chile's Foreign Minister Heraldo Munoz, Brunei's Foreign Minister Haji Erawan bin Pehin Yusof, Japan's Trans-Pacific Partnership minister Toshiyuki Motegi, Secretary of Economy of Mexico Idelfonso Guajardo, Peru's Trade Minister Eduardo Ferreyros and Vietnamese Trade Minister Tran Tuan Anh, pose for pictures after the signing ceremony of the Comprehensive and Progressive Agreement for Trans-Pacific Partnership, CP TPP, in Santiago, Chile, on Thursday.

higher costs.

The EU considers itself to be caught in the crossfire of a trade dispute, in which Trump has mainly singled out China for being unfair in its commercial deals.

The original TPP was conceived by the U.S. as a counterweight to China's growing economic influence through a robust trading bloc that excluded the Asian

giant. The thinking was that China would have an incentive to open its market and liberalize its policies in an effort to eventually qualify for TPP membership.

"Without the United States, it doesn't serve that purpose," said Edward Alden, senior fellow at the Council on Foreign Relations. "It becomes a modest liberalization measure."

WOMEN'S

FROM PAGE 1

demonstrators, including opposition presidential candidate Ksenia Sobchak, picketed outside Parliament, demanding Slutsky's resignation.

In Italy, actress Asia Argento, who helped sparked the #MeToo campaign last year, said she is launching a new movement, #WeToo, to unite women against a power imbalance favoring men.

Argento told Radio 24 that her aim is "to finally change the patriarchal system so rooted in our

culture, not just in Italy."

Argento helped embolden other women to report sexual assault and harassment when she accused Hollywood mogul Harvey Weinstein of rape in an expose by The New Yorker. She faced a backlash in Italy, with critics questioning why she waited 20 years to come forward.

German Chancellor Angela Merkel, one of the world's most powerful women, said in a video message that the quest for greater gender equality in Germany and worldwide must continue.

"Many women before us have made sacrifices and fought persistently so

that women would have more rights," she said. "But there's still a lot to do."

In Rome, Catholic women challenged Pope Francis to give women a greater voice in church affairs. Former Irish President Mary McAleese, an advocate for women's ordination and gay rights, accused the church's all-male leadership of refusing to change women's second-class status.

"The Catholic Church has long since been a primary global carrier of the toxic virus of misogyny," McAleese said.

In Uganda, where domestic violence is common and often goes

unreported, Ugandan President Yoweri Museveni urged men to stop abusing their wives.

"If you want to fight, why don't you look for a fellow man and fight?" said Museveni, calling domestic abusers cowards.

At a star-studded event at the United Nations, U.N. Secretary-General Antonio Guterres called on men to join in making gender equality "a reality for all."

"This is what women and girls want. And that is what I want," he said. "It is what every sensible man and boy should want."

International Women's Day, created over a century ago by the socialist

and labor movements, traditionally has been a higher-profile occasion abroad than in the United States, where women's rights activists have been energized over the past 14 months by huge protest marches and the emergence of the #MeToo movement.

Nonetheless, several U.S. companies, including McDonald's, Kroger and Old Navy, made gestures in recognition of the day, and the White House announced that first lady Melania Trump would present State Department courage awards to women from around the world at a March 21 ceremony.

KOREAN

FROM PAGE 1

Secretary of State John Sullivan.

Chung said he was delivering a message — apparently a signed letter from Kim — to the White House that the North Korean ruler had given him and Suh Hoon, chief of South Korea's National Intelligence Service, earlier this week in Pyongyang, North Korea.

Trump personally hinted at the news when he made his first appearance ever in the White House briefing room Thursday afternoon and told reporters to stay around for "a major announcement" on North Korea, one that

clearly met his approval.

Ever since a five-member South Korean delegation returned Tuesday from meeting Kim in Pyongyang, the tantalizing prospect of a peaceful resolution to the rising tensions in northeast Asia appeared possible, although far from certain.

The South Koreans said that Kim had offered to freeze further nuclear or ballistic missile tests while talks proceed, and to "denuclearize" if he was convinced his country faced no military threat and his dynastic regime was secure.

In a sign of the fast-moving diplomacy, Kim will meet South Korean President Moon Jae-in next month in the third-ever meeting between the leaders of

North and South Korea since their war ended in an uneasy cease-fire in 1953.

Earlier this week, Trump voiced cautious optimism about talks with North Korea, saying he hoped the North Koreans were "sincere" in their offer to engage in talks. But he said he's prepared "to go whichever path is necessary."

Trump and Kim have traded insults and invective over the past year — "Little Rocket Man" vs. "a mentally deranged U.S. dotard" — but Trump also said he would be "honored" to meet with Kim under the right circumstances.

Other members of the administration urged caution, saying multiple diplomatic attempts

to curb North Korea's nuclear program since the early 1990s all have failed, and that Kim's government may be seeking to get out of onerous sanctions or buy time to make a more advanced warhead.

"We're a long ways from negotiations," Secretary of State Rex Tillerson said in Ethiopia, where he was on a five-nation tour of Africa.

Saying the Trump administration had to be "very clear-eyed," he said the first step would be "to have some kind of talks about talks" to set the parameters of any negotiations.

"I don't know yet, until we are able to meet ourselves face-to-face with representatives of North Korea, whether

the conditions are right to even begin thinking about negotiations," Tillerson added.

Tillerson has long promoted diplomacy with North Korea to avoid a potential military conflict with the nuclear-armed nation.

The apparent thaw began on Jan. 1 when Kim offered to send a North Korean delegation to the Winter Olympics in Pyeongchang, South Korea, in February.

Vice President Mike Pence, who headed the U.S. delegation to the Olympics, had planned a secret meeting in South Korea with Kim's younger sister. But the North Koreans canceled the meeting after Pence said the U.S. was about to impose stiff new sanctions.

TARIFFS

FROM PAGE 1

assault on our country. It's been an assault."

His move, an assertive step for his "America First" agenda, has rattled allies across the globe and raised questions at home about whether protectionism will impede U.S. economic growth. The president made his announcement the same day that officials from 11 other Pacific Rim countries signed a sweeping trade agreement that came together after he pulled the U.S. out of the Trans-Pacific Partnership last year.

Though he focused on workers and their

companies in his announcement, Trump's legal proclamation made a major point that weakened steel and aluminum industries represent a major threat to America's military strength and national security.

The former real estate developer said U.S. politicians had for years lamented the decline in the steel and aluminum industries but no one before him was willing to take action.

Despite a week of furious lobbying against his plan by Republican lawmakers and some of his own advisers, Trump said he would go ahead with penalty tariffs of 25 percent on imported steel and 10 percent on aluminum. But he also

said the penalties could "go up or down depending on the country, and I'll have a right to drop out countries or add countries. I just want fairness."

Century Aluminum Chief Executive Michael Bless said the tariffs would allow his company, which produces high-purity aluminum used in military aircraft, to recall about 300 workers and restart idled production lines at its smelter in eastern Kentucky by early 2019. And Trump took note of U.S. Steel's announcement that it planned to ramp up activity at its plant in Granite City, Illinois, and recall about 500 employees because of the new tariffs.

But there was political criticism aplenty,

especially from Trump's own Republican Party.

House Speaker Paul Ryan, appearing with Home Depot employees in Atlanta, warned of "unintended consequences." And Sen. Ron Johnson of Wisconsin called the tariffs "a very risky action" that could put agricultural and manufacturing jobs at risk.

"I'm not sure there are any winners in trade wars," said Johnson, who once ran a plastics manufacturing business in his home state.

Democratic Sen. Dick Durbin of Illinois said Trump's action was "like dropping a bomb on a flea" and could carry "huge unintended consequences for American manufacturers

who depend on imported materials."

Business leaders, too, sounded their alarm about the potential economic fallout, warning that American consumers would be hurt by higher prices. They noted that steel-consuming companies said tariffs imposed in 2002 by President George W. Bush ended up wiping out 200,000 U.S. jobs.

"Tariffs are taxes, and the American taxpayer will pay the cost of a trade war," said Cody Lusk, president and CEO of the American International Automobile Dealers Association. "Even with limited exemptions, tariffs will raise the sale prices of new vehicles."

ALMANAC

Today is **Friday, March 9**, the 68th day of 2018. There are 297 days left in the year.

Today in history

On **March 9, 1862**, during the Civil War, the ironclads USS Monitor and CSS Virginia (formerly USS Merrimac) clashed for five hours to a draw at Hampton Roads, Virginia.

On this date

In **1796**, the future emperor of the French, Napoleon Bonaparte, married Josephine de Beauharnais. (The couple later divorced.)

In **1841**, the U.S. Supreme Court, in *United States v. The Amistad*, ruled 7-1 in favor of a group of illegally enslaved Africans who were captured off the U.S. coast after seizing control of a Spanish schooner, *La Amistad*; the justices ruled that the Africans should be set free.

In **1916**, more than 400 Mexican raiders led by Pancho Villa attacked Columbus, New Mexico, killing 18 Americans. During the First World War, Germany declared war on Portugal.

In **1933**, Congress, called into special session by President Franklin D. Roosevelt, began its "hundred days" of enacting New Deal legislation.

In **1945**, during World War II, U.S. B-29 bombers began launching incendiary bomb attacks against Tokyo, resulting in an estimated 100,000 deaths.

In **1954**, CBS newsman Edward R. Murrow critically reviewed Wisconsin Sen. Joseph R. McCarthy's anti-communism campaign on "See It Now."

In **1964**, the U.S. Supreme Court, in *New York Times Co. v. Sullivan*, raised the standard for public officials to prove they'd been libeled in their official capacity by news organizations.

Today's birthdays

Former Sen. **James L. Buckley**, Conservative-N.Y., is 95. Singer **Lloyd Price** is 85. Actress **Joyce Van Patten** is 84. Country singer **Mickey Gilley** is 82. Former ABC anchorman **Charles Gibson** is 75. Country musician **Jimmie Fadden** (The Nitty Gritty Dirt Band) is 70. TV newscaster **Faith Daniels** is 61. Rock musician **Robert Sledge** (Ben Folds Five) is 50. Rock musician **Shannon Leto** (30 Seconds to Mars) is 48. Actor **Emmanuel Lewis** is 47. Actress **Jean Louisa Kelly** is 46. Actor **Kerr Smith** is 46. Actor **Oscar Isaac** is 39. Comedian **Jordan Klepper** (TV: "The Daily Show") is 39. Rapper **Bow Wow** is 31.

Bible verse

"If any of you lack wisdom, let him ask of God, that giveth to all men liberally and upbraideth not; and it shall be given him."
— **James. 1:5.**

It is surprising how smart we are when He is coming up with the answers. The wisest thing that we can do is ask His advice. Let's do it. Oh, Father, in Jesus' name, give us wisdom just now.

ODD NEWS

It's spring break and beer is flowing — onto a Florida highway

CRESTVIEW, Fla. (AP) — Spring break is underway and the beer is already flowing — onto a Florida interstate highway.

Okaloosa County Sheriff's officials said on Facebook Wednesday that a tractor-trailer carrying Busch beer spilled its cargo onto Interstate 10 in the Florida Panhandle.

In a news release, the Florida Highway Patrol said 44-year-old Michael Nolan Powell of Simpsonville, South Carolina, failed to maintain his lane, resulting in the truck running onto the shoulder of the road before overturning. He was treated for minor injuries at the scene and is charged with careless driving.

Troopers said about 60,000 pounds of Busch beer was tossed from the trailer.

STOCKS LISTING CHANGE - REQUESTS WELCOME!

The Sun Newspaper is tweaking the way stocks are listed in the daily paper. We will continue to run a wide range of stocks, but we're trying to eliminate stocks our readers don't want. If you do not see your stock in the paper, please let us know

and we will put it in the listings. Email the name of the company and the symbol to nlane@sun-herald.com, or call 941-206-1138. You can leave the stock name and symbol on voice mail. When requesting a stock, please include where you live so we can run the listing in the appropriate edition. If you reach voice mail, please leave your contact information so your call can be returned.

MICHIGAN Kalamazoo: A fountain featuring a European settler with a weapon in his hand towering over a Native American will be removed.

MINNESOTA St. Paul: Gov. Mark Dayton has unveiled a revised measure to reduce elevated nitrate levels in water supplies.

MISSISSIPPI Jackson: The University of Mississippi has unveiled six plaques acknowledging the school's historical connections to slavery.

MISSOURI Columbia: The University of Missouri faces a \$60 million shortfall under a worst-case scenario for state support and enrollment.

MONTANA Butte: Two entrepreneurs plan to build a \$35 million medical training center to support rural health care services.

NEBRASKA Gering: Three inmates who barricaded themselves in a cell at the Scotts Bluff County jail gave up peacefully after police arrived.

NEVADA Reno: A federal jury ordered the city to pay a police sergeant more than \$1 million for violating his medical leave rights.

NEW HAMPSHIRE Durham: Weather instruments focusing on ionic radiation and developed by University of New Hampshire researchers were launched into space March 1.

NEW JERSEY Moorestown: Three members of a family of funeral directors are charged with stealing \$1.3 million from a funeral home.

NEW MEXICO Santa Fe: Gov. Susana Martinez supports setting aside up to \$10 million over four years for bolstering school security.

NEW YORK Moreau: A high school raised more than \$830,000 at its annual 24-hour dance marathon.

NORTH CAROLINA Nags Head: The Coast Guard says a container of sulfuric acid fell off a cargo ship in rough seas off the Outer Banks.

NORTH DAKOTA Bismarck: A group seeking to raise the state's minimum wage to \$15 hopes to bring the proposal to voters in November.

OHIO Cleveland: Three adults who chased down two 14-year-old car theft suspects face assault and kidnapping charges after the boys were forced into the trunk of their car and driven to police headquarters.

OKLAHOMA McAlester: The widow of one of five men killed in a January gas rig explosion has filed a wrongful death lawsuit.

OREGON Portland: A man who dumped nearly a dozen dilapidated RVs on city streets was sentenced to 25 days in jail.

PENNSYLVANIA Centerville: A train

carrying 22 tons of hydrochloric acid hit a tractor-trailer, causing a spill. Fifteen people were evacuated.

RHODE ISLAND Providence: The Rhode Island School of Design denies a claim that its Picasso painting "Seated Woman with a Book" was stolen by Nazis in occupied France.

SOUTH CAROLINA Greenville: Authorities say a Myrtle Beach man accused of wanting to enslave and eat a child is free on \$20,000 bond.

SOUTH DAKOTA Sioux Falls: The family of a man who died in a 2016 building collapse has sued a developer and construction company.

TENNESSEE Nashville: Meharry Medical College will provide free dental services Saturday to the uninsured.

TEXAS Harker Heights: A woman who accused police of brutalizing her during a public intoxication arrest is charged with perjury. Police say body camera footage disproves the claim.

UTAH Salt Lake City: The cost of the new airport is nearing \$3.6 billion.

VERMONT Concord: Police say a woman who couldn't pay to euthanize her 18-year-old dog used a sledgehammer and a knife to kill it.

VIRGINIA Spotsylvania: The Spotsylvania County Sheriff's Office will join other nearby law enforcement agencies with a drone program.

WASHINGTON Spokane: New regulations on police reality TV shows require \$1 million of liability insurance and written consent from people captured on video.

WEST VIRGINIA Charleston: A board has approved \$1.68 million for courthouse repairs and renovations.

WISCONSIN Milwaukee: The Justice Department has sued a nursing home where a former employee says she was forced to take a flu vaccine.

WYOMING Cheyenne: Lawmakers are advancing a bill to allow "In God We Trust" placards in public schools and state government buildings.

When is a heart valve leak not worth being concerned?

DEAR DR. ROACH: I was diagnosed with a minor to moderate tricuspid valve leak, as well as a minor to moderate aortic valve leak and a trace mitral valve leak. My doctor says that there is no need to worry; he says we will just watch it. He also says that I can live a lifetime and not have any changes. Is he right? I'm worried all the time about this. I do not have any signs of heart disease as of yet. —Y.A.

ANSWER: The echocardiogram is a high-resolution type of sonogram. It uses soundwaves to take pictures of the heart. The quality of echocardiograms has improved. They are so sensitive that small amounts of leak can be found in 80 to 90 percent of healthy people. While I can't comment on your echocardiogram, my experience is that the majority of trace or mild leaks seen in valves by echocardiogram are not concerning. They likely have been that way for many years, and are unlikely to change. In someone with no symptoms of heart disease, I agree there almost never is a reason to worry.

Dr. Roach

Heart disease remains the No. 1 killer. The booklet on clogged heart arteries explains why they happen and what can be done to prevent clogging. Readers can obtain a copy by writing:

Dr. Roach
Book No. 101
628 Virginia Dr.
Orlando, FL 32803

Enclose a check or money order for \$4.75 U.S./\$6 Can. with the recipient's printed name and address. Allow four weeks for delivery.

DEAR DR. ROACH: I took my 79-year-old mother to the

emergency room in December because she had been suffering from a sharp pain in her lower-right abdomen since the day before. They discovered a 12-cm tumor, which was biopsied and determined to be gallbladder cancer that already was eating into the liver. We were told that her condition did not support surgery, nor was radiation or chemotherapy an option. We were told that this is a rare cancer and, as such, not much research money is spent on finding treatments.

She had a CT scan in April 2017 after being admitted for severe diarrhea; it showed gallstones. But she was asymptomatic, so the doctor said they would just monitor her.

How did she develop such a cancer without any symptoms or pain until it was too late? This blindsided us. As her daughter, am I susceptible to the same sort of cancer? Any insight into this terrible diagnosis is appreciated. —L.J.B.

ANSWER: I am sorry to hear about your mother.

Gallbladder cancer is a rare disease in North America, with only about one case per 100,000 people. Most people do not have symptoms for a long time, which is why your mother didn't know about it until the tumor was very advanced, making it similar to pancreatic cancer. Pain is the usual first symptom, but people may have nausea, vomiting or loss of appetite. The cancer can be hard to see on sonogram or CT, which is probably why the doctors missed it in April.

Gallstones, especially large gallstones, are a clear risk factor for gallbladder cancer. Other risks include chronic infection, gallbladder cysts and polyps, and some occupational exposures.

Having a family history does increase your risk for developing this cancer; however, even as her daughter, your risk is still very small. One study from Sweden, where this disease is a little more common, showed that 5 people per 100,000 with a family history of the disease will develop it.

Woman is blind to signs of fiance's abusive potential

DEAR ABBY: My granddaughter is getting married in seven months and I'm worried for her. I see many red flags.

You have printed a list of warning signs of an abusive mate. Can you print it again? — Perceptive In Pennsylvania

Dear Abby

DEAR PERCEPTIVE: Gladly.

(1) PUSHES FOR QUICK INVOLVEMENT: Comes on strong.

(2) JEALOUS: Excessively possessive; calls constantly.

(3) CONTROLLING: If you are late, interrogates you about where you were.

(4) UNREALISTIC EXPECTATIONS: Expects you to be the perfect mate and meet his or her every need.

(5) ISOLATION: Tries to isolate you from family and friends.

(6) BLAMES OTHERS FOR PROBLEMS OR MISTAKES: It's always someone else's fault if something goes wrong.

(7) MAKES OTHERS RESPONSIBLE FOR HIS OR HER FEELINGS: The abuser says, "You make me angry" instead of "I am angry."

(8) HYPERSENSITIVITY: Is easily insulted.

(9) CRUELTY TO ANIMALS OR CHILDREN: Kills or punishes animals brutally.

(10) "PLAYFUL" USE OF FORCE DURING SEX: Enjoys throwing you down or holding you down against your will during sex.

(11) VERBAL ABUSE: Constantly criticizes or says blatantly cruel things; degrades, curses, calls you ugly names.

(12) RIGID GENDER ROLES: Expects you to serve, obey, remain at home.

(13) SUDDEN MOOD SWINGS: Switches from sweet to violent in minutes.

(14) PAST BATTERING: Admits to hitting a mate in the past, but says the person "made" him or her do it.

(15) THREATS OF VIOLENCE: Says things like, "I'll break your neck" or "I'll kill you," and then dismisses them with, "I didn't really mean it."

Anyone at risk should contact the National Domestic Violence Hotline at (800) 799-7233 or thehotline.org.

Organizing digital photos

Dear Heloise: I have a ton of DIGITAL PHOTOS, but sorting through them has gotten so time-consuming. Any suggestions on how to make this task easier? — Irene, Allendale, N.J.

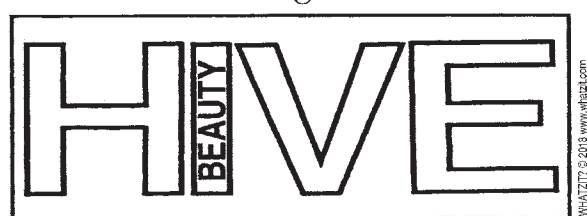

Hints from Heloise

especially nice for vacation pictures. — Heloise

Dear Heloise: Whenever I buy a new mattress, I always spray it with a water-repellent spray. Although I also use a mattress pad, this still protects the mattress from liquid spills and helps keep out dust. — Loretta L., Kingston, R.I.

HOROSCOPE

ARIES (March 21-April 19). You'll be working on a mystery. You already know who did what, but you don't yet know why. You may never know why. Nonetheless, the exercise of trying to figure it out is what will bring you a degree of enlightenment.

TAURUS (April 20-May 20). Your frustration is a good sign. It's part of a learning process. You're on the verge of doing something different. You may need to tinker. Step back and listen to what life is trying to tell you here.

GEMINI (May 21-June 21). You won't like every single person, but if you limited yourself to dealing with only those you liked, you would be hurting yourself. Goldmines of opportunity will be hidden inside business with people you don't fully click with.

CANCER (June 22-July 22). The socially acceptable thing earned its status by being widely used and understood. What's new, by definition, won't fit that category. So don't use public acceptance as your gauge. Let your heart be the judge instead.

LEO (July 23-Aug. 22). It's a repeat of something that happened last week, except it's like the negative print version: The darks are light; the reds are green. The shape is the same, but it doesn't look the same at all. Does it still have the same meaning?

VIRGO (Aug. 23-Sept. 22). Today you've a deep humility and a care and love for others. It's coming through in your interactions, especially since you've decided that you don't have to take the lead.

LIBRA (Sept. 23-Oct. 23). All the things you tried that didn't work have taught you much more than just "what doesn't work out." You will be able to apply these lessons. Relax. You're only getting better.

SCORPIO (Oct. 24-Nov. 21). It's a fine day to develop the sense of mystery that already surrounds you by adding layers of silence and secrecy. It's not always the right approach, but today it will grow your power.

SAGITTARIUS (Nov. 22-Dec. 21). Language changes. Fashion changes. Music changes. There is no right way, only what's in style now and what's not. Are love and relationships also matters of style? It's a theme to consider today.

CAPRICORN (Dec. 22-Jan. 19). In a perfect world, those close to you would sense what you need and kick in help and support. But it's not perfect. It's a world of people born selfish. Getting them to pay attention comes with the territory.

AQUARIUS (Jan. 20-Feb. 18). In the business world, one-on-one meetings are known for being hard to get right. Groups find their own equilibrium, but the one-on-one dynamic is trickier. Good thing you're a natural.

PISCES (Feb. 19-March 20). Today's questions: Who gets to know you and who never will? Should you remain discreet or speak up? The thing about sharing how you feel is that it's going to change — and then what about the update?

TODAY'S BIRTHDAY (March 9). This solar return will change what you do, not who you are. If anything, you'll become more of who you are as you commit to what's really giving you energy and cut away the extraneous activities that don't pay you back in any meaningful way. A celebration will award you in May. A case or deal gets wrapped up in August. Leo and Capricorn adore you. Your lucky numbers are: 6, 40, 33, 21 and 1.

7♥	All pass		

Opening lead: Ace of ♦

An excellent auction by North-South. South's five-diamond cue bid denied a club control. North would not have bid beyond five hearts unless he had a club control, so South was able to make another cue bid in diamonds as a clear cut grand slam

try. North could hardly resist with such excellent fillers in partner's two suits. 13 tricks would have been easy with a 2-2 trump split or the king of clubs onside. South showed that neither of those things were necessary.

South ruffed the opening diamond lead and led the six of hearts to dummy's king, noting the fall of the eight from East. He ruffed a second diamond with the ace of trumps, then overtook his nine of trumps with dummy's jack to ruff a third diamond, this time with the queen of trumps. He led a spade to dummy's ace and ruffed dummy's last diamond with the 10 of hearts. Declarer led a club to dummy's ace and cashed the seven of hearts, drawing the last trump while shedding his remaining low club. He claimed the balance with all high spades.

Declarer was rightly proud of himself. He had executed the extremely rare quadruple dummy reversal!

Trump plan ends research on uranium mining near Grand Canyon

By **FELICIA FONSECA**
ASSOCIATED PRESS

FLAGSTAFF, Ariz. — U.S. scientists studying the effects of uranium mining around the Grand Canyon say they are lacking information on whether the radioactive element is hurting plants, animals and a water source for more than 30 million people.

And they would not get to fully gather it if President Donald Trump's 2019 budget proposal is approved.

The U.S. Geological Survey is leading a 15-year study meant to determine whether a 1 million-acre area surrounding the national park needs protection from new uranium mining claims well into the future. Now, no one can stake claims until 2032, though a portion of that

Obama-era ban is under review by the Trump administration.

The agency says it's received far less for its study than what's needed so far and would be left with nothing under Trump's plan, which eliminates the money in favor of other priorities.

"We love to provide information," Geological Survey hydrologist Fred Tillman said. "If you don't get the funding to do it, you simply can't do the studies."

Former President Barack Obama's administration implemented the ban in 2012 as uranium prices soared and a flurry of new mining claims came pouring in. It faced a backlash from Republicans, who touted improved mining techniques and lamented job loss in a remote area.

Without the study to

document the effects of mining, some fear industry supporters would point to a lack of evidence of environmental harm to reopen the area to mining.

A federal appeals court recently upheld the ban, but the U.S. Forest Service is reviewing whether it's necessary on 360,000 acres it manages. It follows an order by Trump to identify regulations that stand in the way of energy production.

The ban provided an avenue for the Geological Survey to study uranium-bearing pipes, groundwater flow, wind-borne dust, and plants and animals near mines. Of particular concern for the Obama administration was the Colorado River, a lifeline for millions of people in seven Western states that runs nearly 300 miles through

the Grand Canyon.

Those supporting the ban have pointed to the legacy of death and disease on the nearby Navajo Nation, the country's largest American Indian reservation, from Cold War-era uranium mining and to areas that have elevated levels of uranium.

Without the science, the concern is "just opinion," said Jan Balsom, senior adviser to the Grand Canyon National Park superintendent.

"I'm not comfortable with that being the only source of information," she said.

The Geological Survey said its Environmental Health Mission funds the work, allocating \$800,000 to \$1.5 million a year to the studies between 2013 and 2017. That's about half the estimated need annually, the agency said.

AP FILE PHOTO

In this June 7, 2013, file photo provided by the U.S. Geological Survey, scientists, from left, Christine Dowling, Adam Benthem, and David Naftz collect soil samples on the Canyon Mine property in Arizona.

Trump's 2019 budget proposal nixes all funding for the program.

The agency's associate director for environmental studies, Geoff Plumlee, said he's proud of the work done so far under budget constraints

and will await word from Congress on what science will be produced.

Other federal agencies and universities work to fill the knowledge gaps and have contributed funding for the larger effort.

NATIONAL NEWS BRIEFS

Alabama man pleads guilty to trying to help Islamic State

BIRMINGHAM, Ala. (AP) — An Alabama man pleaded guilty to terrorism charges Thursday, admitting that he bought bomb-making materials and had hoped to conduct attacks at a military installation or police stations.

In federal court in Birmingham, Aziz Sayyed, 23, of Huntsville, entered the plea to charges that he sought to aide a foreign terrorist organization.

Federal prosecutors said that, after watching videos

from the Islamic State terrorist group earlier this year, Sayyed purchased ingredients to make an explosive and told others about his hope to use it in a car bomb or explosive belt. Sayyed also shared the videos and expressed his support for the terrorism organization and terrorist attacks.

According to the plea agreement, Sayyed, told people he wanted to attack police stations or the Redstone Arsenal military installation in Huntsville. He was arrested after discussing his plans with an undercover FBI agent in June.

Sayyed's plea agreement

stipulates a 15-year prison sentence. He is scheduled to be sentenced in June.

A lawyer representing Sayyed could not immediately be reached for comment.

Missouri turkey farm quarantined after bird flu detected

ST. LOUIS (AP) — The U.S. Department of Agriculture says the first commercial case of bird flu in the country this year has been confirmed at a turkey farm in southwestern Missouri.

USDA spokeswoman

Lyndsay Cole said Thursday that the H7N1 avian influenza, a low-pathogenic form, was detected through pre-slaughter testing on a farm in Jasper County that houses 20,000 turkeys. The state put the farm under quarantine.

Cole says two other commercial poultry properties within 6 miles of the farm tested negative for influenza.

The low-pathogenic flu is different from the high-pathogenic virus that resulted in the loss of nearly 50 million birds in the Midwest in 2015. Cole says the low-pathogenic virus poses no risk to the food chain.

Jasper County is about 140 miles south of Kansas City, Missouri.

Most municipal workers resign in Utah polygamous sect town

SALT LAKE CITY (AP) — The new mayor of a mostly polygamous town on the Utah-Arizona border is finishing an overhaul of municipal staff and boards following mass resignations when she took office in January and became the first woman and first non-member of the polygamous sect to hold the seat.

Six of seven municipal workers for the town of Hildale, Utah, quit after Mayor Donia Jessop was elected and took charge of the local government run by the sect for more than a century.

They were joined by nine members of various town boards.

Jessop says of those who resigned are members of the Fundamentalist Church of Jesus Christ of Latter Day Saints, an offshoot of mainstream Mormonism that practices polygamy.

The mainstream Mormon church disavowed polygamy more than 100 years ago.

MLB: Rays

De Leon vows to come back 'better'

[TIMES FILES 2017]

RHP Jose De Leon is the second top young Rays pitcher to be hurt this spring.

By **MARC TOPKIN**
Tampa Bay Times

Rays RHP Jose De Leon said he is taking a "really positive" outlook about having Tommy John elbow surgery and is confident he will come back "better and stronger."

"I know it's another obstacle in the way but the mission is the same," De Leon said Thursday

morning. "So I'm really excited about this comeback."

De Leon said it's "tough to say" exactly when he tore the ulnar collateral ligament requiring the surgery.

He said he felt some "tightness" after throwing in Saturday's game and knew something was wrong about halfway through a Tuesday bullpen session but "never

felt a pop" or pain on a specific pitch.

De Leon saw Rays orthopedist Dr. Koco Eaton on Wednesday and will next visit noted surgeon Dr. James Andrews with plans to have the surgery done "the sooner the better."

With an average 15-month recovery and then minor-league games he likely won't be back in top form until

the middle of the 2019 season.

De Leon was acquired from the Dodgers in January 2017 and had a rough first season, spent mostly in the minors with three stints on the DL, twice for arm issues.

De Leon was expected to open this season at Triple-A but pitch in the majors for the Rays at some point during the year.

Tampa Bay Lightning center Brayden Point goes over the top of New York Rangers goaltender Henrik Lundqvist (30) after getting hit by defenseman John Gilmour during the second period Thursday in Tampa.

Lightning chase Lundqvist

Associated Press

TAMPA — Anthony Cirelli had a goal and two assists and the Tampa Bay Lightning chased Henrik Lundqvist with a barrage of shots in a 5-3 win over the New York Rangers on Thursday night.

League-leading Tampa Bay had 17 shots on goal before the Rangers got their first nearly 11 minutes into the game. Lundqvist kept New York's deficit to 2-0 through one period but was pulled after allowing two more goals in the second period.

Cirelli, playing his fourth career game, helped the Lightning improve to 8-0-1 in their past nine games. Adam Erne, Cedric Paquette, Tyler Johnson and Chris Kunitz also scored, and Andrei Vasilevskiy made 27 saves for his league-leading 40th victory, which ties the franchise record.

Ryan Spooner had a goal and an assist for New York, which has dropped consecutive games since sweeping a three-game trip to Western Canada. Lundqvist made 27 saves before being

Wade on Parkland students: 'They are very impressive'

By **TIM REYNOLDS**
Associated Press

MIAMI — Dwyane Wade went to Marjory Stoneman Douglas High hoping to spread some goodwill and bring much-needed smiles to faces of students and teachers.

He also went to listen — and was impressed by what the kids said.

Speaking Thursday about his surprise visit the previous day to the school in Parkland, Florida were 17 people — mostly students — were shot and killed last month, the Miami Heat guard said he was

stunned to see how well-organized the Douglas students are already in their quest for fast and substantive societal change.

"They are well-prepared and well-aware of what they need to do and what they want to do and the change they want to see," Wade said. "It's great. It's great to hear. It's great to see that, because I come from a community in Chicago where our youth are getting killed daily and don't have the same voice, don't have the same

TENNIS: Indian Wells

Sharapova upset by Osaka in 1st round at Indian Wells

Associated Press

INDIAN WELLS, Calif. — Maria Sharapova's return to the BNP Paribas Open for the first time in three years ended in a 6-4, 6-4 loss to Naomi Osaka of Japan on Wednesday night.

Sharapova's ranking of No. 41 in the world forced her to play a first-round match in the tournament she has won twice. A

failed doping test led to a 15-month ban for the five-time major winner.

She trailed 4-1 in the first set before holding serve at 4-all. But Osaka held to go up 5-4 and broke Sharapova on a double fault to close out the set.

Ranked 44th in the world, Osaka took a 4-2 lead in the second set. Sharapova broke

GOLF: Valspar Championship

Tiger up to the task on tough day at Innisbrook

[MIKE CARLSON/THE ASSOCIATED PRESS]

Tiger Woods hits from behind a tree on the fourth hole during the first round of the Valspar Championship on Thursday in Palm Harbor.

By **DOUG FERGUSON**
Associated Press

PALM HARBOR, — Tiger Woods discovered how tough Innisbrook can be in a swirling wind, and he was up to the task.

Woods smacked his hands into an oak as he let loose of the club during a bold escape from the trees, came within inches of an ace on the next hole, and most importantly was among 27 players — just under 20 percent of the field — to break par Thursday in the Valspar Championship.

Canadian rookie Corey

Conners, who got into the field as an alternate not long after he failed to get through Monday qualifying, didn't make a bogey until his final hole at No. 9 and shot a 4-under 67.

That gave him a one-shot lead over Nick Watney, Whee Kim and Kelly Kraft. Only three other players, including former PGA champion Jimmy Walker broke 70.

Woods made five birdies to counter his mistakes in his round of 70, the first time he broke par in the opening round of a PGA Tour

GOLF: Valspar Championship | Tiger Woods

Tiger shoots 70 thanks to par-saving shot from trees

By **MARK LONG**
Associated Press

PALM HARBOR — Tiger Woods moved spectators and a TV truck, and then warned everybody in earshot. He had no idea what was going to happen with his ball sitting near an oak tree at the par-4 16th.

It turned out to be one of his best shots of the day, a low-running wedge from slippery, fallen leaves that could have broken his club and a few fingers.

It ended up just short of the green, Woods followed with a chip shot to 3 feet that saved par and provided one of the top highlights from the opening round at the Valspar Championship on a blustery Thursday.

It also helped Woods finish at 1-under 70 and three shots back of first-round leader Corey Conners.

“It didn’t feel very good,” said Woods, who let go of the club as it started to wrap about the tree trunk. “I moved all the people even and warned them in case the club breaks and gets over there. I pitched it up the hill and came out nicely.”

More like perfectly. Woods was nearly as good with his next tee shot, a 5-iron to 2 feet on the par-3 17th. He tapped in for a birdie and his best start in nearly three years. It was his first opening

AP PHOTO

Tiger Woods signs photos after the opening round of the Valspar Championship in Palm Harbor Thursday.

round under par on the PGA Tour since a 64 in the Wyndham Championship in August 2015. To be fair, he’s only played six opening rounds since.

Still, there was a lot to feel good about considering Woods remains a work in progress while returning from a fourth back surgery.

Woods is trying to get his game ready for the Masters, and without being eligible for the two World Golf Championships in the spring, he needed a place to play.

Woods captivated thousands with every shot. He had a Sunday crowd — in 50-degree weather and gusting winds — following his every move around the Copperhead course at Innisbrook. Fans lined both sides of every fairway, waiting hours just to get a glimpse

of Woods in his first appearance at the event.

“Golf needs you, baby!” one fan screamed.

“Thanks for coming, Tiger. Please come back next year,” shouted another.

Woods gave them reason to cheer.

His flop shot on the first hole was a thing of beauty and got the round started with a birdie. He drained a downhill, 13-footer for another bird on the par-3 eighth. He got to 2 under after consecutive birdies on 10 and 11, but gave then right back on the next two holes.

He ended the round on a high note with those shots at 16 and 17. He closed with a par after finding the 18th green with a 5-iron from the right rough and then two-putting from 50 feet.

TIGER

From Page 1

event since his 64 in the Wyndham Championship in August 2015 — just six tour events ago because of back surgeries.

This was his first time playing the Valspar Championship, and it got his attention.

“I enjoy when par is a good score. It’s a reward,” Woods said. “There are some tournaments when about four holes you don’t make a birdie, you feel like you’re behind. Today, made a couple of birdies, all of a sudden puts me fourth, fifth, right away. That’s how hard it is.”

It was like for everybody, especially Jordan Spieth and Rory McIlroy.

Spieth, who won at Innisbrook in a playoff in 2015, didn’t make a birdie after the par-5 opening hole and shot a 76. Only six other players had a higher score. Rory McIlroy, who like Woods was making his debut in this event, played in the morning and shot 74.

Henrik Stenson, who played with Spieth and Woods, also shot 74.

Morning or afternoon, it didn’t matter. There was a chill in the Florida air, and the wind made it feel colder. Ultimately, the wind swirling through the tree-lined fairways made it tough to get the ball close.

Innisbrook produced the highest average score for the opening round — 72.86 — of the 23 courses used this season.

UPSET

From Page 1

it 4-all before Osaka won the final two games to end the 1 1/2-hour match.

Sam Stosur overcame a slow start to beat American Lauren Davis 3-6, 6-3, 6-3. Two American teenagers advanced to the

Conners managed just fine, taking advantage of a tournament he wasn’t sure he would be playing. He went through Monday qualifying and shot 71, but moments after walking off the course, he was told he got in as an alternate.

“Kind of had a mindset of trying to take advantage of a good break, I guess,” he said.

Watney holed a bunker shot on the par-4 16th, made the turn and had an eagle on the first hole.

“Maybe I need to steal a few shots here and there and get some good things going,” said Watney, winless since August 2012.

Walker (69) and past Innisbrook champion Luke Donald (70) managed to go bogey-free, a rarity on a day like this. Also at 70 were Justin Rose, Masters champion Sergio Garcia, Adam Scott and Steve Stricker, who won last week on the PGA Tour Champions.

Woods is playing his fourth PGA Tour event since returning from fusion surgery on his lower back, his fourth surgery since the spring of 2014. He has shown steady progress, and this might have been his most steady performance, even with four bogeys. Those were inevitable.

One of the came at the par-3 fourth, when he was fooled by the wind and sent his tee shot sailing. It was next to a tree that Woods had to straddle just to advance toward the green. He also came up well short on the 12th into a strong

second round.

Amanda Anisimova defeated 94th-ranked Pauline Parmentier 6-2, 6-2 for her first WTA Tour victory. The 16-year-old Anisimova, who earned a wild card into the main draw, is the U.S. Open junior champion.

Caroline Dolehide, a

wind.

“Into the wind, it felt like you just hit walls,” he said.

Woods got within two shots of the lead by ripping a long iron from the top collar of a bunker on the par-5 11th and using the slope to chip close for a tap-in birdie. He dropped shots on the next two holes, going short into the wind on No. 12 and over the green with the wind at his back on No. 13.

The only unnerving moment came at the 16th, when he tugged his iron off the tee into the trees. Woods realized he would hit the tree on his follow through, asking the gallery — thousands of them — to be careful in case the club snapped. He had to take it toward the lake on the right and bend it back to the left, and it came off perfectly.

But it looked painful. Because he had to generate so much club speed, his left forearm and hands struck the oak and Woods dropped the club and winced on impact. “It didn’t feel very good,” he said.

Woods followed with a 5-iron that rolled just right of the cup for a tap-in birdie and finished with a long two-putt par after getting fooled again by the shifting wind.

“This is a tough golf course. Not too often in Florida do you find elevation. Great driving golf course,” Woods said. “I asked Henrik, ‘What do you around this golf course when there’s no wind here?’ He said it’s still a hell of a test. We can all see that.”

19-year-old wild card, fired 11 aces in outlasting 78th-ranked Shelby Rogers, 3-6, 7-6 (6), 6-3 in 2 1/2 hours.

Belinda Bencic saved a match point in beating Timea Babos, 1-6, 6-1, 7-6 (4), while wild card Genie Bouchard lost to qualifier Sachia Vickery, 6-3, 6-4.

Senior Virility Pill is “Making Sex Great Again!”

Recent warnings on popular sex drugs leads to a new class of performance pills for men; key ingredients work in the brain and body, enhancing arousal and performance.

Gerry Johnson
Men's Health News

SAN DIEGO,

CA — In 1993, it was Viagra. Then Cialis and Levitra in 2003. And now, in 2018, it’s a new kind of sex pill that’s dominating the male potency market...and users are seeing amazing sexual improvements within days of taking their first dose.

For the first time in years, many adult and senior men are refusing to let premature ejaculation, sexual dysfunction, and low sex drive ruin their sex lives. And without any of the side effects of prescription drugs.

After years of painstaking research, scientists have announced a sexual discovery so radical it could end sexual frustrations within the next 5-years.

And it’s this discovery that’s led to the creation of *PEVarx*, a spectacular new potency pill for men that’s revolutionizing sex as we get older.

“Men can expect major improvements in sexual performance, duration, endurance, mood, and total satisfaction” explains Dr. Henry Esber of Innovos Pharmaceuticals, the company behind the *PEVarx*.

“And that’s because *PEVarx* does what no other sex pill or drug has done before... it increases levels of certain chemicals in the brain that are released during sex.”

“These natural brain chemicals control your sex drive, arousal, and even how long you last before climax. In fact, the duration of sexual intercourse is 2.5X longer for men taking this pill. They love it.”

An Ingenious Approach to Sexual Dysfunction

PEVarx is not another ‘sex pill craze’ that’s in one day and out the other. It’s in a new class of pills that supplies the body with exactly what it needs to perform during sex.

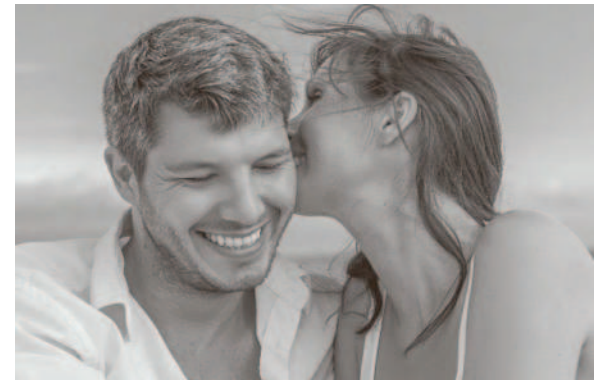

PEVarx contains a special combination of ingredients that have never been blended into a pill. It’s this special mixture that was tested and is responsible for delivering the incredible results in clinical trials..

“To our knowledge, it’s the only drug free pill available that’s proven successful in multiple clinical trials to help men last longer while also improving sexual satisfaction and performance” explains Esber.

Last Longer & Stay Aroused

Ever since the results from *PEVarx*’s most recent clinical went public, the company cannot produce the pill fast enough. Men are eager to get their hands on it and for good reason.

Male participants taking *PEVarx* were able to last 250% longer during sex. For many, this lead to better satisfaction,

LAST LONGER, ENJOY MORE EXCITING SEX: *PEVarx* is helping thousands of men overcome PE. The results are improvements in stamina, satisfaction, and sexual performance.

arousal and performance.

Unlike drugs with dangerous side effects or sprays and creams that work by reducing feeling in the penis and even pills that try to make you less depressed, *PEVarx* helps men stay excited by supporting the pathways in the body responsible for peak sexual performance and pleasure.

PEVarx contains a unique and patent pending amino acid blend and two patented absorption enhancers for maximum efficacy and potency. It’s both safe and healthy.

This special formulation acts on both the brain and body to delay climax, improve endurance and boost sex drive.

Men Say “Yes!”

“Even more remarkable, many of the men using *PEVarx* answered “YES” to the following questions after completing the trial.

More confidence in getting and keeping an erection?
- **YES!**

Were they stronger and harder for penetration?
- **YES!**

Were you better able to keep an erection during penetration?
- **YES!**

Was it less difficult to keep an erection?
- **YES!**

When you attempted intercourse, was it better?
- **YES!**

Backed By Real Clinical Trials

The effects of *PEVarx* were studied in a multicenter, observational study in men with sexual dysfunction. 665 adult men with sexual disorder were given two capsules of *PEVarx* twice daily for two months and the results were stunning.

The average duration of sexual intercourse in PE patients increased 2.5 times.

Even better, users also reported significant improvements in virtually all areas of the International Index of Erectile Function test including the ability to get and keep a hard, firm erection during sex.

With clinical results like this, it’s easy to see why sales for *PEVarx* are soaring.

The Way It Works Is Remarkable...

PEVarx is taken just once daily. The pills are small and easy to swallow. There are no harmful side effects and it does not require a prescription.

PEVarx contains a unique combination

of amino acids that promote syntheses in the hormones responsible for peak sexual performance and stamina in men.

PEVarx works to delay climax by promoting serotonin syntheses, the male hormone responsible for controlling ejaculation and prolonging the duration of sexual intercourse.

Leading to increased sex drive and higher levels of sexual pleasure, duration, and stamina.

When all of the possible benefits of this remarkable new sex pill are considered, it’s no wonder thousands of men can’t wait to get their hands on *PEVarx*.

Supported By The Medical Community

“*PEVarx* has an amazing affect on all men. I would highly recommend *PEVarx* for biological and physiological issues tied to sexual health.”

“The studies show dramatic improvements in sexual performance, sexual duration, and satisfaction in both adults and seniors.”

“*PEVarx* users are more easily aroused and have a much stronger desire and interest in sex. And in addition to sexual endurance, men say they are much happier with their erection when taking the pill.”

“It’s a truly amazing breakthrough for men. It’s easy to use, convenient, safe, and effective.” Dr. Henry Esber, Ph.D. San Diego, CA

Where to Find *PEVarx*

This is the official release of *PEVarx*. As such, the company is offering a special discounted supply to any local reader who calls within the next 48 hours.

A special hotline number and discounted pricing has been created for all Florida residents. Discounts will be available starting today at 6:00AM and will automatically be applied to all callers.

Your Toll-Free Hotline number is 1-800-236-6505 and will only be open for the next 48 hours. Only a limited discounted supply of *PEVarx* is currently available in your region.

Consumers who miss out on our current product inventory will have to wait until more becomes available and that could take weeks. The company advises not to wait. Call 1-800-236-6505 today.

These statements have not been reviewed by the U.S. Food and Drug Administration. These products are not intended to diagnose, treat, cure or prevent any disease. *PEVarx* is not a drug. Results based upon averages. Models are used in all photos to protect privacy.

NFL: Dolphins

Landry signs \$16M franchise tag

By STEVEN WINE
Associated Press

MIAMI — Jarvis Landry is now under contract with the Miami Dolphins, easing the path to a potential trade.

The three-time Pro Bowl receiver signed his \$16 million, one-year franchise tag Thursday, a person familiar with the situation said.

The person confirmed the signing to The Associated Press on condition of anonymity because the Dolphins hadn't announced it.

The Dolphins have been shopping Landry, and the procedural move allows them to trade him as early as next Wednesday, when the NFL's new year begins.

Miami gave Landry the franchise tag last month. He made \$894,000 last season, when he led the NFL with 112 catches.

Landry has said he wanted to remain with the Dolphins, and they said they wanted him back. But the parties have been unable to reach an agreement

Miami Dolphins wide receiver Jarvis Landry (14) runs away from Kansas City Chiefs defensive back Steven Nelson (20).

AP PHOTO

on a long-term deal, and Landry's volatile personality has become a cause for concern in Miami.

The franchise tag

allows Landry to sign an offer sheet with another team. The Dolphins could match that offer, and if Landry leaves, they would receive two

first-round picks from his new team.

More likely is another team working out a contract extension with Landry and then trading

for him. He has been selected to three consecutive Pro Bowls and has 400 career receptions, a record for a fourth-year player.

NFL: Bengals
Bengals sign Chris Baker to 1-year dealBy JOE KAY
Associated Press

CINCINNATI — The Bengals signed defensive tackle Chris Baker to a one-year deal on Thursday, their first free agent acquisition on defense under new coordinator Teryl Austin.

Baker played with Tampa Bay last season after spending six seasons with Washington and one each with Miami and Denver.

The Broncos originally signed him as an undrafted free agent from Hampton.

The ninth-year veteran has started 53 games in the past four seasons. He has 12 career sacks.

He'll get a chance to become part of the Bengals' rotation on the defensive line. The defense finished 18th in the NFL in yards allowed last season under coordinator Paul Guenther, who left for the Raiders after the season.

NBA: Timberwolves

Rose signs with Minnesota, reunites with Thibodeau

By TIM REYNOLDS
Associated Press

For Derrick Rose, what's old is new again.

Rose has signed with the Minnesota Timberwolves in a move that reunites the 2011 NBA MVP with three mainstays from his days in Chicago — coach Tom Thibodeau, as well as Jimmy Butler and Taj Gibson. The Timberwolves did not release the terms, but a person familiar with the situation told The Associated Press that the deal is for the remainder of the season.

Rose may debut as early as Thursday night, when Minnesota plays host to Boston.

"The only thing I'm missing now is the opportunity," Rose told reporters in Minnesota on Thursday. "Talking to Thibs, he sounds like he's going to give me the opportunity, so it's all about learning the guys and fitting in at the right time."

Minnesota will be the fourth team Rose plays for, and technically his fourth franchise in the last 11 months. Rose spent his first eight NBA years in Chicago, five of those with Thibodeau

Cleveland Cavaliers' Derrick Rose (1) passes during the second half against the Oklahoma City Thunder in Cleveland.

AP PHOTO

as his coach. He was with New York last season and started this season with Cleveland, but appeared in only 16 games with the Cavaliers largely because of injuries.

"We just thought he could help the team," Thibodeau said. "That's what our expectations are: come in, be a good teammate, try to help us win. ... He's been around, he's been in a

lot of games. I think he's seen a lot of different things, he's a familiar with what we're doing, he's played with some of the guys we have. So that's a plus."

The Cavaliers traded the former All-Star to Utah last month as part of the massive restructuring of their team, and the Jazz waived him shortly afterward.

Rose has been working out since, and this week

became a father again — just three days before completing the deal with the Timberwolves, who were willing to wait for his new daughter to arrive before asking him to make the move.

"I think I'm familiar with a lot of guys that's here," Rose said. "Just staying ready and coming here and trying to make it to the playoffs and I feel like I can help in some way."

Miami guard Dwyane Wade, who was teammates with Rose earlier this season in Cleveland, said he expected Rose and Thibodeau would reunite — and insisted the 29-year-old guard still, when healthy, can be elite.

"He was the best player in training camp," Wade said, noting that LeBron James was hurt for most of Cavs camp last fall. "It's always been about health with D-Rose."

Rose took some time off earlier this season to evaluate his options. He's joining a Timberwolves team bidding for its first postseason trip since 2004, and entered play Thursday holding the sixth seed in a very close Western Conference race — where four games separate the eight teams from third place to 10th.

He said he isn't worried about role, and said he can fit in alongside fellow Wolves point guards Jeff Teague and Tyus Jones.

"I think I can play with anybody, to tell you the truth," Rose said. "I know the game. I'm not a selfish player. I'm not here for stats or anything like that. I just want to win and help this team and franchise win."

IN BRIEF

TULSA, OKLA.

4 football players plead not guilty

Four former high school football players charged with sexually assaulting a teammate in Oklahoma have pleaded not guilty to second-degree rape.

The Bixby High School students entered their pleas Wednesday, The Tulsa World reported.

The 16-year-old victim told investigators he was assaulted with a pool cue during a team dinner in September at the home of the school district's former superintendent.

JOHANNESBURG

Triathlete recovering from saw attack

A South African triathlete who suffered severe injuries when attackers cut his legs with a saw says he will focus on recovery so he can run and cycle again, South African media reported Thursday. Athlete Mhlangi Gwala told News24 media that he panicked when several attackers pulled him off his bicycle and started cutting his leg, manually using the blade of a chainsaw after it malfunctioned.

Associated Press

WADE

From Page 1

same light on them that Parkland has. These kids understand what they have."

Numerous students posted video and photos of Wade's visit on social media. Only a few of Wade's closest advisers were aware of his plan to go to the school Wednesday in advance, and students made clear his visit provided a huge emotional lift.

"Greatest moment of my life," student Joey Pelose said of the Wade visit.

Wade's family has been touched multiple times by gun violence, including when his cousin — a mother of four — was shot and killed on a Chicago street in 2016, with police saying she was not the intended target.

The shooting in

Parkland has affected him deeply as well, not just for the school's proximity to Miami and to a school that one of his sons attends, but also because one of the victims was buried in a Wade jersey. Wade has also met with the family of that teen, Joaquin Oliver, and promised them that he would keep using his voice to help facilitate change.

"It's a call to action for all of us and we're honored to be just a small part of it to support them — and hopefully give them all a much bigger megaphone," Heat coach Erik Spoelstra said. "We can help with that, but what bigger megaphone can you have than Dwyane Wade going down there and allowing their voices to be heard so many other places. That's powerful."

Wade's visit was one of several examples of how

the sports world keeps trying to help the school heal.

Major League Baseball teams all wore Stoneman Douglas hats in their spring-training openers. Last week, a contingent of representatives from the Heat (including Spoelstra and players Udonis Haslem, Justise Winslow and Kelly Olynyk, plus Haslem's wife Faith), the Florida Panthers, the Miami Marlins and Miami Dolphins all privately met with five families of students who were wounded in the Feb. 14 massacre to offer help.

Earlier this week, the Panthers arranged for the school's hockey team to hoist and skate with the Stanley Cup.

"We know we did the right thing," said Panthers executive Shawn Thornton, who helped arrange the Cup visit.

And Wednesday night,

when the U.S. women's national soccer team beat England 1-0 to win the SheBelieves Cup tournament in Orlando, Florida, the match was preceded by a moment of silence for Douglas soccer player and shooting victim Alyssa Alhadeff. Her family and teammates all received U.S. jerseys with Alhadeff's name and number on them.

"Just when I think there are no more tears to cry," student Aly Sheehy wrote on Twitter in response to the gesture at the U.S.-England match. "Thank you ... for allowing us to come and heal."

Florida lawmakers earlier this week passed a school safety bill with new restrictions on rifle sales and a program to arm some teachers, though it remains unclear if Gov. Rick Scott will sign the bill — which has the support of victims' families — into law.

Tampa Bay Lightning center Anthony Cirelli (71) celebrates his goal against the New York Rangers with left wing Adam Erne (73) during the second period Thursday.

AP PHOTO

LIGHTNING

From Page 1

replaced by Alexander Georgiev, who made 13 saves. Paquette and Erne scored during Tampa Bay's dominant

first period, and Cirelli made it 3-0 just 1:53 into the second.

After Spooner cut it to 3-1, Kunitz chased Lundqvist and Johnson got to Georgiev to make it 5-1 by the end of the period.

MLB: Marlins

Top prospect Brinson off to fast start this spring

By STEVEN WINE
Associated Press

JUPITER — Lifelong Marlins fan Lewis Brinson is eager to see his team make the playoffs, and not just because he missed the end of their most recent postseason game.

Brinson was 9 when the Marlins won the 2003 World Series, with Josh Beckett shutting out the New York Yankees in Game 6 to clinch the championship.

"I tried to stay up," Brinson said. "I feel asleep in the seventh inning, and my mom told me they won the next morning."

The Marlins haven't been to the postseason since, the National League's longest drought. Odds are long it will end this season as the Marlins begin their latest reboot, a makeover that happens to include Brinson.

He's likely to be the opening day center fielder.

"I love being part of the rebuild," Brinson

said, "and hopefully taking this team to a new level and new heights — to put the Marlins back in the map."

He grew up in South Florida and returns home as the most highly regarded prospect acquired by the Marlins during new CEO Derek Jeter's offseason roster breakup. Brinson came to Miami in the trade that sent left fielder Christian Yelich to the Milwaukee Brewers, and the youngster's fast start in spring training is an encouraging development for a franchise desperately needing such signs.

"I know I can hit up here," he said. "I can hit for average. I can hit for power and do it consistently."

In the first 10 games of spring training, Brinson went 9 for 22 (.409) with five doubles and a mammoth home run.

"I like Lewis from the standpoint of adjustments," manager Don Mattingly said Thursday. "That has probably been the most

impressive thing. You'll see one at-bat that looks bad. Next at-bat, the guy tries to get him again with the same pitch, and he lays a hit out there. ...

"His work is kind of different from a young guy that's trying to show you he can hit the ball out of the ballpark every time."

Brinson batted .331 last year for Triple-A Colorado Springs, and he has 89 homers and 96 stolen bases in six minor league seasons. But he flopped in a brief 2017 tryout with the Brewers, batting .106 with only five hits and 17 strikeouts in 47 at-bats.

He says he was nervous and too eager, and is confident he's ready for major league pitching. So are the Marlins, who don't believe the 23-year-old Brinson needs more time in the minors.

"He had a tremendous Triple-A season," president of baseball operations Michael Hill said, "so I don't know how much is there left for him to prove."

Plus the Marlins need

outfielders after trading away all three starters — Yelich, Marcell Ozuna and major league home run leader Giancarlo Stanton. As a sign of their faith in Brinson, they awarded him uniform No. 9. It belonged to his favorite player, Juan Pierre, the center fielder on the 2003 World Series team and now a team instructor. Brinson has fond memories of sitting in the outfield stands that season.

"I wouldn't even watch the game. I would just watch Juan Pierre," he said. "I'll wear his number with pride."

The Marlins hope it will again become a fixture in a championship lineup.

Texas Rangers third baseman Adrian Beltre, center, chases Chicago White Sox's Jacob May, right, in a rundown before tagging May out as Rangers catcher Juan Centeno, left, looks on during the third inning Thursday in Surprise, Ariz.

Rays battle Red Sox to 6-6 tie

Associated Press

Boston's J.D. Martinez had three hits, including an RBI double, while Xander Bogaerts added two hits and also had a run-scoring double.

Adeiny Hechavarria singled twice and drove in a run for the Rays. Tampa Bay ace Chris Archer allowed two runs and five hits in three innings.

AROUND THE GRAPEFRUIT AND CACTUS LEAGUES

BLUE JAYS 9, ORIOLLES 3

Vladimir Guerrero Jr. had four singles in his spring training debut for the Toronto Blue Jays, a 9-3 win at the Baltimore Orioles on Thursday. The 18-year-old third baseman, whose father Vladimir will be inducted into the Hall of Fame this summer, signed with Toronto in July 2015 for a \$3.9 million bonus.

NATIONALS 8, METS 5

Noah Syndergaard struck out his last seven batters, allowing two hits over 3 1/3 scoreless innings in his third start for New York. He struck out the side in consecutive innings, including Trea Turner, Bryce Harper and Anthony Rendon in the third.

PHILLIES 7, YANKEES 6

Luis Severino allowed an unearned run over 3 1/3 innings in his first start, Didi Gregorius hit a two-run homer and Giancarlo Stanton had a two-run single.

CARDINALS 5, MARLINS 4

St. Louis ace Carlos Martinez made his second start, allowing one run and five hits in four innings while striking out four. Miami No. 2 starter Jose Urena made his second start, giving up one run and two hits in three innings. Derek Dietrich had two hits and an RBI for the Marlins.

PIRATES 8, TIGERS 3

Jordan Zimmermann gave up three runs and five hits in 3 1/3 innings, striking out five. David Freese hit his first home run, a two-run drive off Zimmermann. Francisco Cervelli had two hits for the Pirates.

ASTROS 6, BRAVES 4

Scott Kazmir made his third start for the Braves, giving up two runs and four hits in three innings. Ender Inciarte had two hits and walked leading off for Atlanta, while Dansby Swanson went 0 for 2, dropping his average to .182.

CUBS 10, PADRES 4

Ben Zobrist had his first hit after a late spring training start and scored a run for Chicago. Ian Happ, batting .429, had an RBI triple and scored.

RANGERS 5, WHITE SOX (SS) 4

Chicago ace James Shields allowed one run and three hits over four innings in his spring training debut.

ROYALS 12, WHITE SOX (SS) 0

Whit Merrifield tripled and doubled, driving in two runs for Kansas City, while Jorge Soler hit his fourth home run, a solo shot.

DIAMONDBACKS 11, BREWERS 6

Manny Pina hit his first two home runs and had three hits and four RBIs for Milwaukee. Steven Souza Jr. had his first two hits and drove in three runs for the Diamondbacks.

ATHLETICS 7, ANGELS 3

Oakland ace Kendall Graveman allowed three hits, three hits and two walks in 2 2/3 innings, leaving his ERA at 12.00.

MLB: Orioles

Bundy, Gausman lead Orioles pitching rotation this season

Associated Press

SARASOTA — Right-handers Dylan Bundy and Kevin Gausman remain the Baltimore Orioles top two starting pitchers — for now.

When the Orioles opened spring training, they were the team's only accomplished starters in their rotation. Baltimore has re-signed Chris Tillman and added Andrew Cashner to the starting staff, but Bundy and Gausman are the team's aces.

Bundy and Gausman have been grouped together. They were the fourth overall picks in consecutive drafts — Bundy in 2011 and

Gausman in 2012.

Though Bundy got to the big leagues first, in September 2012, injuries kept him from returning until the beginning of the 2016 season. By then, Gausman had already spent parts of three seasons in the major leagues.

Last year, Bundy surpassed Gausman on the mound, with a 13-9 record and a 4.24 ERA, and tossed a one-hit shutout against the Seattle Mariners, striking out 12.

"I don't think he ever takes anything for granted," Baltimore manager Buck Showalter said of Bundy. "He's trying to work on some

things. I don't think he's ever going to get comfortable and think he's got it all figured out."

Bundy has pitched in two Grapefruit League games, allowing 10 runs in 4 1/2 innings, and on Wednesday threw four innings in a simulated game.

"I look at it is that it's just the first two outings of spring, and I'm getting back in the swing of things, but I don't like giving up hits and hit batters and homers and stuff like that," Bundy said after his second start on March 2. "Just mainly getting the arm in shape to go five, six, seven innings is the goal here."

Your '60s - '80s Rock 'n Roll favorites with California Toe Jam LIVE in concert!

**Thursday, April 12, 2018
Venice Community Center**

The ingredient for this well loved band must be because of their time together. 33 years, with no end in sight, honing their seemingly endless song-list from the '60s-'80s rock 'n roll era has made California Toe Jam band one of Florida's most celebrated bands for over three decades. **Don't miss out, get your tickets now!**

How to read the stock tables

1	2	3	4	5	6	7	8	9	
Name	Ticker Symbol	Div	Yield	PE	52-week High Low	Vol	1000s	Last	YTD %Chg
XYZcorp	XYZ	1.20	3.6	17	34.09 27.27	2780	33.72	+20.7	

- 1 — Name of stock.
 - 2 — Ticker Symbol company trades under.
 - 3 — Dividend: A distribution of the company's earnings to shareholders, usually consisting of stock dividends, interest on bonds, or short-term capital gains on the sale of securities usually paid quarterly in the form of cash or stock.
 - 4 — Div. Yield: The dividend divided by the stock price. It helps gauge how well the stock is paying, compared to other investments such as CDs, bonds or savings accounts.
 - 5 — Price to earnings ratio: The price of a stock divided by its earnings per share. PEs are used to gauge the relative worth of a company's stock. When compared to other companies in the same industry, the companies with the lowest PEs are generally earning higher profits.
 - 6 — Range of closing prices in last year.
 - 7 — Sales in thousands (10 = 10,000 shares), and closing price.
 - 8 — Last trading price of the day.
 - 9 — Percent change for the year.
- ▲ Arrows, indicate new highs or lows.
Underline: indicates top 100 stocks by volume rank.
Bold stocks, designates which stocks have gone up or down 5%.

Money Market Funds

Table of Money Market Funds with columns for Fund, 52-Wk High Bid, 52-Wk Low Bid, Avg Yld, and similar metrics for various funds like SEI DIT MMC, US Treas Tr, BBH TxE, etc.

Toronto stocks

Table of Toronto stocks with columns for Name, Vol, High, Low, Last, Chg, and similar metrics for various companies like AlGI Food, ARCRResources, AgnicoEagle, etc.

Treasury bonds

Table of Treasury bonds with columns for Rate, Date, Bid, Ask, Chg, Yld, and similar metrics for various bond issues like U.S. Treasury Bonds and Notes.

FOOTNOTE: Rate-The annual interest rate the Treasury bond provides to investors. Date-The month and year the bond will expire. Bid-The price investors will pay for the bond. Ask-The price at which investors will sell. A bond price is expressed as a percentage of its original purchase cost of \$1,000. The whole numbers and the decimals which represent 32nds of a point must be converted to dollars and cents; for example, 103.18 equals \$1,035.63. Chg-The change between the preceding day's final bid price and the final bid price from the day before. Yld-The annual percentage return to the investor, based on the bond's current price, if the bond is held until it matures. K-Taxes on interest will not be withheld from non-U.S. citizens. n-Treasury note. p-Treasury note; taxes on interest will not be withheld from non-U.S. citizens.

Mutual Funds

Table of Mutual Funds with columns for Name, Obj, NAV, 4-wk Rtn, YTD Rtn, 3-yr Rtn/Rk, and similar metrics for various funds like AAM IngtSelncl d, AAIMkTRet1 b, etc.

How to Read the Mutual Fund Tables

Here are the 4,300 biggest mutual funds listed on Nasdaq. Tables show the fund name, sell price or net asset value (NAV), daily net change and weekly net change. Underlining highlights the funds ranked in the top 20% in each of the last 5 years:

Name: Name of mutual fund and family. Obj: The fund's objective group. Abbreviations listed below. NAV: Net asset value. Chg: Net change in price of NAV from previous day. Rtn: The fund's total return, or percent change in NAV for the time period shown, with

Footnotes: e - Ex capital gains distribution. f - Previous day's quotation. n - No front end load or contingent deferred sales load may apply. p - Fund assets are used to pay for r distribution costs: 12(b)(1) plan. r - Redemption fee or contingent deferred sales load may apply. s - Stock dividend or split. t - Both p and r. x - Ex cash dividend d. NA - not available.

Fund Objectives: AL: Allocation - 70-85% Equity, AM: MultiAlternative, BL: Bank Loan, BM: Bear Market, CA: Allocation - 30-50% Equity, CC: Consumer Defense, CD: Consumer Cyclical, CH: China Region, CI: Intermediate-Term Bond, CL: Long-Term Bond, CR: MultiAlternative, CS: Short-Term Bond, CV: Convertibles, DP: Diversified Pacific/Asia, EB: Emerging-Markets Bond, EE: Equity Energy, EI: India Equity, EM: Diversified Emerging Markets, ES: Europe Stock, FA: Foreign Small/Mid-Value, FB: Foreign Large-Blend, FF: Managed Futures, FG: Foreign Large-Growth, FO: Foreign Small/Mid-Blend, FR: Foreign Small/Mid-Growth, FF: Foreign Large-Value, FX: Foreign Currency, GI: Intermediate Government, GL: Long Government, GR: Global Real Estate, GS: Short Government, HM: High-Yield Muni, HY: High-Yield Bond, IB: World Bond, IC: Trading-Inverse Commodities, ID: Industrials, IE: Trading-Inverse Equity, IH: World Allocation, IP: Inflation-Protected Bond, IS: Trading-Miscellaneous, JS: Japan Stock, LB: Large Blend, LC: Trading-Leveraged Commodities, LE: Trading-Inverse Equity, LG: Large Growth, LO: Long-Short Equity, LP: Energy Limited Partnership, LS: Latin America Stock, LV: Large Value, MA: Allocation - 50-70% Equity, MB: Mid-Cap Blend, MG: Mid-Cap Growth, MI: Muni National Intermediate, ML: Muni National Long, MQ: Miscellaneous Region, MR: Miscellaneous Sector, MS: Muni National Short, MU: Multi-Sector Bond, MV: Mid-Cap Value, MY: Muni New York Long, ND: Trading-Inverse Debt, NE: Market Neutral, NT: Nontraditional Bond, PJ: Pacific/Asia ex-Japan Stock, RI: Target-Date Retirement, RR: Preferred Stock, SB: Small Blend, SC: Communications, SF: Financial, SG: Small Growth, SH: Health, SI: Muni Single State Intermediate, SL: Muni Single State Long, SN: Natural Resources, SP: Equity Precious Metals, SR: Real Estate, SS: Muni Single State Short, ST: Technology, SU: Utilities, SV: Small Value, TA: Target-Date 2000-2010, TD: Target-Date 2015, TE: Target-Date 2020, TG: Target-Date 2025, TH: Target-Date 2030, TI: Target-Date 2035, TJ: Target-Date 2040, TK: Target-Date 2045, TL: Target-Date 2055, TN: Target-Date 2050, TV: Corporate Bond, TV: Tactical Allocation, UB: Ultrashort Bond, VD: Trading-Leveraged Debt, VL: Stable Value, VO: Volatility, WS: World Stock, XM: Allocation - 85% Equity, XO: Infrastructure, XQ: Target-Date 2060+, XR: Option Writing, XS: Long-Short Credit, XP: Emerging-Markets Local-Currency Bond, XY: Allocation - 15-30% Equity. Data based on NAVs reported to Morningstar by 6 p.m. Eastern.
