Honoring Veterans

Kwajalein Pipes and Drums members play outside the Island Memorial Chapel during Veterans Day services Thursday. Kwajalein residents turned out in force to honor veterans during the ceremonies. Complete coverage of Veterans Day events will follow in Tuesday's Hourglass. (Photo by Jim Bennett)

Testing the waters

Teams gather for environmental studies

Story and photos by Jim Bennett

When 5.32 inches of rain fell the last week of October, some TDY guests on Kwajalein smiled. It made their jobs easier.

“We were fortunate with all this rain,” said Brian Sherman, an environmental engineer with the U.S. Army Center for Health Promotion and Preventive Medicine at Aberdeen Proving Grounds in Maryland (CHPPM). “We had an abundant amount this time.”

Sherman is leader of a five-man team testing stormwater run-off and wastewater on Kwajalein, Meck and Roi-Namur, and his is only one of three teams testing various aspects of the Atoll environment these past few (See WATER, page 4)

FAP delegates tackle topics for Kwajalein, Roi

By Peter Rejcek

Power to the people!

Well, last week’s conference of the Kwajalein Family Action Plan (KFAP) may not have exactly been a 1960s counterrevolution, but ordinary residents did have the opportunity to effect change in the community.

“What we’re basically looking at is quality of life issues to improve the community,” 1st Sgt. Ozell Robertson told delegates as the two-day conference began last Friday morning.

Bachelors and family members from Kwaj and Roi-Namur were among the 13 delegates who participated in KFAP. Their charge: To identify issues in the community — from medical to social to family — and offer solutions. A similar conference, (See FAP, page 2)

Brian Sherman, left, and Paul Rankin use the “clean” method for collecting water samples. The method allows laboratories to test the samples to parts per trillion.
FAP focuses on issues vital to the community...

(From page 1)

the first of its kind for USAKA/KMR, was held in July.

"We have made some good progress," Col. Gary K. McMillen, USAKA/KMR commander, told the delegates during a briefing on Friday morning. Construction of a $3.7 million infant daycare center, while already in the works as part of an Armywide initiative, was one result of the July meetings. Improvements in the areas of communication and travel were also KFAP issues that have been or are being addressed.

This time around, delegates presented the commander with a total of 13 issues. The top three were expounded on in detail as the conference wrapped up Saturday morning.

The top three issues included:

• New Roi-Namur Chapel. According to Roi residents, who accounted for five of the 13 delegates, the chapel building near the airport terminal is in severe disrepair.

"I think that was a good one this group pulled out," said McMillen, adding he had not been aware of any problems with the building.

"This avenue of communication is probably a good reason to have these types of meetings," he observed.

• Computerized medical/dental insurance claims. Many of the construction employees who use medical services here must pay for some of those services out-of-pocket before insurance companies will reimburse patients. Delegates said they felt a computerized system would streamline the process and cut costs for patients.

• Airfare for unaccompanied personnel. Delegates suggested allowing unaccompanied personnel an additional round-trip ticket to a gateway city as an incentive to retain employees without families.

McMillen said the airfare suggestion was more of a contractor issue but promised to present it to the companies.

"We'll address it and raise it up," he said.

A project officer will be assigned to those top three issues. Action can take anywhere from six months to a year, Robertson explained in an Oct. 26 story on FAP. The results will then be publicized in The Hourglass and through town hall meetings on Kwaj and Roi.

Other issues discussed by the delegates, who had split into three groups during the conference, included everything from the need for a family-style restaurant to tackling teen-age prostitution to repair of recreational facilities.

Delegates also identified what current services were indispensable and which ones could be sacrificed if the need should arise. While no immediate cuts are planned, McMillen explained he wanted input from the community if budget constraints forced him to trim services.

Recreational services, such as golfing and marina activities, were at the top of the essentials list. Most of those services, however, are paid by retail service dollars, such as from items bought at Macy's.

Also listed as critical to the community: movie theaters, chaplain services and communication.

McMillen said he is committed to keeping Kwaj linked to the outside world through more telephone lines and Internet improvements, as well as keeping the atoll current on technology.

"The world is going to stay connected. We need to stay connected," he said. "Communication will continue to expand out here."

Among the services that delegates said could be sacrificed: Taxi and rental vehicle service and the Emon Beach snack bar. Delegates also suggested consolidating Ten-Ten and Surfway as a means to save money.

As the meeting drew to a close, McMillen offered his appreciation to the delegates but expressed disappointment the teen-age population had not been represented at the meeting.

"It's important for the kids to learn how the island works," he said.

Delegate Daryl McKinley noted the two-day conference was also an important way for residents to have a voice in their community.

"If you're trying to make it better, then your complaint is a justifiable complaint," McKinley said. "I come to meetings like this all the time."

Range mission scheduled for Saturday

A range operation is scheduled for Saturday, Nov. 13, at 8:01 p.m. In conjunction with this operation, a caution area will exist within the Kwajalein Atoll. See Tuesday's Hourglass for caution area boundaries.

In order to ensure clearance of non-mission support personnel from the mid-atoll corridor by the window opening time, Kwajalein Police Department island clearance procedures will begin at approximately 7:30 a.m. Wednesday, Nov. 10, and continue until evacuation has been completed.

Egress of all air and sea craft will be required when requested by authorized personnel. Subsequent to lagoon clearance, the hazard will be in effect until mission completion.
Teamwork supports safe fuel transfer

Rough lagoon conditions destabilize tank on barge

By Carol Sword

The morning of Oct. 29 on Roi-Namur started out like any other until a call came in around 11 a.m. telling of an accident involving 5,000 gallons of fuel.

Walt Clark at Roi Supply was first notified by Kwaj Harbor Control that because of rough conditions in the lagoon, a 5,000-gallon tanker of MO-GAS had become unstable and collapsed to the deck of a barge. At the time, it was unknown if a spill had occurred and whether it had impacted the rest of the cargo.

Key personnel were notified of the impending emergency, and a meeting was held in the island manager’s office to discuss the safety and environmental concerns.

In the first phase of the plan, the Kwajalein Police Department contacted the tugboat captain to request he hold position at the two-mile marker south of the Roi Fuel Pier. All personnel were then evacuated from the pier area.

“As the Bravo team leader, I was responsible for clearing the area 1,000 feet around the Roi Fuel Pier,” said Clark, supervisor of supply and transportation.

Two fire trucks were on standby while police established a no-entry zone. “The fire department was on hazardous condition standby status,” Assistant Fire Chief Mike Phillip said.

Meanwhile, a Search and Rescue (SAR) boat rendezvoused with the tugboat, and the response team assessed the situation.

Although the supporting legs had collapsed, the tanker was still intact. An inspection revealed no leaks, but there was structural damage to the tanker itself.

Once the decision was made to dock the barge at Roi, Kwajalein police officers and the Bravo team prepared to deploy the boom, if necessary, in order to protect the beach. Joe Ingvalson, senior environmental engineer, said he was concerned with environmental damage due to a possible leak.

“Fire was an even greater threat because gasoline is so volatile,” Ingvalson said.

By the time the barge entered port and docked at the fuel pier, Joe Woods, superintendent of Roi-Namur power plant, and the rest of the Bravo team were assembled at the fire station in the event of a spill during the transfer process. Clark and fire department personnel assisted the vessel’s crew in securing the barge at the pier. Automotive personnel then brought a 2,000-gallon-capacity fuel truck to pump fuel from the damaged tanker.

“There was a tense moment when I had to start the engine on the pump,” said Phillip Smith, Roi automotive supervisor. “Any spark could have ignited the fuel.”

When 2,500 gallons had been pumped, a 15K forklift was used to crib up the front end of the tanker so the remaining fuel could be safely pumped out. This procedure was done slowly and carefully.

“The emergency response training really paid off,” Smith said. “I’m particularly grateful to my automotive employees, Nathan Rubon and Belsa Aneo, plus Russell Ilg and the heavy equipment personnel, Ritho Konijen, Bilet Damon, Jerok Abraham, Rittle Tatios and Randall Taidrik, for working with me in the heavy wind and rain to get the job done.”

It took three trips to safely store all the fuel, which delayed off-loading operations for the barge until the following day. But Roi FOM heavy equipment personnel removed the empty MO-GAS tanker from the barge the next morning, and the vessel was reloaded and cleared for departure by 1 p.m. that same day.

“This would not have been possible without the cooperation, support and coordination of the personnel of all departments involved,” Clark said.

Dwight Stevenson, occupational health and safety technologist, agreed the emergency response had been a success.

“Everyone involved worked together to ensure a safe resolution to this event,” Stevenson said. “While this event was unfortunate, the systems we have in place to respond to situations such as this worked excellently.”
Water studies focus on storms, waste and clams?

(From page 1)

weeks. The CHPPM teams consist of contractors, Department of Defense civilians and service members whose job is to determine what pollutants exist in the water, including waste, storm and drinking water.

Wasted Away in Kwajalein

Parking at the Kwajalein landfill, Sherman; Lt. Greg O’Brien, an environmental science officer; and Paul Rankin, an environmental engineer climbed out of their van with the large tan keg-like contraption. Clouds overhead signalled a recent storm and the group carefully negotiated the wide stream of water flowing through the dump towards the ocean.

“We start work when it’s dark, and finish up when it’s dark,” Rankin said.

The stream converged within a line of sandbags, but continued to flow through a 12-inch-square opening in the man-made wall, called a flume. That’s where Sherman set the tube-sampler attached to the contraption. The contraption automatically sucked out preset amounts of water on a timed basis, giving testers an idea of what pollutants were being released into the ocean through storm water runoff.

But if there’s no storm, there’s no storm water, so the team depends on the weather and local weather forecasters.

“We were on-call with Aeromet if there was a storm coming in,” Sherman said.

Where the automatic machine can’t be used, the team collects water by hand using a triple-bag “clean” method that all but eliminates contamination of the samples.

That cleanliness is vital for the labs that later test the water to a parts per trillion level. Samples are tested for metals, nutrients (nitrates, phosphorus, ammonia and total nitrogen), semi-volatile organic compounds, volatile organic compounds, pesticides, PCBs, cyanide and total suspension solids, to name a few.

The team worked 17 such storm water points on Kwaj, Meck and Roi-Namur.

After the sampling, the team traveled to the waste water facility, where they dropped a cylinder attached to another barrel sampler into the rushing water being treated.

“The water here is very clear, but then that’s probably because a lot of it is reclaimed,” Rankin said.

No Clambake

Where the storm water flows out into the ocean, below the surface, is where you would find Colleen Fennessy, Jennie Roe and Lt. Col. Dan Sheehy.

The team used clams set in specific points around Kwajalein to test the effects of pollutants in the waters around Kwajalein, specifically two stations off the landfill and one in the harbor, where they most expected to find pollutants. A fourth station, set between Bigej and Meck islands, served as a reference point, where the group expected to find little pollution.

Clams reveal pollution in the water because they feed by forcing water through their bodies. Any pollution in the water is filtered out and remains in the clam tissues.

“They’re a fatty animal too,” said Fennessy, the project manager. “And they put a lot of water through them,” added Sheehy, an environmental science officer.

But this month’s collection of clams follows some time of preparation. The clams were set in place in July and August. That allows the clams to take three months of readings, rather than short-term episodic readings, Sheehy said.

To perform the study, the group obtains the clams from a hatchery in Majuro. Because they come from a hatchery, they are not of the protected Giant Clam variety. Also, they come in a uniform size and background, so as to maintain scientific integrity. Clams are brought in, attached to concrete trays and put in black plastic protective cages. The team must then scuba dive to the site and place the cages where they’re needed. Sometimes drilling and attaching a pin into the coral to hold the cage in place.

“In the shallow water, that can sometimes make the conditions a little bumpy,” Sheehy said.

This marks the second year of the study designed specifically for Kwajalein. The first study, conducted from February to May 1998, yielded faulty readings because of the drought conditions at the time.

The study itself is based on mussel research in the continental United States, Hawaii and Puerto Rico. There, testers use oysters and other mussels.

“The species selection and deployment, like the drill and pin, are unique to Kwajalein,” Sheehy said.

Besides setting and retrieving clams, the team has dove and examined other sites using video cameras and a transect diving method. In short, they drop a line along the floor and follow the line, filming and examining the environment along the line.

In the harbor, “we found an abundant benthic (creatures that live in the mud and sand) community,” Sheehy said.

“More than we expected,” Fennessy said. “We were told there was nothing alive down there, but there are
Drinking water clearly passes muster...

fish and a lot of things in the sand.”
“We did find an old battery, a sign
of the way things were done at one
time, and hopefully, not anymore,”
Sheehy said.
“But there were a lot of fish living
down there too,” Fennessy said. “It’d
been there awhile.”

Drink Up

If Kwajalein’s drinking water looks
and tastes clean, that’s because it is,
according to Jerry Valcik, program
manager of CHPPM’s drinking water
group.
“This place has taken advantage of
all the new information out there,”
Valcik said.
“It takes a little more effort to main-
tain consistent high quality of water
here because of the different sources
(rain, lens well, ROWPUs),” he added.
Drinking water is tested on a regu-
lar basis for clarity, or turbidity;
bacteria and microbiological organ-
isms; and chemicals.
“From a clarity standpoint, it’s re-
ally clean,” Valcik said.
Turbidity criteria in the states al-
low for a .5 reading. That will drop to
a .3 soon. USAKA/KMR criteria hold
turbidity to a .1 reading.
“Bacteriological-microbiological,
no question it’s safe,” Valcik added.
And on chemicals, he added the
water falls within norms, though
water workers here, like anywhere
else in the world, must work to keep
the chemicals used to clean the wa-
ter under control.

Making the Grade

The results of the tests over the
past few weeks will be part of an on-
going monitoring effort.
“The monitoring efforts being
performed by CHPPM, Fish and
Wildlife Service, National Marine
Fisheries Service and independent
contractors working for USAKA/
KMR is integral in the establishment
of baseline data. This data then is
used to judge our efforts on Compli-
ance issues as established by the
UES and on protection and preser-
vation of the USAKA/KMR
environment for the future of the instal-
lation and the Marshallese
people,” said Dr. Don Ott,
environmental coordinator for
USAKA/KMR.

According to Jim Albert, CHPPM
surface water section chief, the
group first established baseline
sampling for the environmental
standards in 1991. The Republic of
the Marshall Islands accepted the
standards proposed by USAKA/
KMR in December 1995. Where
municipalities and states in the
United States must conform to EPA
standards, military installations
overseas must comply with similar
standards set by the military in
conjunction with the host nation, he
added.
“Water requirements are more
stringent here than in the states
because you have coral reefs, and
not many places in the states have
coral reefs,” Albert added. “We test
for very low levels here, because very
low levels of some things can affect
the reefs.”
The standards fall under an
oversight committee made up of
representatives from USAKA/KMR,
U.S. Army Space and Missile
Defense Command, U.S.
Environmental Protection Agency,
U.S. Fish and Wildlife Services, U.S.
National Marine Fisheries Service,
Corps of Engineers, and the
Republic of the Marshall Islands
Environmental Protection Authority.
Those representatives met this past
week on Kwajalein, as well, during
the testing, to discuss the
environmental activity.
“It’s not adversarial like you might
find in the states,” Albert said. “It’s
very cooperative, with everyone work-
ing toward a common goal.”

From left, Paul Rankin, Lt. Greg O’Brien and Brian Sherman set an automatic
measurement device within a flume at the Kwajalein landfill.

This cylinder with various scientific equip-
ment is used to test waste water.
Burt returns from trip with memories and mementos

By Barbara Johnson

Sue Burt carried a large baggie stuffed with “swaps,” along with memories of new friends, back from the National Girl Scout Convention in Kansas City last week.

Burt was one of 11 delegates representing USA Girl Scouts Overseas at the convention, Oct. 14-17.

Almost everyone who attended went prepared with something to swap from her own area or troop.

“It’s an icebreaker,” Burt said. “You meet people by giving them something.”

Burt took 300 small baggies filled with “brownie” cowries, money cowries, a paper describing the shells and a map showing Kwajalein’s location in the Pacific.

In return, she got everything from patches and ribbons to craft ideas, magnets, pins — even a small piece of granite. And more important, she brought back names and addresses of the new friends she met at the convention.

About 2,000 delegates were in attendance, along with another 8,000 visitors from around the world and participants from Girl Scouts in the Kansas City area.

Overseas delegates are members of GSUSA living overseas. They included two from Guam, five from Germany, two from Panama, one from Kwajalein, and one from Italy — a 14-year-old girl.

Also traveling to Kansas City were four official visitors representing Micronesia, which is part of USA Girl Scouts Overseas: Ione DeBrum from Majuro, Ropina Aloka from Kosrae, Debbie Toribiong from Palau and Eugenia Samuel from Pohnpei.

Keynote speakers at the convention were Tipper Gore and Leslie Stahl.

At the opening ceremonies, Rebecca Lobo, the youngest member of the 1996 U.S. Olympic basketball team, talked to the assembly about being a 6-foot-tall teen-age girl and her experiences in scouting.

“This was one of the neatest things,” Burt said. “There were so many neat stories.”

For example, a jazz singer from Kansas City told of what began her lifelong interest in scouting. Coming from a poor family, all she had to bring to her first scout get-together was applesauce and bread. The leader approached her, saying, “Applesauce sandwiches are my favorite. Will you trade with me?”

Also, it was impressive to see some 15-year-olds getting up in front of 5,000 people and speaking,” Burt added.

As the largest member organization of the World Association of Girl Scouts and Guides, Girl Scouts offers many opportunities to girls and women to meet people in other countries; travel abroad, with someone to meet you when you get there; and participate in cultural exchanges.

When scouts from all over the world meet at the triennial conventions, they forge lasting friendships and discover new opportunities for sharing.

Of the about 22,000 scouts overseas, the largest group is in the North Atlantic. Other groups are the West Pacific, which includes Japan and Okinawa; and troops in a large number of individual locations, which includes Kwaj.

There are also four world centers where Girl Scouts and Girl Guides can attend sessions: in London, Switzerland, Mexico and India. A new center is planned to be opened in Kenya.

The convention concluded with an international dinner and a chance to cement new friendships before heading back to homes far away.

“I would call any of these people if I was ever where they lived,” Burt said.

You’re in the Scouts now

Mary Etta Burt, Girl Scout leader-in-training, second from left, helps Daisy Troop members Apple Seibert, Lauren Amador and Maddie Seibert as they are welcomed to scouting at the Girl Scout Investiture-Rededication Ceremony Monday. Held at the Turtle Pond, the ceremony included the investiture of 19 first- and second-grade Brownies into scouting. Scouts are invested once, at the time they first join. About 45 members of Brownies, Girl Scouts, Juniors, Cadets and Seniors rededicated themselves to scouting and received badges they have earned this year. Additionally, each troop presented five things scouting means to their troop and five things their troop hopes to accomplish by year’s end. To illustrate this year’s theme of “diversity with a common goal,” each scout was given the same five items and challenged to create something original.

Potential boating hazard removed

KPD constable Rimen Matthew and engineman Mike Herrington examine a net found during a Kwajalein police patrol near Bigej. Officials say the net could have been a hazard to boats.

By KW Hillis

A Kwajalein marine police patrol netted a possible sticky situation last week.

“A potentially dangerous situation was avoided,” confirmed Mike Herrington, KPD engineman and patrolman.

A large fishing net tangled in the coral north of Bigej was spotted during a routine patrol by Herrington, and constable Rimen Matthew and Abimelek Danny about 10 a.m. Friday.

“What alerted us was a large barrel attached to it. We went closer to figure out what it was,” Herrington explained. “[The net] could have come loose and become tangled in a propeller and caused a lot of damage.

“It’s also a danger to marine life,” he added. “The fish get entangled and die.”

Lt. Tom McGinnis, KPD, suggested the net probably came off a Japanese or Chinese fishing boat, but that no markings had been found.

The net will be turned into hammocks, according to Herrington. It will hold people now, not fish.

Oct. 30 marks second most rainfall of year

From Aeromet meteorologists

An end of the month deluge caught Kwajalein up to normal in its monthly precipitation total for the third month in a row.

Kwajalein received 5.32 inches in the last week of October to bring the island up to 11.95 inches — .04 inch above normal for the month.

In fact, Kwajalein had its second largest single rain day so far this year Oct. 30, when it received 2.58 inches. That same day, Aeromet’s anemometer recorded a peak wind gust of 45 knots (52 miles per hour) around 5:30 p.m., as a squall moved through the southern part of the atoll.

Through October, Kwajalein has received 68.64 inches of rain, or 82 percent of the normal rainfall for the calendar year to date.

The average daily maximum temperature for October was 85.2 degrees, which was slightly below the normal of 87 degrees. The average daily low temperature was a nearly normal 77.8 degrees.

The hottest temperature recorded last month was 88 degrees on Oct. 7, and the lowest temperature was a chilly 74 degrees during showers in the early morning hours on Oct. 8.

Average wind speed for the month came in at an exactly normal 9 knots.

According to climatic records, the rainy season for Kwajalein peaks in September and October; therefore, expect slightly less rainfall for the month of November — about 10.66 inches to be exact.

The average number of days with precipitation this month is 23, with an average wind speed of 11 knots from the east-northeast.

Books to be Movies at Grace Sherwood Library

How many times have you heard the comment, “Well, the movie was OK, but I liked the book better.” Many discussions, sometimes heated ones, begin this way.

In the next few months, several films are due for release that are based on books. Those books available at the Grace Sherwood Library are listed below.

Read the book, see the film, then decide which you like best. (Film release dates are listed next to the titles.)

Mansfield Park by Jane Austen (Nov. 5, ’99)
Legend of Sleepy Hollow by Washington Irving (Nov. 19, ’99)
Angela’s Ashes by Frank McCourt (Nov. 26, ’99)
Cider House Rules by John Irving (Dec. 10, ’99)
Stuart Little by E.B. White (Dec. 10, ’99)
The Green Mile by Stephen King (Dec. 17, ’99)
Girl Interrupted by Susanna Kaysen (Dec. 21 ’99)
Snow Falling on Cedars by David Guterson (Dec. 22 ’99)
All the Pretty Horses by Cormac McCarthy (2000)

Grace Sherwood Library hours are:
Tuesday: closed
Wednesday: 9:30-11:30 a.m.
Wednesday-Friday: 1-8 p.m.
Saturday-Monday: 1-7 p.m.

Kom ruwainene

“Kom ruwainene” is the Marshallese way to say, “Welcome.”

William and Paula Weaver arrived from Dayton, Ohio. William is a network engineer for Raytheon.

On arriving William says, “This is such a beautiful place. People told me I was crazy for moving here, but now that we are here, I know they are wrong.”
Makos top Barracudas, 432-404

By Loren Lindborg

Despite stomachs full of candy from Halloween the night before, swimmers set six new pool records and locked up in a close meet, the Makos beating the the Barracudas 432-404, Nov. 1 at Millican Family Pool.

The amount of new pool records topped last swim meet by two. Three of them were actually personal best times by the swimmers who made them pool records. Katie Fogg and Jessie Brown. Fogg and Brown again made new pool records with their backstroke, breaststroke and butterfly times.

Swimmers also set 163 personal bests.

As tradition goes, the swim meet opened with the warm-ups, team cheers, invocation and playing of the national anthems.

After that, the meet was on a roll with the freestyle races. Highlights of the freestyle races included the girls’ 13-14 50 yards, with Leslie Borque just out-tapping Sarah Alves by .84 second; girls’ 9-10 50 yards, with Tessa Thimsen just finishing ahead of Kaylee West by half of a second; and boys’ 11-12 50 yards, with Ian Taylor splashing ahead of Rory Scott by .52 second.

Following the freestyle races was backstroke, where Fogg once again improved her 50-yard backstroke time, taking almost a second off.

Some close races included: Rose Demaio beating out Melissa Peacock by .41 second in the 6 and under 25 yards and Adam Banducci pulling ahead of Jon Dufur by less than half a second.

Breaststroke races saw two pool records being set. One was Brown re-breaking her record from last meet and the other was 8-year-old Alan Rowe, who broke John Landgraf’s 25-yard time from last year, making the new record 21.34 seconds.

Other breaststroke highlights included Julie Alves taking the lead over Demaio by .39 second in the 6 and under 25 yards, and Thimsen defeating Jessica Flavin by .61 second in the 9-10 50 yards.

In Butterfly action, both Fogg and Rowe set pool records. In a fast-paced race in the boy’s 6 and under 25-yard butterfly, Tyler Decoster took the win from Graham Kirchener by .61 second.

Completing the meet were the medley and freestyle races, where the excitement level rose to a peak in cheering for the kids.

The tightest race of the medley relay was the 11-12 200-yard medley, where the Makos won by .37 second over the Barracudas.

The other medley race by the 13 and over wasn’t so much action-packed as funny, because as a joke, the coaches made their own relay team. They embarrassed the two teams by taking first place, unofficially.

The freestyle relays were far from dull, with a pool record being set in the 7-8 100-yard freestyle by the Barracudas and a tension-filled race in the 11-12 200-yard freestyle, with the Makos gaining victory over the Barracudas by .2 second.

COMMUNITY NOTICES
PASSPORT SERVICES will not be available Thursday, Nov. 25 and Dec. 2. Regular passport services will resume Dec. 9. For more information, call Pat Lockridge, 51431.

MOPS (Mothers of Preschoolers) will meet Thursday, Nov. 18, 8:45 a.m., in the Religious Education Building. For more information, call Joan, 52280. MOPS is spon-
In the year 2000, we will be voting for candidates for federal office: president and vice president, one-third of the Senate, and all 435 members of the House of Representatives. In addition, 13 state governors and other state officials are up for election. The Arizona and Michigan presidential primaries are scheduled for Feb. 22, with other states following close behind. Watch the Hourglass for the 2000 election calendar and more details on voting. Keep in mind that the deadline for registration in many states is 30 days before the election. Don't be caught unprepared. See Kent Duncan, your voting assistance officer, or call the office of the command judge advocate, 51462/53417.

KAG’S 26th annual Holiday Bazaar will be Monday, 10 a.m.-2 p.m., in CRC Gym. Island artists and crafters will show their best.

KWAJALEIN running club’s annual Turkey Trot, a two-mile prediction run is Monday, Nov. 22. Sign in at Emon Beach main pavilion between 5:15 p.m. The race will start at 5:30 p.m. Fast could win you hot dogs, accuracy could win you a turkey and very low accuracy could win you ... baloney. Questions? Call Bob, 51815H.

Consular officer from the U.S. Embassy in Majuro will be on Kwajalein Nov. 17. Those wishing an appointment should call the USAKA legal office, 53417.

PTO will sell baked goods at the Art Guild’s holiday bazaar Monday, 10 a.m.-2 p.m. Bring your donated treats to the CRC, 9-10 a.m. Then treat yourself by purchasing an item at the bazaar.

EBEYE’S Queen of Peace choir will be singing Sunday at the 9:15 a.m. Mass, in the Memorial Chapel. Join us for worship. A potluck meal will be served at the Pacific Club after Mass. Setup and food items at 11 a.m. Bring a dish or two to share.

Does genealogy interest you? Anyone interested in access to the LDS Church genealogical system through our local Kwajalein branch family history center, call 52630.

KWAJALEIN HIGH SCHOOL PTO meeting will hold a general meeting Wednesday, Nov. 17, 7 p.m., in CAC Room 6. The agenda will be revisions to bylaws and the December shopping mall. All independent business owners are welcome. Questions? Call Darlene, 52951.

ATTENTION GOLFERS: Holmberg Fairways will have adjusted hours of operation for the course, driving range and putting green, during the Kwaj Open Golf Tournament and associated functions, which conclude Monday. Check the posting at the golf course for specific dates, times and functions. Questions? Call 53331 or the pro shop, 53768.

Usable toys are needed for the children of Third Island. The Girl Scouts of Troop 4 will have a collection box in the elementary school office. Questions? Call 52837.

Pet owners: Kwajalein Veterinary Services will not be open through Nov. 18. Emergencies and other requests will be handled on an as-needed basis. For more information, call 52017. Regular hours will resume Nov. 19.

Are you concerned about a friend or family member’s use of alcohol? Al-Anon meets weekly Tuesdays, 7 p.m., in the Religious Education Building (second floor).

SCHOOL ADVISORY COUNCIL will hold its monthly public meeting Wednesday, Nov. 17, 7 p.m., in CAC Room 7. Public is invited.

Boat LOT CUSTODIANS: There will be a boat lot inspection Nov. 23-30. Questions? Call Trea, 53643.

YOKWE YUK WOMEN’S CLUB Cultural Exchange committee is rehearsing several Marshallese dances for the upcoming Christmas Exchange dinner. Anyone interested in joining the entertainment is encouraged to come to CRC Room 7 on Wednesdays at 7:30 p.m. Questions? Call Dianne, 55990.

Girl Scouts will be selling official pocket planners at the mini-mall Monday, 9 a.m.-1 p.m.

Usaka legal officer, Kent Duncan, will be on Roi-Namur tomorrow, noon-3 p.m. He will take appointments for legal counseling and walk-ins for notary and power-of-attorney services. Call 53417 or 51462.

Student music recital will be Friday, Nov. 19, 7 p.m., in the high school MP room. Performers may pick up registration forms in the school music room or from your teachers.

The post office will be closed for a military function Saturday, Nov. 20.
**See you at the movies!**

**Saturday**

**Muppets From Space (New Release) (G)**
Another Muppet adventure, with the whole Muppet gang being dragged by Gonzo to an alien civilization in search of his roots. *Richardson Theater, 7:30 p.m.*

**Deep Blue Sea (New Release) (R)**
Renny Harlin directs this thriller in which a group of scientists genetically engineer super-sharks with the intent of creating a cure for Alzheimer’s disease. However, things go wrong when the sharks begin to get smarter. *Saffron Burrows, Samuel L. Jackson, LL Cool J, Michael Rappaport* *Yokwe Yuk Theater, 8 p.m.*

**Big Daddy (New Release) (PG-13)**
From the creators of Happy Gilmore comes an Adam Sandler comedy in which he stars as a non-committal young man. In order to show his girlfriend he’s responsible, he adopts a six-year-old and ends up learning a lesson about life. *Tradewinds Theater, Roi-Namur, 8 p.m.*

**Sunday**

**Showboat (NR, 1951)**
Classic musical about life on a showboat on the Mississippi River. Starring Ava Gardner and Howard Keel. (107 minutes) *Richardson Theater, 7:30 p.m.*

**Big Daddy (PG-13)**
*Richardson Theater, 9:30 p.m.*

**Caddyshack (R, 1980)**
This classic comedy takes place at a high-brow golf club. Stars Chevy Chase, Rodney Dangerfield, Fred Knight and Bill Murray. (99 minutes) *Yokwe Yuk Theater, 8 p.m.*

**Deep Blue Sea (R)**
*Tradewinds Theater, Roi-Namur, 7:30 p.m.*

**Muppets From Space (G)**
*Tradewinds Theater, Roi-Namur, 9:30 p.m.*

**Monday**

**Muppets From Space (G)**
*Richardson Theater, 7:30 p.m.*

**Big Daddy (PG-13)**
*Yokwe Yuk Theater, 8 p.m.*
