Reader responds to June 11 QOL commentary

This letter is in response to a commentary by Dan Adler in the July 11 issue of the Hourglass.

Dan, I am all for education, and all for companies giving scholarships to employees children. I do think

that they should do it with company funds, not funds received to improve all personnel quality of life.

Chugach receives the money, and is kind enough to use it not only on Child Development Center person-

nel, but all employees of Kwajalein Range Services. Let's just make sure it is used properly.

— Dennis Baker

Do you want to express an opinion or concern?

Kwajalein and Roi residents can access the Kwajalein Customer Satisfaction Survey at http://www.smdc.army.mil/kwaj_CS_survey/ to voice an opinion about: Food and Bar Services, *The Hourglass*, AFN, Post Office, Public Works, Aviation, Retail, Community Activities, Medical Services and Educational Services.

Customer comment cards are available at Surfway. If someone would like an item that is not already available at Surfway, include the Universal Product Code (UPC) along with the name of the item on your comment card. A UPC code can be found by typing the product name into the search box on the Web page <http://www.upcdatabase.com/searchform.asp>.

Writing a letter to the *Hourglass* editor is another way

to communicate a change request. E-mail a letter to Hourglass@smdck.smdc.army.mil. The *Hourglass* also publishes a Thumbs Up and Thumbs Down section as a way to recognize an individual or group; whether it's a kudos or a bad choice.

In addition, customer comment cards are available at the Food Court, the American Eatery, and other Army and Air force Exchange Service facilities that will open this fall. Customers can also e-mail comments to Kris Kovas, AAFES general manager, at kovaskristina@aafes.com. Customers can add a testimonial to <http://www.aafes.com/>.

The commander's hotline is another way to communicate concerns. Call 51098 and leave a message.

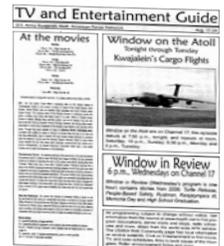

To submit a letter to the editor: Keep letters to less than 300 words, and keep comments to the issues. No personal attacks will be printed. Letters must be signed. However, names will be withheld if requested. We will edit for Associated Press style, grammar and punctuation and if you exceed the word limit, will be edited for space. Limit one letter every 30 days. Send your letter to: *The Hourglass*, P.O. Box 23, Local; or hourglass@kls.usaka.smdc.army.mil.

Operation Security is everyone's responsibility

Be sure all classified documents and offices containing classified materials are secure. Practice good OPSEC.

The TV and Entertainment Guide and the Hourglass are published on Fridays and can be found in the gray boxes at the post office and the Dock Security Checkpoint.

THE KWAJALEIN HOURGLASS

The Kwajalein Hourglass is named for the insignia of the U.S. Army 7th Infantry Division, which liberated the island from the forces of Imperial Japan on Feb. 4, 1944.

The Kwajalein Hourglass is an authorized publication for military personnel, federal employees, contractor workers and their families assigned to U.S. Army Kwajalein Atoll. Contents of *The Hourglass* are not necessarily

official views of, or endorsed by, the U.S. Government, Department of Defense, Department of the Army or USAKA. It is published Fridays in accordance with Army Regulation 360-1 and using a network printer by Kwajalein Range Services editorial staff.

Kwajalein Community Bank takes first place for marketing in Japan/Pacific region

Article and photos By Dan Adler
Interim Manager

Any sports fan knows what an amazing accomplishment it is for a team to go from 'worst to first.'

That's just what the team at Kwajalein Community Bank has done. After the bank was opened on Kwajalein in 2005, it was rated at the very bottom of the 86 Community Banks worldwide.

But the team has been awarded first place for marketing in the Japan/Pacific region for the first and second quarters of 2008. The bank was in second place globally out of 86 overseas military community banks.

The turnaround started when a new manager came to the bank on March 6, 2007.

Nan-joo Kim brought her 21 years of banking experience with Community Bank in Korea. She started her career with the bank as a teller and has been a branch manager for the last 10 years. She has been the recipient of many awards over the years.

"One of the reasons the bank had such a poor rating in the past was because any new venture needs time to establish itself and for employees to gain experience," said Kim. "Since I have been here, they have gained experience and we haven't had much turnover. This award is the result of a total team effort."

Kim also credits everyday training

Col. Stevenson Reed, USAKA commander, congratulates employees, left to right, Ernest Harry, Barb MacDaid and Maricel Lauben as Sgt. Maj. Patric Kutac and Bank Manager Nan-joo Kim look on.

in business with the focus on the customer.

"We know that without the customer, we are nothing," said Kim. "We try to make banking as easy and convenient as possible because when someone is overseas, it can be hard to deal with financial matters."

Kim also said that the bank is full service with certificates of deposit and loan service available.

"We had our first ever auto loan on June 30," she said. "Someone was PCSing and wanted to buy a car and got the loan from us."

To win the first place regional award, the bank was judged in 10 criteria:

- New savings and new checking accounts
- Total new products
- Total deposit balances
- Total loan balances
- Total new deposit and loan accounts to average quarter
- Teller dollar difference (over \$5) to average quarter
- Number of teller differences (over \$5) to average quarter

- Quarterly average full-time equivalent to full-time equivalent (personnel) budget

- Banking center control review (audit) score

- Quarterly community involvement

"The awards were for the first and second quarters of the year. We're waiting to hear about the third quarter results right now," said Kim.

In recognition of the achievement, Col. Stevenson Reed, U.S. Army Kwajalein Atoll commander and Sgt. Maj. Patrick Kutac visited the bank Saturday to award commander's coins to employees Barb MacDaid, Camellia Bobo, Leah Angle, Ernest Harry, Maricel Lauben and Ana Homuth and to offer their congratulations.

The bank received \$475 along with the award with which they had a barbecue on the beach for the employees and a customer appreciation day in February.

As far as the secret to the bank's accomplishments, Kim said "Our standard is to wow the customer. Treat the customers like we want to be treated. That is the global standard of Community Bank."

Sgt. Maj. Patrick Kutac, center, congratulates Nan-joo Kim, bank manager, as Col. Stevenson Reed, USAKA commander looks on.

Air Force General says Iranian threat justifies missile defense

By Jim Garamone

American Forces Press Service

Iran's launch of a missile with a 2,000-kilometer range last week is a concrete example of the threat the world faces from missile proliferation, the chief of the Missile Defense Agency said here today.

Air Force Lt. Gen. Henry A. "Trey" Obering, said the United States is concerned specifically about the threat posed by developments North Korea and Iran are making in their missile programs.

"Iran is working on an extended-range version of the Shahab-3 and a new 2,000-kilometer medium-range ballistic missile, which they term the Ashura," the general said at a news conference.

Iran also claimed that it had successfully launched an exploratory space vehicle in February, which, analysts concluded, also was a Shahab-3.

Last week, Iran launched several short- and medium-range ballistic missiles capable of striking Israel and the U.S. bases in the Middle East. Longer-ranged missiles are capable of striking Europe.

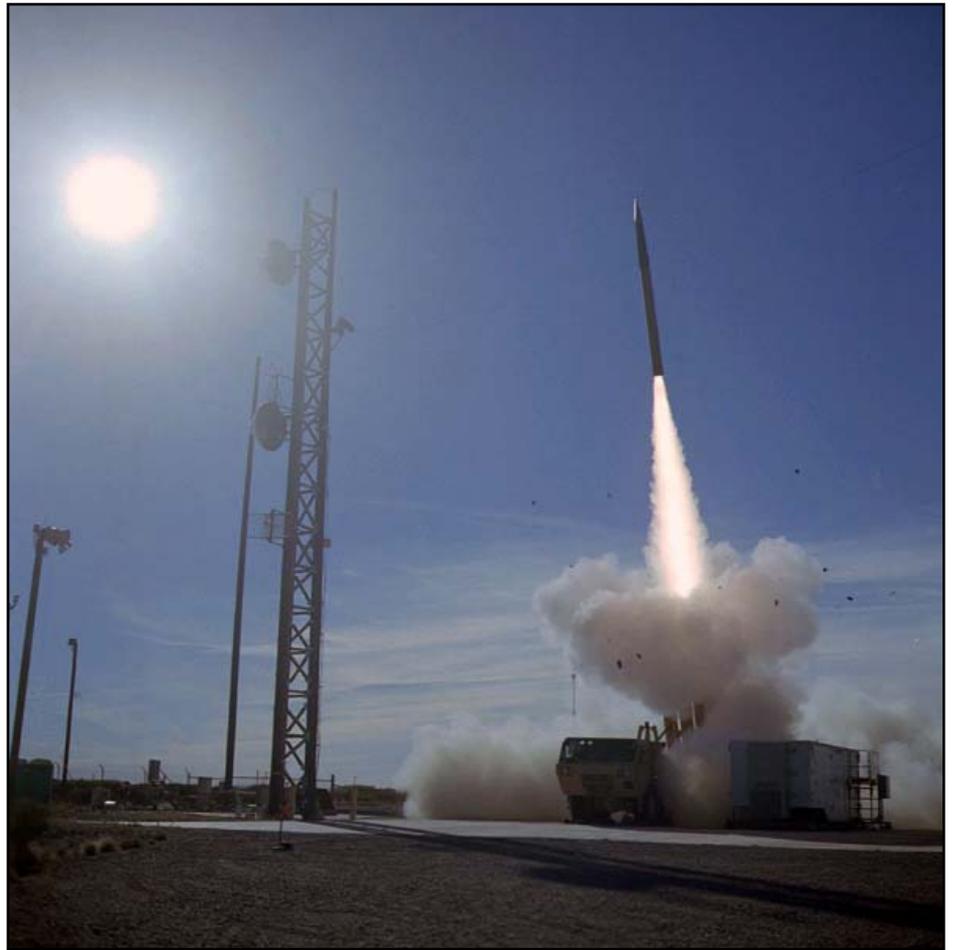

The U.S. concern with the spread of the technology was such that the current and previous administrations invested in fielding the missile defense program.

"We needed to protect the United States and then to expand that protection for our deployed forces and our allies and friends in the European theater," Obering said.

The layered missile defense strategy melds boost-phase defense, mid-course defense and terminal-stage defense together. Various systems from ground-based interceptors, to airborne lasers to sea-based platforms provide protection against a rogue regime trying to launch one or two missiles at the United States or its allies.

U.S. officials are making great progress in integrating the missile defense systems with NATO programs, the general said. Obering discussed some of the systems' successes.

"In the boost phase, we've had

DoD photo

A Terminal High Altitude Air Defense System Missile is launched.

great success with the airborne laser," he said. The laser is mounted in a Boeing 747 and fires through the nose of the aircraft to destroy missiles just launching.

"We have generated the power that we needed on the ground in a 747 fuselage mock-up, and we've also flown the aircraft," he said. "We've demonstrated the tracking laser performance and an atmospheric compensation laser performance. All that goes together to show that we can shoot down a boosting missile. And we're on track to do that next year in a flight test."

Thirty interceptor missiles at bases in Alaska and California make up the only defense the United States has against long-range missiles, Obering said.

As time goes on, the general said, U.S. defense planners are concerned

where countries like Iran and North Korea will go. They worry that the missile proliferators will develop more and more complex countermeasures to go along with their missiles. The agency is working to counter those moves, the general said.

Terminal-phase defense soon will receive another arrow in the quiver, as the agency prepares to deploy the Terminal High Altitude Air Defense system. The THAAD, which will come on line in the next year, shoots down missiles just inside and outside the atmosphere.

Other agency projects include the launch of two space-tracking and surveillance system satellites and a test of missile interceptors scheduled July 18, Obering said. "Overall, since 2001, we have now conducted 35 of 43 successful hit-to-kill intercepts," Obering said.

Range operation scheduled for July 26

A range operation is scheduled for July 26. Backup days for the operation are scheduled through Aug. 3.

The mid-atoll corridor will be closed from 4 p.m., local time, Tuesday through mission completion. Both the east and west

reefs within the mid-atoll corridor are closed.

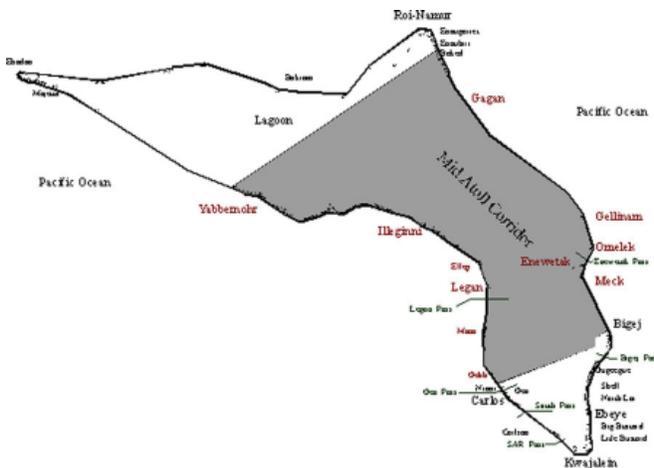

A broad ocean caution area will be in effect from 10 a.m., local time until 5 p.m., local time. The broad ocean caution area extends east of Omelek. If backup days are required, the broad ocean caution

area is in effect each backup day.

Questions regarding the above safety requirements for the mission should be directed to the USAKA Command Safety Directorate, Kwajalein Range Safety Office, 51910.

Kwajalein Atoll: Mid-Atoll Corridor Lagoon Caution Area

Kwajalein Atoll: Reference the mid-atoll caution map. No surface vessels shall be permitted in this area during the identified caution times (starting T-4 days, until released by the Range Safety Officer) without prior approval from the Command Safety Directorate. The area closure is indicated by the "red flag system".

Jobs with a real high

For tower workers on Kwaj, Roi, safety is a matter of life and death

STEP-BY-STEP SAFETY

Wally Burbine discusses the corrosion control job on the AFN tower Saturday with the maintenance crew.

After the Condor has been moved into position, the outriggers are checked to be sure they are set properly.

Article and photos by Dan Adler
Interim Manager

There are some jobs on Kwajalein and Roi-Namur that have definite potential for great injury or even death. Some of those jobs are performed by the tower/antenna maintenance workers.

It's not just good luck that accounts for Kwajalein Range Services having an excellent safety record in the area of tower/antenna maintenance.

It's meticulous planning and training with attention to detail that enables workers to perform a dangerous job in a safe manner.

Concern for safety comes from the top down. Everyone involved in tower maintenance has the safety of workers uppermost in their minds.

Just ask Wally Burbine, Tower/Antenna Maintenance Worker IV. Burbine has been on Kwajalein for 35 years and has been tower/antenna worker all of that time and before that, he was a high rigger in the military.

For the past 22 years, Burbine has taught practical safety courses and certified climbers.

Safety isn't just a word to Burbine. It's almost a religion with him.

Burbine teaches the practical safety course on the MPS Boresite tower which is 100 feet tall.

Along with Burbine's safety classes, Don Swanby of KRS Safety teaches a classroom safety course.

SPI 1432 R2 gives detailed specific criteria for training tower/antenna workers. It calls for training to be provided for each employee who might be exposed to fall hazards and that the training should enable employees to recognize the

hazards of falling. Furthermore, the SPI states that employees will be trained in procedures to minimize the hazards and that the training shall be given by a fall protection-competent person.

Some of the topics covered in training are:

- The nature of fall hazards in the work area
- Correct procedures for erecting, maintaining, disassembling and inspecting fall protection systems to be used
- The use and operation of guardrail systems, personal fall arrest systems warning line systems, safety monitoring systems, controlled access zones and other protection
- The role of each employee in the safety monitoring system when this system is used
- The limitations on the use of mechanical equipment during the performance of roofing work on low-sloped roofs
- Correct procedures for handling and storage of equipment and erection of overhead protection
- The role of employees in fall protection plans
- All standards contained in SPI 1432 R2

Employees are also required to take retraining when they have not climbed in the previous 12 months, the training program has been changed, changes in the workplace render previous training obsolete and when changes in the types of fall protection systems or equipment to be used render previous training obsolete.

The SPI also states that department managers who operate towers, antennas or radar equipment will designate a fall protection competent-person or persons to provide training specific to that site.

Managers are also responsible for maintaining written records on employee dates of training and with the signature of the person who conducted the training.

In addition, managers of such sites must develop a written fall protection work plan to be used as a training tool for personnel required to work at heights on towers and antennas.

During practical safety classes given by Burbine, three experienced climbers, Joe Loek and Banny

See JOBS, Page 8

STEP-BY-STEP SAFETY

If the outriggers check out, the boom is checked for proper operation.

When the boom checks out, the basket is lowered and looked at for safety.

Burbine has the crew read the 'toolbox' safety briefing and sign their names to it indicating that they were briefed about the job.

Before each tower maintenance job, the KRS Safety Department approves a safety analysis which points out any hazards involved and details procedures to mitigate the risks.

STEP-BY-STEP SAFETY

Burbine watches carefully to ensure that Albert Bomato is putting on his safety gear properly.

Safety harnesses are checked before going up in the basket.

The crew goes up the tower to begin the job.

Albert Bomato dons a respirator to protect against paint and solvent fumes.

Tanaka, both Tower/Antenna Maintenance Tech III, and Albert Bomato, Tower/Antenna Maintenance Tech II, assist in teaching the course. Tanaka and Loeak each have eight years experience and Bomato has one year's experience.

The highest structures the crew climbs are the communication towers on Carlos, Illeginni and Gagan. Each of those towers is 220 feet tall.

The tower maintenance operation begins every day with a safety briefing by Ric Wolowicz, Paint Shop supervisor. The briefings are given whether or not a job is being done that day.

Before any tower maintenance job is scheduled, a safety analysis is developed by Wolowicz, sometimes with assistance from Burbine. The analysis identifies potential hazards and risks that may possibly occur when the job is underway and details procedures to minimize the danger of the job

See JOBS, Page 12

Albert Bomato, and Condor operator Oliver Hitchfield are nearly 140 feet in the air for the anti-corrosion procedure.

Six servicemembers die in Global War on Terror

Spc. William L. McMillan III, 22, of Lexington, Ky., died July 8 in Baghdad, Iraq, of wounds suffered when his patrol was struck by an improvised explosive device. He was assigned to the 1st Battalion, 21st Infantry Regiment, 2nd Stryker Brigade Combat Team, 25th Infantry Division, Schofield Barracks, Hawaii.

Sgt. Douglas J. Bull, 29, of Wilkes Barre, Pa., died July 8 at Bagram Air Field, Afghanistan, of

wounds suffered in Chow Kay Valley, Afghanistan, when his vehicle encountered an improvised explosive device during a mounted patrol. He was assigned to the Special Troops Battalion, 3rd Brigade Combat Team, 1st Infantry Division, Fort Hood, Texas.

Sgt. 1st Class Steven J. Chevalier, 35, of Flint, Mich., died July 9 in Balad, Iraq, of wounds suffered in Samarra, Iraq, when his patrol vehicle

was struck by a grenade. He was assigned to the 2nd Battalion, 327th Infantry Regiment, 1st Brigade Combat Team, 101st Airborne Division (Air Assault), Fort Campbell, Ky.

Two Soldiers died July 10 in Babo Kheyl, Afghanistan from wounds suffered when their vehicle was struck by an improvised explosive device. They were assigned to 1st Battalion, 294th Infantry Regiment, Guam Army National Guard,

Barrigada, Guam. Killed were: **Sgt. Brian S. Leon Guerrero**, 34, of Hagatna, Guam and **Spc. Samson A. Mora**, 28, of Dededo, Guam.

Master Sgt. Mitchell W. Young, 39, of Jonesboro, Ga., died on July 13 of wounds suffered when his vehicle struck an improvised explosive device in Kajaki Sofla, Afghanistan. He was assigned to the 1st Battalion, 7th Special Forces Group (Airborne), Fort Bragg, N.C.

Army records zero accidental fatalities over holiday

By Brig. Gen. William Forrester

Over the recent Independence Day holiday period, the active Army experienced zero recordable fatalities resulting from off-duty accidents. To put this into perspective, this is the first recorded fatality-free Fourth of July holiday period the Army has experienced since the U.S. Army Combat Readiness/Safety Center began keeping records in 1974. Unfortunately, there were three reserve component, not in-duty status Soldiers, who lost their lives in motorcycle accidents.

Although the loss of a single Soldier is too much, our leaders continue to demonstrate that engaged leadership does immediately save lives. This reversal of a 34-year

trend is a direct result of engaged leadership at every echelon.

Every leader, Soldier, family member, civilian and battle buddy who used composite risk management and made good decisions to avoid or prevent off-duty accidents, on what is historically one of the most hazardous holidays of the year, contributed to this 'safety success.'

Engaged leaders communicate effectively with their subordinates to gain an in-depth understanding and knowledge of their behaviors. Soldiers and Soldiers' expectations are defined by influences of their past. To change or adjust Soldiers' lifestyles, all the while, capitalizing on what they bring to the fight, without degrading inherent capabilities of independent thought is

tough work. Successful leadership requires Engaged Leaders to take actions to influence attitudes, to clarify standards and ingrain habits of adherence to those standards and instill Soldiers with the confidence in their Leaders' abilities to enhance and ensure mission success.

Engaged leadership lays the foundation for a cultural shift and that, in conjunction with Soldiers taking personal responsibility for their own safety, will further drive down accidental losses. It is important for all of us in our Army to take a moment and acknowledge such a momentous milestone. However, we can not afford to rest on the laurels of our success and give accidents a chance to strike when our guard is down. Army Safe is Army Strong!

KRS/Chugach/AirScan health benefits

Aetna representatives will be on island to address member health insurance questions. The meetings are scheduled as follows:

Wednesday

- 10:30-11:15 a.m., in Corlett Recreation Center Room 1
- 12:45-1:30 p.m., Corlett Recreation Center Room 1
- 3:15-4 p.m., Roi Building C
- 4:15-5 p.m., Roi Building C

Thursday

- 1-1:45 p.m., Corlett Recreation Center Room 1

- 2-2:45 p.m., Corlett Recreation Center Room 1
- 5:30-6:15 p.m., Corlett Recreation Center Room 1

July 25

- 8-8:45 a.m., Corlett Recreation center Room 1
- 9-9:45 a.m., Corlett Recreation center Room 1
- 11:30-12:30 p.m., Corlett Recreation Center Room 1

Seating is limited. Call Marilyn, Health Benefits, 50939, or e-mail to reserve a seat. Separate telephone calls with Aetna representatives are scheduled with CONUS-based employees.

HELP WANTED

KRS and CMSI job listings for On-Island positions will be available at the Kwajalein, Roi-Namur and Ebeye Dock Security Check Point bulletin boards, the bulletin board outside of DVD Depot, the Roi-Namur Terminal/Post Office bulletin board and at Human Resources in Building 700. Job listings for Contract positions are available at www.krsjv.com and on the bulletin board outside of DVD Depot and on the Roi-Namur Terminal/Post Office bulletin board. Full job descriptions and requirements for Contract positions are located online at www.krsjv.com.

NEED EXTRA money? KRS employment applications are continually accepted for all Community Services Departments and the Human Resources Temporary Pool for Casual Positions such as: Sport officials, scorekeepers, delivery drivers, lifeguards, medical office receptionists, temporary office support, etc. Questions? Call 54916.

U.S. Army Kwajalein Atoll

OFFICE AUTOMATION ASSISTANTS, GS-0326-6. Temporary position not to exceed two years. The employee provides clerical support to ensure efficient office operations. The employee accomplishes various duties to provide essential office automation support and production. The employee performs a variety of assignments using the advanced functions of various database software packages. The employee prepares varied documents with complex formats using the advanced functions of word processing, desktop publishing, and other software types. The employee performs systems maintenance functions for electronic mail systems. The employee performs a variety of assignments using the advanced functions of one or more spreadsheet software packages. The employee performs a variety of secretarial and other clerical and administrative functions, using judgment to answer recurring questions and resolve problems. Apply at <https://cpolwap.p.belvoir.army.mil>.

Atmospheric Technology Services Co.

ELECTRONICS TECHNICIAN, Kwajalein Weather Station. Our technicians install, maintain and repair a variety of scientific instrumentation and communications systems, including the KPOL weather radar. Background in telemetry and digital electronics desired. Unaccompanied position. Competitive salary

and benefits offered. Call 51508.

News to Use

Do you have news you would like to share about your club, private organization or work department? Do you have an interesting story and photos of a vacation trip? How about a scuba dive with great photos you took? Have you got a good fish story?

The Hourglass welcomes submissions of news articles written by members of the community. You can submit articles to the USAKA Public Affairs Officer, Vanessa Peeden, at vanessa.peeden@smdck.smdc.army.mil

MANDATORY ISLAND ORIENTATION

12:45 p.m., July 30, in Community Activities Center Room 6. It is required for all new arrivals. It is not recommended for family members under 10. Questions? Call 51134.

making and scrap booking) with the community. Call Kathy, 54613.

THE VETERINARY CLINIC and Physical Therapy office have moved. The Vet Clinic is at Quarters 424-A and Physical Therapy is at Quarters 424-D. The phone numbers are the same.

HOUSING RESIDENTS are reminded that IAW SPI 2600 R2 states: Existing bamboo/cane fence structures are grandfathered structures as of the approval date of this instruction. However, they must meet local building standards and IBC codes and regulations to keep their grandfathered status. Upon housing assignment, termination, or relocation, the owner must remove the grandfathered structure. The structure cannot be sold, traded or transferred to another individual for the purpose of relocation to another housing unit. If the owner moves to other family housing, they may request approval to reinstall the fence structure at their new quarters by gaining approval of a building permit.

HOUSING AND TRAILER occupants are reminded that before placing any plants in the

ground a landscape application and an approved dig permit application must be submitted to the Logistics Housing Office in Building 908. Requests will be reviewed and requestor will be notified of approval or disapproval. Species of plants must be indicated on the application. For copies of the Residential Yard Care and Landscaping SPI 2601, go to KARDS or email billy.abston@smdck.smdc.army.mil.

HOUSING AND TRAILER occupants are reminded that before leaving island for more than 14 days, arrangements must be made for grass to be mowed and trimmed in their absence. Failure to make these arrangements could result in a \$75 Public Works service fee if the lawn care is not performed after two seven-day notices. For more information, e-mail billy.abston@smdck.smdc.army.mil.

SURFWAY DELIVERIES. In accordance with SPI 1040 R1: bus service on Kwajalein and Roi-Namur and delivery service on Kwajalein, states that Surfway grocery deliveries are to be made to residents to their living quarters only. Your cooperation and understanding is appreciated.

Police report increase in traffic violations

Hourglass Reports

The Kwajalein Police Department has seen a recent increase in traffic related violations.

KPD will be closely monitoring vehicle operator traffic regulation compliance on U.S. Army Kwajalein Atoll to ensure the safety of all of our residents. All personnel who operate a motor vehicle at USAKA are required to familiarize themselves with and adhere to USAKA/RTS Regulation 190-5: Traffic Codes for U.S. Army Kwajalein Atoll/Reagan Test Site.

Operators of vehicles must obey all traffic signs, the rules of the road, and operate vehicles in a safe manner on USAKA/RTS. The

Kwajalein Police Department has a zero tolerance policy concerning speeding, seat belt usage and operating a motor vehicle in an unsafe manner or in unauthorized areas (for example, operating a vehicle in-between houses).

USAKA Regulation 190-5 establishes a point system for traffic violations; if you accumulate enough points, your driving privileges will be suspended.

As a reminder, please adhere to the following speed limits and general guidelines:

- The maximum speed limit on USAKA/RTS is 25mph.
- The speed limit on main roads in the residential areas is 15mph unless otherwise posted.

- The maximum speed limit on non-paved roads and in parking lots is 10mph unless posted as a fire lane.

- The maximum speed limit in marked fire lanes is 5mph.

- The speed limit on lagoon from bldg #1010 to EOD has been changed to 15mph where it used to be 25mph.

- No person will operate a vehicle on USAKA/RTS at a speed greater than is reasonable and prudent under the existing road conditions.

- Vehicles will not park north of 6th street after 8 p.m. unless specifically authorized by the chief of the Supply and Transportation Division or his/her designated representative.

JOB S from Page 8

to be done.

The analysis is given to KRS Safety and if the safety people are satisfied with the plan, the analysis is approved by Swanby and John Brown, Kwaj Operations manager.

When the tower maintenance crew is actually on site to begin a job, Burbine gives a 'toolbox' safety briefing to each member of the crew. The 'toolbox' briefing stresses the use of proper equipment such as hard hats, steel-toe shoes, safety sunglasses, safety harnesses and staying hydrated.

After the briefing is completed, each member of the crew signs indicating he received the briefing and understood it.

Sometimes, however, a job can't be done on the day it was originally scheduled. Many things can cancel a job such as equipment failure, rain or high winds.

"We can't work in wind above 25 miles per hour," said Burbine. "We can work in very light rain, but if it gets too heavy, we have to stop."

Maintenance was being done on the AFN tower last week. The tower is 140 feet tall and requires maintenance

at least once a year. The crew was doing corrosion control which involves chipping away old rust, sanding, applying an anti-corrosion solution, putting on primer and finally, painting over the repaired site.

When work is being done on the AFN tower, it is necessary to do a 'lock out and tag out.' That means all TV, radio and the paging system are shut down by Communications Department personnel in order to protect the climbers.

The work is labor intensive and tedious. If workers 140 feet above the ground don't keep the dangers of what they are doing in their minds at all times, a terrible accident could occur.

The efforts of Burbine's and Swanby's safety classes, the careful certification of tower maintenance workers, strict adherence to the SPI, the daily safety briefings by Wolowicz, and the safety analysis approval by KRS Safety before jobs begin, are all designed to keep tower maintenance workers safe on the job. All of it also reinforces to the workers how important safety is.

"Safety is everything," according to Burbine. "Without safety, you're doing a bum job."

Weather courtesy of RTS Weather

Saturday: Mostly sunny, 10 per cent showers. **Winds:** E at 12-17 knots.
Sunday: Mostly sunny, 10 per cent showers. **Winds:** E at 12-17 knots.
Monday: Partly sunny, 40 per cent showers. **Winds:** ENE at 10-15 knots.
Tuesday: Mostly sunny, 10 per cent showers. **Winds:** ENE at 8-12 knots.
Wednesday: Partly sunny, 20 per cent showers. **Winds:** E 8-12 knots.
Thursday: Mostly sunny, 30 per cent showers. **Winds:** E at 10-14 knots.
July 25: Partly sunny, 40 per cent showers. **Winds:** ENE at 12-17 knots.
