THE KWAJALEIN HOURGLASS

The *Kwajalein Hourglass* is named for the insignia of the U.S. Army 7th Infantry Division, which liberated the island from the forces of Imperial Japan on Feb. 4, 1944.

The *Kwajalein Hourglass* is an authorized publication for military personnel, federal employees, contractor workers and their families assigned to U.S. Army Kwajalein Atoll. Contents of the *Hourglass* are not necessarily official views of, or endorsed by, the U.S. Govern-

ment, Department of Defense, Department of the Army or USAKA. It is published Saturdays in accordance with Army Regulation 360-1 and using a network printer by Kwajalein Range Services editorial staff.

High-level U.S. delegation visits Republic of the Marshall Islands

Article and photos by Michael Sakaio
USAKA/RTS Host Nation Liaison

On Aug. 2-3, a high-level U.S. government delegation led by U.S. Department of State, Assistant Secretary for East Asian and Pacific Affairs, Kurt Campbell, and the Pacific Fleet Commander, Adm. Cecil Haney, visited the Republic of the Marshall Islands with stops at Majuro and Kwajalein. Other members of the delegation included Jeff Prescott, personal advisor to Vice President Joe Biden; Edgar Kagan, deputy assistant secretary for East Asian and Pacific Affairs; Gloria Steele, USAID; and retired Lt. Gen. Dan Leaf, director, Asian Pacific Center for Security Studies.

The first leg of the visit was to Majuro, where the delegation was met by U.S. Ambassador to the RMI, Martha Campbell, and U.S. Army Kwajalein Atoll/Reagan Test Site Commander, Col. Shannon Boehm. The delegation then met with the Government of the Republic of the Marshall Islands president and cabinet members. A press conference ensued and was later followed by an evening reception at the Robert Reimers Hotel grounds, hosted by Martha Campbell and attended by U.S. and RMI officials.

On Aug. 3, the U.S. delegation visited Kwajalein Atoll with an initial stop at USAKA/RTS, where Boehm briefed them on the state of affairs at the installation. Next, they visited Ebeye, accompanied by Boehm and RMI officials. The delegation was met at the Ebeye pier by local and GRMI leaders, officials and color guard; each were presented with leis. A vehicle tour of Ebeye was provided with a final stop at Mon LaMike's for a town hall meeting with selected members of the Ebeye

USAKA/RTS Commander Col. Shannon Boehm, left, and U.S. Department of State Assistant Secretary for East Asian and Pacific Affairs Kurt Campbell lay a wreath on the Operation Flintlock memorial and offer a moment of silence.

community. Approximately 100 residents, including land owners, civic leaders, local officials and business owners attended the meeting. At the conclusion of the meeting, the group headed back to USAKA by ferry. A brief stop was made at the World War II memorial where Kurt Campbell and Haney, joined by Boehm and USAKA/RTS Sgt. Maj. Roderick Proileau, paid homage with the laying of the wreaths. Immediately following, the U.S. delegation boarded their plane and headed to the Federated States of Micronesia, one of eight stops in this seven-day Pacific trip.

The visiting U.S. government delegation holds a town hall meeting on Ebeye with approximately 100 residents in attendance.

Rocket booster washes ashore at Mili Atoll

Inspection teams find no environmental impact; plans underway for removal

By Catherine Layton
Associate Editor

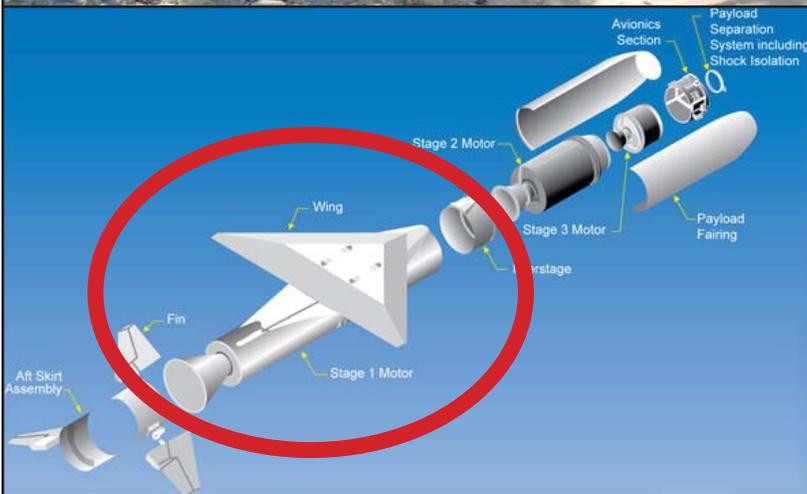

A wing and the stage 1 motor of the Pegasus XL rocket, a winged, 3-stage, solid rocket booster, washed ashore on Jelbon Island at Mili Atoll. Orbital Sciences Corporation, in conjunction with NASA and U.S. Army Kwajalein Atoll/Reagan Test Site, successfully launched the Nuclear Spectroscopic Telescope Array from the Pegasus XL launch ve-

hicle, which was attached to the L-1011 carrier aircraft, from Kwajalein in June. Local residents discovered the debris in July, and contacted the RMI Sea Patrol. A fact finding mission was organized through Orbital and USAKA to assess any impact on the atoll beginning Aug. 2.

Everything for the NuStar mission went according to the plan – the Pegasus XL was lifted to an altitude of almost 40,000 feet and released at the safety-approved drop location. The first stage ignit-

ed and burned until the solid fuel was depleted. The depleted motor with the wing separated seconds later and dropped into the ocean, where it was designed to sink. Instead of sinking, the wing stayed attached to the motor and floated until it reached Mili Atoll. Orbital was notified on July 24 by USAKA that debris from the launch had washed ashore.

On Aug. 3, Chief Warrant Officer 3 Shawn Carpenter, USAKA marine engineer; Maj. Luke Korschner, USAKA operations of-

Photos by Chief Warrant Officer 3 Shawn Carpenter

Top: Adam Lewis, Pegasus mission manager, walks alongside the stage 1 motor and wing that washed ashore at Mili Atoll. The structure was part of the Pegasus XL rocket booster used in the NuStar mission, launched from Kwajalein in June.

Left: The schematic of the Pegasus XL rocket booster in its entirety, shown with the intact structure, circled.

ficer; Kettner Griswold, Pegasus chief engineer and Adam Lewis, Pegasus mission manager joined Republic of the Marshall Islands Environmental Protection Agency Conservation Representative Barry Rilang and RMI Internal Affairs Representative Wallace Peter on a trip to Mili Atoll. A boat, the *Tobwe Mili*, ferried the team to the site, a six hour trip from Majuro. The structure was spotted on the beach at the southern tip of the atoll.

The reef surrounds the islet, so the team had to navigate on the slippery coral, all while carrying supplies and tools. Once there, they inspected the motor to assess any environmental impact, any residual propellant or ordnance and to look at options for removal. The results of the inspection showed there was no propellant and only soot residue from the normal functions of the mission remained. All of the ordnance had fired during the mission as well, and there were no environmental concerns other than the structure debris itself.

There was significant damage to the hardware, which was almost 30 feet long and weighs an estimated 2,000 pounds, according to Koerschner. The majority of damage is due to the initial impact and the long duration in the salt water. Cracks in the case and corrosion were the primary damage, but it was determined the structure can be removed in its entirety. Orbital is working with USAKA to remove the remnants, and is working towards finding the safest and quickest solution for removal.

Pegasus Chief Engineer Kettner Griswold, left, and Pegasus mission manager inspect the booster for any signs of propellant and assess the damage to the structure.

Pegasus Chief Engineer Kettner Griswold, left, and USAKA Operations Officer Maj. Luke Koerschner disembark from the *Tobwe Mili* and cross the reef to begin inspections on the debris.

The boat's crew and Mili Atoll residents gathered around to observe the inspection of the debris.

SPOTLIGHT

SURFWAY

Article and photos by Sheila Gideon
Managing Editor

Over the past seven months, Surfway has received quite a makeover; not to its appearance, but to its contents and business model. Surfway Manager Roy Tomas took over management of the store in January 2012, following 20 years of working at the various retail stores of Kwajalein. He's not the only employee with an impressive amount of experience. His right hand man, Lenny Hamamoto, has been working at the stores for over 15 years. Surfway is further stacked with knowledgeable staff, including two men who currently work in the meat department, but have worked on Kwajalein since the 1970s: Esha Elaisha and Truman Thromman. Combine all that experience and you'll see why 2012 has been Surfway's best year yet.

While the shelves at Surfway have stayed better stocked and you have seen more variety throughout this year, Tomas is still striving to make the store the

Romen Roy takes inventory, preparing to stock items in the frozen food section at Surfway.

Does your department have something interesting going on? Do you have new staff you'd like to introduce to the community? Is there a process you'd like the community to better understand? Contact the Hourglass to become the next "Spotlight" feature.

best it can be for the community's needs. Tomas' number one goal is customer satisfaction. He has implemented numerous changes in order to obtain that goal.

The only groceries delivered on the Tuesday ATI flight are produce. Everything else, including dairy, is delivered biweekly via the barge. Depending on where the containers are in the barge depends on when they get to the warehouse and are put on the shelves. The usual priority goes to the most perishable items first, followed by those that have been backordered. Because produce is delivered on Tuesdays, Tomas has increased hours that day to 7:30 p.m. to allow patrons more time after work to come in and get their shopping done. So far, he has received positive feedback on the change.

Tomas is also intent on carrying out residents' requests whenever possible. You may have noticed more variety throughout the store lately. Much of that is the result of requests made by the community. To request Surfway carry a specific item, you need to fill out the request form located at the entrance of the store and hand it to a cashier. This way, the manager on duty at the time will be given the request in a timely manner. Some items can be requested but are considered a "slow item" because they are not sold quickly enough to keep them stocked all the time. This includes requests such as kale or tomatillos. In order to accommodate requests of that nature, Hamamoto will special order one case each month, since partial cases cannot be ordered. You can expect to see these specialty items the first week of each month. While it's empowering to be able to request what you want at your local store, not all requests can be accommodated. One hundred percent of the groceries at Surfway are ordered from the Defense Commissary Agency. The DeCA supply chain was first implemented at Surfway in September 2009. The implementation offered more variety and lower prices on groceries for Kwajalein residents. However, if DeCA does not carry an item, it cannot be ordered from another source; so, if they don't have it, we don't get it. Fill out a detailed request form to see if your item can be ordered.

Just to wrap your head around how long it takes for items to reach the island, if an item was ordered to-

Claudie James is one of the helpful cashiers working at Surfway.

day, it would not reach island and see the shelves for three months. Produce can be delivered quicker since it arrives by plane, but even then it takes at least one month. Foresight and carefully calculated inventory

helps Tomas and his team make future orders three months out. With a large number of TDY and returning Kwajalein residents for the school year arriving this month, Surfway has planned ahead and is ready and stocked for the influx of people on our island. Of course, with 35 years of experience between Tomas and Hamamoto, it was business as usual for them to prepare for a time like this.

“Roy and I, we’ve been in the trade for all of our lives, basically. Customer service is number one,” Hamamoto said.

Tomas knows Surfway is not perfect and is striving to continually improve. A common complaint he receives is about slow lines. This is mostly attributed to the credit card machines and connectivity issues. When the machines are down, signs are placed at the front door to alert patrons to the inconvenience. It could be wise to carry an extra check in your wallet just in case.

Tomas and Hamamoto are also aware of the recent price increases, particularly to meat, over the past few weeks. Hamamoto explained that cost increases for fuel, oil and fertilizer have been realized in the meat prices. The price increase is happening all over the U.S., not just here at Kwajalein. Remember, Surfway is operated as a not-for-profit business as a service for the residents. Prices are set to recover operating costs only.

“There’s more we can do to improve,” Tomas said. The community is what drives Tomas to make changes to the store. “Surfway is only as good of a grocery store as what the community wants it to be. So, we want to hear from them.” If you have requests or comments, contact Tomas and he will be happy to assist.

DISPATCH FROM ROI

And the work goes on...

San Juan Construction employee David Candle applies Resize, a chemical applied into the joints between concrete expanses, finishing the joint sealant task for San Juan.

Photos courtesy of Lavinda Tyson

The fuel farm project recently held a safety meeting on the importance of wearing Personal Protection Equipment. The focus of the meeting was on wearing gloves while working and finger and hand safety. As a demonstration, an employee's hands were taped and he was asked to make a simple cup of coffee. The activity was fun and it drew attention to the importance of individual difficulties encountered if you have no hands to work with. Employees from left are Charles Kelly, Joy Astle and Jackson John.

Ri'katak lunch program needs your continuing support

KRS provides lunch meals for 52 guest students from Ebye, or Ri'katak students. The lunch program is in place since the students do not have the opportunity to return home as the island resident students do. These meals are not provided as part of the contract, but rather they are supported by voluntary donations.

Individuals, companies and different organizations may voluntarily contribute to the program to ensure that Ri'katak students have a nutritious meal for lunch. The box lunches include deli sandwiches, baked chicken and rice, fruit, vegetables, water and cookies. All of the lunches are prepared by Café Pacific and are delivered to the schools.

The cost of each lunch is \$3.25 daily per student and based on a 180-day school year, the total cost per student for the entire academic year is \$586.

Voluntary donations can be made in any amount up to and including a full year's worth of lunches. Anyone wishing to support this worthwhile cause may send a donation to Janette Bishop in Building 603, Hospital Administration Office, second floor. Checks should be made out to "KRS" and annotated in the remarks section to indicate "Ri'katak Lunch Program." For questions, e-mail Janette or call 52225.

grill, veggies and dessert. Live acoustic music during dinner and kicking it up a notch afterwards, so come celebrate Jim's life with his friends.

OCEAN VIEW CLUB Birthday Bash is at 8 p.m., Aug. 25. Sign up at the KRS Retail Sales office by Aug. 24. Must be 21 years old. Complimentary drinks and cake for registered August birthdays. Contact Barbara Hutchins at 58228 or Ted Glynn at 53338.

THE GREAT KWAJ SWAP MEET is from 9-11 a.m., Sept. 3, at Emon Beach. One complimentary table per household, additional table is \$10. Pick-up service provided, ask for the pick-up when registering. No oversized items. Call the CA office at 53331 to reserve your table. Start the new school year off by de-cluttering your house!

THE KWAJALEIN SECURITY and Access Control Central Patrol Station has property in which the owner cannot be determined or located. Therefore, the items are to be disposed of in a public auction. The auction will be at 2 p.m., Aug. 20, at the Central Patrol Station, Building 807. Items will be available for inspection starting at 12:30 p.m., the day of the auction. The auction is open to the general public with the exception of employees of the Kwajalein Security and Access Control Department, the USAKA/RTS Provost Marshal's Office and their family members, dependents or agents. The items will be auctioned in an 'as is' condition with no expectation stated or implied as to usability or serviceability. Winning bidders must immediately pay for the items they won with U.S. currency only. No checks, money orders, credit or debit cards will be accepted. All property must be removed from the Central Patrol Station within one hour of the auction ending. If requested, a Property Clearance Control Form will be completed for the purchaser to allow transfer of the property out of USAKA/RTS. Call Lt. Chris Ramsey at 59046 between 8 a.m. to 4 p.m. with questions.

KWAJALEIN HOSPITAL is scheduled to implement a new software system for billing and electronic medical record beginning Aug. 21. During this process, be sure to bring your insurance identification cards. You will be required to update your address and phone numbers. Expect some longer wait times, and appointments will be initially longer. Questions, call 52225.

KWAJALEIN SCHOOLS 2012-2013 school year begins Aug. 24. Jr./Sr. High School classes start at 8 a.m., George Seitz Elementary School classes start at 8:30 a.m. If your child is new to Kwajalein schools this year, make sure you have completed all registration requirements prior to Aug. 24. If you have questions, contact the high school office at 52011 or the elementary office at 53601.

AAFES IS HAVING Food Court specials until Aug. 31. At Anthony's Pizza, get a one topping medium pizza for \$7.99, a multi-topping medium for

\$10.99. At Burger King, get a Whopper sandwich for \$2.49, Original Chicken sandwich for \$2.89, a Tender Crisp Sandwich for \$3.79.

LABOR DAY VOLUNTEERS are needed! Volunteer from 3:30-6 p.m., Sept. 3, at Emon Beach to support Labor Day beach party activities. Call Community Activities at 53331 to sign up.

SEPTEMBER LEARN TO SWIM session dates are Sept. 5-28, on Wednesdays and Fridays at the Family Pool. Levels 3-4 swim from 3:45-4:15 p.m. Levels 1 and 2 swim from 4:30-5 p.m. Cost is \$50. Register now until Sept. 1 at Community Activities. Participants must be at least 4 years old. Questions, call Community Activities 53331.

THE OUTPATIENT CLINIC at Kwajalein Hospital will be open every Friday morning from 8:30-11:30 a.m. for same day clinic appointments effective Aug. 24. Emergency services continue to be available 24 hours per day, 7 days per week.

MANDATORY ISLAND ORIENTATION is 12:30-4:30 p.m., Aug. 29, at building 365, CAC Room 6. Arrive 10 minutes early to sign in and be seated by 12:30 p.m. It is required for all new island arrivals, but not recommended for dependent children under the age of 10. Questions, call the meeting facilitators at KRS Environmental, Safety and Health at 51134.

SAFELY SPEAKING: Chemical Labeling. Read and understand the chemical label and MSDS before using a chemical to know the hazards and, precautions, and personal protection equipment selection.

E-TALK: Improper disposal of household hazardous waste could contaminate groundwater and pose a threat to local water treatment systems, sanitation workers, children and pets. Dispose of household hazardous wastes properly, contact Environmental department at 51134 for assistance with large pickups due to PCS.

Starting Monday, the Post Office will have new hours of operation.

Notice of Availability-Missile Defense Agency Environmental Assessment

The Missile Defense Agency has completed an Environmental Assessment, prepared in accordance with the National Environmental Policy Act of 1969 and the Council on Environmental Quality regulations implementing NEPA. The MDA Integrated Flight Tests at U.S. Army Kwajalein Atoll/Ronald Reagan Ballistic Missile Defense Test Site EA analyzes the potential environmental consequences that could result from performing integrated flight tests at USAKA/RTS, Wake Island and in the Pacific broad ocean area. MDA needs to demonstrate integrated Ballistic Missile Defense System effectiveness against short range ballistic missile targets, medium range ballistic missile targets and air-breathing targets in an operationally realistic flight test. Interceptor missiles proposed for use in the tests would be the Aegis Standard Missile, Terminal High Altitude Area Defense missile and Patriot missile. Previously planned and on-going activities at the alternative sites would continue.

Based on the analysis the MDA has determined that proposed activities are not expected to result in significant impacts to the environment and an Environmental Impact Statement is not required. A draft Finding of No Significant Impact and the EA are available at http://www.mda.mil/news/environmental_reports.html and at the following locations: Office Lobby of the Republic of the Marshall Islands Environmental Protection Authority, Majuro, Marshall Islands; Grace Sherwood Library, Kwajalein, Marshall Islands, APO, AP 96555; Roi-Namur Library, Roi-Namur, Marshall Islands.

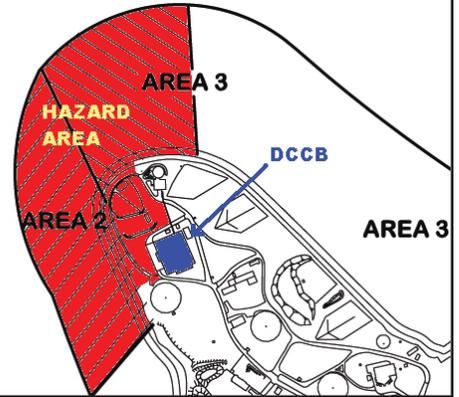

Public comments on the EA and Draft FONSI will be accepted through Aug. 20. Submit written comments to: Missile Defense Agency, Bldg 5224, Martin Road, Redstone Arsenal, AL 35898 ATTN: Mr. Dan Spiegelberg, P.E.
