JUNE 27, 2015

THE KWAJALEIN HOURGLASS

R.M.I. citizens who successfully completed the Navy Seabees CCAD-Marshall Islands Apprenticeship Program are honored by USAG-KA Commander, CCAD-Marshall Islands and local construction leaders at USAG-KA Command Headquarters Wednesday.

Photo by Jordan Vinson

Underwater Photo of the Week

HOURGLASS REPORTS

This two stripe damselfish (*Dascyllus reticulatus*) was photographed by Kwaj resident Shannon Paulsen off Emon Beach recently.

Two stripe damselfish are found mostly in the equatorial Pacific and live both in lagoons and along seaward reefs, residing at a maximum depth of about 50 meters. A member of the Pomacentridae family, which consists of at least 387 species of damselfish, the two stripe damselfish is but one of many species of damselfish that live in the waters of the Marshall Islands.

Adults prefer spending their time among branching coral heads, specifically antler corals (*Pocillopora eydouxi*), and are a common sight for snorkelers and scuba divers. They are a gregarious species that often group together in schools.

As benthic spawners, females deposit their eggs on rock or coral surfaces after their male counterparts prepare a nest by cleaning the rock or coral surfaces with their small mouths. During the thousands of eggs' early time

Two stripe damselfish by Shannon Paulsen.

of development, they grow together, jutting off the surface in the shape of little tubes, and sport like black spots for developing eyes. It's always a real treat for scuba divers who happen upon a nest of maturing damselfish spawn, especially if they brought their cameras.

REMINDER TO ALL: COCONUT CRABS OFF LIMITS

HOURGLASS REPORTS

The Environmental Standards for U.S. Army Garrison-Kwajalein Atoll identify the coconut crab as a protected species. For this reason, USAG-KA residents and personnel should not touch, harass, injure or kill coconut crabs. If you have any questions or concerns, please contact the Kwajalein Range Services Environmental Office at 51134.

The coconut crab (*Birgus latro*), known locally as barulep, is a type of land-based hermit crab. Unlike other hermit crabs, the coconut crab does not make use of a shell beyond the juvenile stages of its life. It is this characteristic that allows the coconut crab to grow so large in size.

Despite their name, coconut crabs have a varied diet which includes other fresh fruits and even meats, usually smaller crabs or dead animals. They use their strong sense of smell to locate food when they emerge from their burrows to hunt at night and, typically, remain inside their burrows during the day to protect themselves from the heat.

Coconut crabs can be found on many of the small islands throughout the Pacific and Indian Oceans. The state of their population remains unknown. For this reason, some nations have given this species protected status.

This coconut crab, photographed by USAG-KA resident Art Bennis on Roi, is one of many on USAG-KA-maintained islands that are protected by environmental standards enforced by the Army and the R.M.I.

Art Bennis

THE KWAJALEIN HOURGLASS

The Kwajalein Hourglass is named for the insignia of the U.S. Army 7th Infantry Division, which liberated the island from the forces of Imperial Japan on Feb. 4, 1944.

The Kwajalein Hourglass is an authorized publication for military personnel, federal employees, contractor workers and their families assigned to U.S. Army Garrison-Kwajalein Atoll. Contents of the Hourglass are not necessarily official views of, or endorsed by, the

U.S. Government, Department of Defense, Department of the Army or USAG-KA. It is published Saturdays in accordance with Army Regulation 360-1 and using a network printer by Kwajalein Range Services editorial staff.

ROI RATS TIE THE KNOT

HOURGLASS REPORTS

Roi rats DJ Castle and JoDanna Kalinowski tied the knot Sunday during a special ceremony on Mellu, a small jungle island located a couple of miles southwest of Roi-Namur. Joining the Castles was a small group of close friends who made the trek via B-boats in the late morning hours to officiate the ceremony and serve as bridesmaids, groomsmen and photographers.

Atop a large, sandy beach hugging the southern end of the island, DJ and JoDanna were wed by Roi resident Carol Golby-Saunders. In a strong breeze that whipped through throngs of coconut palms behind JoDanna and across the surface of the warm, turquoise water behind DJ, Golby-Saunders pronounced the couple husband and wife, four years after the two first met. The Castles couldn't have asked for a more beautiful locale to mark the momentous occasion, they said.

"This experience has been a tremendous joy," DJ told dozens of friends gathered together for the couple's wedding party at the Roi Surf Shack later that night. "We wish our families could be here to celebrate, but we have the next best thing here: our Roi family. Thank you, everyone."

DJ and JoDanna first met in 2011 during a Wilderness Volunteers trip in the Boundary Waters Canoe Area of Minnesota.

"There were eight of us on the trip, all strangers," JoDanna said. "And DJ said, 'Who wants to be my canoe partner?' And I said I would." Several months later JoDanna found a job on U.S. Army Garrison-Kwajalein Atoll and moved to Roi. The rest is history.

The Castles are set to head to Africa to celebrate their honeymoon. There, they'll climb Mount Kilimanjaro and go on a safari.

TOP: DJ and JoDanna Castle with the wedding party. From left to right: Victoria Cameron, Carol Golby-Saunders, the Castles, Gene Littlefield and Sandra Garrison. BOTTOM: The newlyweds admire the stunning three-tier wedding cake cooked up by Kwaj resident Glen McClellan for the couple's wedding party.

USAG-KA, SEABEES RECOGNIZE RMI APPRENTICES

HOURGLASS REPORTS

Six R.M.I. apprentices were formally recognized and honored Wednesday morning by U.S. Army Garrison-Kwajalein Atoll Command staff, members of the Navy Seabees CCAD-Marshall Islands, local construction and business leaders and the manager of Ebeye's R.M.I. National Training Council division.

Having successfully completed the CCAD-Marshall Islands Apprenticeship Program with the Seabees, Thomas Langrine, Zernando Stephen, Enta Nebo, Johnson Eknilang, Elkinwor Jeik and Fernando Jokon were invited to the USAG-KA Command Headquarters building Wednesday. There, they received certificates of completion at a special ceremony that brought out a couple of dozen people to congratulate them.

USAAG-KA Commander Col. Nestor Sadler talked up the apprentices and, having seen them at work in person, said they deserved both the congratulations and job prospects they have received.

"These gentlemen right here truly, truly demonstrated commitment, drive and initiative and ... more importantly, the skills and the ability to learn and grasp the tasks that they were being taught," Sadler said.

Speaking directly to construction and business leaders working on the garrison, Sadler assured the audience that the young men would be fine recruits in the construction industry.

"These individuals are truly worthy and have what it takes to be excellent employees," Sadler said. "And, if they have a desire to be employed here on Kwaj, they could really move on to bigger and better opportunities and make a difference. I can truly vouch

Thomas Langrine, second from right, is honored by USAG-KA Command staff and members of CCAD-Marshall Islands Wednesday. Langrine was one of six young men from Ebeye who successfully completed the CCAD-Marshall Islands Apprenticeship program, boosting the group's construction skills and future job prospects. They were recognized by USAG-KA Command Sgt. Maj. Reginald Gooden, left, Commander Col. Nestor Sadler, and Navy Seabee BU1 Brantly Honeycutt, right.

Jordan Vinson

for them."

During their weeks with the Seabees, the apprentices received in-depth instruction and hands-on experience that will go a long way on future construction builds. A renovation of the dispensary on Gugeegue with their Seabee mentors gave the apprentices a crash course on what to expect in regards to careers in the industry.

ENNUBIRR ANGLERS TAKE TOURNEY PRIZE

HOURGLASS REPORTS

Team Tequila Sunrise landed a hefty 45.2-pound yellowfin tuna June 14, taking first place in the 2015 Biggest and Smallest Fishing Tournament on Roi-Namur. Team captain Stanley Lomae and his crew, Benai Langbata, Tarsen Phillip, Saimon Pedro and Danny Nabu, caught the fish near the island of Bogerick.

"This was a great fish," Lomae said. "I'm very happy the guys and I were able to catch him and bring him in."

The tournament featured four categories of tuna to be caught: wahoo (ono), yellowfin (ahi), aku (skipjack) and dogtooth. Organized and sponsored by the Roi Small Boat Marina staff, the event gave the anglers an opportunity to earn cash prizes in addition to their catches.

While Lomae and his Ennubirr crew took home \$100 on top of their 45-pound fish, Team JoDanna and the Reel Men—consisting of JoDanna Castle, Dan Gunter, David Smith, Joe Coleman and Angel Alejandro—earned \$100 for "hauling in" a pint-sized 4.4-pound yellowfin.

"Bless the maker. That was an awesome catch" Gunter joked. "Tonight we feast like kings!"

TOP: Team Tequila Sunrise celebrates their winning 45.2-pound yellowfin catch at the Roi Small Boat Marina June 14. **BOTTOM:** Team JoDanna and the Reel Men show off their 4.4-pound yellowfin.

NEWS FROM AROUND THE PACIFIC

HOURGLASS REPORTS

RMi looks to Fiji to help country lessen imports

A delegation from the R.M.I. recently travelled to Fiji to explore ways in which the atoll nation could bolster hydroponic and aquaponics projects, lessening total annual imports.

Joe's Farm, a company based in the R.M.I., was selected for a feasibility study by both countries and will be the testing grounds for increased local food production. Ravuni Ululakeba, of the R.M.I. Investment Promotional Authority, told the Fiji Broadcasting Corporation that the Marshall Islands has a tough job ahead.

"In the Marshall Islands we import almost 110 percent of almost all the commodities, whole and retail, and similarly for vegetables and fruits," Ululakeba said. "So we were fortunate that Joe's Farm was given a feasibility study project by our company."

Nauru government accused of veering from democracy

Nauru has gotten international media attention recently due to allegations against the nation's leadership for taking a pronounced turn away from democratic governance, the Marshall Islands Journal and the Australian Broadcasting Corporation report.

The government, headed by President Baron Waqa, is accused by political opponents and international observers of taking bribes from Australian mining company Getax for access to the nation's valuable phosphate stockpiles. The government's deportation of several judges, the suspension and deportation of opposition members of parliament and the revocation of visas for the family members of opposition members have also stoked the flames. Perhaps most surprising was the government's decision to cut citizens' access to the social network website Facebook.

Australian former magistrate Peter Law, whom Nauru leadership expelled along with one of the nation's chief justices last year, has called on Australia and New Zealand to pull their weight and assist the Pacific Islands Forum to "bring Nauru back into the democratic fold."

Spokespersons for the Nauru leadership have denied any wrongdoing and have accused ABC of spreading false information and slandering the government.

World Bank approves cash for disaster preparedness in several Pacific island countries

The World Bank has signed off on more than \$32 million in grants and credits to help regional Pacific nations cope with natural disasters.

Part of the international lending and development group's Pacific Resilience Program, the cash will initially go toward assistance in Samoa, Vanuatu, Tonga and the Marshall Islands, as well as the Pacific Islands Forum and the Secretariat of the Pacific Community, two major regional intergovernmental organizations. In a press release the World Bank issued June 19, the nations are set to use the money to bolster early warning and disaster preparedness procedures, upgrade important public infrastructure, establish accounts for quick post-disaster cash withdrawal and more.

The Pacific Resilience Program is part of the World Bank's International Development Association, a subgroup of the body. It concerns itself with providing aid to the world's poorest countries.

SIMPLY

HOURGLASS REPORTS

Asbestos is a naturally occurring fiber that is resistant to heat and corrosion. Because of these properties it was often used in building materials, such as fire protection, insulation, electrical wire insulation and cement products before 1981. Many of the facilities in the atoll were built before 1981 and may have asbestos-containing building materials in them.

Asbestos can separate into microscopic fibers that can cause many different health problems. As long as the asbestos-containing building materials are intact, it is safe. It is only when the asbestos is damaged that there is danger of exposure. Labels, such as the one to the upper right, are placed on known asbestos-containing building materials.

If a material is marked with this label, do not damage the material. If the material is damaged, report it to your supervisor so that they can contact the help desk and safety department to get the material repaired or removed.

If you have a concern about possible asbestos in any facility, contact Safety at 51134. The Safety office has an extensive database of materials that have been sampled around the atoll.

Known asbestos-containing materials on Kwajalein include:

- 9 inch by 9 inch vinyl floor tiles (all different colors)
- Gypsum wall board joint compound, commonly referred to as "mud" (only in older buildings that have not been renovated)
- Cement board (used for siding in older buildings)
- Underground piping
- Vinyl floor sheeting (the paper backing on older vinyl floors)
- Some roofing materials
- Glues and mastics for flooring

Remember: Asbestos containing materials are not dangerous unless damaged!

MANIT MINUTE

IROIJLAPLAP LOEAK

Iroiijlaplap Loeak was one of the two great chiefs of the Ralik Chain of the Marshall Islands during the late 1800s. The other great chief was Kabua the Great.

Loeak's uncle Kaibuke was the iroiijlaplap (paramount chief) of the Ralik atolls until his death in the late 1860s. After his death two lines of competing leadership emerged. One was headed by Kabua, the son of Kaibuke's younger sister, who took Kaibuke's widow as his wife. The other was headed by Loeak, the older of Kaibuke's two nephews.

Rules of succession were subject to dispute, and during the years after Kaibuke's death there was great controversy—both among the Marshallese and the German administrators, which had annexed the archipelago—over who should take the title of iroiijlaplap, succeeding Kaibuke and assuming control of the land attached to the title.

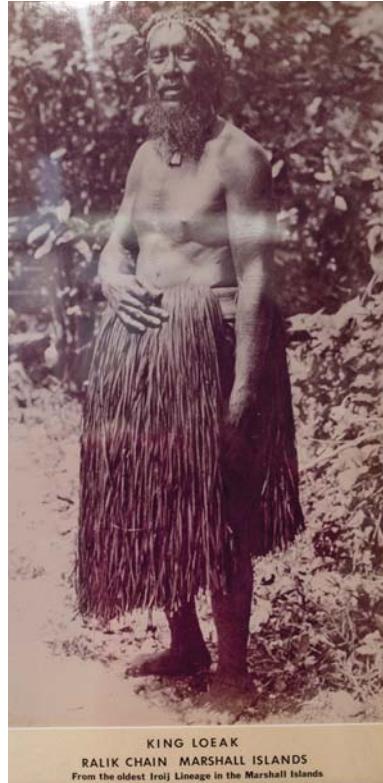

Loeak lived on Ebon, a center for early European activity in the islands. Ebon was the site of the first Christian mission in the Marshalls, established in 1857. In 1859 the first Marshallese trading station appeared on Ebon. After the copra trade began in 1864 Ebon emerged as the center of the growing German copra trade. The balance of traditional power was closely related to alliance and trade relationships with the American missionaries and German traders. The controversies about leadership reached a peak in 1876 when Loeak mustered several hundred warriors to respond to what was perceived as an effort by Kabua to weaken Loeak's leadership on Ebon. Kabua averted outright battle by sailing to Jaluit with his followers.

Kabua successfully presented himself to the Germans as the iroiijlaplap in 1878. To counter Kabua's growing influence with the Germans at the administrative center at Jaluit Atoll, Loeak allied himself with traders on copra-rich Ebon. In 1880 he gathered his forces and went to war against Kabua. An informal truce emerged, made easier by the flow of copra profits to both Loeak and Kabua, but the dispute over the iroiijlaplap title was never fully resolved.

Loeak had some fame as a warrior. Early European reports suggest that he was interested in maintaining a traditional island lifestyle. He was reported to be proud and strict with his alaps (lineage heads who coordinate use of the iroiij's lands), but not really rough. A later German report, however, relates that Loeak "lives in a large and spacious house surrounded by cannons. He dines on a set table, drinks coffee and tea, and dresses in coat, breeches, and hat." With profits from the copra trade, Loeak brought a used New Zealand schooner, the Fortune. Micronesian historian the rev. Francis Hezel notes that Loeak's assimilation to a more Western lifestyle had its limits, though.

"For all his display of liberalness, Loeak had to draw the line somewhere," Hezel notes. "He adamantly refused to become a Christian."

Loeak died at his home in Ailinglaplap in 1904 at approximately 70 years of age.

area.

Ultimate Frisbee. 5 p.m. every Monday and 6 p.m. Friday near the soccer fields. If you've played before then you know how much fun this great workout is. If you haven't, it's combination of soccer and no-contact football played with a Frisbee. For questions or more information please email BenGleich@hotmail.com.

Save energy—use your appliances wisely. Do your laundry efficiently by using the warm or cold water setting for washing your clothes. Always use cold water to rinse clothes. Use your dryer's automatic dry cycle rather than a timed cycle, and clean the lint trap after each use. Conserve energy by running your dishwasher only when it is fully loaded, and turn off the dry cycle, and air dry dishes instead.

Dog Owners, please pick up after your dog at the dog park. It is a privilege to have it and it can be taken away if we do not take care of it.

E-Talk: The 2014 Water Quality Report is now available to all USAG-KA residents. It contains important information about the drinking water at USAG-KA.

Safely Speaking: Lifting heavy objects with a crane is a common practice for KRS. The lifting device and rigging must have the rated capacity to lift the object.

THUMBS UP

... to everyone who helped prepare for the Summer Reading Program: Pattie Alejandro, Ariana and Aiden Alejandro, Ashley and Allison Homuth, Phaylina Taganas, Megan Sok, Daisy Wiltrot, and Denice Phillips. You've made this year's program spectacular!
... to my pack out crew of Jr., James, Willie, DavidLee, Bokbwij, and Johnny. Your efficiency, smooth team work, and care of my personal items as you packed me out was greatly appreciated. Thumbs up to Cindy Yost for insuring that all my pre-pack out details were in order and for giving useful tips on how to make my pack out go smoothly.

Are you a member of a private or public club or organization on the garrison? Want to submit a column to the Hourglass regarding your organization's acitivities? Contact the Hourglass staff via email or call 52114.
