

towards achievement of the recycling goals. This annual report should include:

- the county's public education program on recycling
- the amounts of waste disposed by the following types: yard trash, white goods, clean debris, tires, and all other
- amount and type of materials recovered for recycling
- percentage of population participating in program
- percent reduction in amount of waste disposed
- description of recycling activities attempted, success rates, reasons for success or failure, evaluation of most successful ongoing activities
- recycling programs in progress (first report 10/1/89).

### Existing resource recovery plans

Counties required to submit a resource recovery program shall revise such program to bring it into compliance with this new Act.

Other entities with waste management responsibilities

The requirements of this section shall apply to any special district or other entity which has previously been delegated waste management responsibilities. Such bodies are also eligible for any grants provided under the Act.

### Full cost accounting

- Each local government is required to determine the full cost of waste management in its service area (not jurisdiction) by 10/1/89, or within one year after DER promulgates a rule. This cost should be updated annually.
- By 10/1/89, and on an annual basis, counties and cities must inform each user of his/her share of the full cost incurred.
- A private contractor may not be required by cities and counties to make these calculations or provide the information to the public, unless the franchisee agrees.
- In addition to any other fees allowed or required by law, a county or city may levy fees for:
  - solid waste disposal, which may be based on any relevant factor

- developing and implementing a recycling program for which the non ad-valorem process of Chapter 197 may be used.

- A local government may provide grants, loans or other incentives to aid low-income persons.

### Flow control/operation of facilities

Counties are responsible for provision and operation of solid waste disposal facilities.

### Prohibition against city-owned facilities

Cities may not operate disposal facilities unless approved by special act or interlocal agreement. Exceptions are:

- facilities permitted on or prior to 10/1/88
- resource recovery and related on-site facilities.

### Flow control across county boundaries

Counties may regulate disposal at county facilities of waste generated outside the county.

### Collection and transportation in cities

Cities are required to collect solid waste generated within their jurisdictions and transport such waste to the disposal facility designated by the county.

### County disposal fees

Counties may charge reasonable disposal fees for the processing of wastes.

### Scales at disposal facilities

Effective 7/1/89, scales must be installed at disposal facilities with a life expectancy greater than one year.

### Operator training

Effective 1/1/90, all persons responsible for operation of a solid waste management facility should have completed an appropriate training course approved by DER.

### Landfill management escrow account

Each landfill owner is required to establish an escrow account to provide for eventual closure of the landfill.
