FLORIDA GEOLOGICAL SURVEY
Herman Gunter, Director

MINERAL RESOURCES AND INDUSTRIES OF FLORIDA

BY
JAMES L. CALVER

LEGEND

RESOURCE AREAS:

The areas are generalized and represent the dominent material of surface formation.

- DOLOMITE
- LIMESTONE
- PEAT
- PHOSPHATE
- SAND
- SAND WITH CLAY & KAOLIN
- SAND SHELL & CLAY
- SAND SHELL & MARL
- SAND SHELL "COQUINA"
- SAND CLAY & LIMESTONE
- PHOSPHATIC SANDS & CLAYS, LIMESTONES & FULLERS EARTH

INDUSTRIES

Each industry symbol indicates a producing mine, quarry or plant. No attempt has been made to show inactive and abandoned locations. Clay localities for which published data are available are represented by appropriate symbols.

- SAND & GRAVEL
  - Pit
- PEAT
  - Producer
- LIMESTONE
  - Quarry
- DOLOMITE
  - Quarry
- CLAY
  - Mine
  - Locality
- KAOLIN
  - Mine
  - Locality
- FULLERS EARTH
  - Mine
  - Locality
- PETROLEUM
  - Field
- PHOSPHATE, LAND PEBBLE
  - Mine
- PHOSPHATE, SOFT ROCK
  - Mine
- PHOSPHATE, HARD ROCK
  - Mine
- HEAVY MINERAL SAND
  - Mine
  - Plant
- PORTLAND CEMENT
  - Plant
- LIME
  - Kiln

1956

Compiled from reports by the U. S. Bureau of Mines, the U. S. Bureau of the Census, U. S. Geological Survey, and file data of the Florida Geological Survey.
