## INTRODUCTION

Florida has long been noted for its rich Late Pleistocene fossil vertebrate deposits, including the Vero site in Indian River County (Weigel 1962), the Melbourne Bone Bed in Brevard County (Gazin 1950, Ray 1958), Seminole Field in Pinellas County (Simpson 1930), Reddick (Ray *et al.* 1963) in Marion County, and many others. In recent years a few
