

2 astragali; UF 10917: 4 proximal phalanges; UF 10913; 4 distal sesamoids; UF 10914: 7 ungual proximals.

The Haile XV A skull (UF 10909) is in poor condition, and not enough of the fragments are present to allow complete reconstruction.

FIGURE 15. *Nannippus phlegon*, left upper molar, occlusal view, UF 17484, Haile XV A; X 6.15.
