VOL. XXVI, NO. 199

GAINESVILLE, FLORIDA, SUNDAY, SEPTEMBER 26, 1909

TEN CENTS A WEEK

UNIVERSITY OF FLORIDA WILL OPEN WEDNESDAY

Registration and Classification of Students Will Take Place Tuesday---Bright Prospects.

The University of Florida is to open for the season of 1909-10 this week. The registration and classification of students is to take place on Tuesday, September 28th. All who expect to attend the University are urged to present themselves promptly on that day. Lateness in reporting to the University not only loses time to those who are late, but also causes the authorities more inconvenience than is generally realized, and it is hoped that all prospective students will be considerate enough to avoid causing such inconvenience.

The formal opening for the year will take place on the following day, Wednesday, September 29th, with the chapel exercises, at 9:15 a. m., which are open to the public. The classes will begin meeting for organization and announcements on Wednesday, immediately after chapel, at the hours provided for in the printed schedule, copies of which can be obtained at the president's office.

A considerable increase in enrollment is expected in the academic, general scientific, engineering, agricultural, and pedagogical courses; and besides this, the new law school will add a good many to the number of students in attendance. All the rooms in the dormitory have been

taken, and it is necessary to make provision for students in houses near the University. Among the new students are some who come from the University of Georgia, Bucknell College, the Brooklyn Polytechnic Institute and other colleges of high standing, showing that the University of Florida is winning the popular confidence which its actual merits justify. The preponderance of the students will be from Florida, of course, as should be the case; but there will be several from the North also.

Work has been begun on the new Scientific building, and it is hoped that this building can be put into use before the close of the present academic year. This building will provide for the department of physics, chemistry, geology, and biology, and will enable the excellent laboratory equipment of the University in these departments to be used to much better advantage than has been the case in the past. The space which has been used in Thomas Hall for the temporary accommodation of the scientific work, will be used for dormitory purposes.

The prospective increase in enrollment and in facilities leads to the expectation that the University is about to enter upon the most successful year in its history.

Pole Row to Be Settled By Scientific Societies

BAR HARBOR, Maine, Sept. 25.—General Thomas H. Hubbard, president of the Peary Arctic Club, talked yesterday at Bangor with Commander Robert E. Peary and returned here last night with some of the data and records which are to be used to maintain the position of the explorer in the Cook controversy. These records will be carefully considered within the next few days and General Hubbard and Commander Peary will confer here either Sunday or Monday. This consultation may result in an announcement making public any information in the possession of Commander Peary concerning Dr. Cook.

Peary has placed his case in General Hubbard's hands and a meeting of the officers of the Peary Arctic Club will be called at the earliest possible moment by General Hubbard. This meeting will be held in New York. This action will be taken because General Hubbard believes that Commander Peary's interests will benefit by an early submission of his records

and observations of his trip to the pole.

"Concerning Dr. Cook," said General Hubbard, "I would say let him submit his records and data to some competent authority and let that authority draw its conclusions from the notes and records taken in the field. Dr. Cook is reported as having said that he wants sixty days to go over his records in order to work out his conclusions to show that he has been to the pole.

"It is for the scientific tribunal, whether the Royal Geographical Society of Denmark or any other society, to say whether conclusions have been reached by consideration of the records. All that is wanted is the data and records made in the Arctic and competent authority will determine from them where Dr. Cook has been.

"I may say that Commander Peary will also be expected to turn over his data and observations for the same purpose. What proof Commander Peary has that Dr. Cook was not at the pole may be submitted later."

While Peary and General Hubbard

Man Literally Roasted to Death in Auto Wreck

AMERICUS, Ga., Sept. 25.—One person was burned to death, another instantly killed and a third seriously burned, when an automobile driven by John McLendon ran off an eight-foot embankment yesterday afternoon.

McLendon and Miss Viola Herman, one of his companions, were pinioned beneath the wrecked car, which caught fire.

Ethel Hill, another member of the

party, although severely burned, ran screaming to this city, two miles distant, and gave the alarm.

Miss Herman's neck was broken by the fall and death was instantaneous.

McLendon was literally roasted alive.

The best place to buy your goods is at the store which invites you to come through an ad. in The Sun.

SPAIN TO HAVE WAR, AND REAL WAR, TOO.

MADRID, Sept. 25.—It is generally believed here that the complications between Spain and Mulai Hafid, the Sultan of Morocco, are likely to result in a Spanish-Moroccan war, that is, a war between Spain and the forces of the Sultan of Morocco in distinction from the present fighting, which is limited to the Moorish tribesmen inhabiting the Rif country.

Spain today has over 60,000 troops in North Africa, with 11,000 more mobilizing for service there, and the government feels that only the brilliant completion of the work begun can defeat the plans of political enemies at home.

The situation at Barcelona is causing renewed anxiety. Bomb explosions on the streets there are almost of daily occurrence, but the news papers that print even the rumor of such occurrences are seized by the authorities.

The minister of the interior insists that the government is not fighting its political enemies, but rather a wide-spread anarchistic plot.

NO CLUE TO MURDERERS WHO TOOK SIX LIVES.

ROANOKE, Va., Sept. 25.—A telephone message last night from Grundy, the county seat of Buchanan county, Virginia, says no developments have occurred in the murder mystery at Hurley in which six persons were killed and their bodies burned on last Wednesday. Investigation and search are still in progress, but aside from the liberation of Silas Justis and his two sons, who were thought to have been implicated in the murder, nothing has been brought to light.

The Justises proved their innocence at a preliminary hearing. Silas Justis is not a relative of the persons of the same name who were murdered. He and his two sons were arrested at their home after bloodhounds had led to the house where they live. They stoutly denied that they knew anything of the tragedy.

SHOOTS OFF WIFE'S HEAD, THEN HIS OWN FOLLOWS.

GREENVILLE, S. C., Sept. 25.—One of the most brutal murders ever committed here occurred yesterday morning at the Woodside mill village, a suburb of Greenville, when Whit Galloway shot his wife dead and then killed himself in the presence of his three small children.

Galloway carefully loaded both barrels of his shotgun, then crept to the side of the bed, aimed at his sleeping wife's head and discharged the gun, blowing off her head. Then placing the butt of the gun on the floor he put the muzzle to the side of his head and pulled the trigger, blowing his head completely off.

Jealousy is said to be the cause of the tragedy. Galloway's little 4-year-old daughter said her father also tried to kill her.

CONVICT SLAIN AT TABLE.

TIFTON, Ga., Sept. 25.—Charles Loke, a convict on the chain gang in Tift county, was killed by Albert White, a fellow convict, with a single blow on the head, while seated at the table. White slipped up behind the victim and dealt the blow with a hickory crossbar.

will not discuss what societies shall consider Commander Peary's data, the coast and geodetic survey at Washington will examine records in an official capacity inasmuch as Commander Peary is an officer of the navy attached to that bureau at present.

PRETTY POLITICAL DEAL DEVELOPS PRETTY MESS

If Carried Through Will Upset Calculations of Many Aspiring Politicians---Will Dump Broward.

The Miami News-Record is authority for the following:

"The recent announcement of Hon. Lewis Zim of St. Augustine that he would be a candidate for Congress in the Second District before the primaries of next year, is the first indication that certain political conferences that have been held this summer are bearing fruit.

"It is evidence of one of the finest political deals that have been entered into by politicians in many a long day, and which if carried out will break up the political calculations of many aspiring politicians.

"For some time it has been known that a new political deal was to be put over the boards by which there is to be an entirely new lineup of the old Broward-Barrs faction and in the deal there is to be some remarkable shakeouts.

"The News-Record is in receipt of reliable information, from a source that cannot be doubted, that exposes the inside facts of the proposed deal and that will stir up considerable interest in political circles.

"Reading Mr. Zim's announcement carefully it becomes evident that he does not commit himself to running as a Congressional candidate, but leaves something open for after-consideration.

"It has leaked out, in select quarters, that arrangements have been made, by the select few, to launch a ticket shortly after the holidays. This ticket will comprise all who will be candidates next year, and some who are to profit the combination and become candidates for State offices two years after.

"The slate carries with it the un-

derstanding that Broward is to be thrown overboard, and that the faction is not to support him in his candidacy for the United States Senatorship.

"The ticket is to include Claude L'Engle for the United States Senatorship, and the votes of the new faction are to be thrown to him.

"Instead of Mr. Zim's finally running for Congressman, he will give place on the ticket to R. Hudson Burr, now Railroad Commissioner, who will try to fill Frank Clark's shoes.

"For his service Mr. Zim will, at the proper time, become a candidate for McLin's job as Commissioner of Agriculture, and be supported by those in the present deal.

"Senator Hudson will probably receive support for nomination as a candidate next year for a Supreme Court judgeship and be saved for gubernatorial contest in 1912.

"Such is the line-up for the principal positions. The minor candidates, evidently, have not yet been selected, but it is expected that before the year shall wane the entire ticket will be outlined and active campaign commenced to convince the Florida voters that this is the best ever.

"The announcement that this deal has been consummated will have a tendency to stir up Florida politics at once, rather than after the holidays, when the public were to be let gradually into the plan as to the new candidates.

"Whether the new faction line-up will succeed any better than its predecessors remains to be seen after the votes are finally counted next spring."

Crew Three Days at Sea Without a Taste of Food

PENSACOLA, Sept. 25.—Bound from Santos for New York with a cargo of 31,000 bags of coffee, the British steamer "Tocantous," Capt. Noris, put into port Thursday night for provisions, having been caught in the tropical hurricane in the Gulf last Sunday night and all provisions ruined. The crew of the ship was without food for three days, while the coal in the bunkers ran short. The master of the ship, which shows unmistakable signs of an awful encounter with the storm, stated that for forty-eight hours he was compelled to stand on the bridge of his ship

and apparently during this period he did not move ten miles. With full steam ahead he pointed the nose of the steamer into the storm and rode it out, though at times he thought the ship crew would go down, as immense seas broke constantly over the vessel, while the wind blew at such force that it was with difficulty that the steamer could be kept head on. The vessel suffered considerable damage, the storm gear being carried away, all dishes and furniture broken and deck coverings swept away, in addition to destroying about \$400 worth of supplies.

Pretty Country Girl Proves Muchly Married

KANSAS CITY, Sept. 25.—When he found marriage certificates in his wife's trunk, Frederick Chapman of this city, who believed he had married an unsophisticated country girl, investigated further and discovered what he considered evidence that Mrs. Chapman had not been divorced from her last husband.

Chapman confronted his wife with the certificates and she confessed to previous alliances. He then preferred

a charge of bigamy against her, and she was arrested. She is held for trial in the criminal court.

According to an alleged confession to the prosecuting attorney, Mrs. Chapman admitted having been married to five men besides Chapman in the past ten years, and said she had deserted each of them. Her husbands were Frank Ritter of Paola, Kans.; James Chaney of Butler, Mo.; Martin Wheeler of Jasper county, Missouri, and two in Kansas City, Mo.
