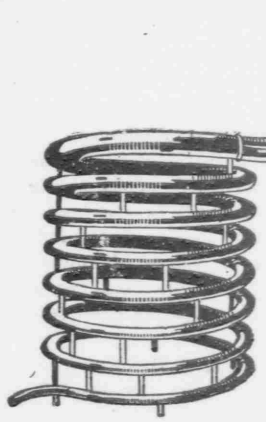
STILLS AT VERY NEAR COST



I have on hand a very large assortment of stills, ranging in size from ten to fifty barrels capacity. I have put the prices of these stills down to just a little above cost, in order to dispose of them. Copper is now exceedingly cheap, and there is no reason why the price of stills sould not be reduced considerably. Naval stores are at a very low price, and I have decided to put the price of stills in keeping with same. Watch this space for my price list, which will be published later on. In the meantime if you are in the market for anything in the still line, ask me for prices, F. O. B. your railroad station. If I do not sell you what you want, I will make someone else sell you cheap. My specialty is closely riveted stills, with heavy bottoms, high crowns, large spouts, extra large worms and above all, stills that are guaranteed not to leak. Drop our nearest shop a line, or wire us for your wants. Ask for our booklet of testimonials.
