

**RECIPE FOR DIXIE ICE CREAM**

Can be made and frozen in 10 minutes at cost of

**One Cent a Plate.**

Stir contents of one 13c. package

**Jell-O ICE CREAM Powder** into a quart of milk and freeze.

No cooking, no heating, nothing else to add. Everything but the ice and milk in the package.

**Satisfaction guaranteed.** This makes 2 quarts of the most delicious ice cream you ever ate.

Five Kinds: *Chocolate, Vanilla, Strawberry, Lemon and Unflavored.* 2 packages 25c. at your grocers, or by mail if he does not keep it.

Illustrated Recipe Book Free. The Genesee Pure Food Co., Le Roy, N. Y.

**HOW RUSSIA OBTAINS NAVAL STORES**

A glance at the way in which naval stores are obtained in Russia serves to show what is likely to happen in this country when the longleaf pine forests, from which our naval stores industry derives the raw material for turpentine, rosin, tar, and pitch, have been depleted.

Red pine, called by the botanists *pinus sylvestris*, is the tree which the Russians exploit for resin, as the longleaf pine of the Southern States is exploited in this country. In securing the resin the Russians chip the trees much as we do, but a far smaller yield is secured.

Each year's chipping extends about three feet vertically, and all the way around the tree except for a strip of bark about two inches wide, just sufficient to keep the tree alive. After five years' chipping this strip of bark is also cut and the tree soon dies.

On account of the coldness of the climate where the red pine grows, the resin does not flow readily, but hardens soon after it exudes from the tree. It is necessary, therefore, to expose a large surface in order to get a sufficient yield. Nor does the resin flow far enough to be caught in liquid form in "boxes" or cups, as it does in this country. Therefore it has to be scraped off after it hardens. The whole product, which amounts to only about two percent of a year from each tree, is comparable with the "scrape" which forms only a small part of the yield obtained in warmer climates.

Spirits of turpentine and rosin are prepared from this crude resin by distillation with steam in the usual manner. The tree is utilized further than this, however. The outside slabs with scarred surfaces, to which some resin still adheres, are treated either in the old fashioned pit kiln or in closed retorts for the production of tar, charcoal, and wood turpentine. The rest of the tree is used for fuel and for making the barrels in which the products are shipped.

It is possible that after our Southern turpentine pine becomes commercially extinct, some of the resinous trees of the colder parts of the United States may be utilized like the red pine of Russia as a source of naval stores, although the yield may be small and the process tedious.

**A CERTAIN CURE FOR CROUP**

Used for Ten Years Without a Failure  
Mr. W. C. Bott, a Star City, Ind., hardware merchant, is enthusiastic in his praise of Chamberlain's Cough Remedy. His children have all been subject to croup and he has used this remedy for the past ten years, and though they much feared the croup, his wife and he always felt safe upon retiring when a bottle of Chamberlain's Cough Remedy was in the house. His oldest child was subject to severe attacks of croup, but this remedy never failed to effect a speedy cure. He has recommended it to friends and neighbors and all who have used it say that it is unequalled for croup and whooping cough. For sale by all druggists.

Call in and see the pretty line of fancy imported China that we are displaying. The Anti-Monopoly Drug Store.

All careful women use

**HERBINE**

Woman who suffer from severe headaches, and all diseases due to a torpid liver, should not fill their stomachs with calomel and other drugs.

**HERBINE QUICKLY CURES** Biliousness, Constipation, Chills and Fever, Dyspepsia, Malaria and all Liver Complaints.

Mrs. C. D. Phillely, Marble Falls, Tex., writes: "I find Herbine the best liver corrective I ever tried. It has done my family and myself a world of good. I recommend it to my friends."

**FIRST BONANZA FARMER**

**Oliver Dalrymple, Who Had Thirty Thousand Acres in Wheat—Simple Story of Great Success**

Fargo, N. D., Oct. 1.—But one man in the United States ever had 600 men and 600 horses working on his farm, using 150 gang plows, that turn from three to eighteen furrows at one time, seventy gang drills, 150 self-binding harvesters and twelve steam threshing outfits, and shipping two trainloads of wheat every day in the threshing season. That man died the other day at Casselton, twenty miles west of here. He was Oliver Dalrymple, and his wonderful farm, which for many years contained 20,000 acres, and at the time of his death 17,000, was celebrated in foreign lands as well as in this country.

Dalrymple was the original bonanza farmer and he demonstrated the value in dollars and cents of the combination of the science of agriculture and modern business methods. Knowing how to get the very best seed, how it should be planted under various conditions, how the crop should be cultivated and how to market it to best advantage, he sat in his late years in his central office, and by telephone received reports daily from each of the six divisions into which his farm was divided for administrative purposes, and gave directions to the division superintendents and their foremen.

Even when he left the central office in Casselton and went to his beautiful home on Summit avenue, St. Paul, he kept in close touch with all parts of his wide domain and more than once gave from these such directions to his superintendents on the farm as the small farmer gives to his hired hand at the barn door or beneath the windmill. To those who know how wise an agriculturist Oliver Dalrymple was and how carefully he watched the cultivation of his great farm, it is easy to understand his success as a bonanza farmer.

**Came from Pennsylvania**

There were two Dalrymples of the same sort, Oliver and W. P. They were brothers and came west from Pennsylvania in 1855. They were of Scotch parentage and more canny farmers never were.

Oliver, who was 78 when he died, settled in Fairbault, Minn., when he was 22, and engaged in a loan and land business. He became convinced that there was more money to be made out of the soil than anything else and in 1866 took up agriculture in Washington county in the same state and seeded 2,500 acres.

Nine years later he turned his attention to Dakota, then a vast unpeopled plain. The Northern Pacific railroad was extended to Bismarck in that year, 1875, and between Bismarck and Fargo there wasn't a mile of railroad track or a dwelling.

Dalrymple, with the instinct of the true pioneer, scented a rich future for the western prairies and induced his friend T. B. Grandin, to go and spy out the land. Grandin looked over some sections of Dakota carefully and sent back word for Dalrymple to come on.

**Building of Great Farm**

In 1875 and 1876 Dalrymple bought from the Northern Pacific railroad and from the United States government 75,000 acres of land in the Red River valley. Part of this land he acquired for himself, and of the rest he owned half, the remainder being taken by General G. W. Cass, then president of the Northern Pacific road; B. P. Cheney of Boston, and J. L. and T. B. Grandin of Pennsylvania.

The lands were paid for in Indian scrip and railroad stock at par and in that way cost from 40 cents to \$3 an acre. The same lands are worth on an average \$25 an acre now. But this rise in price could only be guessed at in the day when Dalrymple made his first big deal.

Few people then believed that the Red River valley land had any particular agricultural value. Mr. Dalrymple has said that in the spring of 1876 a large portion of his farming property was under water and on a windy day whitecaps rolled over the broad expanse with sufficient force to swamp a small boat.

But the Dalrymples and the Grandins were convinced even then of the value for agricultural purposes of the rich, black soil of the now famous valley, and Dalrymple said that whether the surrounding country should remain unsettled or not, it would command a price above \$20 an acre before many years.

Without delay he set out to demonstrate his faith in the future of the plains and for five years he broke 5,000 acres each year. Practically all of the 20,000 acres was put into wheat. Of this farm Mr. Dalrymple owned three-fourths and he was the general manager.

**Work of Administration**

The necessity of dividing the farm into administrative and working sections was apparent to Dalrymple from the outset. He made each of his superintendents directly responsible for the working of 2,500 acres and each superintendent finding that the executive business required all of his time, appointed foreman, who made the rounds on horseback.

Each headquarters was connected with the central office at Casselton by telephone and the central office was connected with the telegraph office at the railroad station. Each division was equipped with its own set of workmen, teams and machinery.

Although the land is so level as to require much less machinery and power to operate than the ordinary farm, there were, as noted, 150 gang plows, seventy gang drills, 150 self-binding harvesters and twelve threshing outfits. The twelve threshing outfits each turned out from 2,000 to 2,500 bushels of wheat a day, and when threshing began on the Dalrymple farm the railroad company provided two special trains a day to haul the grain away.

It took from 500 to 600 harvest hands to do the work, and though many wheat farmers in the Dakotas have trouble in getting men for the few weeks of hard, fast work in the harvest season, the Dalrymple farm usually had an adequate supply of labor, for Dalrymple's way of dealing with his men

was well known among the great gangs that garner the crops in this section.

**Cutting Down the Bonanza**

The Dalrymples and the Grandin brothers divided their joint holdings about seven years ago and the Dalrymples gradually reduced the magnitude of their operations and sold portions of their land. W. F. Dalrymple died several years ago and since that time Oliver still further reduced his holdings until last year he had about 17,000 in the Red River valley. Not all of this is sown to wheat now, for Dalrymple had begun to rotate his crops to revitalize the soil.

The twenty-five years which Oliver Dalrymple spent as a resident of St. Paul didn't change him from a farmer. He always insisted that he was such, and those who called him a capitalist or a captain of industry offended him. He was a man of retiring disposition and modest manner, and often declared that he was happiest when he was at Casselton or riding across his expansive fields and talking with his men about the thing which had occupied a large part of his life and brought him great riches—wheat.

**AN EIFFEL DINNER TOWER**

**The Structure on German Trains Amuses and Amazes the Tourist**  
(Leipzig Correspondence of New York World.)

The tourist who takes his Germany through a car window in long ten-hour journeys need no longer store up scenery on an empty stomach. The Teuton has solved the problem of dinner en route in his peculiar way.

At a midway station a waiter in dress suit appears, places before the passenger a tin Eiffel tower, in which through its various stories the courses of "mittagessen" are concealed, and vanishes again like a magician.

The tower, which in colour somewhat resembles a fire-grate, stands about the height of an ordinary table. If you are a man you secure it firmly between your knees to withstand the see-saw of the express before proceeding to investigate. If you are a woman you brace it at one side and take the consequences.

A door just wide enough to admit a plate, and coming down the rounded length of the armored commissariat, reveals a series of racks. From the lowest, just above the floor level, is extracted the soup, piping hot. From the second emerges the fish. Mounting higher, deliciously roasted chicken, with all the "extras," is brought to view, and on the topmost round the pudding, the ice, or, in season, the enormous German strawberries serve for dessert.

On the turret of this remarkable Eiffel the et ceteras are neatly fitted into appropriate niches—salt, pepper, sugar, a drinking glass; while rising from a rack at the side like an invading warrior on a scaling ladder the neck of a bottle of Rhine wine stretches upward.

Hunger appeased, the tower is dropped at the next wayside station. This epicurean feast costs the modest sum of 3 marks (75 cents), and the Eiffels are in great demand.

**Afflicted With Sore Eyes for 33 Years**

I have been afflicted with sore eyes for thirty-three years. Thirteen years ago I became totally blind for six years. My eyes were badly inflamed. One of my neighbors insisted upon my trying Chamberlain's Salve and gave me half a box of it. To my surprise it healed my eyes and my sight came back to me.—P. C. Earls, Cynthia, Ky. Chamberlain's Salve is for sale by all druggists.

**ALBANY HAS A HEN WITH AN UDDER**

**The Barnyard Wonder the Product of a Georgia Farm**

Albany, Ga., Oct. 1.—Albany has the most remarkable hen in the world. She is a barred Plymouth Rock, and in most respects is normal. Her claim to lasting distinction lies in the fact that she has an udder which is to all appearances, almost identically like a cow's, except that the teats are two in number, instead of four.

This wonderful hen was raised on B. M. Wilson's Fernland farm, a couple of miles west of Albany. Mr. Wilson told of his "hen with a bag," and was laughed at. Then he brought the barnyard wonder into town and exhibited her.

The bag is exactly where it would be expected to be if the hen were a cow, instead of a modest layer of eggs. It is about the size of a lemon or a large egg, and is devoid of feathers. The two teats are exactly where they ought to be, and in each teat there is what appears to be an aperture such as would be required for the passage of milk. The milk has not yet appeared, though this is explained by one of Mr. Wilson's farm hands, who contends that the hen is "dry."

**WOMAN INTERRUPTS POLITICAL SPEAKER**

A well dressed woman interrupted a political speaker recently by continually coughing. If she had taken Foley's Honey and Tar it would have cured her cough quickly and expelled the cold from her system. The genuine Foley's Honey and Tar contains no opiates and is in a yellow package. Refuse substitutes. Sold by all dealers.

**GREAT HEAVENS! HOW SHE WILL TALK**

Bridgeport, Conn., Oct. 2.—A fine, healthy, two-headed girl baby, weighing eight pounds, has come to Mr. and Mrs. Joseph Falco. Mother and babe are in the Bridgeport Hospital, and both are doing very well indeed.

Doctor and nurse say the baby will live, in all probability. Her parents live at No. 119 Wakelee street. Joseph Falco, the father, is a business man and well known resident of North Bridgeport. Mrs. Falco is the mother of four bright, healthy children.

**ARE YOU ONLY HALF ALIVE?**

People with kidney trouble are so weak and exhausted that they are only half alive. Foley's Kidney Remedy makes healthy kidneys, restores lost vitality, and weak, delicate people are restored to health. Refuse any but Foley's. Sold by all dealers.

# Pig Sty or Cotton Field?

Since Biblical times, the hog has had the reputation of being a very uncleanly animal. How then can hog fat, from which lard is made, be clean and wholesome, and make healthful, digestible food? *It simply cannot, and does not.*

Now let us consider the ingredients of *Cottolene*—just pure, refined cotton seed oil, and the choicest of beef suet. Do they not appeal to you as preferable to the fat of the swine?

*Cottolene* is an absolutely pure product, and will make palatable, digestible, wholesome food. *Cottolene* is the best frying and shortening medium made today. If the best is none too good for you, ask your grocer for *Cottolene*, and do not let any prejudice stand in the way. The only way to know *Cottolene* is to test it yourself.

**COTTOLENE is Guaranteed** Your grocer is hereby authorized to refund your money in case you are not pleased, after having given *Cottolene* a fair test.

**Never Sold in Bulk** *Cottolene* is packed in pails with an airtight top to keep it clean, fresh and wholesome, and prevent it from catching dust and absorbing disagreeable odors, such as fish, oil, etc.

**Cook Book Free** For a 2c stamp to pay postage, we will mail you our new "PURE FOOD COOK BOOK" edited and compiled by Mrs. Mary J. Lincoln, the famous Food Expert, and containing nearly 300 valuable recipes.

Made only by THE N. K. FAIRBANK COMPANY, Chicago
