Summer Diarrhoea in Children

During the hot weather of the summer months the first annual looseness of a child's bowels should have immediate attention, so as to check the disease before it becomes serious. All that is necessary is a few doses of Chamberlain's Colic, Cholera and Diarrhoea Remedy, followed by a dose of castor oil to cleanse the system. Rev. M. O. Stockland, pastor of the first M. E. church, Little Falls, Minn., writes: "We have used Chamberlain's Colic, Cholera and Diarrhoea Remedy for several years, and find it a very valuable remedy, especially for summer disorders in children." The readers of this paper will be pleased to learn that there is at least one dreaded disease that science has been able to cure in all its stages, and that is catarrh. Hall's Catarrh Cure is the only positive cure now known to the medical fraternity. Catarrh being a constitutional disease, requires a constitutional treatment. Hall's Catarrh Cure is taken internally, acting directly upon the blood and mucous surfaces of the system, thereby destroying the foundation of the disease, and giving the patient strength by building up the constitution and assisting nature in doing its work. The proprietors have so much faith in its curative powers that they offer One Hundred Dollars for any case that its fails to cure. Send for list of testimonials. Address:

A Sad Picture.

At Varzin once, after sitting for some time sunk in profound reflection, Bismarck lamented that he had derived but small pleasure or satisfaction from his political activity, but, on the other hand, much vexation, anxiety and trouble. He had, he said, made no one happy by it, neither himself, his family nor any one else, "but probably," he continued, "many unhappy. Had it not been for me there would have been three great wars the less, the lives of 80,000 men would not have been sacrificed and many parents, brothers, sisters and widows would not now be mourners."—"Bismarck's Table Talk."

Unique Rainmaking.

One of the oldest rainmaking plants is the invention of a native of one of the Indian provinces. By means of a rocket he sends more than a mile into the air a reservoir of ether attached to a parachute. This, being released at the highest point, floats gently back to earth, the condensation being caused by the evaporation of the ether. It is said to be decidedly efficacious even where there is scarcely a trace of cloud.

Cut It.

"Yes," said the college student, "dad got the idea that I was cutting up too much, and so he cut in and threatened to cut down my allowance unless I took a brace. I felt all cut up at first, but I didn't want my allowance cut off or cut into just for a little funny business, and so I cut it out." And the listening foreigner remarked, "What did the young man say?"—Somerville Journal.

Breaking It Gently.

Captain of Steamer—Madam, it gives me great pain to be obliged to tell you that your little boy's hat has blown overboard. Fond Mother—Why, I thought it was tied on with a string! Captain—Yes. That was just the trouble. The string did not break.

Corrected.

"Miss Isabel, you are not at all like other girls."

"That is not a compliment, Mr. Spooner. You should say that other girls are not at all like me."

Quite Proper.
