MID-WINTER STYLES

PREPARED FOR WINTER

The woman who takes good care of her health will be able to enjoy the cold season. It's largely a matter of dress. These jackets will provide comfortable protection from the severest weather. They are stylishly cut, well made, and will be good several seasons; $3.50 for a nice one—better ones cost a little more.

COATS FOR COMFORT

We have fur coats and cloaks, and others only trimmed with fur. It all depends on what you want to pay; but whatever you may decide, you surely get full value. Some of the fur trimmed gaments have all the elegance of the real furs that are considerably higher in price.

IN THE TRIMMING

Many garments get their greatest charm from their trimming. It depends on what is used and how it is used. We have the right sort of goods for this purpose, in such variety that a customer is always sure to get just the trimming that best fills the need.

M. FISHEL.

BRIDGING THE CHASM

The holidays are over and so to fill in the gap before spring trade opens, we propose to give extraordinary values in dress goods and trimmings. Examine our line of $1.50 and $2 shoes for both ladies and gents and see if the values are not the best offered in the city.

Yours for business, G. A. Nash.

A BUSINESS BLOCK BOUGHT

Messrs. C. C. Rawls and Perry H. Nugent have bought the two story store in which G. A. Nash's store is located, from Dr. E. C. Hood, for $3300. The property was advertised for sale by the Doctor in the Star and the gentlemen bought it merely as an investment, rightly thinking it a bargain at the bargain at which it was offered. Here are other level headed, clear sighted business men who can see a future in Ocala realty. In this connection we might mention that more real estate, both residence and business, has changed hands in Ocala during the past year than for the three years preceding, and our property is now owned mostly by home people, reversing the order of things as they once were.

WILL BE OPEN THIS WEEK

J. M. Neely, the shoe and hat man, will be open and ready for business in his handsome quarters by the last of the week. The store is being fitted up in first-class style, handsome and convenient shelving, pretty new paper on the walls and ceiling, and the floor will be finished in hard varnish, and there will be comfortable willow settees and handsome rugs for his customers' comfort. The store, its stock and fixtures will be strictly first-class when completed.

IMPORTANT REAL ESTATE DEAL

McIver & MacKay, our wide awake merchants and contractors, have bought from D. A. Miller the property occupied by them on North Magnolia street. The purchase includes the two stores fronting on Magnolia street, the big brick two story warehouse in the rear, the corrugated iron warehouse, the stables and sheds, etc., with all of the land except an alley way between the brick warehouse and the balance of the Miller property on the corner of the block. The firm has also leased the room in which the office and carriage room is located for a term of five years and paid the rent in advance for that time. As soon as they can conveniently do so, Messrs. McIver & MacKay will build a second story on the two main stores, by extending the walls and then tearing off the old roof and putting on an entirely new one. This will give them the room which they are even now badly in need of. When this is all complete the property will have cost them between $11,000 and $12,000 and will be the most convenient and valuable for their purposes in town. The firm have great faith in the future of Ocala, both as to the mercantile business and real estate values, and have cast their lot with us, to sink or swim, but you can rest assured they are not of the sinking kind, though both are big enough to make a hole in any fish pond they might tumble into. Success to the firm's new venture. May they grow and increase during the next five years as they have in the past. This is as good luck as we could wish them.

THE FLORIDA STATE NORMAL

To the People of Florida: This institution is now a realization of our hope—a strictly professional school for the teachers of the whole state. For our success we are indebted to many, particularly to the state superintendent, the county superintendents and the members of the legislature. Believing that those who have been of so much assistance to us will be pleased to learn of the gratifying results, we give below a few facts of general interest.

At this early date, while many teachers are yet engaged in their schools, we have in attendance exactly one hundred students, and twenty-four pupils in the Model School. These students come to us from forty counties of the state, not including the counties represented by proxies. Fifty-five of the one hundred have already taught school, many of them with marked success. No one of them is under sixteen years of age. The senior class, which is the largest the school has ever had, now has about five times as many members as there were at commencement season five or six years ago. The facilities for work have been greatly improved by the enlargement of our buildings and the acquisition of books, apparatus, etc.

The various improvements for which appropriations were made by the legislature of 1901 are nearing completion and will be of very great advantage to us. Our Model School building, for example, is a gem of beauty, convenience and adaptability to its special purpose.

If our well founded expectations are realized we shall probably have more students before the close of the spring term than our boarding departments or recitation rooms can easily accommodate. We are therefore especially desirous of securing the attendance of those whom the Normal School will benefit most. The sole purpose of the Normal School, as we understand it, is to educate teachers. A professional education, of course, prepares them for any ordinary examination. But, our four years' course of study and broad aim do not always fully satisfy those who wish to make a rapid review simply to pass a particular examination. Such reviews belong, we believe, to an institute rather than to a normal school. The normal department of the State College at Tallahassee, of the Seminary at Gainesville and other good institutions in the state, as conducted last year, answer well the purpose of institutes, and, being under the suzerainty of these well equipped institutions, are admirably adapted to such work. We therefore advise persons who wish to pursue a large number of studies for a period of eight weeks or less, to attend one of them. We likewise insist upon those coming to the Normal School who wish to pursue thoroughly a reasonable number of studies (usually five) for ten weeks or more, in a manner that will give them credit toward graduation and leave (to them) permanent benefits as teachers.

We shall be glad to send our sixty page catalogue to the reader or any of his friends that may be interested, and will answer by letter any questions one may wish to ask regarding the Normal School.

The winter term begins December 31; the spring term, March 18; commencement is May 29.

Total cost of attending the school without a scholarship, for a term, about $33; from Christmas until June, about $66. Respectfully yours,

C. L. Hayes, Principal.

DeFuniak Springs, Fla., Dec. 2, 1901.

A CORRECTION

Finding that a portion of our circular of December 2 may be so understood as to do injustice to J. B. Stetson University, an institution for which we have the highest regard in all respects, we hasten to state, in the language of President Forbes, the facts as he would have them understood. He says:

"1. We have been offering for many years a full four years' course of study for teachers, and many students have been graduated from the department in this course.

"2. We are offering a new, strictly professional two years' course, and seventeen students are now taking it.

"3. Incidentally, we do give special review work for teachers in the spring and many teachers avail themselves of it, but this is only a relatively minor phase of the work of our normal department."

N. B.—Our mistake, as we find from a careful examination of the catalogue, was in supposing that Courses 1 and 2, described above, belong to the collegiate department instead of the normal department. This third "minor phase," "given incidentally," is all that we had intended to include in our reference. Very respectfully,

C. L. Hayes, Principal.

State Normal School, DeFuniak Springs, Fla., Dec. 18, 1901.

A VERY LIBERAL OFFER

One of our whole-souled citizens hailed Mayor Fishel this morning and when told the deficiency for entertaining the State Teachers' Association was $10 yet, said, "I'll give $5 if some other citizen will give the other $5."

Geo. Giles & Co. contributed a dollar toward the deficiency fund for the state teachers' entertainment, and W. E. McGahagin, the grocer, gave the committee fifty cents. Thanks.

WHITE MAN TURNED YELLOW

Great consternation was felt by the friends of M. A. Hogarty, of Lexington, Ky., when they saw he was turning yellow. His skin slowly changed color, also his eyes, and he suffered terribly. His malady was Yellow Jaundice. He was treated by the best doctors, but without benefit. Then he was advised to try Electric Bitters, the wonderful Stomach and Liver remedy, and he writes: "After taking two bottles I was wholly cured." A trial proves its matchless merit for all Stomach, Liver and Kidney troubles. Only 50c. Sold by Anti-Monopoly Drugstore.
