## The Story of a Medicine.

Its name—"Golden Medical Discovery"—was suggested by one of its most important and valuable ingredients—Golden Seal root.

Nearly forty years ago, Dr. Pierce discovered that he could, by the use of pure, triple-refined glycerine, aided by a certain degree of constantly maintained heat and with the aid of apparatus and appliances designed for that purpose, extract from our most valuable native medicinal roots their curative properties much better than by the use of alcohol, so generally employed. So the now world-famed "Golden Medical Discovery," for the cure of weak stomach, indigestion, or dyspepsia, torpid liver, or biliousness and kindred derangements was first made, as it ever since has been, without a particle of alcohol in its make-up.

A glance at the full list of its ingredients, printed on every bottle-wrapper, will show that it is made from the most valuable medicinal roots found growing in our American forests. All these ingredients have received the strongest endorsement from the leading medical experts, who recommend it as the best remedy for the diseases for which "Golden Medical Discovery" is adapted.

A little book of these endorsements has been compiled by Dr. E. V. Pierce, of Buffalo, N. Y., and will be mailed free to any one asking same by postal card, or letter addressed to the Doctor as above. From these endorsements, copied from standard medical books of all the different schools of practice, it will be found that the ingredients composing the "Golden Medical Discovery" are advised not only for the cure of the above mentioned cases, but also for the cure of all catarrhal, bronchial and throat affections, accompanied with catarrhal discharges, hoarseness, sore throat, lingering, or hang-on-coughs, and all those wasting affections which, if not promptly and properly treated are liable to terminate in consumption. Take Dr. Pierce's Discovery in time and persevere in its use until you give it a fair trial and it is not likely to disappoint. Too much must not be expected of it. It will not perform miracles. It will not cure consumption in its advanced stages. No medicine will. It still cures the affections that lead up to consumption, if taken in time.

## ICE! ICE!

Buy Ice From Red Wagons

They say, but if you will examine carefully the ice which melts so rapidly you will note that there seems to be holes in it, that the center is what is called "snow ice," which, being porous, allows it to melt quickly.

## "Crystal Ice"

The kind we turn out is as clear and perfect as it is possible to make ice, and is the most economical ice to use. Ask the man on the Red Wagon to stop and see you.

PERRY'S HOMICIDAL MANIA

Killed His Three Children and Then Himself

Greensburg, Pa., Nov. 7.—Edward J. Perry, former mayor of this city, was the chief actor in a horrible tragedy here yesterday when he shot his three children and then killed himself. Perry is known to have been deranged mentally for some time past, and it is supposed that a homicidal mania took possession of him. At one time Perry was one of the foremost and most popular men in the city. Recent business reverses are supposed to have caused him to lose his mental balance.

## CLOSED A FEMALE COLLEGE

An Epidemic of Typhoid Fever Proved Fatal to Four Alabama School Girls

Athens, Ala., Nov. 7.—An official statement issued yesterday by W. T. Sanders, chairman of the board of trustees of the Athens Female College, which was recently suspended because of an epidemic which was prevalent there, states that four of the young ladies died last week.

They were Miss Florence Brown of Cullman, secretary of the principal; Miss Nina Ward of Madison, Miss. Louise E. McWhorter of Gaylesville, and Miss Annie Nichols of New Hope.

Two of them died at their homes and the others at the college building. The two previous deaths in the college were over thirty years ago.

The epidemic has been pronounced typhoid fever, but the source of infection has not yet been determined.

PROGRESSING FAST AS POSSIBLE

Hurricane Floods Delayed but did Not Stop the Drainage Work in the Everglades

Tallahassee, Fla., Nov. 8.—That Gov. Albert W. Gilchrist believes the Everglades drainage work to be progressing as well as is possible under the circumstances under which the trustees of the Internal Improvement Fund are working, is made evident in a brief statement made evident in a question regarding the progress of the work.

The heavy rains that came with the late hurricane flooded the Everglades, and the canal banks were overflowed for miles. News of this led some of the old opponents of drainage to question its success. When Gov. Gilchrist went into office he declared that he would investigate thoroughly the drainage matter and act accordingly.

The request was made of him that he not declare himself one way or the other and endeavor to stop the work or go ahead, according as to what his present view might be. This request was backed by some of the pro-drainage papers, one of which expressed the belief that the drainage is not progressing so satisfactorily as under the direction of former Gov. N. B. Broward.

Gov. Gilchrist has made a close inspection of the drainage work from both the east and gulf coast sides. He does not believe that it would be possible to rush the work any more rapidly than it is now going on.

Gov. Gilchrist expressed satisfaction with the progress being made. Thousands of farms have been purchased in the Everglades, subject to the drainage work, and in many cases these purchases were made after the purchasers had carefully investigated personally.

"The trustees have four dredges at work," stated Gov. Gilchrist, in response to a request for information. "These dredges are making as much headway as could be expected. With the amount of money on hand the trustees could not possibly push the work any more than it is now being pushed. The money for accomplishing this work is derived from sales of land made on the installment plan.

At present these installments are not sufficient to warrant the trustees in building and operating any more dredges. The money derived from taxation has been held up, as the case is now pending in the United States court. With the amount of money on hand and in sight, as much progress is being made as could reasonably be expected."

Best for Biscuits.

A prominent teacher in one of the Domestic Science schools in Mississippi writes that she is using Cottolene in her lessons with excellent results. She says: "For biscuits, Cottolene is all that could be desired. The biscuits are light and flaky, with none of that disagreeable odor which is so often associated with lard. Cottolene is also an excellent medium for frying croquettes and doughnuts and gives them a clean, crisp, brown crust."

Other noted experts, such as Mrs. Rorer and Marion Harland, have given similar testimony to the merits of Cottolene. It is a cooking fat made from the finest vegetable oils; it gives better results than lard, and it is much more wholesome and economical as well.
