

Great Bargain Sale of Real Estate!

For the next Thirty Days I will sell the property described as follows at little more than Half Value.

A Good Home

One two story eight room house with two halls, front and back verandas, two fowl houses, a fine well of soft water and lot one hundred by two hundred feet in block 5, Allred's addition to Ocala, with beautiful oak shade trees in front and rich garden in the rear; worth \$2500.00 Will sell to quick buyer for \$1500.00

Cottages

One five, one six and one seven room cottage just completed and rented for eight, twelve and fifteen dollars per month. Worth \$1000.00, \$1500.00 and \$1800.00. Will sell for \$600, \$900 and \$1200. These houses are located on block 103, Allred's addition to Ocala, a beautiful location on a hill with nice shade trees. Several other smaller cottages rented for \$6 per month, worth \$500. Will sell for, each, \$300.

Marion Heights

This is a beautiful addition, situated on the Kendrick hard road, just outside the city. Since laying out this addition, three years ago, I have sold about sixty lots; most of them at \$50.00 each. I have over one hundred of the most valuable ones left, and for the next few days I will sell

them for \$25.00 each. Is in the very best colored addition adjacent to Ocala, adjoining the 40 acres bought by the colored Odd Fellows upon which they expect to build a state Odd Fellows home in the next few months. After this sale these lots will be advanced to

\$100 to \$150.

Lots in Allred's Addition

I have about two hundred lots left in Allred's North addition to Ocala, located between the A. C. L. and S. A. L. R., in good white neighborhood. I have been selling these lots from \$150.00 to \$200.00 each; for the next few days I will sell them from \$50 to \$100 each. These lots are near the manufacturing center of the city and are bound to be valuable in the near future.

Farming Lands

I have 160 acres of land northeast of Ocala, one mile from the court house running east of the Anthony hard road, adjoining the famous Johnson & Liddon watermelon farm. This land is well adapted to the cultivation of watermelon, cantaloupe and other truck, and well located; the S. A. L. R. R. running through the property. This land if located within a mile of any other town, the size of Ocala, in the Southern States except Florida, would be worth \$100.00 per acre. I am offering it at the very low price of

\$15 per acre.

500-Acre Proposition

I also have 500 acres laying west of the Anthony hard road, and embracing the Kendrick hard road, one mile from town, well timbered with oak and second growth pine. It will now cut \$10.00 worth of oak wood per acre. There are 1500 small pine trees on this land which are now worth 10 cents each for turpentine. This timber is growing at the rate of \$2.00 or more per acre per year. As an investment there is nothing better than this land at \$20 an acre. Much of it is this land at \$20 an acre. Much of it

Clay County Farm

I have 400 acres of very fine farming land located between Starke and Green Cove Springs in Clay county, Black Creek; thirty miles from Jacksonville. This place is richly endowed by nature; the land is very fertile, and especially adapted to the cultivation of the best paying crops in Florida, strawberries, cucumbers and celery. On this place is a natural irrigating plant, which could not be equalled for artificially for \$10,000.00. This is in the shape of a large soft water spring, furnishing from 100 to 150 gallons of water per minute. The branch or creek from this spring runs for a half mile through the land, having from 12 to 15 feet fall. Near the spring is a high bluff on either side forming a natural dam. With a little outlay of money this spring could be made to irrigate hundreds of acres of land, portions of which are adapted to strawberries and cucumbers, while other portions are adapted to celery. On this place is a four room house and about fifty acres of land under fence, there are 300 acres of good round timber and 50 acres in good hammock. As an investment there's nothing that will beat this place in the State of Florida for FIVE THOUSAND DOLLARS.

My reason for offering the above really valuable tracts of land and city property is that I am overloaded with real estate and am in need of money at once. It is safe to say that any of the above quoted city property will double in value within the next 12 or 18 months.

A Query

If there is more liquor sold in dry counties (as our anti friends claim) than in wet counties why in the name of reason do not the wet forces combine with us and work for prohibition?

Mrs. Armour

Those who failed to hear Mrs. Armour lecture Tuesday evening missed an intellectual treat. Very seldom do we have a speaker of such marked ability in Ocala. She is possessed of a master mind, well trained and thoroughly informed. The handling of her subject was most logical, and her appeal was made to reason.

She touched upon the recent election in Alabama, where the prohibition amendment was rejected. She was on the ground for a week or two, and attributed the failure to carry not to a lack of prohibition sentiment in Alabama, but to the face of the issue being side tracked into a political fight against Governor Comer. Asst. politicians managed the campaign, as they will do in this state unless the temperance people work with might and main. She stated, as most of us know, that Alabama has still state-wide prohibition, backed by the Fuller law, which is the strongest prohibition law in the United States. Don't let the idea prevail that Alabama is wet, or will ever be.

Again, one thing she said, we tolerate the licensed saloon in this age and time, simply from custom. We are used to it; we have had it all the time. To uproot custom has been the Herculean task for reformers since the world began.

Alcohol ranks with morphine and cocaine in its poisonous and vicious effects upon the human system. Morphine and cocaine have their real uses in medicine and have been a boon to the suffering in alleviating pain. Yet if some enterprising person or company should propose to establish cocaine and opium joints in Ocala or elsewhere the citizens would rise up in masses against the undertaking. No China for us.

Yet these drugs are no more a poison than alcohol. The difference is that cocaine and morphine deaden the sensibilities, rendering its victims worthless, while alcohol to this effect the excitement of the worst passions, even to murder. Given a sufficient dose we can always count on its making a fool.

Again, scientific investigation and the clinical thermometer have destroyed all the old ideas in regard to the good of alcohol in medicine and otherwise. For instance, it has been thought a stimulant which would produce animal heat and would warm the human body. It has been found

by applying a clinical thermometer that the temperature of a drunken man is lowered. The alcohol sends the blood rushing to the surface, but the real temperature is not increased. For this reason alcohol is not used by arctic explorers. For the same reason physicians are abolishing it in their practice, and are using other things less harmful and of more value.

Again, as to the action of alcohol upon the blood. The blood is composed of white and red corpuscles, the latter the life sustaining element, while the white corpuscles are the disease resisting power. It has been found that alcohol destroys these white corpuscles. See for yourself the purple nose of the habitual drinker. Let the source of defense, our army and our navy, our forts and our arsenals be destroyed, how easy it would be for some foreign power to come over and take possession of our rich and fertile country. Let alcohol destroy or impair these white corpuscles, the germ resisting element in the blood, and something will happen.

A drinking man gets frightened when pneumonia strikes him; sometimes his kidneys fail, and consumption is a well known effect of alcohol.

Even the snake-bite theory has been disproved.

Poison has been extracted from a venomous reptile and mixed with alcohol, the result showing a more deadly poison, if possible,

than the venom of the snake.

These are only hints of what Mrs. Armour said. She held her audience spellbound for more than an hour,

and many were sorry when her address was ended.—Sunday's Banner.

HOLIDAY BARGAINS AT THE GLOBE

Be sure before you do your holiday shopping to call at the Globe and look over our elegant line of Holiday Goods and our magnificent line of General "Globe" Goods, from which so many useful Christmas presents can be found for all members of the family. The
