### Preparing for Cane Grinding

By C. K. McQuarrie

The proper preparation of the cane | every ten matured ones, on ordinarycrop for grinding cuts quite a figure sized canes. in the net result of the syrup-making. Cane intended for syrup should be in Maine, and your mother wanted to allowed to grow as late in the season among farmers in certain communilater on when the crop is properly vember is early enough to cut the cane for syrup-making purposes.

Stripping. Stripping can be done any time after the first of October, and any odd is the laying away of the cut cane in time at the farmer's command can be rows or piles to wait until grinding devoted to the job. There are several good tools for this purpose on makers do not practice this-they the market, and if the acreage is large grind as they cut. But where a large it pays one to buy these; but for the acreage is grown, it is impossible to ordinary cane patch on most farms, a get enough help to keep the cutting piece of hoop iron will be found to do and grinding going at the same time; good work. All dead leaves should be so the crop has to be laid away and completely removed up to the first covered up with leaves and trash to immature joint, and particular care keep out the cold. In laying it away, exercised that everything in the shape of trash be completely cleared one, piles containing about 600 canes away from the roots, so that the stalks can be cut very close to the ground; for the sweetest part of the cane is that next to the ground. Topping.

This operation has quite an important bearing on both the quality and quantity of the syrup. If we cut close to the mature joints and leave no green joints for grinding, we are it takes less of it to make syrup. For apt to be troubled with sugaring of the syrup. The green or immature sap from newly cut cane to make one joints contain glucose which tends to prevent this sugaring, so one or two seven gallons of sap, from cane wind-immature joints should be left when rowed for two months, will make one topping. The number of green joints gallon of syrup of a superior quality left depends on the length of the to the other, providing the cane has Subscribe to The Jou-al. one may leave a green joint for weather. canes. As a general rule to go by, been thoroughly protected from cold

Cutting. When we come to the cutting, we want to use a sharp tool that wall as possible. There is often rivalry make a clean slanting cut. Why slanting? Because if otherwise the ties as to who will have the first of butt of the stalk will be more or less the season's syrup on the market, and splintered, and if laid away for some the crop is often cut weeks ahead of time before grinding, that joint will the time it should be cut. Syrup have some sour sap in it, which we made from immature cane is of an do not want. The ordinary cane knife Saturday noon to Tuesday morning at inferior quality in every way. We is not a good tool for cutting down Bar Harbor, and then we spent the have then a poorer quality in the first cane, in that it can not cut close syrup on the market than we get enough to the ground. A light wellsharpened hoe will be found the best matured. Throughout northern and for this purpose, and handled by a western Florida, the middle of No- man who knows how to use it, will do excellent work. There should be two once in awhile, as I have done with crop. Should a slight frost occur be- hands working together, one cutting fore that time it will not damage the down the canes, and the other removing the cut canes out of the way.

Windrowing. What is meant by this expression time. Quite a number of our syrupunless the crop is an extra heavy each are recommended, laid as smoothly as possible, and well covered to protect them from frost.

Grinding immediately after cutting is not to be recommended, let the crop be large or small. Syrup made from cane laid away for a month or two is superior to that made from new-cut cane. The sap seems to mature, and instance, it will require ten gallons of gallon of 34 degree syrup; while rowed for two months, will make one
