Arcadia Bike Fest gears up for Saturday

By CRAIG GARRETT
ARCADIAN EDITOR

It was a perfect formula of a historic city with easy access to major roads and walkable downtown streets, a happy welcoming and pure Florida weather.

Organizers hope for a repeat performance with the return of Arcadia Bike Fest on Saturday.

The downtown event runs all day, and side streets close to auto traffic. Barrier guards, police, volunteers, signage and the energy of a street festival will guide riders expected from all corners. Most merchants will remain open, according to organizers and sponsors that include Arcadia Main Street Program, Bert's Black Widow Harley-Davidson, the Fran Haasch Law Group, the city of Arcadia, Moose Riders, Fat Chris, Gulf Coast Auto,

Truck and Equipment Repair, Peace River Distributing and the Arcadian newspaper.

The first downtown festival in November included flawless weather and motorcyclists from just about everywhere, which surprised some because it was Arcadia's first such festival. Downtown merchants reported strong sales and the all-day event was a huge success, many of the riders introduced to Arcadia for the first time.

Sponsors and organizers will bring streets of vendors, more entertainment, Florida Full Throttle magazine running a best bike contest, film crews with Born To Ride Motorcycle Media documenting the day, entertainers that include local country performer Andy Pursell, a

Arcadia Bike Fest organizers in November were Pam Ames with Arcadia Main Street Program (left), Miles Christian-Hart, Elizabeth Brown, marketing manager for Bert's Black Widow Harley-Davidson in Port Charlotte, and Andrea Jeter with Arcadia Main Street Program. The event on Saturday is again hosted by Arcadia Main Street but features more stuff, more vendors, local country performer Andy Pursell and a second title sponsor, the Fran Haasch Law Group. Several thousand riders are expected.

TShane Johnson, kin to 'Acrefoot' Johnson, follows his footsteps

By CAROL MAHLER
ARCADIAN HISTORY EDITOR

TShane Johnson walked from Orlando to Panama City, then ran from Orlando to San Diego to raise funds to help homeless veterans and teens long before he found out about his famous great-uncle ... James Mitchell Johnson (1850-1922).

Known as "Acrefoot," James Johnson over 130 years ago walked a daily 50-mile route to deliver the U.S. mail between Fort Ogden and Fort Meade before the train linked those cities in 1886. According to legend, he walked another 10 miles from Fort Meade to Bartow, where his sister lived. By staying with her family, he saved the fee for "room and board" in Fort Meade and enjoyed a visit with relatives.

Such legends have grown up around Acrefoot, DeSoto County's own folk hero, a giant of a man for the times, standing 6 feet 7 inches tall and weighing 250 pounds inside size 14 shoes that likely wore quickly. He was the third son of Elias Johnson and Elizabeth Keen Johnson, who arrived in Fort Ogden in 1866. Acrefoot's brother Moses is Shane's great-grandfather, and Shane grew up as did his ancestors "barefoot, running in the woods" near Arcadia, according to Shane's book, "Hike Across America: 3,000 Miles For Your

PHOTO BY CAROL MAHLER

TShane Johnson (left) with a copy of his first book. His father, Timothy Johnson, holds a copy of the DeSoto County Historical Society's "Recollection II," featuring stories and the only known photograph of their great-uncle James Mitchell "Acrefoot" Johnson.

Why," published in 2018.

A 1998 graduate of DeSoto County High School, Shane Johnson, also a big man, is now a best-selling author and motivational speaker.

But he didn't start that way. While on leave while serving in the U.S. Marine Corps, he was riding a motorcycle that was struck by a car. Johnson was thrown into a brick house, and the impact split his bicep and shattered his rib cage. His broken ribs sliced vital organs. He walked

to a nearby fire station. Medically, he died three times, but survived and fought to recover his health. He then began a career in banking and mortgages, specializing in those products geared to veterans. One of his clients—a veteran living in the Panhandle—had to walk up to 10 miles to a bus and then ride two hours to a U.S. Veterans Administration hospital in Pensacola for treatment. That predicament inspired Johnson's first fundraising walk from Orlando to Panama City.

Johnson endured his own rough patch, losing everything in 2008 in the Great Recession. He learned about homelessness for two years. And after his car was totaled in an accident, he learned to walk or run everywhere.

On his 3,000-mile walk to California, for example, his goal was 22 miles a day, because 22 is the average number of veterans every day committing suicide. He spoke in 20 cities, passed through nine states and met 10,000 veterans on his journey.

Although Johnson does encourage audiences to give respect and appreciation to our veterans, he also urges vets to take leadership roles in their community. He considers time served in the military as an investment that can be "paid back" when veterans serve as community leaders. In fact, such leadership is the subject of his second book, "Keep Your Feet Moving: 7 Principles To Get You Through The Tough Times," published in 2018.

Now the father of four-year-old Charleston "Charli" Ridley Johnson, TShane is working on a third volume to "bring back dad the hero." He dreams of a country in which people find fulfillment and pride in their families rather than their jobs or occupations.

His next project begins this Sept. 11 at Ground Zero in New York City and will end in Orlando on Nov. 11.

Hero's advice: Read internet pop-up ads

By CRAIG GARRETT
ARCADIAN EDITOR

Maybe next time pay closer attention to those internet pop-up ads.

When DeSoto high-schooler Rylee Butler was scrolling through a web-based health lab, an advertisement for CPR instruction popped up. Instead of ignoring such things as most web regulars do, Rylee clicked the tutorial ... and watched the video on cardiopulmonary resuscitation, the procedure to pump life back into those who've stopped breathing. We're all told to achieve Red Cross CPR certification, but few accomplish this simple task.

"It's not really rocket science," said Butler, a 15-year-old at the high school with her mother Ronda to share an amazing story about how CPR saved a friend within a short time of watching the YouTube video.

The four days of the Arcadia All-Florida Championship Rodeo, March 7-10, friends and family had gathered at the Butler home along Peace River. Rodeo participants were visiting, including Kyle Lawrence, a DeSoto High grad and professional cowboy in town for team roping competition. Airboats were the recreation.

Fast-forward to nearly sunset on March 9 and four of the airboats on Peace River headed back to the Butler rancheria. They space apart by minutes because of the blowback an airboat generates, Rylee said. Rounding a bend in the river as a passenger, Butler and her mates encountered a nightmare.

PHOTO BY PRISCILLA MCDANIEL

Rylee Butler (center) received commendations Tuesday from the DeSoto County Sheriff's Office and the school district. The 15-year-old is flanked by Supt. Adrian Cline and her mother, Ronda, a district teacher.

An airboat captained by Kyle Lawrence was dead in the water and its riders had vanished.

What had happened, Rylee learned later, was that wake from another boat moving the other direction caused Lawrence to lose steerage. The airboat was heaved ashore, where Lawrence

struck an overhanging branch and was knocked overboard, as were three others from the sudden thrust to shore.

Rylee and a male passenger on the distressed airboat in the chest-deep river found Lawrence and a young woman underwater, neither breathing and the cowboy suffering a grave

PHOTO PROVIDED

Ronda and Rylee Butler

head injury. So Rylee used what she had learned on the internet pop-up advertisement. Applying CPR breathing techniques for a minute or as the boy held the lifeless girl, suddenly her eyes fluttered and she began hurling water, Rylee Butler said. Kyle Lawrence was later airlifted, ending his medical trip in Alabama where he lives. Following his ordeal from the polite distance of social media, it appears that he's on the road to better health.

For her part, Rylee Butler said faith helped her push through unimaginable terror and the rush of relief, all in a few short minutes. And then she saddled up and won in barrel racing at Sunday's rodeo. "I was going to win this for Kyle," she said of the motivation that day.

Snowbirds critical in helping DeSoto's hungry

By CRAIG GARRETT
ARCADIAN EDITOR

It's the near the end of season and the snowbirds are tearing out of here.

Not so fast. These RV park and resort residents will complete an important annual ritual before packing the Lincoln and heading north. They will gather foodstuffs, kitchen items, clothing and even cash for dropoff to the many food pantries and non-profits in DeSoto County that help the homeless and food-challenged families.

James Beckett with the Arcadia Center for the Needy said the non-profit would likely fall apart if not for the kind donations of these hundreds of kind men and women.

"Amazing people," he said.

Bill Payne is the activities director at Toby's RV Resort. He said residents even donate recycled can proceeds and bingo night donations, as well as food and other goods over the year.

"You have to figure the needy need it. It's what more fortunate (people) do," he said.

Arcadia Center for the Needy, in fact, serves huge numbers. Their volunteers will bag hundreds of daily

James Beckett understands the need to feed food-challenged families, having at one point in an interesting life been homeless. He has managed the Arcadia Center for the Needy for about 15 years, in a building that is mortgage-free.

lunches and donate boxes of clothes to those arriving in the morning. You watch mothers clothe a child in a sweatshirt on cool mornings, people lining up for small bags of groceries or a meal, things more fortunate people take for granted.

"I don't know what kind of answer your looking for," said Gary Kramer at Cross Creek RV Resort. "(Donations) have been going on for years and years. That's what we do."

PHOTOS BY JIMMY PETERS

It's an annual thing for visiting families to share food, household items and spare clothing with the less fortunate. Much of these goods are dropped off as visiting "snowbirds" return to their northern homes. The Arcadia Center for the Needy is a central dropoff site for these generous donors.

To the right: Libations during poker run festivities always help.

Hello Beautiful: What happens in her chair, stays in her chair

By JIMMY PETERS

ARCADIAN HOMETOWN EDITOR

Entering the salon, I hear laughter. Turned out to be Megan Albritton and her client reflecting on the happenings of the day. Walking into the Hello Beautiful Salon was like being welcomed into a friend's home. It just felt comfortable.

Megan never wanted to be a beautician ... but she had a mom who knew her daughter's heart, and who gently guided Megan into a career that has now become her passion. After the salon where she was working closed on short notice, Megan was forced to make a decision. So with her mother's prompting and the help of family and friends, Megan in January opened the Hello Beautiful Salon at 219 West Oak St. in downtown Arcadia.

"My family has been my rock; I couldn't have done this without them" Megan said.

Born and raised in Arcadia, Megan graduated from Sunstate Academy. She is a licensed cosmetologist, has color specialist and pure Brazilian blowout certificates. Finishing school, she apprenticed at a high-end salon in Fort Myers. Through that experience she realized, "I never want to work in that kind of spa again, where I have to wear slacks and heels and spend the day uncomfortable. I would rather make a little less money, work a little harder and be comfortable with my clientele." She continued, "Today I have a real friendship with my clients; when you sit in my chair if you want a glass of wine, or a cup of coffee, that's cool. If you want to talk about personal things, go to it. What you say in my chair stays in my chair."

Hello Beautiful Salon clients receive a range of services such as manicures that include French tips, and sculpts, perms, curly perms, bodywaves, relaxers—if you want your hair straightened—and Brazilian blowouts. Balayage, highlights and root retouch are also provided. Megan specializes in vivids,

exclaiming, "I love my vivids!" She continued, "My mom works in the shop every Tuesday, Thursday and Friday plus every other Saturday, and specializes in perms—any kind of a perm you want, that woman can do it."

Adult standard cuts start at \$15, children \$10. "My salon special is \$85 and includes a reconditioning treatment, haircut, blowdry, style and toner," Megan said. "I bundle everything you get into one price. For special situations I customize a price, because everyone's hair is different I may have to treat one person's hair differently from another. I want my clients to be able to sit in my chair, be treated like a queen, and know that they can afford it."

Looking for a professional hairstyle,

OUR VIEW

Legislators find a 'work-around' on felon voting

OUR POSITION: Again, legislators devise ways to limit voter-approved amendments.

When Florida voters overwhelmingly passed a constitutional amendment requiring smaller school class sizes, the state Legislature came up with ways to sidestep implementation.

When voters overwhelmingly passed an amendment that designated tax revenues for land preservation, the Legislature found ways to circumvent it.

When voters overwhelmingly passed an amendment authorizing medical marijuana, the Legislature managed to limit the roll-out by banning the most common form of marijuana, smokable plants.

And now, after voters overwhelmingly passed a constitutional amendment granting ex-felons the right to vote, the Legislature, again, is looking for ways to limit the impact.

No doubt you can discern a pattern. It is behavior that dismisses express public will. It damages overall intent by parsing detail. And it's nothing but a power play—arrogant and cynical.

They're at it again this year.

The object of legislative finagling this time is Amendment 4, which passed with nearly 65 percent of the vote last November.

The Amendment 4 ballot summary said: "This amendment restores the voting rights of Floridians with felony convictions after they complete all terms of their sentence including parole or probation. The amendment would not apply to those convicted of murder or sexual offenses, who would continue to be permanently barred from voting unless the Governor and Cabinet vote to restore their voting rights on a case by case basis."

After the election, Senate President Bill Galvano, R-Bradenton, acknowledged some legal points would need clarification. But he acknowledged the amendment was "self-implementing."

"There's a clear class of individuals who should be eligible to vote without further legislation. ... Whatever we do legislatively would be a supplement on it."

Supplement, indeed.

Proposed legislation would require ex-felons to not only complete their prison sentences, probation and pay restitution to victims, but also to pay all fees and fines that that may have accumulated.

That's a step beyond what had been previously required when ex-felons had to appeal individually to the governor and cabinet for restitution of rights. It would naturally set roadblocks to lower-income would-be voters.

LETTERS TO THE EDITOR

Impressed with Arcadia rodeo

I want to compliment the Arcadia All-Florida Championship Rodeo Association on a excellent rodeo on March 9, 2019. We enjoyed a delightful afternoon at the new arena. All was very well organized and efficiently managed. Few know that the event is planned and carried out by volunteers and a fine office staff. It was as well run as the Super Bowl! Arcadia is so fortunate to have such an event here! I would also like to compliment Marshall Matt Anderson, Sheriff James Potter and the Florida Highway Patrol Auxiliary on their efficient management of the traffic that day. The Junior

ROTC Auxiliary should be thanked as well for handling the parking of the many cars. All traffic was handled efficiently and moved right along. The Mosaic Arena is a great addition to DeSoto County. We should be very proud to have such a splendid facility in our community!

M. Lewis Hall Jr.
Arcadia

Ban phosphate mining in DeSoto County

Commissioners ... you have to think beyond the fence line. Mosaic has already been approved by the

Army Corps for Manatee and Hardee counties. If I were you I would get with (DeSoto Development director) Earl Hahn and County Attorney Don Conn and mention having some kind of water testing.

I have spoken to Earl Hahn about last summer. Maybe this isn't such a bad idea? FDEP (Florida Department of Environmental Protection) water quality standards are horrible, but it's their rule. My gut feeling tells me Mosaic will exceed those standard limits as the mines grow and the rains fall. Think about it. Where is their pollution flowing to now? So many

GRITS & PIECES

Forget the Ides of March, beware April Fools' Day!

Sometimes folks tell us to "beware the Ides of March." Well, that pretty much passes by uneventfully, but the next date we really ought to be leery about is April 1, and you know what that means—foolish folly that makes fools of many. Me included.

Of course we fell for lame admonishments such as, "Your shoe's untied," or, "You've got something in your teeth." From there we grew into the prank phone call phase, wherein you could call the store and ask if they had Prince Albert (a loose-leaf tobacco) in the can. And when they said "yes," you'd tell them they better let him out. Same goes for calling random numbers to ask if their refrigerator was running, and then warn them that they better go catch it. You get the gist.

Luke Wilson

troubador55@embarqmail.com

My childhood buddies and I were never bound to the first day of April. Why only have that kind of fun only once a year? So any calendar day was fair game, as was any sucker we could get to fall for a prank of some sort.

I scared a few people with the old "dead finger in the box" trick, where you cut a hole in the bottom of a box small enough to fit into your palm, stick your middle finger through it, wrap it

with gauze, and make fake blood to go around the base. I'd approach someone, take the lid off the box, and say "Wanna see a dead finger?" When they leaned in for a look, that's when the finger would jump up at them and I'd get whacked, or at least chased around, because they didn't think it was nearly as funny as I did.

Another classic was to find someone who was sleeping and deposit some shaving cream in their dominant hand. Then all you had to do was tickle their nose a little with a piece of string, and they'd go to scratch it in their sleep and wind up sucking that stuff right up their nose. And they'd come up fighting for air, every time. The hardest part was

LETTER SUBMISSION POLICY

Letters are welcome on virtually any subject, but we do have some rules. Please keep them to less than 250 words. Letters must be received no later than noon on Tuesday. Letters will be edited to length as well as grammar and spelling. All letters must be signed with full name - not initials. An address and telephone number must be included; they are not for publication, but must be provided so we may verify authorship if necessary. Due to the number of letters received, we reserve the right to run only one letter per person per month. The Letters to the Editor section is intended as a public forum for community discourse and the opinions and statements made in letters are solely those of the individual writers. The Arcadian takes no responsibility for the content of these letters. Please send or bring correspondence to the Arcadian, 108 S. Polk Ave., Arcadia FL 34266, or fax to 863-494-3533. Readers with access to the internet may e-mail Letters to the Editor to cgarrett@sun-herald.com or arcadian.editor@gmail.com.

Arcadia Garden Club: Learning about lillies, next up April 1

By **JAMIE PIPHER**
ARCADIA GARDEN CLUB

The Arcadia Garden Club met March 3 at the clubhouse with 29 members and three guests attending—Charlotte Allen, Mary Ruckle and Broncoynn Ligon. Jeanne Lloyd received a spirited birthday song for her 90th birthday.

Marilyn Eigsti, aquatic plant expert from Sarasota, presented a revealing slide presentation and other visuals on the subject of aquatic plant identification and use in southwest Florida. Eigsti is owner of Wonderful Water Lilies, a registered nursery specializing in pond plants.

The first rule of pond plants, Eigsti reported, is that you do not need a pond to have aquatic plants. Pond/aquatic plants include water lilies, lotus, marginal/bog plants such as lizard's tail, papyrus, water poppy and butterfly ginger. Containers—and a new concept, grow bags—are great alternatives to ponds for housing these plants. To grow water lilies, for example, follow these steps: Place about one inch of topsoil (not potting soil) in a three-gallon pot without holes, add fertilizer (slow six-month release with a 13-13-13 composition was suggested), place more top soil in the pot, add water until absorbed and rest for 12-14 hours, compress soil to remove air, add 4-5 cups of cow manure and 1T of bone meal, make a mound of manure and bone meal, place water

Bob Wilk tells a funny plant story to guest speaker Marilyn Eigsti (right), with wife Suzanne listening.

lily on the mound, distributing roots around the mound, fill the pot to within 1 inch with moist top soil, compressing soil carefully and not covering the area where the stems off the rooted area, and finally cover the top with small rocks or pea gravel.

Eigsti provided live examples of all plants identified during the presentation and provided a sample to each participant.

Members were reminded of the upcoming field trip to Oaks of Devonaire at the home of member Theresa Collins-Hill. See Arcadia Garden Club on Facebook (Arcadia, Florida Garden

Club) for a photo tour of this exemplary landscaped area.

Nominating Committee reported the proposed new slate of officers: President-**Lorraine Brauckhoff**; First Vice-President-**Odette Flanagan**; Second Vice-President-**Val Littlefield**; Third Vice President-**Evelyn Sasser**; Recording Secretary-**Theresa Collins-Hill**; Correspondence Secretary-**Carman Miranda**; and Treasurer-**Babs Ames**. Election will be held at the April meeting.

Next meeting will be (Monday) **April 1** at noon at 1005 W. Magnolia St., Arcadia. The speaker will be

From the clerk's desk: Understanding Mental Health Court

Mental health is a growing issue in the United States, as a whole, and DeSoto County is no exception. So far in 2019 there have been eight mental health cases filed, compared to a total of 24 cases filed in 2018.

If you feel someone is a danger to themselves or others, we have packets available here at the clerk's office, free of charge. There is also no filing fee. Instructions on how to complete the packet are included and our knowledgeable deputy clerks are available for assistance. However, please keep in mind that we are not attorneys and are unable to give legal advice. Petitions can be filed requesting an involuntary examination for both mental instability and substance abuse.

Mental-health petitions require one sworn statement, whereas substance-abuse petitions require three sworn statements. Along with basic information about the person of concern, it is helpful to include a detailed description of the issue along with any corroborating documents such as law enforcement reports, although this is not required. Petitions are sent to the judge the same day they are filed and a response from the judge will be received on the same day. If the petition is

Nadia Daughtrey

granted, certified copies can be picked up by the petitioner for delivery to the sheriff's office. At this time the sheriff's office will locate and take custody of the respondent and transport him or her to a mental health treatment facility for further evaluation and treatment. In cases of substance abuse, the petitioner must first determine availability and then secure the space for the respondent before the sheriff's office can transport him or her.

Incapacity is another type of case that may be opened in mental-health court. While Baker Acts (mental health) and Marchman Acts (substance abuse) are most often isolated incidents, incapacity is ongoing, mostly dealing with people such as the elderly with dementia or Alzheimer's disease, or minors with disabilities. Petitions for incapacity must be filed by an attorney. To determine a person's mental

capacity, the court appoints a minimum of three members of an examining committee comprised of mental-health professionals. The appointed members then go to the person in question to conduct an evaluation. Once the evaluation has been completed, each examining member must file his or her report to the court within 15 days of the date of the order. The court then makes a determination based on the submitted reports and renders an order accordingly. There are different levels of capacity ... and depending on this a person may keep certain rights and privileges such as voting, getting married, driving and making financial decisions, all of which will be specified in the court's order.

Guardianship and incapacity go hand in hand, in that once a person has been declared incapacitated, a guardianship is started. The court will appoint a guardian for the incapacitated person, or ward, and this may be a family member, attorney or professional guardian. It is the responsibility of the guardian to submit a report annually to the court for review. This report includes the state of the ward's physical well-being based on the guardian's observations as well as an accounting of the ward's finances. The clerk's office conducts

an annual audit of the ward's finances based on the guardian's submitted report. The reports and audits are all forwarded to the court for review and approval. This system of checks and balances ensures that the ward's best interests are looked after.

If you have any questions about mental health court, you can contact Desiree Dennison at 863-993-4876, or email her at desiree.dennison@desotoclerk.com. Desiree has been our mental health clerk for nearly four years and will be happy to assist you.

DeSoto County clerk's office calendar

Third annual Passport Fair—If you haven't already, please mark your calendar for (Saturday) **April 27**. We will be open from 8 a.m.-12 p.m. to process new and renewal passport applications. Passport pictures will be taken for free on this day!

May 24 will be our next office fundraiser breakfast. For \$5 you can fill up a plate with some delicious home-cooking. All proceeds go to our **Guardian Ad Litem** Christmas fund. Breakfast will begin at 8:30 a.m.

We will be **closed on April 19** in observance of Good Friday.

FROM PAGE 4

friends and family in DeSoto county with cancer. Coincidence? Having some kind of testing done by the county would protect you. If limits exceed, this is something tangible that DeSoto County would benefit against Mosaic in court. The phosphate industry is going full steam ahead in Hardee and Manatee! Do you think your quality of drinking water will get any better?

P.S. commissioners: I would nip this in the bud and ban phosphate

mining in DeSoto County. Sarasota county did it. Why allow a phosphate industry to taunt the residents and let them be anxious year after year? Will our well run dry? Will we have dead marine life every summer? Will the red tide last another year? What are we drinking? Will Boca Grande suffer another ground zero? Dead dolphins, manatee, goliath grouper and snook! Fisheries in Charlotte Harbor gone forever? Ban phosphate mining in DeSoto County. Be guarded against the phosphate industry upstream from you.

Mari R. Hollingsworth
Longboat Key, Florida

OUR VIEW

FROM PAGE 4

Or, let's be clear, Democrats. The House Subcommittee of Criminal Justice approved the voter-restriction bill last week. The vote was 10-5, on straight party lines.

Of course. More lower-income voters means more Democratic voters, and more Democratic voters means Republicans might lose their grip on power.

After all, in 2018, Republican Gov. Ron DeSantis beat Democratic rival Andrew Gillum by 32,463 votes, out of

a total 8.2 million cast. In the senate race, Republican Gov. Rick Scott beat incumbent Democratic Sen. Bill Nelson by only 10,033 votes. Out of 8 million.

In its voter guide before the election, Florida TaxWatch said it was thought Florida had as many as 1.6 million people "unable to vote because of felony convictions." That's nearly 30 percent of the national total of ineligible voters.

That's a lot of Democrats, potentially enough to make up a gap of 10,000 or 32,000 or 50,000. And then some.

No wonder Republicans found a way to insert monkey wrench. Not a big one, but enough, perhaps, to make a difference in a statewide election.

"The right choice for all the right reasons"

Floyd arrested on attempted murder charge

Danny Long Floyd, 64, was arrested Monday on a charge of attempted murder. He is being held without bond in the DeSoto County Jail.

FLOYD

According to records from the DeSoto County Sheriff's Office and Clerk of Court, Floyd lives in a trailer on S.E. Olive Street in Arcadia, and rents rooms out to people. On Monday, deputies responded to a call from Floyd about a stabbing, saying "I think (the victim) needs to go to the hospital badly." They found the victim, a tenant in the trailer, standing out front holding his abdomen.

Inside, deputies found Floyd near the door, and on the floor near him was a large knife with blood on it. Floyd reportedly said he and the victim had been arguing; when he told the victim to stop, the victim said, "What are you going to do, n----?" Floyd allegedly said he stabbed the victim in the stomach.

The victim was air-lifted to Lee Memorial Hospital as a trauma alert.

Floyd later claimed the victim had touched him all over and he stabbed the man in self-defense. He allowed deputies to collect evidence (including the bloody knife) and take photos.

One of the tenants said Floyd often threatens to "cut people's guts out." According to that tenant, Floyd "sits and drinks all day and becomes belligerent and threatening." In the past she has taken the knife and hidden it.

Cooper to serve 4 years in prison on battery, drug charges

Warren Cooper, 55, of the 1200 block of Harlem Circle, Arcadia, was transferred to the Department of Corrections last

COOPER

Thursday on drug and battery charges.

According to records from the DeSoto County Sheriff's Office, Clerk of Court and DOC, on Feb. 20, 2018, a deputy saw Cooper on the street and stopped him due to an outstanding warrant for his failure to pay child support. Cooper initially gave a wrong name and was arrested on the warrant. When searched, he was found in possession of a crack pipe and a controlled substance for which he had no prescription.

In September, deputies responded to a domestic battery call when Cooper reportedly hit his former girlfriend with a large walking stick.

He pleaded no contest and was sentenced to serve four years in prison on charges of aggravated battery with a deadly weapon and possession of a controlled substance without a prescription. His projected release date is Sept. 17, 2022.

DOC records indicate Cooper has served multiple terms in prison dating back to 1982 on charges including armed robbery, sale of cocaine, aggravated child abuse and felony battery. His most recent was a five-year sentence for unarmed robbery in 2006.

Lesser sent to state prison

Michael David Lesser, 60, a resident at the Florida Civil Commitment Center in Arcadia, was sentenced to a year and six

LESSER

months in state prison for possession of more than 20 grams of marijuana and possession or use of drug paraphernalia.

According to records from the DeSoto County Sheriff's Office, Clerk of Court and Department of Corrections, Lesser was seen entering the woman's bathroom at the FLORICA Civil Commitment Center

POLICE BEAT

The information for Police Beat is gathered from police, sheriff's office, Florida Highway Patrol, jail and fire records. Not every arrest leads to a conviction and guilt or innocence is determined by the court system.

visitation area. When he exited, a guard stopped him. Lesser handed him a bundle wrapped in black electrical tape.

Inside the bundle there were two baggies containing a green leafy substance that later tested positive for marijuana, totaling 27.36 grams.

Lesser was arrested on charges of possession of more than 20 grams of marijuana and possession or use of drug equipment. He pleaded no contest and was sentenced to prison.

He was transferred to the DOC on March 22 and his projected release date is June 2, 2020.

Lesser had been convicted in New York for attempted rape in 1996. After serving time in Florida state prison on a charge of failure of a sex offender to comply with registration requirements, he was transferred to the Florida Civil Commitment Center.

Man arrested on burglary, theft charges

Morgan Horton Reed, 37, allegedly stole a bike because he was tired of walking.

REED

According to the Arcadia Police Department arrest report, APD responded to a call about a man on a bike — later identified as Reed — loitering around East Mills and East Imogene streets. As an officer questioned Reed, another man drove up claiming Reed had just stolen the bike.

When questioned, Reed allegedly admitted taking the bike because his back was hurting and he was tired of walking.

The bike's owner said he had heard Reed in his house who then exited the residence and out to a shed where he took the bike.

When Reed was taken into custody, an officer reportedly found crystal meth in a sock in Reed's pocket. He is being held on \$10,500 bond and his first court date is May 28.

Laundry theft leads to prison term

A man is going to prison for four years after stealing someone's clothes from a local laundromat.

C. PELHAM JR.

According to records from the DeSoto County Sheriff's Office, Clerk of Court and Department of Corrections, in January 2018, a deputy saw Clarence Thomas Pelham Jr., 54, standing by the back door of Habitat for Humanity. The deputy told him he could search through the Dumpster but could not go through items that had not yet been sorted and discarded by Habitat.

Pelham was searched and a bag was found. Pelham said it contained toys, but one of the boxes in the bag was found to contain methamphetamine. Another bag attached to his bike also contained meth. He also had a scale that contained some meth, totaling almost two grams. He was arrested on charges of possession of a controlled substance and possession or use of drug paraphernalia. He was released the next day on \$3,000 bond.

On Jan. 1, 2019, deputies responded to a local laundromat where the victim said he had left his clothes in a washer. When he returned later to pick them up, they were missing. All of his shirts, pants and blankets were gone; he estimated the value at \$1,000.

Using surveillance video, Pelham

was identified as the man who had taken the victim's clothes. When he was apprehended, Pelham said he took them because he needed clothes. He was arrested on \$1,500 bond and released the next day.

Pelham was arrested again on Feb. 25 and jailed for failure to appear. He pleaded no contest to the drug and theft charges and was sentenced to four years in state prison. His projected release date is Feb. 22, 2023.

DOC records indicate Pelham has previously served prison sentences going back as far as 1983 on charges including burglary of an occupied dwelling or conveyance, trafficking in stolen property, grand theft and possession of a weapon or ammunition by a convicted felon.

Man sent to prison for sex with teen

Kenneth Marvin Pelham, 46, of the 1100 block of Lincoln Drive, Arcadia, was transferred on March 20 to serve a seven-year state prison sentence.

K.M. PELHAM

According to records from the DeSoto County Sheriff's Office, Clerk of Court and Department of Corrections, Pelham was arrested in July 2017 on more than 40 counts of lewd and lascivious behavior with a victim between the ages of 12 and 16, and one count of obstructing justice by harassment in a felony proceeding. He had remained in the DeSoto County Jail until entering a guilty plea.

According to the arrest report, in 2016 Pelham, then 43, was suspected of having a sexual relationship with a 14-year-old victim. He was allegedly a friend of the victim's family.

In 2017, he was suspected of having sexual relations with two other 14-year-old victims. Another 14-year-old claimed she lured Pelham into a sexual relationship that lasted more than a year.

When questioned by law enforcement, Pelham denied any sexual behavior with that victim and did not know why she would claim such a relationship.

Pelham was held in jail without bond while his case was adjudicated. Ultimately he pleaded guilty to one count of lewd and lascivious behavior, and the other similar counts were dropped.

With credit for time already served, Pelham is projected to remain in prison until July 24, 2024.

He has a lengthy prison history going back to 1989, serving up to 10-year sentences on various charges (all out of DeSoto County) including burglary, grand theft, aggravated assault and battery with intended harm, burglary of an occupied dwelling or conveyance, trafficking in stolen property and possession of a firearm by a convicted felon.

The DeSoto County Sheriff's Office reported the following arrests:

- Javier Cardona Jr., 19, 1200 block of S.W. Fern Terrace, Arcadia. Charges: driving on a suspended license, operating a motorcycle without a license, resisting an officer by fleeing to elude arrest with lights and siren active, and violation of probation. Bond: none.
- Terrence Thomas Carlton, 47, 600 block of N. Paygay St., Arcadia. Charges: two counts of possession of a controlled substance without a prescription, habitually driving on a suspended license, resisting or obstructing an officer without violence, possession or use of drug equipment, destroying, tampering with or fabricating evidence and possession of less than 20 grams of marijuana. Bond: \$7,500.
- Kadaisha Lucinda Nycarie Cobb, 21, 4300 block of S.W. Jasmine At., Arcadia. Charge: violation of probation. Bond: none.
- Charles Dwayne Davis, 31, no address, Arcadia. Charge: violation of probation. Bond: none.
- Jose Luis Gonzalez, 62, 1000 block of S.W. U.S. Highway 17, Arcadia. Charge: trespass by failing to leave on owner's order. Bond: \$500.

Bond: none.

• Carlos Hernandez Hernandez, 38, Zolfo Springs. Charge: driving without a valid license. Bond: \$250.

— Compiled by Susan E. Hoffman

Develop blind eye and deaf ear

In his book "Lectures to My Students" the still highly regarded 19th-century minister, C.H. Spurgeon, wrote: "I have one blind eye and one deaf ear and they are the best ear and eye that I have."

This trainer of ministers was simply passing on the advice of Solomon written long before him: "Also take no heed unto all words that are spoken." (Ecclesiastes 7:21)

When I hear someone say "I'm always the last to know about trouble in my church," I know I'm in wise company.

Some things are better left unseen and unheard. Paying too much attention to negatives can cause one to become an expert at fault-finding. And if you build your life on faults, expect earthquakes. Nothing will go right in your life if you chose to fill your mind with things that are wrong with people God loves.

Chronic complainers seldom see this solemn truth: Their constant griping is actually directed toward God. To complain about our circumstances is to complain about Him, since He directs or allows all the events that come into our lives.

It's time, then, to tune out all the cutting negative voices of the past.

Why not become blind and deaf to all voices and events that drag you down?

Hear birds instead of sirens.

Hear laughter instead of complaining.

Look for rainbows instead of dark clouds.

See the beauty of snowflakes instead of complaining about the depth of the snow.

Remember the encouragements of yesterday and make them work for you today.

Members of a congregation were filing out of their church shaking hands and exchanging greetings. I had never ministered at this church before but felt

Roger Campbell

at ease with the people. The bond of love between us was new but familiar.

One of the worshippers stopped to ask if I might consider writing a book to help those struggling with negative attitudes. "I'm so negative," he said. "I'm negative about the church—about everything."

Millions who exit church services and others who never enter them are defeated by this destructive frame of mind. Negativism is a thief that robs people of adventure and joy; even the economy of the nation is drained of needed vitality by this crippling condition that causes its victims to expect little and attempt less.

A man I once met in a Detroit hospital left an impression on me that remains: His attitude demonstrated the faith he possessed was genuine. He seemed blind and deaf to the faults of others and the two words he spoke to me as we parted have returned to refresh me again and again.

"Be encouraged!" he said.

What good words!

Perhaps someone you will meet today needs to experience their life changing power.

OBITUARIES

Robert J. Wey

Robert J. Wey, 74, of Arcadia, Fla., passed away April 25, 2018, in Port Charlotte, Fla. A "Celebration of Life" for Robert will be 2 p.m. (Sunday) March 31, 2019, at Oak Ridge Cemetery, Arcadia.

Mr. Wey was born Oct. 20, 1943, in Arcadia to the late Eugene and Doris Wey. Robert was a graduate of DeSoto High School and a veteran of the U. S. Army, serving in the Vietnam War. Robert was a descendant of three generations of DeSoto County pioneers—grandparents Mr. and Mrs. Jacob Wey and Mr. and Mrs. Jessie Hickman; and Dr. Green, his great-grandfather, was the first doctor in Arcadia. Dr. Green established the first drug store in Arcadia, while his son-in-law, Jake Wey, opened a drug store in what was known as the Wey Building, which later became Mercer's Men's Store.

Survivors are his cousins, Donald Davis and Kerry McAnly Wegner; grand-nephews and nieces.

Robert is predeceased by his parents; aunts, Elizabeth Hickman Davis and Margaret Hickman McAnly; brothers, Eugene C. Wey II, and twin brother Richard H. Wey; cousins, Thad Davis, George Davis, Jim McAnly and Bill McAnly; a nephew, Eugene C. Wey III.

Online condolences may be made at pongerkaysgrady.com. Ponger-Kays-Grady Funeral Home and Cremation Services, Arcadia, is in charge of arrangements.

Ernest Charles Miles

Ernest Charles Miles, 66, of Arcadia, Fla., passed away March 22, 2019, at his home surrounded by family. He was born July 21, 1952, in Pahokee, Fla., to Francis R. and Ruth (nee Lowe) Miles. Ernie was a wonderful husband and father. He graduated from CHS in 1970, where he was an all-round athlete lettering in wrestling, track and football. He worked for the city of Punta Gorda for over 25 years, starting on the water crew and working his way to Director of Public Works. He went on to acquire his State Underground and Fire line licenses and worked as project manager for several large utility companies until he retired in 2015.

Mr. Miles was an avid history buff and especially enjoyed Punta Gorda history and researching his family genealogy and their extensive ties to early Punta Gorda. He coached Charlotte County Babe Ruth from 1975-1977 and Little League from 1991-1995. He was a popular coach with the kids and parents because of his easy-going manner and love of the sport and his desire to instill

sportsmanship in the young boys.

Upon retiring to Arcadia, he was able to spend his time outdoors working in his yard with his dogs by his side, puttering in his workshop and relaxing in the swing under the oak. Ernie was a self-taught guitarist. In the evenings after dinner you could hear him playing classic Rolling Stones on his favorite guitar. He loved fishing and golfing with his son and enjoying the quiet country life with his wife and daughter. He will be greatly missed by all.

He was survived by his wife of 45 years, Sharon L. Miles; their children, Courtney L. Miles of Arcadia and Christopher M. Miles; and daughter-in-law, Samantha of Dubai, UAE; siblings, Diann Macomber of Punta Gorda, Donna and Robin Youse of Miami, Collette and Ricky Tomlinson of Punta Gorda, and Ross and Gina Miles of Baton Rouge, La. He also had a large extended family of aunts, uncles, nephews, nieces and cousins, as well as many cherished friends. He was predeceased in death by his parents, Francis and Ruth Miles, and brother-in-law Robert M. Macomber.

A Celebration of Life service will be held at 1 p.m. (Sunday) March 31 at the Kays-Ponger & Useton Funeral Home, 635 E Marion Ave., Punta Gorda. In lieu of flowers, the family has requested donations be made to an animal shelter or rescue of your choice in memory of Ernie's passion and love for animals. Fond memories and expressions of sympathy may be shared at www.kays-ponger.com for the Miles family.

Sol good: Our nearest star

By VICTOR C. ROGUS

ARCADIAN SCIENCE EDITOR

Our nearest star is named “Sol,” more commonly known as the sun. The Romans coined the name “Sol” and the Greeks “Helios.” The star Sol lies some 93 million miles from the earth. It provides us with light and warmth and makes the earth a perfect platform to support life.

Our sun is rather unremarkable, in that it is a normal main sequence star, one of more than 100 billion stars in our galaxy. The sun is by far the largest object in our solar system, containing about 98 percent of our system’s mass. The rest of the mass belongs mostly to the planet Jupiter.

The sun’s temperature on the surface is about 58,000 degrees kelvin (or 103,000 degrees Fahrenheit) and 15.6 million kelvins at the core. At present the sun contains about 70 percent hydrogen and 28 percent helium. This gradually changes over time as the sun converts hydrogen into helium.

The most readily observed surface of the sun is called the photosphere, the visible layer we are most familiar with. Sunspots are visible as they transit the sun’s photosphere. They appear as dark regions, usually in magnetically joined pairs of opposite polarity. These sunspots are cooler than the photosphere and are caused by concentrations of magnetic field flux. Sunspot numbers vary in an abundance according to an eleven-year cycle. During this cycle sunspot numbers can range from many (solar maximum) to none (solar minimum). Sunspots usually last a few days or a few weeks before they decay. Sunspots are connected to solar phenomenon such as solar flares and coronal mass ejections, or CMEs, sending charged particles hurtling through space and disrupting shortwave radio and cellphone communications. Large sunspots can be seen from the earth without the aid of a telescope.

Telescopes are often used to project an image of the sun onto a card or plate, making it safe to view. I cannot express enough that we must NEVER view the sun through an optical instrument without proper filtering for your safety. Thousand Oaks Optical offers fine over the aperture solar filters at a low cost. These filters come with a set screw to hold them in place, but I recommend using tape in conjunction with the screws to secure the filters, ensuring the filter will not be blown off by a sudden gust of wind or an improper fit. Your eyes can be damaged in an instant! Baader Planetarium also offers a solar prism that allows for

Sunspots viewed from 93 million or so miles, a distance so great it takes about eight minutes for its light to reach us.

The sun in partial eclipse.

safe viewing of the sun.

Above the photosphere there is the chromosphere. This is where we can observe solar prominences, filaments and flares that can extend millions of miles into space. Special equipment is required to observe these phenomena. A hydrogen telescope is best. These can be quite expensive, however. I own one that I sold a custom Jeep to afford—to me it was worth it! Observing our nearest star can be quite rewarding ... but it must be safely. Always be sure of what you are doing, or be with someone who does.

Solar eclipses can be an awe-inspiring event. I have seen people brought to tears while experiencing one. Transits of the planets Venus and Mercury across the solar disk also can put things into perspective for us as we compare them to the earth.

The first thing one notices when observing our nearest star is that we are working in the daylight and the warmth of the sun. This is a bit unusual for the night-time astronomer, but much can be learned from observing our nearest star.

It gives us insight into what stars in distant galaxies might be like.

Happy St. Patty's Day!

By MICHELLE JALETTE

OAKVIEW ESTATES CORRESPONDENT

The Activities Committee and residents of Oakview Estates held their second annual St. Patrick's Day on March 17. The afternoon started with a parade of golfcarts in the spirit of St. Patrick's Day. As the parade meandered through the park, a secret judge chose the winner of the best decorated golfcart.

Residents lined the parade route to cheer on 11 golfcart owners. The secret judge chose sisters **Joyce Langfang** and **Betty DeV Vaughn** as winners because of their elaborately

themed and decorated golfcart. Betty also played Irish music on her clarinet. A delicious corned beef dinner prepared by **Phil** and **Ronnie Linck** was served following the parade.

The Oakview Activities Committee would like to thank all our participants ... and look forward to next year.

Parade participants lining up for the second annual celebration.

DeSoto Board of County Commissioners is seeking volunteers to serve on the Value Adjustment Board

The VAB is made up of five members all of whom require specific qualifications. The citizen member and alternate must own homestead property in DeSoto County. Citizen members must not be a member or employee of any taxing authority in this state or a person who represents property owners, property appraisers, tax collectors or taxing authorities in any administrative or judicial review of property taxes. Citizen members shall be appointed in a manner to avoid conflicts of interest or the appearance of conflicts of interest.

The VAB shall hear petitions relating to assessments, complaints relating to homestead exemptions, hearing of appeals from exemptions denied, appeals concerning ad valorem tax deferrals and classifications. The VAB only schedules hearings a few months out of the year.

If you are interested in serving as a Value Adjustment Board member or alternate, please email a letter of interest to Jill Kersey at j.kersey@desotobocc.com by April 30, 2019. The Board of County Commissioners will appoint a citizen and alternate from the letters of interest at a regular scheduled Board meeting.

adno=3667403-1

Happy second birthday, Avery Kaye Tanner!

*You are precious in every way,
the sunshine in my day; the joy
in my soul and the love of my life.*

You are loved by so many.

Write stuff: Five traps for new authors to avoid

New authors should be aware of a number of traps which could cost them time and money. There are at least five.

Mark Barie

1 Awards

For a fee, sometimes substantial, you can enter your book in dozens of contests. But be careful. Some competitions are nothing more than money-makers for the sponsor. In addition, the so-called "judges" in such contests are neither qualified nor respectable. Research each contest you enter, confirming its longtime existence, its reputation in the industry and its process for determining the winners. Without such research, you will be a loser, for sure.

2 Author conferences/book fairs

Before you spend money on registrations, travel costs, lodging expenses and display materials, do your homework. Does the conference/book fair you wish to attend offer what you need? For example, will there be tips on writing, editing and publishing from experienced authors? If it is a book fair, will there be substantial aisle traffic with potential book buyers, or simply a bunch of other authors also trying to sell their books. Check out the history of the conference/book fair. Organizers should be willing and able to provide you with the type and number of attendees they have attracted in the past. Attending one of these affairs without first doing your homework is foolish and quite possibly very expensive.

3 Book reviews

Be cautious of any organization that offers to do a review of your book for a fee. If all they do is provide raving reviews for anyone willing to cough up some money, you know that their review is worthless—to both you

and your potential readers. Contact the organization. Ask for references and look for a history of consumer complaints, if any. Companies that do useless reviews will be obvious.

4 Book promotions sites

Once you become an author, you will discover a plethora of companies that want to promote your book. For a fee, of course. Exercise great caution when dealing with these firms. Do they have a proven track record? Are their customers pleased with the results ... or not? Exactly how do they promote your book and what, if any, results are they willing to guarantee, or at least predict. Marketing your book is your chief responsibility and contracting with someone else to do your job is rarely successful.

5 Vanity presses

If you are paying a company to publish your book and they appear to publish every author that comes through their door, you are most likely dealing with a vanity press. It is acceptable to pay for professional services like editing, layout, cover design and website construction. It is not acceptable to pay a "publishing company" for banging out a book that fails to meet even the minimum industry standards and will make you the laughingstock of your industry.

Mark Barie is the author of several books. His most recent novel "War Calls, Love Cries" is available at amazon.com or at MarkBarie.com.

Congratulations to the very best!

Flying high on DeSoto County, viewed from above

By CRAIG GARRETT
ARCADIAN EDITOR

Sarasota County is an amazing place, sixth, in fact, in Florida's overall healthiest places to live.

But buried in that same Robert Wood Johnson health survey of Florida's 67 counties, DeSoto County rests atop the list for physical environment, things such as air and water quality. Other factors relating to drive times and housing are in the survey.

But it appears that DeSoto County is one of the state's more physically beautiful places, too, its land a little greener, its oranges a little juicier, its people a little nicer than, say, coastal cities where

they stack on top of one another and wait and wait in the baking asphalt.

That's at least according to a gaggle of visiting pilots to Arcadia Municipal Airport. Several dozen members with the Old Farts Flying Club were in town last week, visiting the airport's fly-in campground, the amenities, fueling up on cheaper-than-normal gas, enjoying a splendid morning in the heartland.

But the overriding theme was just how special DeSoto County is ... from the air.

The region, said Lisa Heidinger, a Cessna pilot visiting with husband Albert from the club's home base in Port St. Lucie, "is really pretty. The orange groves look greener. Word is getting

around that this is absolutely worth visiting."

The flying club has some 450 pilots who rally up on Thursdays for targeted fly-ins. They'll hit places such as DeSoto County once, but plan to return. The idea is to be around other pilots, Heidinger and others said, but to also share that passion with younger people, to get them interested in recreational aviation.

"A fantastic place to share aviation and pizza," said Aaron Wohl, an emergency-room doctor co-piloting a Fort Myers-based biplane. "Who could complain about this," meaning the day's brisk breeze under warm skies in sunny DeSoto County.

One tool for attracting others to DeSoto County is the fly-in/over-night campgrounds at Arcadia Municipal, said George Chase, president of the Friends of Arcadia Airport group, the nonprofit that last year added a shower/restroom facility for visiting campers. The group also added a loaner van for pilots to ferry back and forth. Because DeSoto County features things not along the coast, even in other rural spots—rodeo, ecotourism, the downtown antique shops, plenty of food choices and outdoor recreation such as fishing and canoeing—"it's just a unique site," Chase said. "There are very few places like it in the U.S." And take that, Sarasota County.

Arcadia Municipal Airport manager Shelley Peacock and a visiting helicopter pilot talk about the attractions in DeSoto County.

DeSoto SPORTS EXTRA

Lessons learned in 9-6 win over Gateway

By **STEVE KNAPP**

ARCADIAN SPORTS EDITOR

There were several lessons learned in the Bulldogs' 9-6 win over Gateway Charter last week. Usually lessons will cost you something in return, but the boys in blue not only learned a few things about the game, they also came out of it with a nicely played win.

"This should be a lesson for you," head coach Mike Klossner said. "We scored early and let them back in the game. You keep playing baseball and don't worry about the scoreboard or mistakes, just keep playing and keep yourselves in the game. The ballgame is never over until that last out.

"We had the opportunities to score runs and sometimes we did and sometimes we weren't able to ... but you kept in the game. That was a good win and I'm proud of you."

Lesson 1

The Bulldogs scored four times in the first inning but went out 1-2-3 in the second. When you jump on a team early like that, it is good to bury them right away and take them out

of the game. The Bulldogs didn't do that. If you let a team hang around long enough, they will find a way to beat you.

Lesson 2

It is so important to get that first out every inning. In the first four innings, the Griffins put the lead-off man on base. They scored in three of those innings and were able to take the lead 6-5 after four innings.

DeSoto put the lead-off man on base just twice and scored both times. It's very simple—get that first man out of there and it makes it much harder to score runs.

Lesson 3

The game is not over until the last out. Everybody has heard that or the other popular saying, "The opera's not over until the fat lady sings." I've never been forced to go to an opera. But from what I've heard, that is true.

The Bulldogs not only scored the tying run, but also the winning run in the fifth inning after the first two men had gotten out. Caleb Fillingim singled to get the rally started. Trent

Jones ran for him and pinch-hitter Ethan Underwood followed with another single. Garrett Leath singled in Jones and Underwood took third. Underwood scored on a planned play where the runner on first got into a rundown long enough for Underwood to score from third with the winning run.

Final lesson

Don't worry about something bad happening ... until it does. C J Nelson was the unsung hero in the game. He wore the collar at the plate, but his presence on the mound was huge.

Mason Ayers took the hill to begin the fourth inning after the starter Jade Zepeda had thrown 57 pitches through the first three innings. Zepeda had allowed three runs, only one earned, on three hits and struck out four, including the side in the first.

Ayers was on the bump for the first time this season and was playing his seventh different position of the season. He gave up a single to the lead-off man (and he later scored)

PHOTO PROVIDED

Trent Jones runs the bases correctly as he watches his coach to send him or hold him up. Jones scored on this single by Garrett Leath to tie the game in the fifth. DeSoto beat Gateway Charter, 9-6.

Bulldogs spanked by Lake Placid, 24-5

By **STEVE KNAPP**

ARCADIAN SPORTS EDITOR

“We’ve got a lot of work ahead of us, a lot of work,” said DeSoto softball coach Keith Wallace.

His team had just been beaten by Lake Placid, 24-5, and there wasn’t anything he could do about it.

It’s a matter of making the routine plays routine, and they had a hard time doing that against the Green Dragons. The Bulldogs threw to the wrong bases and struggled with many of the basic fundamentals of the game and situational plays.

“We’re a whole lot better than what we played tonight,” said Wallace.

There were a couple of bright spots, however, with the biggest being the hitting of Libby Wilkinson. The sophomore first-sacker led the Bulldogs with three RBIs, going 2-3 at the plate. Her only out came on a rocket hit at the shortstop who made a nice play on the ball.

Trailing 9-0 in the third, the Bulldogs kicked up their heels. With a run in and the bases loaded, Wilkinson drilled a 2-2 pitch to left center to drive in two runs. She drove in the final run with an infield single.

“Those were the two best balls anyone has hit this year, up to this point,” said Wallace.

Wilkinson had a habit of letting one hand go off the bat. Wallace worked in practice by wrapping her hands to the bat to get the feel of what it is like to hit the ball with both hands. It paid off with two very well hit balls.

The Green Dragons, in turn, hit three home runs, including two in the 13-run uprising in the fifth inning. They banged out 23 hits and ran the bases at will as they scored in every inning.

PHOTOS PROVIDED

Meet the Lemon Drops, Arcadia golf's new team

By **CRAIG GARRETT**
ARCADIAN EDITOR

They're the Lemon Drops, a few kids learning the game at Arcadia Municipal Golf Course. The youngsters ranging from age 6 through high schoolers practice under the watchful eye of Jeff Gibson, a PGA pro and Arcadia Municipal's director of golf. The idea is to build a golf program in DeSoto County, as an opportunity for the kids to play competitive golf and for lifelong enjoyment, Gibson said. He'd like to form a nonprofit to benefit Junior Golf, expand the program and assemble a high school team.

"They learn to play golf by playing golf," Gibson said, meaning that along with Saturday range practice the youngsters play a few holes on Mondays.

Tagging along on a practice round on Monday with Isabella Morris, 7, and Layla Turner, 8, were a couple of adults, including Isabella's mom Emily. Gibson shared swing tips and other advice, but mostly directed the girls to stand correctly and drive through the ball. Modern play is about power, he told them, as the girls wound up and drilled their pink and yellow golf balls.

"Don't worry about results," he added. "You want to be athletic."

PHOTO PROVIDED

Junior golfer Layla Turner (left) and Emily Morris at Arcadia Municipal on Monday. Youngsters are encouraged to sign-up for driving and practice clinics. Emily's daughter Isabella also played a practice round.

And then he awarded each girl a lemon drop candy, a reward for hard play and now the new Junior Golf nickname. www.golfarcadia.com

Athletes of the Month

PHOTO PROVIDED

Senior ballplayers Jade Zepeda (left) and Mason Ayers shared the honors as DeSoto County Athlete of the Month for February.

PHOTO PROVIDED

C J Nelson pitched in relief with the bases loaded in the fifth inning and got a pop-up on his second throw. Nelson pitched the final 3 1/3 innings to get the win for DeSoto County.

LESSONS

FROM PAGE 14

but got the next two outs. But remember lesson 3 (go back four paragraphs if you can't remember it).

Ayers then hit a batter and the next man went yard to left to give the Griffins their first lead of the night at 6-5. The bomb rattled Ayers, as the plate was dancing on him and he juiced the bases with three straight walks.

Klossner said, "We all know Mason is a much better pitcher than that, so

he has to just forget it and move on."

Enter Nelson. The freshman, who coach Eric Shea joked "throws a 38 mph curve," threw two pitches and got a pop-up to Logan Adams behind the mask to end the inning.

The sixth inning is when Nelson showed his stuff. He gave up a lead-off double, and you know what I've said about getting that leadoff man out. Up next was the meat of the Gateway lineup, including their big slugger who hit a homer two innings earlier.

Nelson toyed with them,

getting the big man to pop-up and then a fly ball and a ground-out ended the inning with the lead-off man still standing on second base. That was some piece of pitching.

Nelson got them out 1-2-3 to end the game in the seventh to earn the win and preserve a 9-6 DeSoto win.

Nelson said, "That's the pitch (curve ball) that was working for me, so I kept throwing it at them. Why throw them a fastball when they couldn't hit my curve? I don't worry about how hard I can throw, I just get out there and throw it."

Chris and Nana's adventure, life is good! (part 2)

By PRISCILLA MCDANIEL

ARCADIAN NANA CORRESPONDENT

Arcadian photographer Priscilla McDaniel writes an occasional column about adventures with her grandson Chris. This is part 2.

Almost back to the car at Highlands Hammock State Park, Chris stopped and pointed. And once again ... I looked all over the place. What, Chris, where is it and what is it? Right there, Nana ... a dragonfly. Chris, you've never seen a dragonfly? Nope, the kid had never seen a dragonfly. I need to get him out of the house more! So we left the Hammock with Chris feeling pretty good about what we had seen that afternoon. A scrub jay, a 'Terminator' bug, a 'gator, a dragonfly, a turtle and dandelion-like flowers. He was asleep in the car before we even left the Hammock.

The next day I took Chris to the Hardee County Wildlife Refuge in Zolfo Springs. He seemed perfectly happy outside and playing with the cats—he just has to pet everything. I talked him into putting the cats down and going into the refuge. He was immediately excited to see the emu and then we noticed that three of them were acting weird and the feathers in their necks seemed to be getting fluffy, legs flaring, and running around each other making all kinds of weird sounds. So I'm thinking this must be some kind of mating ritual. Got home and Googled it and, by golly, that was what it was. I think it was a failed attempt, though ... was kinda happy about that. So at the refuge we saw the emu, otters, owls, raccoons, coyotes, green herons, turtles, black bear, tortoises, bobcats, deer and 'gators. We had to go around twice, Chris wanted to make sure he saw everything, and yes we did! Nana and Chris had a fun day and

Chris is amused by a scrub jay's technique for cracking nuts.

were looking forward to going to Myakka River State Park the next day.

We got up early to get a head start to the day and were at the Sarasota park when it opened. The little guy actually enjoyed the ride to the park. I love it. I made sure whenever I saw a hawk or a caracara, I pointed it out. We actually saw two eagles sitting on fence posts. If Chris wasn't with me, I would have turned that car around and gotten a photo of that, but I thought to myself, another day.

Immediately upon entering Myakka, I pulled into the first parking area and walked him across the street to see the 'gator on the shore. He got his picture and was happy. Chris had to get a picture of the wild iris blooming in the park and off we went to the main parking area with the restaurant, gift shop and boat ride. We walked down to the weir. Chris was excited to get photos of the roseate

PHOTOS BY PRISCILLA MCDANIEL

Chris loves photographing outdoor landscapes and the wild things growing and living on it.

spoonbills and great blue heron and then we came upon another 'gator on the shore. I had Chris stuck to my side; he got his picture and we moved on.

A black caterpillar was next up—Chris wanted to move it off the walking path so no one would crush it. Nana would not let him touch it. Go find a twig, Chris, and push it into the grass ... but do *not* touch it. Well, the caterpillar walked onto the twig. Chris was all smiles, showing the creature to every person in the area. Then he put the twig in the grass, so proud of himself for saving the caterpillar's life.

We wanted to go to the gift shop, but

the place was packed. On the way out I spotted a turkey trying to sweet talk a young hen, but she ignored him and went on her way. He was persistent and keep strutting his stuff. There must have been 30 cars on the side of the road, its occupants getting pictures. Chris thought that was pretty cool the way a turkey's feathers fold down and fluff back up again. Even at Nana's age, nature still amazes me.

The next day we went to the mall to buy Chris's baby sister a 1-year-old's party dress and shoes. That's when Chris went home with his dad ... and I went to bed. Life is good!

20020664.001. The file(s) pertaining to this project is available for inspection Monday - Friday except for legal holidays, 8am - 5pm, at the Southwest Florida Water Management District, 7601 US Highway 301 North, Tampa, FL 33637.

Notice of Rights

Any person whose substantial interests are affected by the District's action regarding this matter may request an administrative hearing in accordance with Sections 120.569 and 120.57, Florida Statutes (F.S.), and Chapter 28-106, Florida Administrative Code (F.A.C.), of the Uniform Rules of Procedure. A request for hearing must (1) explain how the substantial interests of each person requesting the hearing will be affected by the District's action, or proposed action; (2) state all material facts disputed by each person requesting the hearing or state that there are no disputed facts; and (3) otherwise comply with Chapter 28-106, F.A.C. A request for hearing must be filed with and received by the Agency Clerk of the District at the District's Brooksville address, 2379 Broad Street, Brooksville, FL 34604-6899 within 21 days of publication of this notice. Failure to file a request for hearing within this time period shall constitute a waiver of any right such person may have to request a hearing under Sections 120.569 and 120.57, F.S. Because the administrative hearing process is designed to formulate final agency action, the filing of a petition means that the District's final action may be different from the position taken by it in this notice of agency action. Persons whose substantial interests will be affected by any such final decision of the District in this matter have the right to petition to become a party to the proceeding, in accordance with the requirements set forth above. Mediation pursuant to Section 120.573, F.S., to settle an administrative dispute regarding the District's action in this matter is not available prior to the filing of a request for hearing. HOROSCOPE

ARIES — Mar 21/Apr 20

You might have to make a few concessions in the short-term if you are eager to make real progress in the long-term, Aries. Eventually all things will even out.

TAURUS — Apr 21/May 21

Put exercise to the forefront of your list of things to do, Taurus. If you have not been physically active lately, work slowly and diligently to build up your endurance.

GEMINI — May 22/June 21

Important decisions cannot be made in a matter of minutes, Gemini. You really have to work through all the angles. Seek opinions from trusted friends.

CANCER — June 22/July 22

Make a list of things you need to accomplish this week, Cancer. If you let it all sit in your head, you are bound to get overwhelmed and forget something.

LEO — July 23/Aug 23

Leo, there are a few ways a situation at work can go. Not every path may meet with your utmost approval. But you may have to swallow your pride and compromise.

VIRGO — Aug 24/Sept 22

If illness has been going around, Virgo, do your best to avoid getting sick. Be diligent in handwashing and other preventive measures.

LIBRA — Sept 23/Oct 23

Even the most doting parents can use some down time once in a while, Libra. Plan an adults-only date night and enjoy some well-deserved conversation.

SCORPIO — Oct 24/Nov 22

Scorpio, illnesses or medical obstacles can have many sources — from the foods you eat to your emotional wellness. Start jotting things down in a journal to figure out how to feel and look your best.

SAGITTARIUS — Nov 23/Dec 21

Your perseverance is a source of inspiration to others, Sagittarius. Don't be bashful when others share these thoughts with you. Accept their well wishes and give thanks.

CAPRICORN — Dec 22/Jan 20

Hold tight to those friends who have your best interests at heart through happy and trying situations, Capricorn. These are the people you can call upon this week.

AQUARIUS — Jan 21/Feb 18

For so long you have been doling out advice to other people and helping them improve their lives, Aquarius. Now you are the one who could benefit from some counsel.

PISCES — Feb 19/Mar 20

Pisces, a recent birthday celebration could have you feeling like you need to make drastic changes. But small ones can fit the bill as well.

BIKE

FROM PAGE 1

motorcycle stunt team, a bike wash and lots of food and fun. And downtown merchants are gearing up for a few thousand visitors.

"If Saturday turns out anything like November," said Pam Ames, the owner of Arcadia's Peddler's Boutique and president of the host Arcadian Main Street Program, "it's going to be a great day. We're very excited to keep this going."

Arcadia Bike Fest was first hatched by local businessman Miles Christian-Hart. But Arcadia Main Street Program got immediately involved, which helped attract Bert's Black Widow, a Port Charlotte Harley dealer. And that put the event on a much bigger footing.

"I'm overwhelmed with how things evolved," said Christian-Hart, a film actor and rider with deep roots in the motorcycle

community. "It has been a great partnership."

VW Atlas, big on cargo space, cool on appeal

By **LEN INGRASSIA**

ARCADIAN AUTOMOTIVE EDITOR

Volkswagen's newest crossover offers an appealing alternative for growing families with lots of gear to stow. In its second year of production, the Atlas is a large vehicle with attractive price points that won't break the bank.

Pros:

- Plenty of cargo
- Value in mid trims
- Great warranty

Cons:

- Thirsty
- Can get pricey
- Fussy infotainment system

While the Atlas is relatively new, it has been around globally and replaced the Touraeg in late 2017. Its German auto-maker wanted a larger crossover, and as such the Atlas has three-row seating, with its third row fit for adults. First-year sales were brisk during 2018, with 59,677 of the four-door hatchbacks sold.

The Atlas cabin is larger too due to its longer, wider and lower body, which helps getting in and out of the 16.5-foot body (10-inches longer than Touraeg). Exterior lines are not particularly stylish but it has good curb appeal and a plethora of standard equipment.

Two engine choices are available—an economical four-cylinder and a peppier six included in our mid-trim SE test car. An eight-speed automatic transmission is exclusive to each.

Our independent track testing of zero to 60 resulted in an 8.5-second time with our front-wheel drive tester, probably due to its near 4,500 pound heft.

Five trim levels start with the base S (\$31,890) that is only available with the turbocharged four-cylinder; SE

The instrument cluster features a digital gauge display, eight-inch touchscreen and easy to reach dials and buttons.

(\$36,490) and SEL (\$42,390). The SE has a Tech package and the SEL offers a Premium trim that can reach into \$50,000-plus. There's a 5,000-pound towing capacity.

For best value, we'd recommend the SE Tech trim that offers a good selection of safety gear, remote start, 20-inch alloys and a power liftgate for under \$40K.

Unfortunately, adaptive cruise, lane keeping, navigation and high-beam assist are only available on upper trims, while many rivals offer most of these things as standard.

With its extra length, however, the Atlas has impressive cargo space—more than 20 cubic feet with all seats in their upright position; 55 with the third row folded and class-leading 96 cubic feet with all seats down.

The Atlas has stiff competition, among others the Mazda CX-9, Honda Pilot, Toyota Highlander, Nissan Pathfinder, Buick Enclave and Chevy Traverse. We'd compare the Atlas ride to that of a boulevard cruiser, comfortable with a spacious interior and quiet cabin. The ride is compliant with little body roll in curves, ample merging power on highway ramps and ease of parking on

PHOTOS BY LEN INGRASSIA

Clean lines define the 2019 Volkswagen Atlas, a large crossover with a pleasing ride and room for up to seven in three rows.

downtown streets.

The interior has all the makings of a refined SUV but seems overly laden with hard plastics here and there. To be fair, armrests were well cushioned and came in handy on longer trips. We found it difficult to position the manual steering wheel to a just-right position, however. Another disappointment were the clicks needed to set and adjust cruise controls.

Overall, the Atlas is an easy car to like and deserves a test drive on your shortlist.

Contact independent automotive columnist Len Ingrassia at lenscarcorner@comcast.net

2019 Volkswagen Atlas

Engine: 3.6-liter/V-6, 276 horsepower, 266 lb.-ft. of torque

EPA estimated fuel economy: 17 city,

24 highway, 19 combined

Assembled: Chattanooga, Tenn.; U.S./Canadian parts content, 47 percent; major source of foreign parts, Germany, 22 percent; country of origin: engine, Germany, transmission, Japan

Crash test ratings: The National Highway Traffic Safety Administration awarded the Atlas five stars overall, its highest rating, with five stars in side impact and passenger side frontal protection. Frontal crash protection rated four stars for driver and four stars in rollover protection. The Insurance Institute for Highway Safety awarded the Atlas its highest ranking of "Good" in small and moderate overlap frontal protection, side impact, roof strength and whiplash protection, and a "Superior" rating for its crash avoidance and mitigation system.

Warranty: 6-year/72,000 bumper to bumper; 6-year/72,000 mile powertrain.

If I only had a time machine

Columnist

Curtis HONEYCUTT

I appreciate reader feedback, and I try to respond to each email and letter I receive. Believe it or not, at least seven of you are reading Grammar Guy on a consistent basis! That's humbling.

If you had a time machine to go back and re-do one moment of your life, what would you change? For me, I would learn where to place the word "only" in a sentence properly. This grammar faux pas of mine doesn't get past you word nerds out there. In fact, I've received at least seven emails about my misplacement of "only" over the past few months. So, if you don't mind, I'm going to learn my lesson once and for all; after all, Grammar Guy should get this right (lest the readers think him a

dullard).

Only is like a key fob with weak batteries—it's effective just when it's as close to the thing it's modifying as possible. So, when you move "only" around in a sentence, it gunks up or completely changes the meaning of your sentence. The proximity of "only" to the word or phrase it modifies is crucial.

The more I look at the word "only," the more it reminds me of the way we use the

word "just." In these examples, when you see "only," substitute it in your mind with the word "just."

Only vampires bite humans in the neck. This sentence implies no one besides vampires bites humans in the neck area.

Vampires bite humans only in the neck. Here, the implication is that vampires don't bite humans anywhere else. Here's a quick public service announcement: if you're thinking about getting a neck tattoo, don't.

Vampires only bite humans in the neck. This use of only here implies that vampires don't do anything else to humans except bite their necks. Vampires don't pick humans' noses, they don't style

humans' hair, and they don't jiggle the loose skin on humans' upper arms.

Vampires bite only humans in the neck. This suggests vampires don't bite ostriches, giraffes, flamingos, or anything else in the neck—just humans.

Apparently, I understand grammar best when I use nerdy examples like vampires and time machines. And, now that I've learned my lesson, I can save my single-use time machine do-over for something else, like the time I attempted to iron my shirt while still wearing it.

HPC issues Certificates of Appropriateness

By **CAROL MAHLER**

ARCADIAN HISTORY EDITOR

Arcadia's Historic Preservation Commission, or the HPC, approved two Certificates of Appropriateness and discussed Arcadia's status as a Certified Local Government at their meeting on March 11.

Listed in the National Register of Historic Places in 1984 as part of the Arcadia Historic District, the houses at 208 W. Hickory St. (Florida Master Site File (FMSF) #DE00138) and 144 S. Sumpter Ave. (FMSF #DE00343) were identified as "contributing but altered" structures. That means that changes to the original designs—such as enclosed front porches—had already been made.

The new owner of 208 W. Hickory was given approval to paint choosing a shade from the palette of historic colors adopted by the HPC.

The owner thought the house had been constructed in the 1940s, but research proved otherwise. The house was listed in the 1921 Arcadia City

Directory and in the 1920 U.S. Census, occupied by Frank B. Smith, age 53—a citrus grower and shipper—and his wife Effie M. Smith, age 47, and her daughter Christine Peters, age 19. Effie M. Kreider had first married Fred C. Peters. With his brother Paul and father Anthony, Peters established the first bank in Arcadia in 1890, and more.

The owner of 144 S. Sumpter Ave. received approval to reroof the structure that seemed to date from the 1940s. However, Minor L. Rogers, a clerk at the David R. Whitehead grocery store on Oak Street, and her husband Ira E., lived in the house, according to the 1915 city directory. The 1921 directory listed it as the residence of Michael J. and Elizabeth Donahoe. His occupation was listed as the United States Army, so he probably worked at Carlstrom Field where aviation training started in 1918 and continued until 1922.

The commission at the meeting also learned that the city of Arcadia's "Certified Local Government" designation "is in good standing and currently

meeting the requirements of the CLG guidelines," according to a letter received from Megan McDonald, the CLG coordinator for Florida's Department of State, Division of Historical Resources. The city has partnered with state and federal agencies to preserve and protect the city's historic resources, both those encompassed by the Arcadia Historic District and those outside of those boundaries.

McDonald noted on the evaluation, "Glad to see Arcadia Taking advantage of the State Grant program so soon after certification!" City Administrator Terry Stewart told the commission that a planning grant for city hall was ranked 38 of 50 projects, and he hoped the Florida legislature would fund the grants.

Some commission members are attending CLG training on the second Monday in April, so the commission will meet at 4 p.m. on April 10, in the City Council Chambers, 23 N. Polk Ave. The meeting is open to the public. 863-494-4114.

Wednesday hearing is crucial in Mosaic dispute

By **CRAIG GARRETT**
ARCADIAN EDITOR

DeSoto County and Mosaic Fertilizer go before a dispute resolution expert on Wednesday, attempting to resolve differences over rezoning Mosaic farmland in DeSoto County to industrial mining. The special magistrate is to decide the impact of the DeSoto Board of County Commissioners on Mosaic when it voted against rezoning last July. (procedural guidelines are listed at desotobocc.com)

The Arcadian asked Dennis Mader with People for Protecting Peace River Inc. (3PR) and Heather Nedley with Mosaic to define their opposing positions for our readers. Space allows for one answer. We will post full replies at www.yoursun.com/Arcadian by Friday.

Question: Phosphate mining has a history in Florida. DeSoto County, in fact, is its home. What's wrong with continuing that?

Nedley: "Phosphate was discovered by Captain J. Francis LeBaron in the Peace River in 1881 and in 1889 Arcadia Phosphate Co. mined the first commercial phosphate in Florida. Mining is moving southward to reserves in Hardee, DeSoto and Manatee counties.

"Thirty years ago, 20+ companies were mining and a dozen manufacturing facilities were operating. Now, there's three manufacturing facilities and four mines operating. So, phosphate mining has been going on in Central Florida for more than 100 years and if you compare the past to the present, it is done with much less intensity and greater environmental protections now. Being a responsible neighbor is important to our company. That starts with safe and reliable operations and extends to our economic impacts and employee contributions.

"As for what phosphate offers DeSoto County in the future? A lot. The University of Florida/IFAS completed a comprehensive economic impact study detailing what DeSoto could expect in terms of economic activity and jobs from Mosaic's operations. Some of the highlights include nearly \$20 million in state and local tax revenue, 200 jobs with a local multiplier of 777 jobs and an average wage of around \$95,000. Phosphate mining is significant economic driver representing 21 percent of total gross regional product and \$219.56 million in value added to the regional economy.

"Those opposed to mining will often reference a prior project which was an extension to an existing mine and claim that mining adds no new jobs. The DeSoto mine will be an entirely new facility. And, while we expect that some experienced employees will be necessary to bring the mine online, over the life of the facility we expect the majority of the employee base to come from DeSoto and the surrounding areas. As our mining has moved south over time, the regions contributing to our employee base have as well. Hardee County residents now make up a large portion of the employees at our mines, whereas that was not the case when mining was predominantly taking place in Polk and Hillsborough counties.

"Our employees actively contribute to the communities where they live and

work. Whether it's coaching a youth baseball team or volunteering at a local food pantry, their efforts and impact can be seen throughout Central Florida. Mosaic employees are proud of the work we do, the families we support and the benefits we provide to our operating areas.

"And our contributions go far beyond jobs. In association with our recent permit for the Ona mine in Hardee County, Mosaic agreed to fund an endowment for a forgivable loan program for Hardee County students seeking degrees in such fields as STEM (Science, Technology, Engineering and Math) or a technical trade certification. If the students remain in the county after receiving their degree or certification, the loan can be forgiven. This program will not only help the citizens of Hardee obtain a college degree, but it will also help the county build a skilled workforce to attract new employers. And, the company also agreed to help fund an infrastructure grant program that allows the county and its municipalities to apply for grants for infrastructure projects that help encourage economic opportunities in the county. These types of opportunities will be available to DeSoto County and its residents as well once we are operating here."

Mader: "Yes, phosphate mining has a history in Florida, but it's a dubious history at best. There is a great deal wrong with its continuation because of the irremediable impacts to the natural environment and the vast scope of phosphate mining operations both above and below the ground.

"I grew up in south Lakeland on the Mulberry Highway (State Road 37) which had been mined continuously from the Lakeland city limits all the way to Mulberry and beyond. My father's first job when my family came to Florida in 1946 was with International Mineral and Chemicals. He was working as an engineer in the design of an industrial drier to remove clay particles from phosphate concentrate. He intensely disliked the industry and the town of Mulberry, which was a God-forsaken dusty crossroads and railroad stop dominated by fertilizer production plants, so he moved on after one year and ultimately went into business for himself. However, a great many of my peers growing up in Lakeland were the scions of phosphate and its allied industries executives and engineers – a privilege that bestowed on us practically free range all over mine property. It was just part of the wall paper growing up there, and we took it all for granted. There was no mandatory reclamation in those days and practically everywhere we went the natural landscape had been ravaged by draglines and was just left idle and overgrown. Even today tens of thousands of acres (about one fifth of all Polk County) is idle and worthless. Think about the economic consequences of the loss of such a vast tract of Florida landscape which otherwise could have been developed or used for agriculture. To me it's a tragedy that this scale of destruction has continued for generations.

"Certain experiences that occurred to me in my youth stand out above all the rest ... the first was the loss of Kissengen Springs, a 20-million gallon

PHOTO PROVIDED

DeSoto County and Mosaic Fertilizer are before a special magistrate on Wednesday at the county administration building. (details at www.desotobocc.com)

per day, first-magnitude flowing springs just south of Bartow where my family and many folks throughout history used to go for swimming. In 1950, Kissengen Springs went completely dry due to ground water withdrawals by the phosphate industry. The spring never recovered, and today all that remains is just an overgrown patch of dry mud. To me, that's unforgivable.

"Another was the sight of frogs that had grown an extra appendage. A family I knew well acquired a building lot across the road from the Medulla School House south of town on an unreclaimed phosphate pit. There were seven kids in that family. One day the boys were messing around the banks of that old pit and began finding these weird mutated frogs that had three hind legs. That was in the early sixties. They brought those frogs to Lakeland High School where our biology teacher, Miss Williams, preserved them in formaldehyde bottles and stashed them in the closet of the biology lab. I never forgot that sight. That marked my conversion. It was then I began to realize the true and malign consequences of phosphate mining.

"A lot of my peers found summer work in the fertilizer operations—particularly those whose parents were employed in the industry. I applied for a job one summer myself. At least I had enough presence of mind to write on my application

that I wouldn't work around acid. When I was called in for my interview the man looked at the application, and said, "It says here you won't work around acid?" I answered, "Yessir, I'm going to college and I don't want to risk my eyesight." He looked at me in disbelief and said, "Son, all we got around here is acid." I realized then the interview was over. That's before it was revealed to the public that all mined land also had elevated radio-activity levels.

"So, when I think about the history of phosphate mining in Florida, I see it from an environmentalist's point of view. I see the complete disintegration of the native vegetation and the destruction of complex soil layers that sustained the flora and fauna that once thrived across hundreds of thousands of acres. I think about the dozens of gyp-stacks containing acidic water destined to subside and vanish into the porous substrata that forms the basis of this whole state. (Every school child knows that Florida's subterranean landscape is like a sponge of limestone, and limestone and acid don't mix.) I think about ruptured clay slime containments and recurring pollution of the Peace River and its tributaries, the systematic loss of streams and flowing springs, of pastures, woods, and bayhead swamps, fish kills, and loss of animal habitat. It's what I would consider a form of environmental genocide."

GRITS & PIECES

FROM PAGE 4

watching their nose twitch just before it all went down, and trying not to wake them up by stifling your giggles.

Whoopie cushions, joy buzzers, and fake rubber vomit never had a thing on my friends and I. One time at Englewood Beach we'd swam all afternoon with friends, and after the gals went into the bathroom to shower and change, I took some leftover potato

salad and emptied it in front of the door. When they walked out, I distracted them by calling their names and they stepped right in it. Imagine that stuff squishing between the toes of your bare feet and what you might've thought it was. Now imagine them screaming and chasing after you. Yes, it was so worth it.

My daddy had a mischievous streak in him, too. One time he called his boss's phone (when the boss wasn't home) and began telling a long story—his version of "The Three Little Pigs," except he substituted his boss and coworkers for

the characters. When the allotted time on the answering machine ran out, he called back and continued. He did this over and over until he ended the story, and all his boss could do was shake his head. Original, for sure.

My friends and I used to ride around a lot in the early 1970s, and one of them had one of those all-powerful spotlights that plugged into the cigarette lighter of the vehicle. I mean that sucker was bright, too—I bet it could be seen from outer space. My friend with the light and I rode by the home of another buddy on a few

occasions at night, knowing he'd be sitting in the living room, watching TV, and facing the road with the front door open. We'd ease by, get even with the door, and blast him with the blinding beam, then speed away. Of course, he'd run out on the front porch, trying to see who it was, but couldn't see a thing because his eyeballs had just been royally zapped.

Okay, I better end this now before I run out of room. Actually, I'm stopping so I don't incriminate myself further. Happy April Fools' Day ... y'all be careful out there!

TAX PREPARATION

Common tax mistake leaves \$1 billion on the table each year!

Each year, the IRS reports it has roughly \$1 billion in unclaimed refunds just from people who didn't file a return. That is an expensive mistake. Many people don't realize that they may be able to claim refunds of income tax that was over-withheld or qualify for a refundable credit like the earned income tax credit. The good news is that taxpayers have until April 15 to file or amend a 2015 tax return to claim a refund.

Not filing is just one mistake, and filing a return doesn't mean the taxpayer is in the clear. Other mistakes taxpayers should watch out for include using the wrong filing status, making clerical errors, overlooking important credits and missing deductions.

Take a second look at old tax returns - With H&R Block's free Second Look, taxpayers can have their previously filed returns from 2015, 2016, 2017 and even 2018 reviewed to see if they made any mistakes that left money on the table.

Ride on: Van Fleet Trail, Florida's best for nature viewing

By **KAREN SMOKE**

ARCADIAN BICYCLING EDITOR

For traveling with my bike by car, I have a rack that mounts on the rear of my mini-hatchback. It's OK for short jaunts, but for longer trips I fold the rear seats and load the bike in the car. A quick release hub makes removing the front wheel easy: disengage the brake cable, open the axel skewer, loosen the nut on the opposite side and pull the wheel out of the fork. I feel my bike is safer inside the car, but I forgot how she would scream "ride me" from the back seat as I drove. So on the way home from our east coast visit, we reached a compromise—we'd stop in Polk County and ride on the Van Fleet Trail.

Possibly Florida's most rural paved rail trail, the southern end is in Polk City and it runs through Green Swamp, headwaters for four rivers; Withlacoochee, Ocklawaha, Hillsborough and Peace. Except for one curve in the 29-mile length, the trail is arrow straight, as most rails-to-trails routes are. With clear unobstructed view, cyclists are free to ride slow or go at a brisk pace.

Officially designated as part of Florida's Statewide System of Greenways and Trails, and as a National Recreation Trail, the Van Fleet Trail is ideal for a relaxing nature ride ... there's no other trail like it in Florida. Much of the trail forms the eastern boundary of the Withlacoochee State Forest.

The trail offers excellent wildlife viewing, especially between where I accessed the trail at Green Pond Road and Bay Lake Road. Within minutes I saw a gopher tortoise and a green garter snake, the third tortoise allowed me to snap a photo. Heading north the trail crosses into Lake County and then into Sumter County where the northern trailhead is at Mabel, just west of Groveland. The two midpoint trail accesses are the only roads the trail crosses. Parking, picnic tables and restrooms are located at each of the four access points, and all but Bay Lake Trailhead have water spigots. This is a remote area and there have been some reports of car break-ins, so be sure to lock your vehicle and, as always, never leave valuables in the car.

The trail passes through former citrus lands, cattle ranches, rural residences and wildlife management areas. Hunting is allowed in the Green Swamp and Richloom WMA on the western side of the north half of the trail. Trail-users should wear fluorescent orange when using the trail during hunting seasons.

The trail is named after Gen. James A. Van Fleet, a distinguished combat commander in WWI, WWII and the Korean War. The rail corridor dates back to the 1920s, and a historic mile marker bearing the numeral 789 is believed to indicate the rail distance to Richmond, Virginia. The trail is multi-use—equestrians are allowed on the grassy margins, while bicyclists, pedestrians and inline skaters share the paved portion. Dogs on leashes are allowed. All trail-users yield to equestrians, cyclists and skaters yield to pedestrians. Trail etiquette includes: Keep to the right except when passing, give a warning signal when passing, and obey all other posted rules.

When I pulled into the parking area about noon on a Monday, several other cars were there and cyclists were actively loading or unloading bikes. The trail can get quite busy on weekends. I chatted with several cyclists. Most of these weekday users lived within a few miles of the trail head, several were snowbird retirees and reported they frequently meet friends for a ride on the trail. I met four young boys who come to Florida in winter to race motorcycles on the weekends, ride the trail during the week to keep in shape.

Along the way frequent benches or small pavilions offer a place to stop and rest. A screened pavilion in the area called Three Bridges is a good spot to observe wildlife in the swamp. Every mile or so a Bicycle RX box—an Eagle Scout Project by Tyler J. Drone, Troop 320/Winter Garden and completed in November 2017—offers a set of tools including a hand pump, tire levers, crescent wrench, a chain break tool and

a multi-tool, all tethered to a sturdy wire cable. Emergency mile markers painted on the path give location and instructions to call 911, also a number for trail staff to report other problems.

The Polk City Trailhead is about a two-hour road trip from Arcadia. Pack a lunch and get an early start to ride the entire trail and back to your car, which may take about six hours at a leisurely pace, with stops to view wildlife and enjoy your lunch. You'll want to ride this trail again.

Prime Minister May says she'll step down if Brexit deal OK'd

She would quit within weeks if agreement is passed and Britain leaves European Union

By JILL LAWLESS and DANICA KIRKA
ASSOCIATED PRESS

LONDON — British Prime Minister Theresa May offered up her job in exchange for her Brexit deal Wednesday, telling colleagues she would quit within weeks if the agreement was passed and Britain left the European Union.

May's dramatic concession that "there is a desire for a new approach — and new leadership" was a last-ditch effort to bring enough reluctant colleagues on board to push her twice-rejected EU divorce deal over the line.

It looked like it might not be enough, as a key Northern Ireland party said it would not be supporting the deal.

May's announcement came as lawmakers held an inconclusive series of votes on alternatives to her unpopular deal. It was the first step in an attempt by Parliament to break the Brexit deadlock and stop the country from tumbling out of the bloc within weeks with no exit plan in place.

May has been under mounting pressure from pro-Brexit members of her Conservative Party to quit. Many Brexiteers accuse her of negotiating a bad divorce deal that leaves Britain too closely tied to the bloc after it leaves.

Several have said they would support the withdrawal deal if another leader took charge

Alaska's Tlingit Code Talkers praised for secret WWII work

Army veteran Richard Bean Sr. of Hoonah, Alaska, died without anyone knowing that he and other Alaska Natives had used their Tlingit language to outsmart the Japanese during World War II

Serviceman George Lewis Jr. of Sitka, Alaska, was one of the servicemen who helped the military outsmart the Japanese with Tlingit codes they could not break.

Serviceman George Lewis Jr. of Sitka, Alaska, was among the group of long-deceased servicemen who are being hailed by the state in for their life-saving efforts during World War II.

Army veteran Richard Bean Sr. of Hoonah, Alaska, was among the group of men who had been forbidden to speak Tlingit as schoolchildren in their southeast Alaska villages.

Alaska Natives used their Tlingit language to outsmart Japanese during World War II

By RACHEL D'ORO
ASSOCIATED PRESS

ANCHORAGE, Alaska — Army veteran Richard Bean Sr. died without anyone knowing that he and four other long-deceased Alaska Natives had used their Tlingit language to outsmart the Japanese during World War II.

Now, they are finally being hailed in their home state for their lifesaving efforts as servicemen.

Earlier this month, legislators passed a formal citation honoring the Tlingit Code

Talkers. State flags were flown at half-staff and later presented to the men's families.

Bean and the others had been forbidden to speak Tlingit as schoolchildren in their southeast Alaska villages. Later, they used it to provide the military with unbreakable codes, as did their more well-known peers, Navajo Code Talkers.

The language of the Alaska Natives had been suppressed by missionaries and teachers trying to "civilize" them, said Rosita Worl, president of the Sealaska Heritage Institute. The Juneau nonprofit

works to preserve and enhance the cultures of southeast Alaska's Tlingit, Haida and Tsimshian tribes.

Punishments for students who spoke Tlingit included having their mouths washed out with soap and their hands struck with rulers, Worl said.

"We're finally ecstatic that there is this recognition that our people served this country, even served this country that wasn't always good to them," she said.

The men's contributions went

Charlottesville attacker pleads guilty to 29 hate crimes

Man drove his vehicle into a crowd of counter-protesters

By DENISE LAVOIE
AP LEGAL AFFAIRS WRITER

CHARLOTTESVILLE, Va. — An Ohio man pleaded guilty Wednesday to federal hate crime charges in a deadly car attack at a 2017 white nationalist rally in Virginia, a case that stirred racial tensions across the country.

Under a plea agreement, James Alex Fields Jr. of Maumee, Ohio, pleaded guilty to 29 of 30 federal charges stemming from the "Unite the Right" rally in Charlottesville on Aug. 12, 2017. He did not plead guilty to one count that carried a potential death penalty. His plea agreement says the death penalty was taken off the table.

Fields appeared stoic, with hands folded in front of him for much of the hearing. He did not speak, except to repeatedly respond "yes, sir," when U.S.

US will reassign 750 border inspectors as illegal crossings rise

By CEDAR ATTANASIO
ASSOCIATED PRESS

EL PASO, Texas — The Trump administration said Wednesday it will temporarily reassign several hundred border inspectors as beleaguered forces already stationed along the U.S.-Mexico border struggle to keep pace with the growing number of migrant families who are showing up at the border in poor health and turning themselves in to agents to request asylum.

Customs and Border Protection Commissioner Kevin McAleenan said the reassignment of 750 border inspectors would mean longer waits at crossings as the busy Easter holiday nears but that it was necessary to address what he called "an operational crisis." The reassigned officers will process migrants,

Parkland looks beyond therapy to reach teens after suicides

Community trying to connect with teens who are averse to traditional therapy

By **KELLI KENNEDY**
ASSOCIATED PRESS

PARKLAND, Fla. — Days after the suicides of two student survivors of the Parkland school shooting, community leaders were frantically putting extra services in place Wednesday to try to connect with those hard-to-reach students who are averse to traditional therapy.

A local nonprofit had planned to open a teen wellness center near Marjory Stoneman Douglas High School on April 30, offering free activities like karaoke night, yoga, kickboxing and

acupuncture for students who weren't interested in talking to a therapist. But Eagle's Haven opened ahead of schedule Monday to address emergency needs of students and their families.

"One teen just wanted to cry yesterday and didn't want to talk. Another teen wanted to tell his story about the actual shooting," said Julie Gordon, a licensed therapist and program director of Jewish Adoption and Family Care Options, the nonprofit behind Eagle's Haven.

The first Parkland suicide took place March 16. Cara Aiello

told WFOR-TV her 18-year-old daughter Sydney had suffered from survivor's guilt — her friend, Meadow Pollack, died in the attack. Coral Springs police Officer Tyler Reik confirmed Monday that a Stoneman Douglas sophomore apparently killed himself Saturday, but officials were still awaiting autopsy results. The boy's name was not immediately released.

The newly opened wellness center in a nondescript, mostly empty office space offered cookies, fruit and coffee for those who want just to check it out until they start holding

after-school activities. The students are on spring break this week, making reaching them outside a central location more difficult.

In the aftermath of the Valentine's Day shooting that killed 17, well-intentioned therapy groups have struggled to get traumatized students in the door. Some feel re-traumatized talking about it; some only want to talk to friends who were there and understand what it's like; others still perceive a stigma around seeking help.

"One of the challenges has

been is that the parents want to bring the kids in to talk and then the kids come in and they don't really want to be here because we're just another therapist," JAFCO executive director Sarah Franco said.

Their hope is that the wellness activities will get students in the door and offer an outlet to release some of those emotions, emphasizing that talk therapy is not the only solution. But free traditional therapy also will be offered for those who want it, and therapists will even go to students' homes, if that's more comfortable.

NEWS FROM AROUND THE STATE

Hail dings windshields, breaks windows in Florida

ORLANDO, Fla. (AP) — A series of hail storms in central Florida dinged up car windshields and blew off pool screens in an unusual sight for the Sunshine State.

In tiny Trenton, the streets were covered in so much hail that it resembled a snow covering Wednesday morning. Workers from the public safety department in the city west of Gainesville posted photos to Facebook showing a backhoe cleaning up the icy mess.

Florida Today reports that pool enclosures were shredded, and windows were broken along the Space Coast.

Deputy shoots, wounds teen during domestic violence call

TAMPA, Fla. (AP) — Authorities say a Florida deputy shot and wounded a teen during a domestic violence call.

The Tampa Bay Times reports that the shooting occurred Tuesday night in Tampa. The teen was hospitalized in critical condition.

Hillsborough Sheriff Chad Chronister says Deputy Daniel Estanislau responded to the Jasmine Terrace Apartments following two calls about someone bleeding after an attack. After the deputy arrived, he reported spotting a 17-year-old male who matched the description of the attacker from the calls.

Teen dies after falling out of truck bed

FREEMONT, Fla. (AP) — Authorities say an Alabama teen has died after falling out of the bed of a pickup truck in Florida.

The Northwest Florida Daily News reports that 15-year-old Kaden Johnson of Pell City, Alabama, died Tuesday morning on the Clyde B. Wells Bridge near Freeport.

The Florida Highway Patrol reports the truck was crossing the bridge when Johnson fell out and was hit by a car. The car's driver pulled over, but the truck's driver kept going, not realizing Johnson had fallen. The driver filed a missing person's report with the Walton County Sheriff's Office when he reached his destination and noticed Johnson was missing.

Florida may allow legal papers to be notarized online

TALLAHASSEE, Fla. (AP) — The Florida legislature is considering making it possible for people to have legal documents notarized online.

The bill, HB 409, would make signing official documents, such as a will or power of attorney, quicker and more convenient in the state. Critics have expressed concerns that greater convenience could lead to more fraud, especially among the elderly.

The bill, proposed by Rep. Daniel Perez, R-Miami, moved Tuesday through the House transportation and tourism

appropriations subcommittee and will be considered next in the Judiciary Committee, the final step before a House vote. A Senate version hasn't made as much progress.

Perez said he had traveled to Colombia recently, and he realized as he boarded the plane that he forgot to assign power of attorney to his in-laws. Requiring his appearance in person before a Florida-commissioned notary made it impossible to fix his oversight, he said.

Folice officer jailed on child rape charge

JACKSONVILLE, Fla. (AP) — Authorities say a Florida police officer faces rape charges after an image of a nude girl was found on his cellphone.

Jacksonville Undersheriff Pat Ivey says 39-year-old Officer Matthew Harper Butler was charged Tuesday with capital sexual battery of a victim under 12 years old. He remains in jail and bond was set at \$1 million.

Florida Senate: Limit constitution changes to 1 subject

TALLAHASSEE, Fla. (AP) — Florida voters could be asked to restrict the state's Constitution Revision Commission from placing items on the ballot that contain more than one subject under a resolution unanimously passed by the Senate.

Senators from both parties expressed concerns that voters are being forced to vote

for constitutional changes they don't support in order to approve changes they do support.

The commission meets every 20 years to suggest changes to the state constitution, which require approval from 60 percent of Florida voters. This year it placed seven items on the ballot, five of which bundled different subjects together. An example is an amendment that bans oil drilling and state waters and also vaping in places where smoking is banned.

Florida could expand size, scope of Alzheimer's committee

TALLAHASSEE, Fla. (AP) — The Florida Alzheimer's Disease Advisory Committee could be expanded in size and scope under a bill unanimously approved by the state House.

The House applauded Wednesday after passing the bill sponsored by Republican Rep. Scott Plakon, who lost his wife to Alzheimer's disease last year.

The bill would expand the committee from 10 members to 15, and it would have to include a sitting House and Senate member. The committee now makes recommendations to the Department of Elder Affairs. If the bill becomes law, the committee would have to also submit an annual report to the governor, Senate president and House speaker and make recommendations on Alzheimer's policy.

Florida House, Senate panels OK budget plans \$400M apart

TALLAHASSEE, Fla. (AP) — Florida House and Senate budget writers on Wednesday approved spending plans for next fiscal year that are about \$400 million apart and both short of the \$91.3 billion proposed by Republican Gov. Ron DeSantis.

The legislative budget plans easily cleared appropriations committees in both chambers, readying them for a floor vote. Ultimately, the House and Senate will convene a conference committee to work out a final budget for the fiscal year that begins July 1. The budget is the only bill lawmakers must pass during the 60-day legislative session, which ends May 3.

The House budget clocks in at \$89.9 billion, with the Senate proposing about \$90.3 billion. Counting the governor, all three plans are significantly higher than the current Florida budget.

Key differences include overall spending levels on education and the environment, a \$30 million split on school mental health services, Hurricane Michael recovery, affordable housing and whether to keep the Visit Florida tourism promotion office alive. It's set to expire in October under current law.

Ultimately, the legislative budgets moving out of committees Wednesday represent only the first markers in a debate that will consume much of the next month in Tallahassee.

NEWS FROM AROUND THE WORLD

Drug suspect caught fleeing Australia by Sea-Doo

SYDNEY (AP) — A British man wanted on drug charges has been thwarted in a daring bid to flee Australia for Papua New Guinea on a motorized personal watercraft.

Australian police said the 57-year-old man set out Monday on his Sea-Doo craft from the northern tip of Australia's Queensland state, carrying enough fuel to make the 86-mile trip across Torres Strait, and possibly armed with a crossbow.

But after an Australian Border Force vessel was deployed to search for him, he was located only a few miles from his destination at Saibai Island, an Australian territory near the southern coast of New Guinea.

Mozambique confirms 5 cases of cholera after cyclone

MAPUTO, Mozambique (TNS) — Authorities in flood-ravaged Mozambique confirmed five cases of cholera on Wednesday, after aid groups warned of a possible outbreak of the waterborne disease in the wake of cyclone Idai.

National Director of Medical Assistance Ussene Issa confirmed the cases of cholera to dpa by phone, saying all five were reported in the Munhava area of Beira.

The World Health Organization has already shipped some 900,000 doses of an oral cholera vaccine to Mozambique. The WHO is also providing expertise to set up three cholera treatment centers, including an 80-bed facility in Beira.

"Given the sheer amount

of water that passed through Beira during cyclone Idai and the volume of damage caused, it's not surprising that there are outbreaks of waterborne disease like cholera in the city," the charity Doctors Without Borders said in a statement Wednesday.

The United Nations also warned of the risk of diarrhea and malaria.

"Flood waters are beginning to recede west of Beira City. ... The outflow of flood waters, however, poses new challenges, as the area that was previously underwater is now a large muddy swamp," the U.N. Office for the Coordination of Humanitarian Affairs (OCHA) said in a statement.

It has been almost two weeks since the cyclone hit southern Africa, with Mozambique bearing the brunt and parts of Zimbabwe and Malawi also devastated.

More than 700 people have died in the three countries combined, and hundreds of thousands have been displaced. The death toll is expected to rise considerably.

At least 3 million people have been affected in total, according to U.N. figures, by what has been called one of the worst cyclone-related disasters ever to hit the Southern Hemisphere.

On Wednesday, the first of three planes from the U.N. refugee agency (UNHCR) carrying relief items like tents, plastic tarpaulins, blankets, mosquito nets and solar lanterns landed in Mozambique.

The U.N. World Food Program on Wednesday also called on the international community to step up support, warning that the storm's victims would need at least six months to get back on their feet.

India says it successfully test-fires anti-satellite weapon

NEW DELHI (AP) — India successfully test-fired an anti-satellite weapon on Wednesday, Prime Minister Narendra Modi said in an unexpected announcement just weeks before a general election.

Modi said in an address broadcast live that Indian scientists had destroyed a low earth orbit satellite with a missile, demonstrating India's capacity as a "space power" alongside the U.S., Russia and China.

Pallava Bagla, a science writer

at the New Delhi Television Channel, said that by successfully hitting the fast-moving satellite, India had crossed a "very significant threshold."

"India demonstrated that we can, if threatened, bring down an enemy satellite in space," Bagla said.

The announcement is Modi's latest bid to flex India's military muscle as his party seeks to retain power in polls beginning April 11.

After 40 Indian soldiers were

killed in a February suicide bombing in disputed Kashmir, India said it retaliated with a "surgical strike" on a terrorist camp in Pakistan.

Afterward in an air skirmish, Pakistan shot down one of India's Soviet-era fighter jets, prompting scrutiny of India's aging military hardware.

Modi said Wednesday that the new capability is "not against anyone," and that India's policy remains against the use of weapons in space.

Norway cruise ship engines failed from lack of oil

AP PHOTO

A cruise ship that was the focus of a daring rescue operation off Norway's frigid North Sea coast became disabled because its engines didn't have enough lubricating oil, the country's top maritime official said Wednesday. Low oil levels were the "direct cause" of the engine failure that stranded the ship during a storm Saturday, Lars Alvestad, the acting director general of the Norwegian Maritime Authority, said. Sensors detected the oil shortage and automatically shut down the Viking Sky's engines to prevent a breakdown, he said.

FTC crackdown stops billions of illegal robocalls

By **RON HURTIBISE**
SUN SENTINEL

Operations responsible for more than a billion illegal robocalls, including one based in South Florida, have agreed to permanently stop the harassing activities, according to the Federal Trade Commission.

The four operations, each comprised of numerous affiliated companies, are defendants in civil lawsuits by the FTC aimed at seizing their assets and stopping them from making fraudulent calls. Each faced charges they violated the FTC Act and the agency's Telemarketing Sales Rule, including its Do Not Call provisions.

Under court orders announced Tuesday that have been finalized or are expected to be finalized in coming days, the four companies are barred from robocalling and most telemarketing activities, including use of automatic dialer programs, and will pay financial judgments.

One of the companies provided the software that the FTC is blaming for making more than a billion illegal robocalls.

Robocalls remain a large and growing problem in the U.S., as sophisticated operations have learned to target mobile phones with spoofed caller IDs.

Last week, phone service providers AT&T and Comcast announced successful completion of a test of a new Caller ID authentication system using digital certificates to verify that an incoming call's display ID isn't being spoofed.

The two companies said they planned to make the services available to their customers later in the year.

Boca Raton-based Pointbreak Media was shut down in May 2018 amid allegations the company falsely claimed to represent Google and threatened businesses with removal from Google search results unless they paid a one-time fee ranging from \$300 to \$700, the FTC said.

Defendants affiliated with Pointbreak that agreed to settle with the FTC include Michael Pocker and companies Modern Spotlight LLC, Modern Spotlight Group

LLC, Modern Internet Marketing LLC; Steffan Molina and companies Perfect Image Online LLC and Pinnacle Presence LLC; and Ricardo Diaz.

The Pocker settlement orders him and his companies to pay more than \$5.5 million in fines to the FTC, but those will be suspended after Pocker pays more than \$18,000. Likewise, the Molina settlement orders him and his companies to pay more than \$5 million in fines, but those fines will be suspended upon payment of about \$103,000.

Diaz was hit with a \$1.81 million judgment, which will be "partially suspended" upon payment of \$690,817, the FTC said.

The other companies that agreed to permanently end robocalling activities are:

- NetDotSolutions and numerous affiliated companies that operated "TelWeb," a computer-based telephone dialing platform that can be used to blast out a large number of robocalls in a short time. Billions of robocalls were made using TelWeb, including calls to numbers on the National Do Not Call registry and calls with fake, or spoofed, caller IDs, the FTC said.

- Higher Goals Marketing, based in Orlando, pitched fake debt-relief services, promising to substantially and permanently lower consumers' credit card interest rates and save them thousands of dollars in interest payments, the FTC said.

- Veterans of America was shut down as part of an enforcement effort dubbed "Operation Donate with Honor," a crackdown on fraudulent charities that gain consumers' trust by promising that donations will help veterans and servicemembers, the FTC said. This scheme also used the names Saving Our Soldiers, Donate Your Car, Donate That Car LLC, Act of Valor and Medal of Honor.

None of the names is a real charity, the FTC said. The operation's ringleader, Travis Deloy Paterson, faces a \$541,032 monetary judgment which will be suspended after he provides significant assets, including eight vehicles, to the FTC.

Man pleads guilty to kidnapping Jayme Closs, killing parents

By **STEVE KARNOWSKI**
ASSOCIATED PRESS

BARRON, Wis. — A Wisconsin man pleaded guilty Wednesday to kidnapping 13-year-old Jayme Closs and killing her parents, in a move that spares the girl held captive in a remote cabin for three months from the possible trauma of having to testify at his trial.

Jake Patterson, 21, snifled and his voice caught as he pleaded guilty to two counts of intentional homicide and one count of kidnapping. As part of a plea deal, prosecutors dropped a count of armed burglary. Patterson faces up to life in prison when he is sentenced May 24; Wisconsin does not have the death penalty.

In a bizarre remark as he left the courtroom, Patterson turned back and said "Bye, Jayme." His victim wasn't there.

Patterson had said he would plead guilty in a letter sent this month to a Minneapolis TV station,

AP PHOTO

Jake Patterson appears for a hearing at the Barron County Justice Center, Wednesday, in Barron, Wis.

saying he didn't want the Closs family "to worry about a trial."

Patterson admitted kidnapping Jayme after killing her parents, James and Denise Closs, on Oct. 15 at the family's home near Barron, about 90 miles northeast of Minneapolis. Jayme escaped in January, after 88 days in Patterson's cabin in near the small, isolated town of Gordon, some 60 miles from her home.

The plea, coupled with an earlier decision by prosecutors not to bring charges in the county where Jayme was held, increases the chances that the details of her time in captivity will remain private.

Patterson stoically answered "yes" and "yeah" to repeated questions from Barron County Judge James Babler about whether he understood what he was doing. Later, as he responded "guilty," to each count, he could be heard sniffing. He paused for several seconds after the judge asked him about the kidnapping charge before stuttering, "guilty."

Defense attorney Richard Jones told Babler that Patterson "wanted to enter a plea from the day we met him" and brushed off strategies presented to him, including trying to suppress his statements to investigators.

"He rejected all that and has decided this is what he wants to do," Jones said.

Trump Fed pick Stephen Moore owes \$75,000 to IRS

By **CHRISTOPHER CONDON and JOE LIGHT**
BLOOMBERG NEWS

WASHINGTON — Stephen Moore, whom President Donald Trump said he'll nominate for a seat on the Federal Reserve, owes more than \$75,000 in taxes and other penalties, according to the U.S. government.

A federal tax lien filed in the circuit court for Montgomery County, Md., where Moore owns a house, says that the government won a judgment against Moore for \$75,328.80. The January 2018 filing said it was for unpaid taxes from the 2014 tax year and could accrue additional penalties and other costs.

An IRS spokesman said he was prohibited by law from commenting on the case. A White House spokesman declined to comment. Moore referred questions about the tax debt to his wife, Anne Carey.

Carey said the dispute originated with a deduction on Moore's 2014 tax return in which he accidentally claimed the sum of his alimony and child-support payments to his former wife, when only

alimony is deductible. Because Moore had moved, he never received notifications from the IRS after the agency audited the return, she said.

The IRS disallowed the entire deduction and added penalties and interest, Carey said. She said she and Moore have now resolved to pay the lien as quickly as possible but will continue to press their dispute with the IRS.

She said the couple had overpaid their taxes in more recent years by about \$50,000 and will seek that amount in a refund when they file their 2018 tax return.

"It was not an attempt at defrauding the U.S. government," Carey said.

Carey said the White House hasn't raised alarm about the tax lien, which was reported earlier by the Guardian.

Trump announced last week he would nominate Moore, a senior fellow at the conservative Heritage Foundation, for an open seat on the Fed's board of governors. The White House hasn't yet officially submitted Moore's nomination to the Senate, which must vote to confirm him.

DeVos defends plan to eliminate Special Olympics funding

By **COLLIN BINKLEY**
AP EDUCATION WRITER

Education Secretary Betsy DeVos on Wednesday defended a proposal to eliminate funding for the Special Olympics, pushing back against a storm of criticism from athletes, celebrities and politicians who rallied to support the organization.

DeVos became a target on social media after Democrats slammed her plan to remove the group's funding as part of nearly \$7 billion in budget cuts for next year. The Special Olympics received \$17.6 million from the Education Department this year, roughly 10 percent of its overall revenue.

In a statement responding to criticism, DeVos said she "loves" the organization's work and has "personally supported its mission." But she also noted that it's a private nonprofit that raises \$100 million a year on its own. Ultimately, she argued,

AP PHOTO

Education Secretary Betsy DeVos arrives for a House Appropriations subcommittee hearing on budget on Capitol Hill in Washington, Tuesday.

her agency can't afford to continue backing it.

"There are dozens of worthy nonprofits that support students and adults with disabilities that don't get a dime of federal grant money," she said. "Given our current budget realities, the federal government cannot fund every worthy program, particularly ones that enjoy robust support from private donations."

Special Olympics

Chairman Tim Shriver on Wednesday pushed back against the proposed cut.

"This is not the old Special Olympics, it's not my mom's Special Olympics in some ways," he said on MSNBC. "This is a new Special Olympics. We are actively engaged in the educational purposes that the country has articulated at the federal level."

The Trump administration tried to eliminate Special Olympics funding in its previous budget proposal, too, but Congress ultimately increased funding for the group. Lawmakers indicated that the latest attempt will also fail.

DeVos is expected to present her budget Thursday, just days after being grilled over it in the House. Democrats on a House subcommittee asked DeVos how she could cut Special Olympics funding while calling for a \$60 million increase in charter school funding.

FAA defends its reliance on aircraft makers to certify jets

WASHINGTON (AP) — Under fire from lawmakers on Capitol Hill over the two deadly Boeing crashes, the head of the Federal Aviation Administration on Wednesday defended the FAA's practice of relying on aircraft makers to help certify their own planes for flight.

Acting FAA Administrator Daniel Elwell said the strategy has "consistently produced safe aircraft designs for decades." And he said the agency would need 10,000 more employees and an additional \$1.8 billion a year to do all the work now done by designated employees of the companies it regulates.

Under the self-certifying program, these employees perform tests and inspections needed to win safety approvals, with the FAA overseeing their work. The approach is credited with holding down government costs and speeding the rollout of new models.

But in the wake of the air disasters

involving Boeing's new 737 Max jetliner in Ethiopia and Indonesia, that practice has been seized on as evidence of an overly cozy relationship between the FAA and the industry.

Sen. Richard Blumenthal, D-Conn., said at a Senate subcommittee hearing that delegating safety work to the companies puts "the fox in charge of the henhouse."

"The fact is that the FAA decided to do safety on the cheap, which is neither safe nor cheap," Blumenthal said. He vowed to introduce legislation to change the system.

At the same hearing, the Transportation Department's inspector general, Calvin Scovel III, said the FAA plans to significantly revamp its oversight of aircraft development by July. But the department gave no indication it intends to abandon the collaborative approach.

Federal judge blocks Medicaid work rules in two states

WASHINGTON (AP) — A federal judge blocked Medicaid work requirements in two states on Wednesday, dealing a blow to one of the Trump administration's marquee efforts to push the poor toward self-sufficiency.

U.S. District Judge James E. Boasberg in Washington issued two decisions finding that Medicaid work requirements for low-income people in Arkansas and Kentucky pose numerous obstacles to getting health care that haven't been adequately resolved by federal and state officials.

He sent the federal Health and Human Services Department back to the drawing board.

Work requirements are already in effect in Arkansas, but Kentucky's program has been on hold because of lawsuits. Both states want "able-bodied" adults who get health insurance through the Affordable Care Act's Medicaid expansion to work, study, volunteer or

participate in "community engagement" activities.

But advocates for the poor say that Medicaid is a health care program and that work requirements have no place in it. Boasberg did not resolve that core issue.

Instead, he wrote that HHS approval of the Arkansas requirement was "arbitrary and capricious because it did not address ... whether and how the project would implicate the 'core' objective of Medicaid: the provision of medical coverage to the needy."

He used similar language in his ruling on Kentucky.

Nationally, some 12 million people are covered by the Medicaid expansion, accepted now by more than 30 states. Officials in GOP-led states have argued that work requirements and other measures such as modest premiums are needed to ensure political acceptance for the expansion.

US stocks stumble, erasing some gains

(AP) — Technology and health care companies drove a broad slide in U.S. stocks Wednesday, erasing some of the market's solid gains from a day earlier.

The sell-off put the Dow Jones Industrial Average on track to end the month with a loss and marked the second drop for the benchmark S&P 500 index this week.

While U.S. stocks remain on track to finish the quarter with solid gains, investors remain anxious over the slowing global economy and worrisome signals coming from the bond market.

The yield on the benchmark 10-year Treasury note continued to decline

Wednesday, dropping to 2.38 percent from 2.41 percent late Tuesday. That remained below the yield on the three-month Treasury bill. When that kind of "inversion" in bond yields occurs, economists fear it may signal a recession within the coming year.

The S&P 500 dropped 13.09 points, or 0.5 percent, to 2,805.37. Even with the latest slide, the index is up 11.9 percent so far in 2019, an unusually strong start to the year.

The Dow slid 32.14 points, or 0.1 percent, to 25,625.59. That came after a day of wavering, having been up as much as 100 points and down as much as 232 points.

STOCKS LISTING CHANGE - REQUESTS WELCOME! Mutual funds listings will run on Saturdays.

The Sun Newspaper is tweaking the way stocks are listed in the daily paper. We will continue to run a wide range of stocks, but we're trying to eliminate stocks

our readers don't want. If you do not see your stock in the paper, please let us know and we will put it in the listings. Email the name of the company and the symbol to nlane@sun-herald.com, or call 941-206-1138. You can leave the stock name and symbol on voice mail. If you reach voice mail, please leave your contact information so your call can be returned.

Volunteers should err on the side of vaccination caution

DEAR DR. ROACH: I am a 74-year-old female who would like to volunteer at one of the local hospitals.

My bloodwork indicated that I have an immunity for measles, German measles and chickenpox, but not for mumps. My personal physician believes that it would be smart to get the MMR vaccination and that the benefits outweigh any possible side effects, which are uncommon.

What is your advice, given the fact I can opt out of getting this vaccine with a physician's OK? I am hesitant about possible side effects, especially at my age, and because there is not a single vaccine only for mumps, I'd be getting injected with vaccines I do not need. I also have not heard of any outbreaks of mumps in this country, unlike those of whooping cough. — M.M.

ANSWER: People born before 1957 generally are considered to be immune to measles, mumps

Dr. Roach

and rubella. However, perhaps 1 or 2 percent of people may still not be immune to mumps, whether by waning immunity from natural infection over time or never having been exposed.

For a health care worker (that includes the very valuable volunteers who help in many hospital areas), it is reasonable to consider revaccination. There is no clear rule for someone in your unusual situation.

Unfortunately, there have been recent outbreaks of mumps, many

associated with colleges. In the U.S. in 2018, there were over 2,000 reported mumps cases. My opinion is that you should either get the MMR vaccine (the risks for someone in their 70s are still small), or absent yourself from the hospital in the unlikely event of a mumps outbreak near you.

DEAR DR. ROACH: I have not seen any comments on cyanoacrylate for wound treatment in your column.

My wife cut her finger recently, and it took quite a long time for it to clot (she is a healthy and fit 70, walking 1,500 miles a year). That situation prompted thoughts of cyanoacrylate when there recently was a sale on single-use tubes at a local store.

Are there any negatives to keeping some in our first aid kit for sealing a deeper cut after cleansing? — L.V.L.

ANSWER: Cyanoacrylate is used in hospitals for wound

closures (Dermabond is the name of one such prescription medication), as they are waterproof, have antimicrobial properties and are easy to use — for experts. Cyanoacrylate isn't appropriate for home or field use, as the wound needs to be appropriate in size, depth and shape, correctly prepared and very clean. Closing an infected wound is a terrible idea, and trying to glue a wound that is too deep is not likely to be effective. Lori Boyle, an advanced nurse practitioner and wound care expert I spoke to, said, "The only time that should be done is after the zombie apocalypse and there's no medical provider available."

A consumer product that I think is a better fit for a first aid kit is a liquid formulation bandage made with an antiseptic, benzethonium chloride, in a formulation with nitrocellulose and castor oil, which dries to protect the wound (New-Skin is one brand name).

Dream of joining Marine Corps is shot down by mom

DEAR ABBY: I'm originally from El Salvador. I have been living in the U.S. for five years, have been studying English for four years and I have my GED.

I want to join the U.S. Marine Corps because it is my dream. I want to do it because I think that service to this country is the best thing I can do. I want to protect this country, and I want my family to be proud of me.

Here is the problem: My mom and my wife don't want me to do it because they say it is dangerous. What should I do?

— Dreaming in Houston
DEAR DREAMING: If joining the United States Marine Corps is your dream, then following your dream is what you should do. Now is the time to have a heart-to-heart talk with your wife because this decision will have an impact on her life as well as yours.

DEAR ABBY: I raised my children to be respectful, responsible adults who are career- and family-oriented. Both are college graduates, married and successful.

My eldest daughter recently announced that she has been "going through something" and surprised us

Dear Abby

with a tattoo on her shoulder sporting her children's names on a colorful, rather large background.

I was shocked because she works at a large banking firm and was recently promoted as a senior financial investor. I'm now afraid it will impede her career advancement, and also concerned it will encourage her two young daughters to get tattoos.

Am I overreacting?
— Disappointed in North Carolina

DEAR DISAPPOINTED: Yes, you are overreacting. In a situation like this, a mother should ask her daughter what "things" she has been going through, and what that tattoo means to her. The mother should also recognize that her daughter is an adult now, and her choice to apply body art is just that — a choice.

Know your doctor's details

Dear Heloise: I work at a busy surgery center in a medical complex. Multiple times a day, PATIENTS WANDER IN looking for their physician's office. They don't know the doctor's name, phone number or address, and their ride has dropped them at the door.

This leaves us in a difficult spot.

I don't have time to find a wheelchair and take the patient to a building on the far end of the complex for an appointment.

Please make sure you have the doctor's office information and phone number when you come to an appointment. I have no

Hints from Heloise

problem helping people, but unfortunately, I can't help when I don't have the information necessary.

Along these same lines, please don't drop people off and drive away unless you know for absolute positive that they are in the right place. — Janey Mae, Omaha, Neb.

RULES

- Each row and each column must contain the numbers 1 through 4 (easy) or 1 through 6 (challenging) without repeating.
- The numbers within the heavily outlined boxes, called cages, must combine using the given operation (in any order) to produce the target numbers in the top-left corners.
- Freebies: Fill in single-box cages with the number in the top-left corner.

HOROSCOPE

ARIES (March 21-April 19). You're giving a performance of sorts, and you're not exactly sure how well it's going. If you ask too many questions, it might tip the other person off to your feelings of insecurity. But you can afford to ask one or two.

TAURUS (April 20-May 20). With your vast projects, deep thoughts and complicated ventures of late, it may feel like the way you're living your life is unsuitable for small talk. But when you're with the right people, all flows naturally.

GEMINI (May 21-June 21). The friendlier the environment, the more you worry someone is about to sell you a timeshare. And then there are the shark tanks. If you seem like you don't belong, they'll eat you alive. Act as if you've been there.

CANCER (June 22-July 22). People do different things to get through the tension of a workday. Some joke around. Some socialize. You'll have the easiest time of it when you isolate, turn on some tunes and focus hard in your own little bubble.

LEO (July 23-Aug. 22). Rumination is unhelpful. But if you never think about

the past, how can you learn from it? You'll split the difference. Think it over until you come up with one thing you could have done differently, and then move on.

VIRGO (Aug. 23-Sept. 22). Remember the time you heard of someone's good fortune and didn't feel the least bit happy? It's something to consider before sharing your own good news. Shield yourself from the repercussions of jealousy.

LIBRA (Sept. 23-Oct. 23). You want to give voice to your admiration but are apprehensive about doing so, as you're afraid your flattery will sound foolish. The more specific and reasoned your compliment, the better it will land.

SCORPIO (Oct. 24-Nov. 21). Some people can't write because they are blocked. You're the opposite today. You feel blocked in another area of life, and you'll write your way out of it. Getting your feelings down, if only to be read by you, will liberate you.

SAGITTARIUS (Nov. 22-Dec. 21). While no one is against you, there are those who are adamantly for themselves who happen to be positionally opposed to you. Someone will have to move to the side.

CAPRICORN (Dec. 22-Jan. 19). Persuasion is a subtle art. When the point of influence is detected, it ceases to work. You are most persuasive when you don't even realize it's what you're doing.

AQUARIUS (Jan. 20-Feb. 18). It's time for another you-to-you review on the topic of caring for yourself. It's easy to forget, with so many people around wanting and needing things from you, that self-care is your No. 1 job on the planet.

PISCES (Feb. 19-March 20). Top lawyers don't build their entire case in the opening statement and neither should you. Your audience will stick with you today as you present your information in a thoughtfully ordered way.

TODAY'S BIRTHDAY (March 28). You'll discover new resources inside yourself. It comes about when you give yourself tasks that require great concentration and stamina. To turn inward for periods of time will build a core of strength you'll apply in many areas of life. You'll sign an important document in June. A stellar career move happens in August. Gemini and Scorpio adore you. Your lucky numbers are: 8, 10, 4, 39 and 18.

big honor in diamonds. The slam was a good one, needing only for East to hold at least one of the two missing club honors. However, after West's normal king of hearts lead, South found a line of play that didn't rely on East's club holding.

South discarded the jack of spades from dummy while winning the opening heart lead with his ace. He ruffed a spade, cashed the ace of trumps, and led a trump to his queen. South discarded a low club from dummy on the ace of spades and ruffed another spade.

A club to the nine lost to West's queen, leaving West with the unpleasant choice of leading a club back into declarer's ace-10, or leading a heart from his queen. He chose a low heart. South discarded a club from dummy and won with his jack for his twelfth trick. Well done!

Note that if West had another spade, the lead of that spade would be ruffed in dummy and South's long spade would be established as a winner.

The bidding:
SOUTH WEST NORTH EAST
INT Pass 3♣* Pass
3♦ Pass 4♦ Pass
6♦ All pass
*Transfer to diamonds

Opening lead: King of ♥

Modern players routinely transfer into a five-card or longer major suit. Tournament players also transfer into the minor suits, and that's what happened here. North's four-diamond bid was a mild slam try, promising at least a six-card diamond suit. South leaped to slam based on his three first-round controls and his

Trump appoints Wall Street executive to arts board despite sexual misconduct scandal embroiling his business

By CHRIS SOMMERFELDT
NEW YORK DAILY NEWS

NEW YORK — President Donald Trump tapped a wealthy Wall Street executive this week to serve as a trustee on a prestigious performing arts board — even though the financial honcho's company is embroiled in a sexual misconduct scandal.

Marc Stern, a major Republican donor and the chairman of Los Angeles-based asset management business TCW, was appointed by Trump on Tuesday to serve a six-year term as a trustee on the board of the John F. Kennedy Center for the Performing Arts in Washington, D.C. As a trustee, Stern will play

part in administering the center's programming.

It's unclear if the president knew before tapping Stern to the spot that his company has since January 2018 been ensnared in a court battle stemming from sexual misconduct allegations made by a former employee.

A White House spokesman declined to comment.

Sara Tirschwell, who used to work as an investor for Stern's asset powerhouse, alleges in a lawsuit filed in Manhattan Supreme Court that her former boss, Jess Ravich, pressured her into having sex on multiple occasions. When she began refusing his advances, Tirschwell alleges Ravich stopped backing her asset fund,

making it nearly impossible for her to adequately do her job.

Tirschwell says she then filed a complaint with the company's head of human resources, who pledged to investigate the matter. But just nine days later, the company abruptly fired her, claiming she had violated company policy by tipping off an investor in another department of a possible deal.

Tirschwell contends in her suit that her firing was the result of her coming forward with sexual misconduct allegations and is demanding \$30 million in damages from TCW, claiming gender discrimination, contract breach and retaliation. Ravich still works at TCW.

Iraq war hero's family presented Medal of Honor

WASHINGTON (AP) — The son of an Army staff sergeant awarded a posthumous Medal of Honor by President Donald Trump on Wednesday said he wants his father to be remembered as the best parent and best soldier anyone could ever ask for.

And that's exactly how Travis Atkins will be remembered, Trump assured Atkins' son, Trevor Oliver.

Atkins, 31, of Bozeman, Montana, died in June 2007 while trying to subdue a suspected Iraqi insurgent in a town near Baghdad.

After realizing the man was trying to detonate a suicide vest, Atkins wrapped his body around the man and threw him to the ground, away from three of his soldiers who

AP PHOTO

An Army staff sergeant who saved three soldiers from the blast of an Iraqi suicide bomber by turning himself into a human shield was memorialized as President Donald Trump presented the service member's family with the Medal of Honor.

were nearby. Atkins, who was on his second tour of duty in Iraq and leading a 15-soldier squad after he had become "bored" with civilian life, was killed instantly.

BORDER

FROM PAGE 1

provide transportation and perform hospital watches for migrants who require medical attention. It is unknown when they will return to their regular duties.

McAleenan spoke in front of the metal fencing that separates El Paso from Juarez, Mexico, after a delay that followed the

apprehension of several migrants who had crossed a shallow spot on the Rio Grande nearby and turned themselves in.

Arrests along the Mexican border jumped to 66,450 in February, up 149 percent from a year earlier, while arrests in the Border Patrol's El Paso sector, which stretches across New Mexico and much of West Texas, were about eight times higher than they were a year ago.

March is shaping up to be even busier. McAleenan said the agency was on track to make 100,000 arrests or denials of entry during the month, up about 30 percent from February and about double the same period last year. About 55,000 will have arrived as families, including 40,000 children.

The commissioner said the border was at "a breaking point," language that is consistent with the

administration's portrayal of a state of crisis. President Donald Trump last month declared a national emergency to obtain military funds for construction of his prized border wall.

While arrests are still well below highs of the early 2000s, the surge of families and children has tested U.S. authorities.

Customs and Border Protection is taking more than 60 migrants to the hospital each day,

McAleenan said. In the previous four days, he said infants have had 105-degree fevers, a 2-year-old suffered seizures in the desert and a 40-year-old man suffering organ failure refused surgery.

A few hundred yards from where McAleenan spoke, about 600 migrants were held in a football field-sized pen lined with concertina wire under the shade of a bridge that connects El Paso to Juarez.

CRIME

FROM PAGE 1

District Judge Michael Urbanski asked him if he was pleading guilty knowingly and voluntarily.

Under the plea agreement, Fields admitted that he intentionally drove his car into the crowd because

FIELDS JR

of their race, color, religion, or national origin.

Urbanski scheduled sentencing for July 3. Fields faces a life sentence. Fields, 21, was convicted in December in a Virginia court of first-degree murder and other state charges for killing anti-racism activist Heather Heyer and injuring dozens of others. A jury found that Fields intentionally plowed his

car into a crowd of people protesting against the white nationalists.

The "Unite the Right" rally drew hundreds of white nationalists to Charlottesville to protest the planned removal of a statue of Confederate Gen. Robert E. Lee. Hundreds more turned out to protest against the white nationalists.

President Donald Trump sparked a national uproar when he blamed the violence at the rally on "both sides," a statement critics saw as a refusal to condemn racism.

After Tuesday's plea hearing, U.S. Attorney Thomas Cullen said, "The defendant's hate-inspired act of domestic terrorism not only devastated Heather Heyer's wonderful family and the 28 peaceful protesters ... but it also left an indelible mark on the city of Charlottesville, our state and our country.

AP FILE PHOTO

In this Aug. 12, 2017, photo, people fly into the air as a vehicle is driven into a group of protesters demonstrating against a white nationalist rally in Charlottesville, Va.

"While nothing can bring Heather back or make the other 28 victims whole, it is our hope that this plea provides some closure and

helps these victims move on with their lives."

Heyer's mother, Susan Bro, said she and Heyer's father agreed that they did not want prosecutors

to seek the death penalty.

"There's no point in killing him," she said. "It would not bring back Heather."

TLINGIT

FROM PAGE 1

undisclosed for decades because the U.S. military had kept the unbroken codes secret in case they were needed in future wars.

"Their orders were not to talk about it," Ozzie Sheakley, an Army veteran and Tlingit leader, said about the five Alaska Natives. "They took those orders seriously."

Even their closest relatives had no clue about the wartime endeavors of Richard Bean Sr. of Hoonah and Robert "Jeff" David Sr. of Haines; Sitka brothers and Navy men Mark Jacobs Jr. and Harvey Jacobs; and Sitka resident George Lewis Jr., who served in the Army.

Bean's wife died before Congress posthumously recognized the men. His 85-year-old nephew, Ron Williams, never knew either, even though the two were close.

Williams said there was

only one hint. His uncle told him a platoon leader had overheard him speaking Tlingit with Jeff David while the two served together in the Philippines. They were in the same company but different platoons.

The Army official asked how the men would like to handle communications then gave each a walkie-talkie.

That was all Bean said, and Williams never pushed for more, sensing his uncle didn't want to talk about it. Richard Bean died in 1985.

"Even the guys that knew him all his life, you know, they didn't know what he did either because he never said anything about it," Williams said.

David never said anything about the wartime duties to his son, Jeff David Jr., either.

"He just said he was in special services," the son said.

The military declassified the Navajo Code Talker program in 1968. But it was

AP PHOTO

The Sealaska Heritage Institute of Juneau, Alaska, shows a Congressional Gold Medal awarded to Alaska's Tlingit tribe in 2013 for the World War II efforts of five Tlingit servicemen.

decades before recognition came to the Tlingit servicemen, after the passage of the Code Talkers Recognition Act of 2008.

Sheakley, commander of the Southeast Alaska Native Veterans, got a call from Department of Defense officials.

They told him the five Alaskans had been identified as Code Talkers from the Tlingit tribe, along with others from 32 Lower-48 tribes. Soon they would get the recognition long afforded the Navajos, who made up the largest group of Code Talkers.

BREXIT

FROM PAGE 1

of the next stage of negotiations, which will determine Britain's future relations with the EU.

conceded she would have to go, although she did not set a departure date.

"I am prepared to leave this job earlier than I intended in order to do what is right for our country and our party," she said, according to a transcript released by her office.

Anti-EU lawmaker Jacob Rees-Mogg, who has

clashed with May throughout the Brexit process, said she had been "very clear" that if Britain leaves the EU as foreseen on May 22, she will quit soon after.

He said the prime minister had been "very dignified."

"She put her case well, and reiterated that she had done her duty," he said.

It was unclear whether May's offer to resign would be enough to win backing for her deal, which was defeated by 230 votes in January and by 149 votes earlier this month.

High-profile Brexitier Boris Johnson announced soon after May's statement that he would support the agreement, which he has

previously called a "humiliation." Johnson is a likely contender to replace May as prime minister.

But other hard-liners said they would continue to reject the deal, and Northern Ireland's small but influential Democratic Unionist Party refused to budge in its opposition to the deal.

ALMANAC

Today is **Thursday, March 28**, the 87th day of 2019. There are 278 days left in the year.

Today in history

On **March 28, 1979**,

America's worst commercial nuclear accident occurred with a partial meltdown inside the Unit 2 reactor at the Three Mile Island plant near Middletown, Pennsylvania.

On this date

In **1797**, Nathaniel Briggs of New Hampshire received a patent for a washing machine.

In **1898**, the U.S. Supreme Court, in *United States v. Wong Kim Ark*, ruled 6-2 that Wong, who was born in the United States to Chinese immigrants, was an American citizen.

In **1990**, President George H.W. Bush presented the Congressional Gold Medal to the widow of U.S. Olympic legend Jesse Owens.

In **1999**, NATO broadened its attacks on Yugoslavia to target Serb military forces in Kosovo in the fifth straight night of airstrikes; thousands of refugees flooded into Albania and Macedonia from Kosovo.

In **2005**, The Colorado Supreme Court threw out the death penalty in a rape-and-murder case because five of the trial jurors had consulted the Bible and quoted Scripture during deliberations. (The U.S. Supreme Court refused to consider reinstating the death sentence of Robert Harlan, who ended up being sentenced to life in prison for the murder of cocktail waitress Rhonda Maloney.)

Today's birthdays

Author Mario Vargas Llosa is 83. Country musician Charlie McCoy is 78. Movie director Mike Newell is 77. Actress Conchata Ferrell is 76. Philippines President Rodrigo Duterte is 74. Actress Dianne Wiest is 73. Country singer Reba McEntire is 64. Olympic gold medal gymnast Bart Conner is 61. Actress Alexandra Billings is 57. Rapper Salt is 53. Actress Tracey Needham is 52. Actor Max Perlich is 51. Movie director Brett Ratner is 50. Country singer Rodney Atkins is 50. Actor Vince Vaughn is 49. Rapper Mr. Cheeks is 48. Actor Ken L. is 46. Singer-songwriter Matt Nathanson is 46. Rock musician Dave Keuning is 43. Actress Annie Wersching is 42. Actress Julia Stiles is 38. Singer Lady Gaga is 33. Electronic musician Clayton Knight is 31.

Bible verse

"In whom we have redemption through His blood, even the forgiveness of sins."

— Colossians 1:14.

Nothing less and nothing more can settle the sin question in our lives. "The blood of Jesus Christ, God's Son, cleanseth us from all sins." — The application is in acknowledging that He died for us and we cannot really live without Him.

ODD NEWS

Boo light special? Market defends against ghost claim

WILMINGTON, Mass. (AP) — A New England supermarket chain is spiriting away rumors that one of its stores is haunted.

A spokeswoman for Market Basket says in a statement to The Boston Globe that "as far as we know all of our stores ghost-free" after someone posted on social media this month about seeing an apparition at a store in Wilmington, Massachusetts.

The person said the ghost was "an old Victorian era woman in her nightgown ... near the frozen peas." Hundreds of people weighed in, including others who claimed to have seen a ghost in the store.

Justine Griffin, the Market Basket spokeswoman, says that if there is anything to the ghost story, it's probably because she's "attracted to our Victorian-era prices."

How to read the stock tables

| 1 | 2 | 3 | 4 | 5 | 6 | 7 | 8 | 9 |
|---------|---------------|------|-------|----|------------------|-----------|-------|----------|
| Name | Ticker Symbol | Div | Yield | PE | 52-week High Low | Vol 1000s | Last | YTD %Chg |
| XYZcorp | XYZ | 1.20 | 3.6 | 17 | 34.09 27.27 | 2780 | 33.72 | +20.7 |

- 1 — Name of the stock.
 - 2 — Ticker Symbol company trades under.
 - 3 — Dividend: A distribution of the company's earnings to shareholders, usually consisting of stock dividends, interest on bonds, or short-term capital gains on the sale of securities usually paid quarterly in the form of cash or stock.
 - 4 — Div. Yield: The dividend divided by the stock price. It helps gauge how well the stock is paying, compared to other investments such as CDs, bonds or savings accounts.
 - 5 — Price to earnings ratio: The price of a stock divided by its earnings per share. PEs are used to gauge the relative worth of a company's stock. When compared to other companies in the same industry, the companies with the lowest PEs are generally earning higher profits.
 - 6 — Range of closing prices in last year.
 - 7 — Sales in thousands (10 = 10,000 shares), and closing price.
 - 8 — Last trading price of the day.
 - 9 — Percent change for the year.
- ▲▼ Arrows, indicate new highs or lows. Underline: indicates top 100 stocks by volume rank. Bold stocks, designates which stocks have gone up or down 5%.

Southwest Florida fishing, boating, wildlife, paddling, hunting and all things outdoors

Whole lotta pics:

The fishing is hot, and you've got the photos to prove it
— Starting on PAGE 3 —

Speak up:

When you see folks doing it wrong, you have to educate
— PAGE 5 —

What the bird says:

Our avian friends are surprisingly talkative, if you listen right
— PAGE 15 —

Officially spring:

Whitebait are here — the last nail in winter's coffin
— PAGE 19 —

Just a bit slippery: Mark Granning can't quite manage to hold onto this "flying" Spanish mackerel.

Surveying seagrass

FROM THE PUBLISHER'S DESK • CAPT. JOSH OLIVE

OK, complainers: Here's your chance to help our Harbor

Over the past two years, I have been hearing a lot about the sorry state of the seagrass in Charlotte Harbor. Apparently, I'm not the only one, because now Sea Grant is taking action to quantify the problem.

I know some of you are saying that's not a solution. No, it's not — but you can't come up with a solution until the problem has been identified, and that's exactly what this project aims to do. So, without further ado, a press release from Sea Grant:

Soon snorkelers will begin canvassing the floor of Charlotte Harbor. They'll be on a

LETTERS TO THE EDITOR

If you have a question or comment for WaterLine, email it to Editor@WaterLineWeekly.com.

CAPT. JOSH:
Last May, I walked right into a huge red tide at the Boca Grande Beach, and that was about it for the year. Subsequent to this initial experience I, along with everyone else, learned a lot about red tide. One thing I learned was that way back in November 2017, it was known that the red tide was lurking offshore and it came in with a vengeance in May 2018. So, what about now? Is it out there? Is it coming? I wonder why we have heard nothing about its progress (or hopefully, lack of progress) all winter long. Also, on a related topic: Is the Army Corps of Engineers still loading up the Caloosahatchee river? I would presume so.

— Al Dicks

AL:
It's important to know when someone knows better, so I have deferred your questions to Charlotte County Sea Grant agent Betty Staugler. Her answer follows:

The severe red tide we experience started in late October 2017. Actually, the red tide cell counts were high enough inside Gasparilla Sound and Lemon Bay to close shellfish harvesting areas in November 2017, and these areas remain closed due to high toxicity levels in the shellfish meat (clams and oysters). Officially, the red tide event ended in early 2019, but it takes shellfish a

while to rid itself of the toxins. Over the last several weeks, the red tide-forming organism *Karenia brevis* has not been detected or has been at background levels in samples collected throughout the state. Sampling for *K. brevis* occurs year round and results are publicly available at <http://bit.ly/2F8wdQa>. It's important to note the *K. brevis* is always present somewhere, so background conditions do not mean a bloom is imminent. Red tide can and has bloomed every month of the year, but peak bloom months are in the late fall and winter. Regarding the releases from Lake Okeechobee, the Army Corps began pulse releases into the Caloosahatchee River in late February. This is to reduce the lake level and hopefully avoid some of the harmful releases during the rainy season, when blue-green algae is most prevalent. The Army Corps also hopes that lowering the lake level may allow some aquatic plants to regenerate, which in turn would be good for water quality. Here is a blog from last August that you may find informative on the topic: <http://bit.ly/2FwYBpt>.

— Capt. Josh Olive, WaterLine Publisher

CAPT. JOSH:
I was pleased to see your column on loons in the WaterLine this week! I work at the Loon Preservation Committee Center in Moultonborough, N.H., during the summer and volunteer at Peace River Wildlife Center when I am in Florida. Loons are still on the threatened list in New Hampshire, and The

Loon Preservation Committee has worked hard to educate and protect them so that we can continue to hear their wonderful cries on the lakes. It is very sad when we get loons as patients at the Peace River Wildlife Center because they normally do not survive. They are very difficult birds to treat and do not do well in captivity. People are very often quite surprised when I tell them that we have common loons in Florida! I did my final project for the Florida Master Naturalist Program on loons. I thought you might be interested in checking out the Loon Preservation Committee's website (Loon.org), which has a lot of information about loons. I hope you can continue to enjoy watching them for years to come. Thanks again for the great column!

— Bette Ruyffelaert

Letters are welcome on any outdoor-related subject, but we do have some rules. Please keep them to less than 250 words. Letters may be edited for length as well as grammar and spelling. We reserve the right to refuse any letter not signed with the writer's full name. Slanderous or libelous material will not be published. AROUND CHARLOTTE HARBOR • CAPT. RALPH ALLEN

I shoulda said something

Photo provided

While the water where you fish may not be clear enough and shallow enough to replicate this shot, it's worth thinking about how to take better photos of fish in the water. Every angler deserves a pic, but not if the fish has to die for it.

Not our place? Maybe — but if we don't educate them, who will?

I watched a happy moment one evening last week. Two guys in a bass boat were tossing artificials for snook and one of them landed a really nice fish. I was too far away to be able to precisely estimate the size of that beautiful fish, but I'm pretty sure that it was overslot — maybe way overslot.

After a spirited fight they had it boatside and were able to lift it aboard. That's when the lucky anglers got really happy. It's also when I started to get sad.

But first, a disclaimer: I have killed quite a few snook in my time. When I was going to college on Florida's East Coast, my favorite snook rod was marked to show 18 inches (the minimum size for harvestable snook at that time). There were plenty of evenings at Sebastian Inlet when I took a limit of four snook back to my apartment so I didn't have to spend as much of my limited cash on groceries in the coming days. That mark on my rod allowed me to quickly measure a snook at night without having to hunt around for a measuring device and it was a very efficient system.

Later in life when I began working as a Charlotte Harbor fishing guide, I killed and filleted many snook that were caught by my clients. So I am no stranger to snook blood. However, I have released far more snook than I have harvested. And I figure that I owe it to a snook that's going to be released to try my best to handle it carefully to give it as good a chance as possible at survival. I know that they don't all make it, so in spite of my best efforts I am guilty of killing some released fish too.

Which brings me back to the happy/sad moment the other evening. One of the guys lifted the heavy fish aboard and the first thing he did was to lay it on the deck. A carpeted, slime-removing deck (remember, this was a bass boat).

Someone unhooked the fish as it lay on the deck, then one of the guys dug around in the boat until he came up with a measuring device so they could get a good length on their catch. Not that there would be much reason to obtain an exact measurement since the season is closed, but a measurement is good for storytelling. As the scene unfolded, there was a decided lack of urgency about the proceedings. Nobody seemed in a big hurry to return the gasping girl to the water.

Then it was photo time. The victorious angler went to hoist the fish for a photo, but just about the time he had it horizontal and chest-high the fish started flopping, got loose and dropped to the deck with a

thump that I could hear from 50 yards away. At least the carpet may have helped some there.

After it stopped flopping, the fish was picked up again and posed for a lengthy photo session, then the angler lowered the fish to vertical, held by its lower jaw, while the two guys stood together shielding the camera screen from the sun so they could peruse the photos to make sure they had some good shots. After a minute or two of scrolling through photos, the guys were apparently satisfied that they'd captured the moment for posterity and it was time for the release.

To be fair, they did spend some time with the fish over the side attempting to revive it. I was too far away and on the wrong side of the boat to tell how strongly that fish may have swum away. But I'm not optimistic about its prospects for survival — it was out of the water for more than five minutes, and it wasn't handled very well.

My conscience has been bothering me ever since I witnessed this episode because I didn't do anything about it. Perhaps I should have said something to the guys, but I was far enough away from my vantage point on land that I would have had to yell. It's hard to present your suggestions in a genteel manner while shouting at someone.

And I didn't want to come across as a cranky and envious old geezer who wanted to spoil their big day. We see this on social media every day, just about any time anyone posts anything the least bit boastful some hater will bash it. I didn't want to be "that guy."

But I now regret not trying to make it a teachable moment. So I am trying to somewhat soothe my guilty conscience by penning this column as a guide on various ways that we can hurt fish unintentionally. Please try to get them back in the water as quickly as possible if you remove them from the water. Don't hold them with rags or lay them on carpet, since both will tend to remove protective slime from the fish. Don't hang large snook vertically while holding them by the lower jaw. And try really hard not to drop them onto the deck.

An old-timer told me that if I really want to be fair to the fish, as soon as I lift a catch out of the water I should inhale deeply, then hold my breath until the fish is returned to the water. The old guy's theory was that an angler who does this is experiencing approximately the same respiratory challenge as the fish, and that you shouldn't keep a fish out of the water longer than you can hold

your own breath. I don't know if this is a good guideline or not, but at least it puts things in perspective.

Hopefully I will sleep with a clear conscience tonight.

Would you believe those blue things are worms? Christmas tree worms, to be specific.

Squirmy wormy worms

YOUNG NATURALISTS • BETTY STAUGLER

Sure, they're slimy and gross — but worms are really cool

"Worm" is our common word for invertebrate animals that have soft, elongated bodies. When most people think of worms, they usually think of nightcrawlers or red wigglers. Both may be called earthworms since they both are found in the earth, but they live very different lives.

Nightcrawlers are soil-dwellers. They like to burrow several feet below the surface. Red wigglers, on the other hand, are surface-dwellers and prefer to live within the top 6 inches of the soil. Red wigglers are often found among the fallen leaves, as well as in manure piles.

Not only do we find worms on land, but the ocean is full of them. Some of these marine worms resemble earthworms, but others look more like ribbons, flowers, peanuts, or even Christmas trees. Some marine worms are so small, you need a microscope to see them. Others are super long. Marine worms comprise several phyla, a grouping of worm members who share a general body plan.

Segmented worms include the oligochaetes (say "oh-LIG-oh-keets"), or worms with few bristles, such as the earthworm. In marine environments, polychaetes (this one's easy — just think of a girl named Polly Keets) are much more common than oligochaetes.

Polychaete worms have many bristles. In fact, the name polychaete means "many bristles," and one of the common names for polychaete is bristle worm. There are about 8,000 polychaete worm species worldwide — including my favorite, the Christmas tree worm, which as its name implies resembles a Christmas tree. While some polychaetes live in burrows or tubes, others move about freely.

Flatworms have many marine species, with very simple, flat bodies. They usually crawl on the bottom or along underwater surfaces, but they can swim. When they do,

they do so with a dainty fluttering motion. Around coral reefs, they can be brightly colored, often with beautiful patterning. In bays and estuaries, they tend to be beige or brown.

Ribbon worms are unsegmented like flatworms, but their internal structure is far more complicated. They are usually much longer too. Like flatworms, ribbon worms can be brightly colored. The longest, the bootlace ribbon worm, is found on British seashores and can grow to be 100 feet long.

Peanut worms are also unsegmented. They tend to occur in shallow waters and burrow in soft sediments. Peanut worms get their name because when disturbed they contract into a lumpy peanut-shell shape. I find these sometimes when I pull my research gear in after it's been deployed for some time. They must not be happy with me, because they're always peanut-shaped.

Worms are an important part of the food chain in marine habitats. Some are filter feeders. They wave their sticky tentacles in the water to capture tiny microscopic food particles. Others are deposit feeders. They feed on sand and mud and get their nutrition from microorganisms contained in these sediments. Still others feed on seaweed, prey on other animals, or scavenge on dead animals.

Marine worms are also food for other marine animals, including many of our sport and commercial fish. They perform an important role in the marine environment. By breaking down and cycling nutrients between the sediments and surface waters, they help to keep our marine environments healthy.

WHY IT MATTERS
Mangrove trees provide crucial habitat for many species of fish, birds and invertebrates. Without mangroves, say goodbye to tarpon, snook, redfish and many other gamefish species.

HOW WE HARM IT
Fortunately, most of the mangroves the surround Charlotte Harbor have been protected from development. However, we can still damage them in smaller but important ways.

- MAKING BETTER CHOICES**
Follow these tips to help keep our mangrove forest and swamp healthy and productive:
- When fishing a mangrove shoreline, retrieve any gear that gets caught in the trees. Line, lures and hooks are death traps for birds. If they fall into the water, they can be harmful to many other species and also to boat engines.
 - Be careful about spraying herbicides if you live within a mile of the Harbor, river or a canal. Especially in the rainy season, runoff can quickly carry poisons right into the Harbor. Limit your use to dry days, or avoid it altogether.
 - Don't pull up or trim mangroves growing in canals unless absolutely necessary. These will be fishing hotspots in the future.

THANK YOU FOR BEING A GOOD STEWARD AND HELPING TO MAKE OUR WATERS HEALTHIER — WE ALL NEED TO DO OUR PART!

KAYAK FISHING • KIMBALL & LES BEERY

WaterLine photo by Les Beery
 Kimball with a redfish caught on light tackle. If you want to catch more fish in the shallows, you need to learn to dial it back.

Rig right, rig light

The heavy stuff won't catch many fish on the flats, so lighten up

Everything matters when kayak fishing, but your choice of terminal rigs can make or break your day. You might have the best kayak and the best rod, reel and line — but if you don't pay attention to the part the fish see, you may never catch one. A lot of kayak fishing happens in clear, shallow water. That ensures you're casting to spooky fish. Light line, light leader and smaller lures make long, accurate, stealthy casts possible.

Gamefish have good eyesight. If you show them something that looks real, they might attack. Show them that same lure with a wire leader, and they'll probably ignore it. There are exceptions to anything we might recommend, but here's what has worked for us over the years. We willingly trade more numerous strikes on light line for fewer strikes with heavier tackle that ensures Moby Dick gets in the boat. A properly adjusted drag will win most battles. Besides, the few fish that get away make epic fishing stories.

We use jigs most of the time. These single-hook lures offer unlimited versatility at a low cost, and are significantly safer in a kayak than lures with multiple treble hooks. On shallow grass flats or in cold water, we like sixteenth-ounce jigs because they sink slowly. On deeper flats, we go to eighth-ounce jigs, and even quarter-ounce models on the beach. Using different weight jigheads lets a kayak angler present a lure at various depths in shallow or deep water.

There are several styles of jigheads available. Our favorites are the D.O.A. jigheads with the eye on the front of the jig. This style tends to shed grass better than jigs with the eye on top and the nose that sticks out front.

Jighead color is another issue that anglers have strong opinions on. "It ain't no use if it ain't chartreuse" has started more than a few discussions. Whatever color you like, eyes are essential. The best jig heads have glass eyes; others use painted eyes. Both serve to focus a predator's attention on the lure as they key in on their prey. Les is a traditionalist and insists on red jigheads on the bays and grassflats. Kimball is very fond of chartreuse. We both agree white is the best color on the beach.

Soft plastic jig tails come in a huge assortment of sizes, colors and designs. To further complicate matters many are available in scented versions. Someone once said, to find the best jig on the rack, look for the one they are out of. The ones they are out of are mostly smaller jig tails in natural fishy colors. Try to duplicate the size and color of baitfish currently available in the wild.

These tails come in many different

designs, but our favorite is the shad tail (which some call a paddle tail). This little paddle tail flutters as the jig is retrieved. Curly tail designs present too tempting a target for pinfish and other tail-biters, so they won't last very long.

Scented jig tails like Gulp! are popular with kayak anglers pursuing redfish; their sense of smell helps reds find meals in thick grass beds. The most popular color is New Penny in the 3-inch size. Many of these scented lures don't have curly tails or paddles to impart action, so it's up to the angler to make it come alive.

The aspect of scented lures that many anglers don't understand is how slowly they should be worked. It takes time for the scent to disperse and do its job, so slow the retrieve to a series of short hops.

There are times when floating grass makes it nearly impossible to fish a standard jighead setup. Most soft plastics can be rigged weedless using a 2/0 wide gap hook and a bullet weight — similar to the worm rig bass anglers use. It won't track straight up and down through floating grass, but an injured baitfish doesn't swim normally either. This rig is also deadly if you want to slowly sneak a small lure along the bottom on a shallow grass flat. It looks like an injured fish barely kicking along the bottom.

There are lots of lures out there, from the classic gold weedless spoon to feather jigs of every color and size. But plastic jig tails are more realistic and durable — plus, they have a meaty feel when a fish bites down on them, encouraging them to hold on longer.

Whatever jig you choose, use a fluorocarbon leader. Circumstances may call for a heavier leader, but we always start with 20-pound material. Starting with a couple of feet lets you change lures for a few times without tying on a new leader. We tie our leaders to doubled 10-pound braided line with a double uni-knot. Avoid swivels and clips; they turn off some fish and also will get attacked by mackerel or other toothy fish, resulting in a quick cut-off. Learn to tie a loop knot to give the jig more freedom to wiggle.

It is still up to the angler to make any lure come alive. Two retrieves we commonly use with jigs: The lift-and-drop moves the jig rapidly up from the bottom then lets it slowly drop back. The quick movement gets a predator's attention, and the slow drop signals an easy meal. Or, try a slow steady retrieve at a speed that lets the lure swim slowly just above the grass. To a predator, this looks like a meal that isn't paying attention. Maybe texting?

So get out there and toss jigs where neither wade fishermen nor boat anglers can go. In a kayak, you can access places where fish are less educated than the other popular spots. A small jig will catch some really big fish.

Kimball and Les Beery, authors of the

waterproof "Angler's Guide to Shore Fishing" and "Angler's Guide to Kayak Fishing Southwest Florida," contribute these columns to promote the excellent fishing available in Southwest Florida. Their books are available at most tackle shops in the area or at AnglerPocketGuides.com as a download or waterproof hard copy.

OUTDOOR NEWS BULLETIN BOARD

If you have an event you want included in the Outdoor News Bulletin Board, email it to Editor@WaterLineWeekly.com

WILD ABOUT WATER QUALITY

In honor of World Water Month, please join the Charlotte Harbor National Estuary Program from 9:30 to 11:30 a.m. March 30 at the CHNEP offices in Punta Gorda City Hall (326 W. Marion Ave. Punta Gorda) for a citizen science workshop. We will be learning about water quality and collecting samples. Participants will receive a test kit to take home to sample their nearest waterway. This is a part of the annual EarthEcho Water Challenge. Samples are needed from local waterways for this global clean water project. Go to <http://bit.ly/2XDVfDw> to sign up.

CLEAN UP WITH AUDUBON

The Peace River Audubon Society will be participating in the annual Great American Cleanup/Keep Charlotte Beautiful scheduled for March 30. Members of PRAS will again this year be cleaning up Kiwanis Park (501 Donora Street, Port Charlotte). Meet at 8 a.m. in the main parking lot to pick up supplies. The first 20 members to sign up will receive a Great American Cleanup T-shirt. Kiwanis Park is well known for some of the best birding in Charlotte County. Why not come out and help pick up litter to make our community clean, green, and beautiful and at the same time, enjoy the large number of birds that occupy this gem of a park. Following the cleanup, there will be refreshments available at the Douglas T. Jacobson Veteran's Home (21281 Grayton Terrace, Port Charlotte). Call Nancy Turner 941-627-9107 to sign up.

AMBERJACK PRESERVE NATURE WALK

Naturalist Bill Dunson will lead a free nature walk from 8 to 10 a.m. April 2 at Amberjack Preserve/Lemon Lake (6250 Gasparilla Pines Blvd., Placida). A hike to the two boardwalks on tidal Lemon Lake provides a fascinating study of the impacts of water salinity and water depth on animals and plants. No registration required; for more info, call 276-233-6364 or email wdunson@comcast.net. Sponsored by Peace River Audubon Society.

RADIO WATERLINE SEMINAR

The next event in the Radio WaterLine seminar series will be held April 3 at Jerry's Tiki Bar & Waterside Grill (15001 Gasparilla Road, Placida). Seminars are scheduled for the first Wednesday of each month and are hosted by the boys from Radio WaterLine. Topics vary depending on how the fishing is going, but you're guaranteed to learn something useful — and if you have any questions you want answered, bring 'em with you. Come out at 5:30 p.m. and enjoy dinner and drinks with Capt. Josh Olive and Capt. Mike Myers (you buy your own); the talk gets started at 6:30 p.m. For more info, call Capt. Mike at 941-416-8047 or Capt. Josh at 941-276-9657.

TALES OF AN EVERGLADES BIOLOGIST

The Florida Department of Environmental Protection, South District invites you to join them from 1:30 to 4 p.m. April 3 for "Tales of an Everglades Region Biologist": A selection of anecdotes and images from Dennis Giardina's participation in efforts to recover endangered species and to control invasive, exotic species. The talk will be held in Room 165 of the Joseph P. D'Aleandro Bldg (2295 Victoria Ave., Fort Myers). Since 2007, Dennis Giardina has been a biologist with the Florida Fish and Wildlife Conservation Commission and the co-chair of the Everglades Cooperative Invasive Species Management Area (ECISMA). Registration starts at 1 p.m.

WILD WEDNESDAY MOVIES

Join CHEC Alligator Creek (10941 Burnt Store Road, Punta Gorda) at 10:30 a.m. or 1:30 p.m. for Wild Wednesdays. Guests enjoy a nature-themed film followed by lively discussion led by a Florida master naturalist. The final film of the season is on April 3: "Nature — The Gorilla King." These events are free and open to the public. For more info, contact Becky at 941-575-5435 or becky@checflorida.org.

A WALK IN THE PARK

The Friends of Pinebrook Park (1251 Pinebrook Road, Venice), a central Venice neighborhood association whose mission is to take care of and promote the park, in partnership with the city of Venice, will hold a walk at 9 a.m. April 4 to celebrate the rezoning of the park and unveil new signage. The walk is about 1.5 miles along groomed trails. The Friends of Pinebrook Park and other representatives with expertise in the field of fitness, nature, plants and trees will be on hand to talk and lead groups through the trails. Wear comfortable shoes and clothing; parking on site and water available. For more info, contact Kathy Eiferle at katharineeiferle@aol.com or 810-513-0390.

URBAN BURROWING OWLS

Join Liz White, a PhD student at the University of Florida, from 2 to 3:30 p.m. April 4 at the Charlotte Harbor Environmental Center (10941 Burnt Store Road, Punta Gorda) to hear about her research on the urban burrowing owls of Cape Coral and Marco Island. Burrowing owls are unique from most owls in that they nest in the ground. They are opportunistic, taking over empty burrows dug by tortoises, armadillos, and other animals. Discover more about these tiny raptors and the vibrant population right here in Southwest Florida. Tickets are \$10 each for the general public and \$6 each for CHEC members. For reservations, call 941-575-5435.

GREAT AMERICAN CLEANUP AT CEDAR POINT

It's time again for Charlotte County's Great American Cleanup. Interested individuals and groups are encouraged to participate in this annual event scheduled for 9 a.m. to noon April 6. We will meet at Cedar Point Environmental Park (2300 Placida Road, Englewood) and clean up local parks which may include Cedar Point Environmental Park,

ONGOING EVENTS

FISHING CLUB MEETINGS: The Gulf Cove Fishing Club meets on the second Monday of the month from October through May at the Hope Lutheran Church in Gulf Cove (14200 Hopewell Ave., Port Charlotte) at 7 p.m. At each meeting, a speaker will talk on a timely topic. The public is invited to attend, but only Gulf Cove residents can be members. For more info, call 941-698-8607.

NATIVE PLANT SOCIETY MEETINGS: The Mangrove Chapter of the Florida Native Plant Society meets from 7 to 9 p.m. the second Tuesday of each month (Oct-May) at Lemon Bay Park (570 Bay Park Blvd., Englewood). Call 941-769-3633. The Coccoloba Chapter of the Florida Native Plant Society meets from 7 to 9 p.m. the second Thursday of each month at the Calusa Nature Center and Planetarium (3450 Ortiz Ave., Fort Myers). Call 239-275-3435. Meetings are free and the public is welcome.

WHAT'S THAT BIRD?: Volunteer bird interpreters share their expertise on ID and behavior of raptors, shorebirds, waterfowl and other avian visitors at Myakka River State Park (13208 S.R. 72, Sarasota). Volunteers set up scopes and help people identify birds from 9 a.m. to 1 p.m. every day of the week.

Oyster Creek Environmental Park and/or Buck Creek Preserve. This is our country's largest community improvement event and engages 4 million volunteers in 20,000 communities nationwide. Come help clean up your community. Trash bags, refreshments and T-shirts (to first 20 who register) will be provided. Just bring a commitment to help. And remember, do your part every day by picking up trash that you see, not just during special cleanups. For more info or to register for the cleanup, call 941-475-0769.

NATIVE PLANT SOCIETY MEETS

The Mangrove chapter of the Florida Native Plant Society will meet at 6:15 p.m. April 9 at Lemon Bay Park (570 Bay Park Blvd., Englewood). Kate Borduas, an environmental activist, Florida Master Naturalist and certified interpretive guide, will present "The Wonderful, Wacky World of Lichens." All meetings are free and open to the public. For more info, visit Mangrove.FNPSC.org or call 941-769-3633.

EYES ON SEAGRASS CITIZEN SCIENTISTS

Are you concerned about the health of Charlotte Harbor? Citizens are needed to document the health and status of seagrass and seaweed in upper Charlotte Harbor. A training session will be held from 7 to 8:30 p.m. April 11 at Charlotte County Eastport Environmental Campus (25550 Harborview Road, Port Charlotte). This volunteer training will cover survey methods and project goals. To register, contact Betty Staugler at staugler@ufl.edu or 941-764-4346.

HOOK KIDS ON FISHING

In partnership with Fishermen's Village, Anglers for Conservation is coordinating AFC's Hook Kids on Fishing program from 10 a.m. to noon April 13 at Fishermen's Village (1200 West Retta Esplanade, Punta Gorda). Kids ages 6 to 16 are welcome along with their parents. The first 100 kids registered will receive a free rod and reel. Registration is mandatory; sign up at AnglersForConservation.org/events. These conservation-minded programs teach casting, fishing safety, knot tying, the tackle box, boating, catch and release tactics, fishing habitat and conservation, and are taught by professional guides and knowledgeable anglers. Volunteers are needed and donations are greatly appreciated. If you're interested in volunteering or sponsoring this event, contact Mike Conneen at Mike@AnglersForConservation.org.

BEACH CLEANUP

Join the SunCoast Friends of the Florida Master Naturalist Program from 8 to 11 a.m. April 13 for a volunteer environmental service project during Beach Cleanup 2019. Join us for cleanup at Manasota Beach (8500 Manasota Key Road, Englewood) in the dune line, parking lots, and trail areas. Bags, gloves and cold water provided. A limited number of event T-shirts will be available (while supplies last). Meet in the parking lot at the tent for sign-up and instructions. Bring a hat, closed toe shoes, sunscreen and a grabber (if you have one). Bring a reusable water bottle to limit our use of natural resources. Register early through UFSarasotaExt.eventbrite.com to reserve your spot and receive notice of any changes. For more info, call 941-861-9822 or email kclements@scgov.net.

WADING AT PONCE DE LEON PARK

Discover the biodiversity of seagrass beds through hands-on exploration of Charlotte Harbor, wading up to waist-deep water while searching for fascinating creatures. Charlotte Harbor Environmental Center, Inc. is conducting free seagrass wading adventures at Ponce de Leon Park (3400 Ponce de Leon Pkwy, Punta Gorda) from 9 to 11:30 a.m. April 16. After an introduction on aquatic environments, participants will wade into the shallow water of Charlotte Harbor in search of plants and animals that reside there. Dress appropriately and wear shoes that can go in the water. A hat, sunscreen, and bottled water are encouraged. Participation is limited, and pre-registration is necessary for this free program. All children must be accompanied by an adult. For more info or to register, call 941-575-5435.

HANG OUT WITH SCRUB JAYS: Spend the morning with the scrub jays at Oscar Scherer State Park (1843 S. Tamiami Trail, Osprey) from 8:30 to 10:30 a.m. every Sunday. This unique Central Florida experience includes a nature walk to see the park's diverse ecosystems, native flora and fauna. Call 941-483-5956 for info.

CHARLOTTE HARBOR DRAGONS: Dragon boat club meets every Wednesday and Saturday at 8 a.m. and Sundays at 1 p.m. Learn the ancient art of dragon boat racing. We practice out of the Port Charlotte Beach Complex (4500 Harbor Blvd. Port Charlotte). For availability, contact Eddie Amara at 941-740-1286 or eamara1@comcast.net, or to learn more about the club visit CharlotteHarborDragons.com. Paddles up!

CHARLOTTE HARBOR MULTIHULL ASSOCIATION: Members of this club for multihull owners, sailors or those who are interested in the exchange of ideas about equipping and sailing boats, share information about anchorages and cruising destinations, hold informal races and have raft-ups. No dues. The club meets at a local restaurant the first Monday of each month at 6 p.m. For more info, call 941-876-6667.

COASTAL VENTURES CRUISE CLUB: This club, designed

for personal boat cruising, meets on the third Tuesday of the month at the Waterfront Restaurant (2205 N. Tamiami Trail, Nokomis). Join them for dinner at 6 p.m. and/or the 7:30 p.m. meeting where they'll discuss upcoming cruises and activities. Enjoy the camaraderie of like-minded water rats. If interested, attend a meeting or call 941-493-0070 for more info.

VOLUNTEER AT SHAMROCK PARK: Shamrock Park Nature Center (3900 Shamrock Drive, Venice) holds its monthly volunteer work mornings from 8 to 10 a.m. on the third Friday of each month. For more info, call Jennifer Rogers at 941-861-5000 or email her at jrogers@scgov.net.

PEACE RIVER PADDLING: Join a guided kayaking trip on the Peace River. Free if you bring your own kayak, or rent equipment for \$25 per person. Paddle with an experienced guide and explore remote areas of the Peace River. These trips are intended to be easy paddling for everyone to have fun, meet people with similar interests, and enjoy the outdoors. Trips are planned from 9 to 11 a.m. each Tuesday if weather permits. Meet at Nav-A-Gator 30 minutes prior to departure. Sign up by calling Steve Burroughs 813-857-4634. Trips are provided by KayakEcoTours.com.

SIERRA CLUB OUTINGS

All outings are free and the public is invited. Donations to the Sierra Club always gratefully accepted. On paddle trips, participants must provide own watercraft and PFD, and be able to swim. Call the listed number to make a reservation. For a full list of outings, visit GCHGroup.org.

PADDLE DOWN UPPER SHELL CREEK with Rick Fried, 9:30 a.m. to 3 p.m. April 1: Here's a chance to see the other way and likely a few more alligators to photograph. We'll go downstream this time to the dam and back. 941-637-8805.

PADDLE THE PEACE RIVER ROOKERIES with Rick Fried, 9 a.m. to 3 p.m. April 10 or May 24: Paddle down to the rookeries to see active nest-building and hatching, and then up side channels or the river to the Nav-A-Gator for lunch. Return via a different Peace River route. 941-637-8805.

AUDUBON IN THE FIELD

The general public is invited to join members of the Peace River Audubon Society for a series of field trips and walkabouts. Field trips are half-day to full-day adventures. Bring a bag lunch, drinking water and sunscreen. Carpooling is available; inquire. Walkabouts are shorter trips, about two hours. Call the number listed for more info.

APRIL 2 WALKABOUT: "Birds, Buds, and Blooms." Meet at 8 a.m. at Amberjack Preserve (6250 Gasparilla Pines Blvd, Placida). Coordinator: Bob Winter, 941-828-2627.

APRIL 13 FIELD TRIP: Fort De Soto, St. Petersburg. Meet at 7 a.m. at Deep Creek Walmart parking lot across from Culver's (385 Kings Hwy, Port Charlotte). Coordinator: Mike Krzyzkowski, 863-244-2652.

APRIL 20: PRAS Earth Day Event at Deep Creek Preserve (10797 Peace River Street, Arcadia) at 8 a.m. Coordinator: Nancy Turner, 941-286-0340.

MAY 7 WALKABOUT: "Folklore Fun." Meet at 8 a.m. at Hathaway Park (35301 Washington Loop Road, Punta Gorda). Coordinator: Ron Mills, 941-575-6968.

equipment mandated by federal and state regulations is onboard. If an inspected vessel is found to be safe, a "Seal of Safety" decal is awarded to the boat owner and affixed in a prominent location. For more info or to schedule an appointment, call Bill Shaw at 941-474-2705 or email ShawCo1@att.net. Visit Flotilla87.com at CoastGuardEnglewood.com for more info.

CHEC NEEDS VOLUNTEERS

Enjoy learning about and teaching others about nature? Looking for a fun and educational way to meet like minded people? Consider becoming a volunteer with Charlotte Harbor Environmental Center at Cedar Point Park (2300 Placida Road, Englewood). Office volunteers work shifts from 8:30 a.m. to noon or noon to 3 p.m. Monday through Friday. Volunteers can work one shift per week or just a shift a month. Volunteers are needed as trail guides to lead guided nature walks through several local Charlotte County properties. These are usually from 9 to 11 a.m. on various days of the week. If interested, a training session will be scheduled. You will learn some plants, animals and interpretive techniques to help you lead these "walks in the woods." Contact Bobbi Rodgers at 941-475-0769 or Bobbi@CHECflorida.org.

BIRDING TALK IN NORTH PORT

North Port Friends of Wildlife will sponsor a talk by Bob Clark from 6 to 7:30 p.m. April 23 at the Shannon Staub Library (4675 Career Lane, North Port). Bob, a member of the Venice Area Audubon Society chapter, will bring us up to date on that chapter — who they are, what they do and will include news of their bird rookery. In addition, he will speak about eBird, Cornell's Lab of Ornithology's bird sighting reporting/tracking website/app (eBird.org), including the benefits of using it and how to use it. Currently, North Port has very little statistical reporting input into eBird and we want to change that. No cost; the public is welcome to attend.

VOLUNTEERS NEED FOR FISHING CLINIC

CHNEP seeks ambassadors to share their love of fishing at our sustainable fishing clinic, planned for April 27. Morning and afternoon shifts available. The clinic will be held at The Big Calusa, a week-long celebration of the Caloosahatchee River at North Shore Park, 13001 N. Cleveland Ave., (North Fort Myers). Volunteers will teach skills like casting, knot tying, hook safety, fish ID and more. Participating kids will receive a free rod and reel. You can register to help out at <http://bit.ly/20uSvzV>.

TREE FAIR 2019

People for Trees, a non-profit native tree advocacy group that has been sponsoring tree festivals since 1999, will host Tree Fair 2019 from 10 a.m. to 2 p.m. April 27 at the North Port Community Education Center (4940 Pan American Blvd., North Port). Hundreds of 3-gallon native trees (approx. 6 to 8 feet tall) will be for sale for only \$15 each; Florida sweetgum, American elm, bald cypress, slash pine, southern red cedar, red maple, dahoon holly, pignut hickory. Alice White, chair of People for Trees since its inception in 1997, will lead a number of informational "walk and talks" about the trees that will be for sale so attendees can choose just the right trees for their yards. Attendees can see the correct way to plant a tree at a demonstration plot. Arborists from Simply Trees will be doing tree-climbing demonstrations throughout the morning, from 10 to noon, and be available to answer questions about tree pruning, maintaining a healthy tree, etc. There will be a "Fairy Gathering" at 11 a.m. led by "Rev. Faerie" Elaine Silver who will also provide the musical entertainment. For more info, contact Alice at 941-468-2486, treelady12001@yahoo.com or visit PeopleForTrees.com.

ENGLEWOOD EARTH DAY FESTIVAL

The Englewood Earth Day Festival celebrates sustainability with family-friendly activities, raffles and demonstrations. The event is scheduled for 10:30 a.m. to 4:30 p.m. April 28 at Buchan's Community Park (1390 Old Englewood Road, Englewood). CHNEP needs your help to spread the word about clean water and plastic pollution! Sign up as an ambassador to assist at our educational booth for the event — let's make every day Earth Day! Morning and afternoon shifts available. To volunteer, go to <http://bit.ly/2Yskghd>.

CAPT. JOSH SPEAKS AT CG AUX MEETING

The next meeting of Flotilla 98 of the Coast Guard Auxiliary will be held at 7 p.m. May 1 at the Punta Gorda Isles Civic Association (2001 Shreve Street, Punta Gorda). The flotilla will welcome Capt. Josh Olive, speaking about WaterLine and answering questions about Charlotte Harbor. Guests and prospective members are always welcome. For more info, call Michael F. Griffith at 941-223-9064.

FREE VESSEL SAFETY CHECKS

The Coast Guard Auxiliary is conducting free vessel safety checks in Englewood. They'll make sure the safety

Jerome Marz caught and released this stud 35-inch redfish while fishing with Charlie Madden near Boca Grande.

Rick MacKenzie of Port Charlotte caught this 18-inch sheephead on a shrimp. It weighed just under 5 pounds.

Cope Zafirides with the 34.5-inch snook he caught and released aboard the Reel Action near I-75.

John Schulties with a nice snook and Tom Hickey with a 26-inch redfish. Both fish were released unharmed.

WE WANT YOUR PICS!

Here's how it works: Take pictures of your outdoor adventures. Send your high-quality digital photos to Editor@WaterLineWeekly.com. DO NOT send us photos of oversized or other release-only fish being poorly handled. Photos of such fish being gaffed, held by the lower jaw only or obviously damaged or dead will not be published, no matter how big the fish or how proud the angler may be.

Michigander Dan Brazo caught this hogfish with Capt. Matt Glass out of Stump Pass Marina.

Glen Pooley with a blackfin tuna 15 miles out of Venice.

ONION-CRUSTED GROUPEr

- 2 tbsp olive oil
- 1 cup chopped red bell pepper
- 1 cup chopped green bell pepper
- 2 cups fresh or frozen corn
- 1 cup diced onion
- 1 tsp salt, divided
- 1 tsp fresh-ground black pepper, divided
- 1 tsp dried thyme, divided
- 4 6-ounce grouper (or other white fish) fillets
- 1/2 cup crushed french-fried onion rings

Heat oven to 450°F. Combine 1 tablespoon of the olive oil with red and green bell peppers, corn, onion and 1/2 teaspoon each of the salt, pepper, and thyme in a large ovenproof pan. Roast mixture in the oven until the corn and peppers start to brown, about 12 minutes, stirring twice. Coat fillets with remaining 1 tablespoon of oil and remaining 1/2 teaspoon of salt, pepper and thyme. Top with crushed onion rings. Remove roasting pan from oven; spread corn-and-pepper mixture to sides of the pan. Place fillets in middle of pan; return to oven and cook 10 minutes until fillets are opaque in the center. Serve fillets on a bed of roasted vegetables. Yields 4 servings.

Kya Martin was super excited about her tomtate grunt.

Kari Pooley with a flag yellow tail snapper 30 miles out of Venice.

Becca Derosa caught this sweet snook while fishing with Capt. Jamie Allen.

Dennis Schumacher and his son Marty from Wisconsin with several meals of sheephead.

Shris Zafirides from Canada with a 32.5-inch Peace River snook caught and released aboard the Reel Action.

Katelyn Zabriske with a beautiful largemouth bass she caught in a Riverwood pond while visiting her grandparents.

Chris Heichelbech caught this guitarfish while beach fishing on Gasparilla Island.

Don Karlgaard with a pair of 19- and 15-inch trout caught in Bull Bay.

Tommy Powers of Rice Lake, Wis., with a 20-inch trout which he carefully released while fishing with his father-in-law, Bruce Smith.

Larry Beller caught and released this Windmill Village snook using a live shrimp.

Timmy G. from New Hampshire caught and released this 32-inch snook with Capt. Robbie Hayes out of Boca Grande.

Eric James caught this beautiful 30-inch snook with a gold spoon off Punta Blanca Island.

WE WANT YOUR PHOTOS!
Here's how it works: Take pictures of your outdoor adventures. Send your high-quality digital photos to Editor@WaterLineWeekly.com. FRESH LOCAL FISHING REPORTS FROM VENICE TO PINE ISLAND

INSHORE & FRESHWATER

ASHLEY L.

ECONOMY TACKLE
Sarasota
941-922-9671

The **snook** bite is good around the creek mouths and some are showing up in the surf. **Tarpon** reports are due any day now. There's a lot of bait in Sarasota Bay. **Sheepshead** are mostly gone. Freshwater **bass** are nailing topwater frogs, but be patient before you set the hook.

GULF & OFFSHORE

Kingfish are from 3 miles on out on thick schools of Spanish sardines. There are also **little tunny**, **blackfin tuna** and tons of **barracuda** wherever you find the bait. Big **mangrove snapper** are still chewing on the ledges. **Amberjack** are on the wrecks and big structure in 70 to 90 feet.

BEST BET

If you're able to go offshore, go. It's unreal out there.

ERIC

COOKS SPORTLAND
Venice
941-493-0025

Sheepshead action has slowed down. A few **trout** have been caught in the bay. A fair number of **hammerhead** sharks have been hooked along the beaches. The freshwater **bass** bite is still great, but most fishermen have moved to worms. Spinnerbaits are also a decent option.

Big **red grouper** have been reported in 90 feet. Lots of **mangrove** and **lane snapper**, plus a few **yellowtails**, have also been out there. **Sand perch** have been showing in 30 feet. When the water warms a couple degrees, the **kingfish** will be back.

Pompano are on the beaches, the jetties and the pier eating silly jigs. If the water's dirty, tip it with a chunk of shrimp.

JIM

FISHERMAN'S EDGE
Grove City
941-697-7595

(3/21 report) Bait was getting more plentiful before the front and will probably improve shortly afterward. **Whiting**, **black drum** and baby **sharks** have been biting in the surf. **Pompano** are reported at the Tom Adams Bridge. **Sheepshead** are on the Placida trestle but more abundant on the nearshore reefs. A few **tarpon** had shown up in Boca Grande Pass, but the weather might chase them out.

Spanish mackerel have been very plentiful off Manasota and Gasparilla islands. **Kingfish** have been caught in 30 to 40 feet on trolled plugs, and some have been in the 20- to 30-pound range. **Yellowtail** and **lane snapper** are good at the Bayronto. **Red grouper** to 31 inches have been caught at about 100 feet.

Snook and **redfish** have been attacking topwater plugs in the backcountry early, late or on overcast days.

JEFF

CAPT. TED'S TACKLE
Port Charlotte
941-627-6800

Things slowed down after full moon and cold front. There are decent numbers of small **redfish** on both the east and west sides. **Snook** are fair; there are some bigger ones in Bull and Turtle bays but the rivers have been good as well. **Tarpon** have been spotted rolling around the U.S. 41 bridges on the Peace River.

Grunts and small **grouper** are biting on the nearshore reefs. A few **sheepshead** have also been caught. **Little tunny**, a couple **blackfin tuna**, **Spanish mackerel**, **kingfish** and **sharks** are around the shrimp boats at first light.

The freshwater fish have been hungry. Avoid the tournament guys on the Harbor and try something different.

ROBERT

FISHIN' FRANK'S
Charlotte Harbor
941-625-3888

Snook have been all over the place: The rivers, the PGI canals, the east and west sides, and a few around the phosphate dock. The **redfish** reports are OK in Pine Island Sound and Lemon Bay north of the Tom Adams bridge. Some smaller reds have been on the east side. Big **jacks** are in the PGI canals, Alligator Creek and on the edges of the bars. **Sheepshead** are good in the ICW area.

The **sheepshead** bite is still good on the nearshore reefs. We're also seeing a mixed bag of **grunts** and **porgies** on the reefs. The **mangrove**, **lane** and **yellowtail snapper** are better at 20 to 30 miles. **Spanish macks** and **kingfish** are from the passes out to 20 miles, with more fish south than north.

Dare I say it? **Tarpon** are in Boca Grande Pass, the Sanibel Causeway at night, and the Tom Adams bridge early in the morning. Offer them shrimp in the Pass or Bait Busters elsewhere.

CAMERON

RIO VILLA
BAIT & TACKLE
Punta Gorda
941-639-7166

(3/21 report) **Trout** have picked up in Two Pines; try live pinfish under a float on the outer edge of the bar. Small **cobia** have been eating the pinfish, so keep an extra bait rigged and ready. **Spanish mackerel** are outside the bars in about 6 feet. Bigger **Mayan cichlids** are eating minnows way up in the Peace River, along weed lines. Weedless jerkbaits skipped under the bushes in Shell Creek are working for **bass**.

No reports.

Good numbers of **snapper** are in the rim canal of PGI. Shrimp are working, but small whitebait (green-backs) will call out bigger fish. Expect **jacks** and juvenile **snook** as bycatch.

DOUG

D&D MATLACHA
BAIT & TACKLE
Matlacha
239-282-9122

(3/14 report) **Redfish** (slot size and above) are taking big shrimp under corks in Pine Island Sound. Around Cabbage Key, **snook** are hitting cut mullet. **Trout** are hitting around Matlacha on DOA shad on a red jig in 3 to 5 feet.

In 90 to 100 feet off Boca Grande, we're seeing a mixed bag of **snapper** (including catch-and-release **reds**) and **gag grouper**. In closer, we have big **mangroves** in the Pass.

The Bokeelia Pier and nearby docks have been loaded with big **sheepshead**. We're also seeing a few around the D&D seawall.

JACK

BAIT N WAIT
Fort Myers Beach
239-466-8737

(3/14 report) A few **tarpon** have been caught around the Sanibel Causeway. The Fort Myers Beach pier has been slow. **Snook** are under the old Fort Myers Beach bridge at high tide, and the **sheepies** and **black drum** are there at low tide.

Red grouper has been pretty solid. No **mackerel** reports yet.

The **jacks** are abundant in the Fort Myers Beach canals.

THE FISH COACH'S TIP OF THE WEEK: With mackerel in the area, it's a good plan to have spoons with you whenever you go out on the water. When you go to buy spoons, you'll find many styles. Which to use depends on whether you're casting or trolling, and how deep you want to fish. When the macks are on the surface, a lightweight single-hook flats spoon is fine. They sink slower. But they also weigh less than other spoons of similar size, so I like them better for trolling than casting. If the fish are deeper, or if you need to make long casts, a Kastmaster is ideal. The metal is thick, and that makes them heavy. All of these come with treble hooks, which can be swapped for singles if you're willing to take the time. Sprite-style spoons are fine too, but they neither cast as well as the Kastmaster (go figure) or stay up top as well as a flats spoon. Whatever you choose, have several sizes to match the available bait. — As the Fish Coach, Capt. Josh Olive offers personalized instruction on fishing techniques. To book your session or for more information, go to FishCoach.net, email Josh@FishCoach.net or call 941-276-9657.

BIRDING IN PARADISE • ABBIE BANKS

Bird song mnemonics

Shutterstock photo
This white-eyed vireo looks more like a cartoon character than a boozer, but that's not what he says.

A fun trick for learning to recognize the sounds of our feathered friends

Many years ago (I am not going to say how many), I met a great group of birding friends. We mostly traveled on group birding trips to places like Cape May, Delaware, the eastern shore of Maryland, Texas and Virginia. We also attended several Midwest Birding Symposiums and we would meet in Florida for trips before I moved here.

I learned a lot from this group. They were awesome birders, and back then some were learning just as I was. We are still in communication, and we all are still birding.

One of the fun things they did was use mnemonics to identify the birdsong or bird call. Mnemonics are phrases that help us identify something. Several of my friends were amazing birders and could tell the bird with a few notes of song. But most are not that lucky. I am not one of the lucky ones who can recognize a lot of bird calls; just some. So I like mnemonics, which are fun to use and easy to remember.

One of the very first and easiest phrases to learn is the call of the barred owl: "Who cooks for you?" Most birders know this phrase. One I use a lot here in Florida is "Get your beer, Chuck." If someone is not familiar with mnemonics, they may think I am an alcoholic screaming out for booze. But it's the call of the white-eyed vireo. It is also quite distinct.

The Carolina chickadee says its name: "Chickadee-dee-dee." I'm sure you've heard it. Right now, the tufted titmice are at my feeders. I hear them first, as they call "Peter, peter, peter." We usually hear the great crested flycatcher first and then see it. The call is "Wee-eep, wee-eep." It is quite distinct.

Of course, all birders recognize the eastern phoebe as it raspyly says its name: "Fee-bee, fee-bee." Sometimes we don't even see the phoebe — but its call is so distinct, birders just write it down as a heard bird.

Just on our last field trip we listened to the Carolina wren as it melodically called "Teakettle, teakettle, teakettle." We hear the common yellow-throat here quite often, calling "Witchety, witchety, witchety."

Thank you to the chuck-wills-widow for

saying its name and also thank you whip-poor-will. The chuck-wills-widow is here year around, and the whip-poor-will is here only during the winter.

Often we hear the loud screams of the red-shouldered hawk: "Kee-ahh, kee-ahh." They may even get louder when the blue jays are chasing it screaming "Queedle, queedle, queedle!"

One of my personal favorite bird calling activities is answering back to the fish crows' "Uh-huh, uh-huh," which forces me to answer, "Unh-uh, unh-uh."

The great horned owl calls out at night and asks "Are you awake?" Then it answers the question for you. The call will be heard as "Are you awake? Me too."

Not all birds are known for mnemonics. Our Florida state bird is the famous (seen on every street sign pole) northern mockingbird. Since this bird copies other birds' songs, we can recognize the call by its pattern: Three notes then four notes, three notes then four notes.

Of course you'll need a good imagination or maybe the continual use of these mnemonics to recognize them. I am usually the first one to call out, "Get your beer, Chuck" when I hear the white-eyed vireo. It is so clear to me that I can't tell you any other call for this Florida-area bird.

I hope you're not scratching your head right now wondering what I'm talking about. I guarantee from now on while you're birding you'll be listening for these phrases. Have fun with mnemonics. If you are having a difficult time, make up your own words for that bird call and you will not forget it.

There are hundreds of phrases for bird calls, and they may differ from region to region. Whether you are a backyard birder or go on major birding trips, these mnemonics will come in handy. Good birding! "Cheer, cheer, charmer" (or so says the eastern bluebird).

Abbie Banks is a member of the Venice Area Birding Association, a group of folks who want to enjoy the environment and nature without the cumbersome politics of an organized group. For more info on VABA or to be notified of upcoming birding trips, visit AbbiesWorld.org/references.html or email her at Amberina@aol.com.

Florida Administrative Code 68A-4.001 (4): The intentional feeding or the placement of food that attracts pelicans and modifies the natural behavior of the pelican so as to be detrimental to the survival or health of a local population is prohibited.

WEEKLY MAGAZINE

SLACK TIDES NEWS OF INTEREST FROM AROUND THE GLOBE

KILLING SHARKS, 15 AT A TIME

A large female great white shark pregnant with a record 14 pups was accidentally caught by fishermen off the coast of Taiwan and sold at a fish market March 20. The enormous mamma was purchased for less than \$2,000 by a Taiwanese taxidermy company, Taiwan English News reported. The images from local news agencies of the great white shark (*Carcharodon carcharias*) and the pups that were cut out of her are hard to believe. At more than 15 feet long, the shark is bigger than a small car and is probably not what most fishers want in their nets. The shark's 14 pups look as though they were nearly fully developed and ready to take on the open ocean but were stopped short when their mother was killed. The 14 pups this mamma shark was carrying likely mark a record number for the species, said David Ebert, a shark scientist and the director of the Pacific Shark Research Center at Moss Landing Marine Laboratories in Moss Landing, California. "It is very rare to catch pregnant white sharks, so at least they were able to document this with photographs," Ebert said. Burgess and his colleagues are working to connect with the shark's purchaser and obtain tissue samples from the mamma shark and each of her pups. "This is exciting for us as scientists because, again, finding a pregnant female doesn't happen often," Burgess said. "They aren't getting caught as often, which is great, but you also don't get animals to look at. The story is a good one in the sense of knowledge, but a bad one in the sense that it's a pregnant female shark."

WHEN CROCS ATTACK

Northern Territory, Australia — Dac Craig and his friend Daniel were doing some fishing in Australia's Northern Territory when Daniel hooked onto what Craig called "a donkey" of a barramundi. Craig began filming the battle to land the big fish, but it turned out that Daniel had some competition, in the shape of a crocodile Craig estimated was 9 to 10 feet long. Craig's dramatic video shows him yelling at Daniel to run as the fish is pulled from the water, quickly pursued by the giant crocodile. Unfortunately for Daniel, the crocodile wins the race, swallowing the fish right off his hook. "The whole thing's gone down his gob," lamented Craig, who told ABC Australia. "We were shocked, we were sad. I was disap-

pointed for Daniel — it was a good fish." See the video for yourself at <http://bit.ly/2FBanX0>.

FRANKENFISH RETURNS

Sylvia Wulf sure was busy at the Seafood Expo North America last week, hustling to meet with various fish distributors and other business contacts. The AquaBounty Technologies CEO's controversial product isn't like the other fish in the sea. Her Maynard company produces a special kind of salmon, and she had a promising story to tell attendees at the Boston event. AquaBounty makes genetically modified fish, the first bioengineered animal approved for human consumption in the United States. The Food and Drug Administration gave the green light this month by lifting a ban that had blocked AquaBounty from bringing its genetically modified eggs into the country from Canada. Wulf expects to start moving eggs from AquaBounty's Prince Edward Island hatchery to the company's Indiana salmon farm within two weeks. She hopes to begin selling the fish in the United States by the end of next year, most likely through a food-service company to start. Eventually, she envisions a half-dozen fish farms across the country, and an ambitious overseas expansion.

LOG-ROLLED

NEHALEM, Ore. — A woman is recovering in the intensive care unit after being crushed by a log that was lifted by a sneaker wave at Manzanita Beach off Pelican Lane Saturday afternoon, according to Nehalem Fire and Rescue. Heathyr Croasmun broke 13 ribs in multiple places and suffered bruising on her lungs, according to her husband Joe Croasmun. The family took a photo a minute or two before the wave hit. It knocked Joe, his brother, and two kids over as well. The incident has emergency responders heeding a familiar warning: "Never turn your back on the ocean." This spring break scare is not a rarity along Oregon's coast, according to Nehalem Fire and Rescue Chief Perry Sherbaugh. He tells KGW that his department sees a log incident like this every few years and it can be deadly. "You're talking about a several ton log rolling across you. It would be like rolling dough out on a table. Your body can't sustain that amount of weight," Sherbaugh said.

UNDERWATER SPIES

As Russia, China, and the United States race to build undetectable submarines or underwater drones, scientists are recruiting some unlikely help to keep

up. A DARPA-funded program called Persistent Aquatic Living Sensors — adorably abbreviated to "PALS" — is developing a way to use the endless bubbling, snapping, and clicking of pistol shrimp as a sort of ubiquitous sonar, according to Discover Magazine, which talked to Alison Laferriere, the project leader who works at defense contractor Raytheon BBN Technologies. "The idea is that the sounds that the shrimp create would travel to the object, reflect off of it and we would be able to detect it at our sensors," she told Discover. Pistol shrimp can shut their claws so fast that it gives off a 190-decibel noise. Because the shrimp are so common, their snapping fills coastal areas with a sort of underwater white noise that could be used to spot enemy submarines or drones — or at least that's DARPA's idea. "What we're interested in, specifically, is monitoring the soundscape and determining if there's a change in the soundscape in some way when an underwater vehicle passes through," Laferriere said. Monitoring that underwater soundscape would only require that the military install listening devices — because the shrimp and other animals are making the noise, there's no need to install a prohibitively-expensive network of sonar-generating devices as well. Of course, Laferriere's team doesn't yet know what a military drone would look like to a sonar detector — she's still working in a lab setting with tanks of snapping shrimp. But if all goes well, PALS will travel to the Virgin Islands to start recording and analyzing oceanic noise later this year.

JUST ONE CHOICE

There was this fisherman that always had a good day fishing. His friend, the game warden, couldn't figure out how he did it, so one day the game warden decided to go fishing with his friend. The fisherman took his friend the warden out to his favorite spot. Once there, the fisherman took a stick of dynamite out of his backpack, lit it and threw it into the water. The dynamite exploded and a dozen fish floated to the top. The game warden said, "That's illegal, you can't do that!" The fisherman lit another stick of dynamite and threw it into the water. The dynamite exploded, and a dozen more fish floated to the top. The game warden said, "Stop that now, and take this boat back to shore ... I'm going to have to give you a citation and confiscate all your gear." The fisherman looked over, lit another stick of dynamite, threw it into the game warden's lap, and said, "You gonna sit there and keep flapping your trap, or are you gonna fish?"

Make a new plan, Stan

FLORIDA BASSIN' • GREG BARTZ

Shutterstock photo
You pull up to your spot, and this is what you see. Better have some backup ideas.

Sometimes you have to throw everything out and start over

So your fishing day isn't going so good. You are overrun by guides taking their customers out, a bunch of people suddenly discover there are bass in the area you've been fishing, and the airboaters are making so much noise you can't think straight. When chaos descends on you, you need to be able to change things up in order to catch fish.

The situation I described may sound a tad comical to you, but this is exactly what happened to me in a tournament a couple of weeks back. I was so frustrated I almost put my new Nitro back on the trailer. Instead, I persevered and wound up winning the tournament. But the only reason that happened was we changed our tactics completely. Let me share with you what we did that day on Lake Kissimmee to catch some bass.

First of all, when Missy and I go out fishing, tournament or not, I rig up a lot of different combinations of baits. I want a range of soft plastics, covering various colors, sizes and shapes. I also want a spinnerbait, a chatterbait, a crankbait, and various topwater rigs tied on rods and ready to grab. Then we go fish. I know it seems like overkill, but trust me, I use them all in search of what may bite best.

In practice, we found that the far shoreline of Lake Cypress had nice bass and we could catch them on a Rebel Pop-R. Who doesn't like catching bass this way? So that was one spot we were good with. I had fished around Brahma Island and Jack's Slough the weekend before with no luck. We have countless spots on Kissimmee, but the way the bass bite was on with that Pop-R, I was confident we could catch a limit early ... as long as we could get out to the bass and not have a ton of boat traffic.

We no more than got started when two guides with their clients roared up on the same spot I was fishing. Now, these are big areas with plenty of room to fish. The problem I had was that while I was sitting still letting them get their clients set up and deciding which way to go, one of them came within a few feet of running into my new boat. After getting the captain's attention, he apologized. Then he went right through the area I had intended to fish, followed by his buddy in the other guide boat.

After watching them catch four bass,

I decided to move on and let them have the area. It was clear that my bait would be no match for the big shiners they were dragging around. I went to another part of Cypress, nothing there. Hit the mouth of Lake Hatchineha, nothing there. Tried two spots in the river, nothing there. Checked the mouth of the river leading to Kissimmee, nothing there. Went to a spot on the north end of the lake, nothing there. By then, it was 10:15 and I had zero bass in the well.

So what should I do? My pattern of topwater bass had been run over. I hadn't found any life anywhere else I stopped. I made the decision to head back down the lake to Jack's Slough and fish the same area that I got nothing in when we practiced.

You may be asking why, and that's a good question. There was something about that spot in practice that made me not completely give up on it. While we hadn't caught anything, we did raise fish in there on our Gambler Big EZ swimbaits. Given the conditions we had, I thought it might be worth a second chance.

My first cast saw my braided line wrap around the eye of my rod, cutting the line and sending my bait flying. I was really getting upset by now. But after seeing one big boil inside the sparse grass lines, I retied and started fishing again.

That's when things got going. We caught a limit of bass inside of 90 minutes. That Big EZ really started to work. We made long casts inside the grass and around the scattered pads and started catching bass one after the other.

We went from one end of the chain just south of the lock to the extreme other end of the chain, and we changed our tactics completely. That is a big chance when you have zero bass in your well.

We went from topwaters to swimbaits. We went from fishing over hydrilla to casting at grass and pads. After getting a read on the day, the conditions, and everything else that was going on, we knew we had to change something. The change was drastic, but it was needed and it paid off. Because we were willing to adapt, we wound up with the biggest bass and heaviest weight of the day.

When you get caught in that situation, you need to be able to make a new plan. A

lot of this comes from time on the water. You have to have that confidence to know you can make a move to someplace you've had success in the past. Maybe it won't be the exact same spot, but to water that is similar.

Don't ever get hung up on one area and beat yourself to death. If I'm not catching anything, I'm going to go try something else — preferably something new, something different, and in water I'm not used to fishing. That's how you gain experience.

You're already out there, so why not explore? Sometimes those changes won't amount to much. But sometimes, they'll reward you handsomely. Don't get stuck — don't be afraid to make a change.

Greg Bartz is a tournament bass fisherman based in Lakeland. Greg fishes lakes throughout Florida's Heartland and enjoys RV travel around the Southeast with his wife and tournament partner, Missy. Contact him at Greg.Bartz@SummitHoldings.com.

PEACE RIVER WILDLIFE CENTER • ROBIN JENKINS, DVM

Photo provided

This great blue heron is suffering from botulism poisoning. The cloth is holding it upright; otherwise, it would fall over.

Why so needy?

Your donations keep us going, but it's got to be the right stuff

Peace River Wildlife Center is extremely grateful to our supporters who donate items from our wish lists. Some of the things we request are pretty self-explanatory. We feed bird seed to birds. It's not rocket science. But why do we ask for puppy pee pads or hose nozzles? Are we waterboarding young dogs here?

Many of the supplies we ask for are for housekeeping and cleaning purposes: Wipes, soap, paper towels, etc. Many of the provisions in that category can be satisfied by any brand or generics. Sometimes we ask for a product by name just because it is common vernacular. When we say we need Kleenex, we mean any kind of plain facial tissue (unscented, no lotion).

But occasionally we do ask for a brand name and there's a reason for it. When we must bathe an animal for some reason, we use original Dawn dishwashing detergent specifically. We get birds that have gotten into discarded cooking oil or automotive grease. We admit birds, snakes and small mammals that have gotten stuck in glue traps, and the only way to free them safely is to gently coat them in an oily substance and slowly peel them off the glue board.

Those creatures then have to be bathed in the grease-cutting Dawn to remove the oily substances from their feathers, fur or scales. No other soap we have tried has proven as safe and effective as Dawn. (This is not a paid endorsement.)

Another brand-name item we love is the Scotch Brite scrub sponge. Generic sponges may cost half the price, but they have to be replaced so quickly that they end up costing

much more. The cheapos just don't hold up to the herculean task of scrubbing dried-on raccoon poo or mouse guts off cage walls and food dishes. Things you didn't know you didn't know (and wish you still didn't).

Sometimes we will ask for a specific product because we know it has the properties we require. Heating pads are tricky because most of them have an automatic shut-off. Product labels can bury that fact in hard-to-find places, or not mention it at all. Through trial and error (lots of error!), we have found a few that will remain on constantly. Constant steady heat on low is what our patients require. It does us no good for a baby squirrel to get chilled every couple of hours, or to have a volunteer posted at the heating pad area to turn the pads back on as soon as they pop off.

Food can be confusing for donors also. While we realize many of our patients will go on to live lives in the wild where they may consider garbage a fine feast, we endeavor to feed fresh, wholesome food-stuffs here. If you have half a bag of fresh kale that you know will go bad before you finish it, we will gladly take it for our rabbits and tortoises. But that cantaloupe rind or rotten tomato is not something we can feed to any of our animals. My philosophy is that if I wouldn't eat it, I won't feed it.

Some "cast-offs" are great, like the leafy tops of many vegetables (carrots, beets, etc.) if they are fresh. We have gotten a plethora of fresh greens, fruits and veggies from our friends at Warden Farms and many people in the community who shop there or grow their own crops. These are not only grown

without pesticides, but last much longer than store-bought produce because they are truly farm-fresh and haven't already spent weeks in warehouses and on trucks.

I don't mean to sound ungrateful, but we never feed bread or hot dogs to anything. Never. Ever. If you have stale or moldy bread or crackers, please just throw them away, along with your potato skins, peach pits and banana peels. PRWC has many well-meaning supporters who unwittingly bring us their garbage, thinking we can use it to feed our animals. We cannot.

If you are ever in doubt about donating something to us, just give us a call. We can use the most unusual things that you might not have considered. SSD or Silvadene cream that is prescribed for wound care management in people, often in excess, is a great topical medication for some of our patients — but it's expensive for us to purchase.

Or we may just say, thanks, but no thanks. Even some of the things we need most at times (such as sheets or towels) we may have too many of at other times. With our extremely limited amount of storage space, we must be constantly cognizant of what we have and what we need on a daily basis.

If you are interested in helping PRWC by purchasing supplies for us, check out our web site at <http://bit.ly/2HZ8tku> for our Wish List. You can also link up to our Amazon wish list through the web site and order from there, support PRWC through the Smile charity program, and send supplies directly to us.

To answer the questions from earlier in this diatribe: We use the hose nozzles to

keep the outdoor habitats clean. We often hear people exclaim, astonished, "It doesn't even stink here!" Our volunteers clean each and every habitat and cage at least daily. Some get cleaned numerous times a day.

The pee pads are placed on the cage floors of bunnies and certain other species that tend to be rather prolific poopers and/or might get their nails or talons stuck in the loops of towels. We also use them for birds that have been affected by botulism or red tide and are partially paralyzed. We make a "donut" out of a towel to support their heads and hold them in some semblance of a natural position. Then we spread a pee pad over the makeshift "nest" to change as necessary to keep the bird clean and comfortable — well, as comfortable as they can be under the circumstances.

We appreciate our community's support that allows us to provide care for the injured and orphaned wildlife of Charlotte County and beyond. Every item donated to us stretches our budget even further. Thanks to the generosity of our supporters, we can provide close to a quarter-million dollars in care to our patients and residents with a budget of only \$100,000 a year.

Peace River Wildlife Center is a nonprofit organization, dedicated to the care, preservation and protection of Charlotte County's native wildlife since 1978. They are open seven days a week year-round, including holidays. Tours are offered from 11 a.m. to 4 p.m. PRWC receives no government funding and relies entirely on private donations. For more info, visit PRWildlife.org, email PeaceRiverWildlife@yahoo.com or call 941-637-3830.

Even the snooklets get excited for whitebait this time of year.

OK —
now it's
spring

STAY FLY • CAPT. REX GUDGEL

The true herald of winter's end has arrived

It seems like I say the same thing in every column this time of year, but another cold front just passed through the area yesterday. This one brought rain, wind and a big drop in both water and air temps. Every year (starting in February) we try to "will" spring (and springtime fishing) to arrive here early to save us from the horrible winters we are subject to. Every year, we get some great weather and great fishing early, and everyone says "Spring is here!"

Then Mother Nature puts us in our place again and again. As I write this, it's 2:58 p.m. on March 20th. In exactly three hours, it will officially be spring. But I don't think I'll rush right out and fish. Luckily, I had blocked out the first part of my week to take care of some other business. I didn't have to cancel any trips, change schedules or pole anyone around in a 15- to 20-mph wind. So, it worked out just right for a change.

I don't need to listen to a meteorologist or look at a calendar to know it's spring. Nor do I have to stand outside and feel the temperature changes, or see how much pollen has accumulated on the tiki bar out back. What is one thing that happens every spring in our waters? Come on, you know this.

Whitebait shows up, right? (Whitebait is a term used that includes different types of small baitfish in our area.) Sure, the days start getting a little longer and the water temps go up. But it's not really spring until the bait makes an appearance here in our neighborhood. How do I find out about the whitebait showing up around here? I don't have to read about it, I don't have to hear about it through the grapevine. I don't even have to take the boat out and go look for it.

No, all I have to do is go to a ramp and take a slow drive-through at

the end of a day. I'll see somebody throwing their leftover bait to all the begging birds (mostly pelicans), right under the posted signs that tell them not to feed the birds. Or even better still, they just dump their leftovers on the ramp and road as they pull the boat out of the water while draining their bait tanks. It's great! We get to step on the still-alive and flippin' bait as we walk to the car, and then run over them when we back the trailer down.

Ahhh, the wonderful signs of spring. Just last week I had a client ask me about all the baitfish on the ramp as we had to tippy-toe through them to get to my boat. I told him that it doesn't rain cats and dogs here in Southwest Florida — it rains whitebait. Honestly, I said it's just very astute conservation tactics and common sense hard at work. I hope he speaks sarcasm.

What does all this whitebait business mean to the fly guys and gals? It means that it is time to take the 10 through 12 weights off the rack. Spray them down with a little Reel Magic and clean them up until they are nice and shiny. Check the drag on the big reels and stretch the fly line. Replace all your leaders and check to make sure that all the welded loops on the fly lines are not cracked or worn. Also check your bigger flies. Take them out of the box and make sure the hooks haven't rusted during the long dormant storage time.

Why do all that? Tarpon, that's why. Some tarpon have been around the passes and backwaters since February, and a couple of weeks ago the pass had a lot of tarpon in it. The tarpon were doing what tarpon do, rolling around, splashing and doing tarpon stuff. I haven't been down south to look yet, but I'm sure there are probably tarpon at Knapp's Point.

Now, don't put the 6 and 8 weights away yet. The redfish and snook have been pretty good and will get better as temps warm and tides get better. The tarpon won't be consistent for a while yet, but, you are going to start seeing them. It won't hurt to have a big rod rigged and on the boat, so get ready just in case.

The arrival of the bait also means that we can start to slowly wean ourselves off the smaller shrimp and crab patterns that we have been throwing this winter. I did say slowly. Like the 6 and 8 weights, don't put them away for the season — but you can start throwing more baitfish style patterns along with the shrimp and crabs.

Anchovy, pilchard and finger mullet patterns will become more of the go-to for a while, until the pass crabs start their spawning drifts on the tides of summer. Don't forget that snook, redfish, trout and all of our fishy friends in the Charlotte Harbor area like those little bite-size crabs as much as the tarpon.

I had to leave the house to run a couple of errands and just got back to the column. OK, now it's officially spring! Also, it's blowing 18 mph and is cooling down quick. Between the full moon, temps down in the 50s tonight, and winds of 15 to 20 mph forecast for tomorrow, I'm really glad I don't have a trip for a couple of days. But, after that — hey it's springtime. Get out and throw a fly!

Stay fly.

Capt. Rex Gudgel is a fly fishing guide in the Boca Grande area and an International Federation of Fly Fishers Master Certified casting instructor. A few problems to solve

A LIFE ON THE WATER • CAPT. VAN HUBBARD

Photo provided

A healthy grassflat has a mix of grass and algae. Too much algae is a bad sign.

Algae, sand and wasted money are killing us

March is marching on and I'm looking forward to April. Hopefully it will bring less wind. The stiff breezes of March are true to form and blowing us off the Gulf frequently. I can fish the nearshore Gulf with east winds, but the west winds stir up beach waters. They are too rough to take folks out on safely. This week was tough as we were forced inside by high winds.

We caught a few fish last week but it was nothing like the calmer week before. On some trips, I was thankful to find ladyfish to bend poles. The abundant schools of Spanish moved on, but baitfish are still here. I expect many more mackerel and kings to pull our strings when it's calm enough we can reach them. We are expecting east winds in coming days, which I predict will allow great fishing again.

It's great to get a break from red tide and all the negative press about it. Stay on all possible prevention and possible cures, because it will not go away forever. We can each do our part by putting less nutrients in our waters to feed blooms. Prayers might help too.

We still have a big problem with algae in our local estuaries. We have a lot of dying red algae showing up everywhere as our varied wind directions blow it around. As waters warm up, this algae dies off and

floats around.

The stuff isn't good: It stinks if it blows up in your neighborhood shores. It also covers much of our bay bottom, suffocating our important seagrasses. Green grasses need sunlight. The algae covers the grasses, killing them. As you motor around shallow areas with dead algae, you will notice it being stirred up by the prop wash. It's also a problem getting hung on our baits and lures.

Beach renourishment is necessary to prevent barrier island properties from falling into the Gulf. It's not a solution — just a bandage to slow down the inevitable. Sands will always continue to shift with winds and waves. Beachfront living is not sustainable, but it's fun between storms. Ask the folks in the Panhandle up around Mexico Beach how it works out when you get a hurricane. Mother Nature will eventually win.

If we go back before Venice did extensive beach renourishment decades ago, our natural hard bottom near Middle Beach offered very productive fishing. Capt. Scotty Moore, myself and a few others enjoyed excellent fishing on this bottom for snook, reds, trout and more.

Ask Capt. Mike Anderson of Reel Animals to dig up their show filmed on this very spot. They were taken to a super-secret spot by one of the newer guides in need of exposure.

My clients were catching big reds and snook as fast as we could until they moved in and ran us off. Their diver swam in to shoot impressive underwater footage of the schools of snook we were enjoying. I'm sure Mike could find the footage to prove just how awesome this hard bottom was — before beach renourishment and red tides killed it.

We need to educate some of our Charlotte County commissioners about hard bottom mitigation. They are concerned about the costs but lack any understanding as to why the natural hard bottom is low quality now. With hard bottom in shallow water, beach renourishment tends to cover it up with sand. Understand that our longshore drifting of sand is from north to south, and it migrates with wave action.

I suspect the problem with fish holding locally longer is exactly the same as our beach hard bottom. But instead of sand covering it, red tide killed all the marine life — barnacles, sponges, corals, etc. — that held minnows and larger fish there. Either way, with no reason to stay, the fish don't.

Growth and "progress" are not going away, but sustainability must be considered. I welcome any opportunity to help educate our commissioners about the importance of natural hard bottom. A manmade substitute is never going to be better.

I'm glad they are concerned about costs. How about increasing impact fees from 40 percent to 100 percent? How about all the taxpayers' "investment" wasted on Murdock Village? These commissioners did not create this mess, but they are giving it away to get it back on property tax rolls. Let's see the total amount we spent on Murdock Village projects. When we add up the initial costs, litigation, loss of taxes and interest, it comes to real money! Hundreds of millions of dollars, surely.

Fishing has long been and still is crucial to our local economy. Yes, construction is big too — but if we don't maintain our quality of life, no one will want to live here!

This area was settled by fishermen because no one else could deal with the heat and bugs. Now that we have A/C and insect control, it's been conquered by outsiders who are more concerned with money than our environment. Please consider what we are leaving for our grandchildren. I've enjoyed my four decades here, but it just might be time to move on.

Capt. Van Hubbard is a highly respected outdoor writer and fishing guide. He has been a professional USCG-licensed year-round guide since 1976, and has been fishing the Southwest Florida coast since 1981. Contact him at 941-468-4017 or VanHubbard@CaptVan.com.

CRAB FETTUCCINE

- 1 pound lump crab meat, drained
- 12-oz box fettuccine noodles
- 1 stick butter
- 2 cloves garlic, minced
- 2 cups whipping cream
- 1/2 cup sherry
- 10 oz shredded Parmesan cheese
- 1/4 tsp pepper
- 1/3 cup parsley

Cook fettuccine according to box directions and drain. While fettuccine is cooking, heat butter and garlic in skillet on medium heat until garlic is lightly browned (do not burn). Add cream, sherry, crabmeat and pepper. Heat 3 minutes until sauce begins to bubble, stirring occasionally. Add Parmesan and stir for 1 minute until cheese is melted. Remove from heat and pour over drained fettuccine. Stir well to coat all noodles. Sprinkle with parsley. Serves 6.

SEAGRASS

FROM PAGE 2A

scavenger hunt of sorts — a hunt for data.

The data they collect will help scientists get a better picture of the health of the Harbor, and will ultimately help communities make more informed decisions about how the resource is managed, says Florida Sea Grant agent Betty Staugler, who is leading the University of Florida citizen science project.

Training for the Eyes on Seagrass program is set for 7 to 8:30 p.m. April 11 at the Charlotte County Environmental Campus (25550 Harborview Road, Port Charlotte).

Citizen scientists will collect data during the first survey, April 12 and 25, and a second survey, July 16 and 29, in upper Charlotte Harbor along the east and west shores.

They will focus on seagrass and seaweed because these two plants provide clues about the status of the Harbor, says Staugler.

"Seagrasses reduce shoreline erosion, oxygenate the water, capture carbon, trap sediments and improve water clarity," she says. "Seagrasses also form extensive structural habitat that supports a diverse array of species, including economically valuable fishes and invertebrates. About 85 percent of the species targeted in commercial and recreational fisheries in the Charlotte Harbor estuary depend on seagrasses for at least part of their life cycle."

So, when seagrasses are thriving, that's

good news for the entire ecosystem. Seaweed, on the other hand, does better under conditions that are not as favorable to seagrasses, Staugler says.

"When there are more nutrients in the Harbor, seaweeds have a competitive advantage over seagrasses," Staugler explained. "Unattached seaweeds also shade rooted seagrasses, reducing their ability to photosynthesize and ultimately shortening their growing season. From an ecosystem perspective, the shift from seagrass to seaweed could have cascading impacts on animals dependent upon seagrass for food and shelter."

Volunteers will receive monitor gear and will work in teams of three anytime between April 12 and 25, and July 16 and 29 to survey seagrass and seaweed in upper Charlotte Harbor along the east and west shores. Volunteers must form their own teams (at least three individuals) and provide their own boat transportation, water shoes, mask, snorkel and fins. Twenty survey teams are needed.

For more info about the program or to preregister your team, contact Betty Staugler at staugler@ufl.edu or call 941-764-4346.

Alrighty then — now you know what needs to be done and how you can help. Those of you who have been complaining, it's time to step up and do something that will actually be productive. Betty is waiting.

Contact Capt. Josh Olive at 941-276-9657 or Publisher@WaterLineWeekly.com.

WaterLine FISHING RULES

State and federal regulations for Southwest Florida waters as of March 26, 2019. All bag limits are per harvester per day. Other limits may apply. For full rules, visit MyFWC.com/fishing and GulfCouncil.org/fishing_regulations.

LICENSES

Resident saltwater or freshwater:

Annual \$17, 5-year \$79. If you fish from shore in salt water only, a license is required but it is free. A combo license for both freshwater and saltwater fishing is \$32.50 annually.

Resident senior: If you are a Fla. resident 65 or older, your driver's license or ID card replaces your fishing license. **Gulf Reef Fish Survey (see below) and tarpon tags still required.**

Nonresident saltwater or freshwater: 3 days \$17, 7 days \$30, annual \$47. Free shore fishing license not available for nonresidents.

Gulf Reef Fish Survey (required to harvest red snapper, vermilion snapper, gag, red grouper, black grouper, amberjack, almaco jack or triggerfish) (see note 14): No charge

Annual permits (required only when a license is required): Snook \$10, lobster \$5

SALTWATER FISH

ALMACO JACK

Limit 100 pounds in state waters, limit 20 in federal waters; notes: 9,11,14

AMBERJACK, GREATER

34" min.; limit 1; **open Aug. 1 - Oct. 31**; notes: 1,3,4,5,7,9,14

AMBERJACK, LESSER BANDED RUDDERFISH

Slot 14" to 22"; aggregate limit 5; notes: 1,4,5,7,9,14

BARRACUDA

Collier, Monroe, Miami-Dade, Broward, Palm Beach and Martin counties only: Slot 15" to 36"; limit 2 (max. 6 per vessel; may possess one per vessel over 36"); notes: 1,5

Kill on sight; no limits

UNREGULATED SPECIES

In state waters, limit 100 pounds or two fish, whichever is more: Blackfin tuna, catfish, cero mackerel, croaker, grunts, ladyfish, little tunny, jack crevalle, pinfish, porgies, rays, sand trout, silver trout, spadefish, whiting, etc. See <http://bit.ly/2HHKTOQ>.

NO-HARVEST SPECIES

In addition to species previously listed, harvest of bonefish, Nassau grouper, spotted eagle rays, manta rays and sawfish is prohibited.

Visit <http://bit.ly/10nYDlz> for full rules, including more no-harvest species.

NOTES

1. Measured fork length (the straight line distance from most forward part of the head with mouth closed to the center of the tail).

2. Measured total length (the straight line distance from the most forward part of the head with the mouth closed to the farthest tip of the tail with the tail squeezed together while the fish is lying on its side).

3. Bag limit zero for captain and crew of for-hire vessels on a paid trip.

4. Reef fish gear rules apply. Anglers must use inline circle hooks when using natural baits, and must possess a dehooking device. Venting tool not required. Also, cannot be taken by powerhead in the reef fish stressed area (see <http://bit.ly/2xDjLVR>).

5. Must remain in whole condition (head and tail intact) until landed ashore. Removal of gills and internal organs OK. **Cannot be used as cut bait.**

6. Harvest by spear, gig or bow prohibited.

7. Use of multiple hooks (more than one point on a common shank, like a treble hook) in conjunction with natural bait prohibited.

8. Harvest by snatching prohibited.

9. Reef fish; illegal to use as bait in federal waters. In state waters, legal-size reef fish may be used as bait but must remain in whole condition and count against bag limit.

10. Included in aggregate 4 grouper bag limit.

11. Included in 20-fish reef fish aggregate bag limit in federal waters (includes vermilion snapper, lane snapper, almaco jack, gray triggerfish and all tilefish species).

12. Closed Feb. 1-March 31 in federal waters outside 20-fathom break ONLY.

13. Included in aggregate snapper bag limit of 10 fish.

14. Participation in Gulf Reef Fish Survey required to harvest. See <http://bit.ly/15D6Hip>

15. No bag limit in federal waters.

16. HMS permit required to target or harvest in federal waters; see <http://bit.ly/2R5mFe8>

FRESHWATER FISH*

LARGEMOUTH BASS: No min. size; limit 5. Only one fish can be longer than 16" (tournaments may apply for a permit allowing participants to weigh more than one over 16")

SUNFISH (all species excluding crappie): Aggregate limit 50

CRAPPIE: Aggregate white/black limit 25

AMERICAN EEL: Min. 9", limit 25

BUTTERFLY PEACOCK BASS: Max. 17", limit 2 (may possess 1 over 17")

GRASS CARP: Must be released immediately.

OTHER EXOTIC FISHES: Keep and eat or otherwise destroy; may not be used as live bait.

UNREGULATED: No limits on bowfin, pickerel, catfish and gar (exc. alligator gar).

PROHIBITED: Alligator gar, sturgeon.

* Visit <http://bit.ly/10nYJQr> for full rules, including special management areas.

Start them out the right way.

Anyone born on or after June 1, 1975 must pass a hunter safety course before purchasing a Florida hunting license.
