Guantanamo Bay's Downtown Lyceum Re-Opens For Business

MWR's downtown Lyceum at Naval Station Guantanamo Bay, Cuba re-opened for business after repairs to the theater's speakers and sound system, July 27. MWR will host the official re-opening with a "Summer Blockbuster Weekend" event featuring newly released movies, free concessions, and giveaways while supplies last.

Naval Station Guantanamo Bay, Cuba

Public Affairs

Morale, Welfare and Recreation's (MWR) downtown Lyceum at Naval Station (NS) Guantanamo Bay, Cuba re-opened to the public, July 27.

The theater was closed July 22 as MWR officials conducted a week-long troubleshooting and maintenance operation focused on issues with the Lyceum's speakers and sound system.

In a press release dated July 25, MWR officials announced, "The sound issues have been repaired at the GTMO MWR downtown Lyceum. The downtown Lyceum will re-open with a noticeably better sound this Friday, July 27, with a 'Summer Blockbuster Weekend.'"

Commander, Navy Installations Command (CNIC) recently partnered with Guantanamo Bay's MWR to convert the installation's theaters from 35 millimeter film projection to a digital projection system. The \$150 thousand upgrade was intended to increase picture and sound quality.

"The first thing you'll notice is that the picture is now breathtakingly clear," said NS Guantanamo Bay MWR Director Tara Culbertson. "It's like watching a movie in high definition (HD) at home, only it is much larger. However, the digital conversion did not repair our sound problems as we had hoped it would. In the past six months, we have replaced the projector systems, sound processor computers and speakers. We are re-wiring our speakers and amplifiers to hopefully

Guantanamo Bay's Utility Plant Upgrades Software, Residents Prepare For Power Outage

Naval Station Guantanamo Bay, Cuba

Public Affairs

Utility Plant (Power Plant 4) officials at Naval Station (NS) Guantanamo Bay, Cuba will conduct a base-wide power outage, affecting the Windward portion of the installation, July 29.

The outage, third in a series of four, is being conducted to safely install, test and transfer to an updated software (SKADA) operating system.

"This upgrade supports the system that controls the generators and base power distribution operations," said Naval Facilities Engineering Command (NAVFAC) Southeast, Guantanamo Bay Production Division Director Art Torley. "It will be transparent to

our customers, but once completed, it will provide NS Guantanamo Bay with a more reliable power distribution system."

NS Guantanamo Bay's Utility Plant serves as the main plant on base, providing electrical power for both the Leeward and Windward portions of the installation, and the power required to supply all fresh water to the community.

"This will be a base-wide outage, but Leeward and Radio Range will be on back-up generators along with other critical facilities such as the Navy Exchange and Gold Hill galley," said Torley. "I would like to thank the GTMO community for their patience and understanding while we make the improvements to our power distribution system."

According to Torley, per commanding officer approval, the next tentatively scheduled base-wide power outage will take place July 29.

"I encourage departments and residents to contact me to schedule a tour of our plant where all of our power and water is produced, to help understand how important it is for us to conserve these resources," said Torley.

Currently, the Utility Plant supplies power to 1,032 facilities and 415 housing units at NS Guantanamo Bay.

Navy Announces SAPR Training Requirements

Chief of Naval Personnel

Public Affairs

The Chief of Naval Personnel announced, July 24, reporting requirements for completion of Sexual Assault Prevention and Response (SAPR) Leadership and Fleet training.

SAPR Leadership (SAPR-L) training, currently being deployed, and the SAPR Fleet (SAPR-F) training to be deployed in October, will be reported via the Fleet Training Management Planning System (FLTMPS), as announced in NAVADMIN 225/12.

"The SAPR-L/F training will provide critical tools to reduce sexual assault and promote a culture of respect and professionalism in our force, where each Sailor is motivated to intervene and stop these crimes," said Capt. Scott Seeberger, SAPR Task Force chief of staff. "Recording the training in FLTMPS will allow

the Navy to monitor the progress we are making in getting the SAPR leadership and fleet message out to our Sailors at every level."

Detailed in NAVADMIN 225/12, recording completion in FLTMPS is required for SAPR senior leadership/triad, SAPR-L and SAPR-F training. To record the training, command training officers must have a command-approved FLTMPS account and access to the FLTMPS SAPR-L/F learning event completion form (LECF) in order to document SAPR-L/F completions.

Completion of all training must be reported using FLTMPS no later than September 30 for SAPR-L and December 31 for SAPR-F.

Applicants may request FLTMPS access using the online form at: https://ntmpsweb.nwptf.nuwc.navy.mil/oars_net/default.aspx.

New And Expanded Programs Place Sailors In Critical Billets

Chief of Naval Personnel

Public Affairs

The Navy is aggressively addressing gaps at sea and working to place Sailors with the right experience levels and skill sets into high-priority Fleet billets via several new and expanded initiatives announced, July 26.

“The Navy is built on three tenets: Warfighting First, Operate Forward and Be Ready. These three tenets rely upon the Navy having people in warfighting billets,” said Vice Adm. Scott R. Van Buskirk, Chief of Naval Personnel. “We have worked to stabilize the size of the Force over the past few years and ensure the right paygrade mix of Sailors in each individual rating, but currently nearly one third of our enlisted ratings remain undermanned due to perennial retention challenges. Combined with our normal numbers of Sailors on limited duty, operational deferment, in training and transit, we have critical gaps at sea that need to be immediately addressed.”

“As our Navy is in ever-increasing demand around the world, filling these gap billets at sea has become more critical,” continued Van Buskirk. “The gapped billets at sea that affect our operational readiness often require our most senior Sailors, E5 and above, in our undermanned critical skills ratings. Although we have significantly improved our balance, we must distribute the available Sailors to our top-priority billets at sea.”

Navy’s efforts to ensure high-priority billets at sea are manned are a continual focus. Over the past six months, Navy introduced several voluntary and structural measures to improve at-sea manning, including the Voluntary Sea Duty Program (VSDP), expanded Sea Duty Incentive Pay (SDIP), adding additional sea duty billets in future years, and increasing accessions. While these actions gain traction, Navy determined additional measures were necessary to reduce gaps in critical skills and needed deckplate leadership on units about to deploy.

To address these sea duty manning challenges, and to match the right Sailors who have the right skills with the priority jobs at sea, the Navy is utilizing several short- and long-term initiatives, including:

- Changes to Career Management System Interactive Detailing or CMS/ID, announced in NAVADMIN 226/12. Beginning with the August 2012 CMS/ID cycle, a single set of sea and shore billets, prioritized by U.S. Fleet Forces Command, U.S. Pacific Fleet and Navy Personnel Command to reflect the highest-priority Fleet billets, will be advertised. Detailers will fill all advertised billets each cycle, and Fleet readiness will be the ultimate factor in filling assignments

and this change ensures the highest-priority requirements are filled.

- Limited Directed Detailing, announced in NAVADMIN 227/12. Over the next few months, Navy will detail selected Sailors with critical skills back to operational sea duty early. Under the limited directed detailing initiative, Sailors who have completed a minimum of 24 months on shore duty may be contacted by their detailer and directed back to a sea duty assignment prior to their projected rotation date. This initiative will target between 200 and 400 Sailors who have the required critical skills, leadership and experience needed at sea now to improve manning on Navy’s imminent deployers.

- Chief Petty Officer (CPO) Early Return to Sea program, announced in NAVADMIN 230/12. Navy will curtail the shore duty of selected senior enlisted Sailors of ranks E7 to E9 and detail them back to sea to fill operational billets that cannot be filled by rotating Sailors. This program is an update to the previous CPO to Sea program, and is designed to ensure high-priority senior

leadership positions at sea are manned for operational readiness.

- Expansion of the Voluntary Sea Duty Program, announced in NAVADMIN 229/12. The Navy is extending the Voluntary Sea Duty Program for an additional year and adding High-Year Tenure waiver consideration as an incentive for senior enlisted Sailors who volunteer. Originally announced in January 2012, and updated in NAVADMIN 205/12, VSDP encourages highly-trained and motivated Sailors to voluntarily extend their enlistment in their current sea duty billet beyond their prescribed sea tour, to terminate shore duty and

accept new orders to a sea duty billet, or to accept back-to-back sea duty orders beyond their prescribed sea/shore flow. Other benefits of VSDP include; geographic choice and stability; PTS deferment; and Sea Duty Incentive Pay, when eligible.

“With programs like Limited Directed Detailing, CPO Early Return to Sea, Voluntary Sea Duty Program, and changes to CMS/ID, we’re aiming to be more aggressive in the distribution process. These actions should reduce the short-notice actions to man high-priority billets, such as cross-decking and diverts,” said Van Buskirk. “I highly encourage Sailors to be proactive, speak with their chain of command, and consider all the voluntary measures Navy has in place to pursue sea duty. Professionally, volunteering may offer additional training opportunities, and sustained superior performance at sea is the hallmark for top evaluations and advancement opportunities.”

Sailors can access more information about CMS/ID changes, the Voluntary Sea Duty Program, Limited Directed Detailing, and CPO Early Return to Sea at <http://www.npc.navy.mil>.

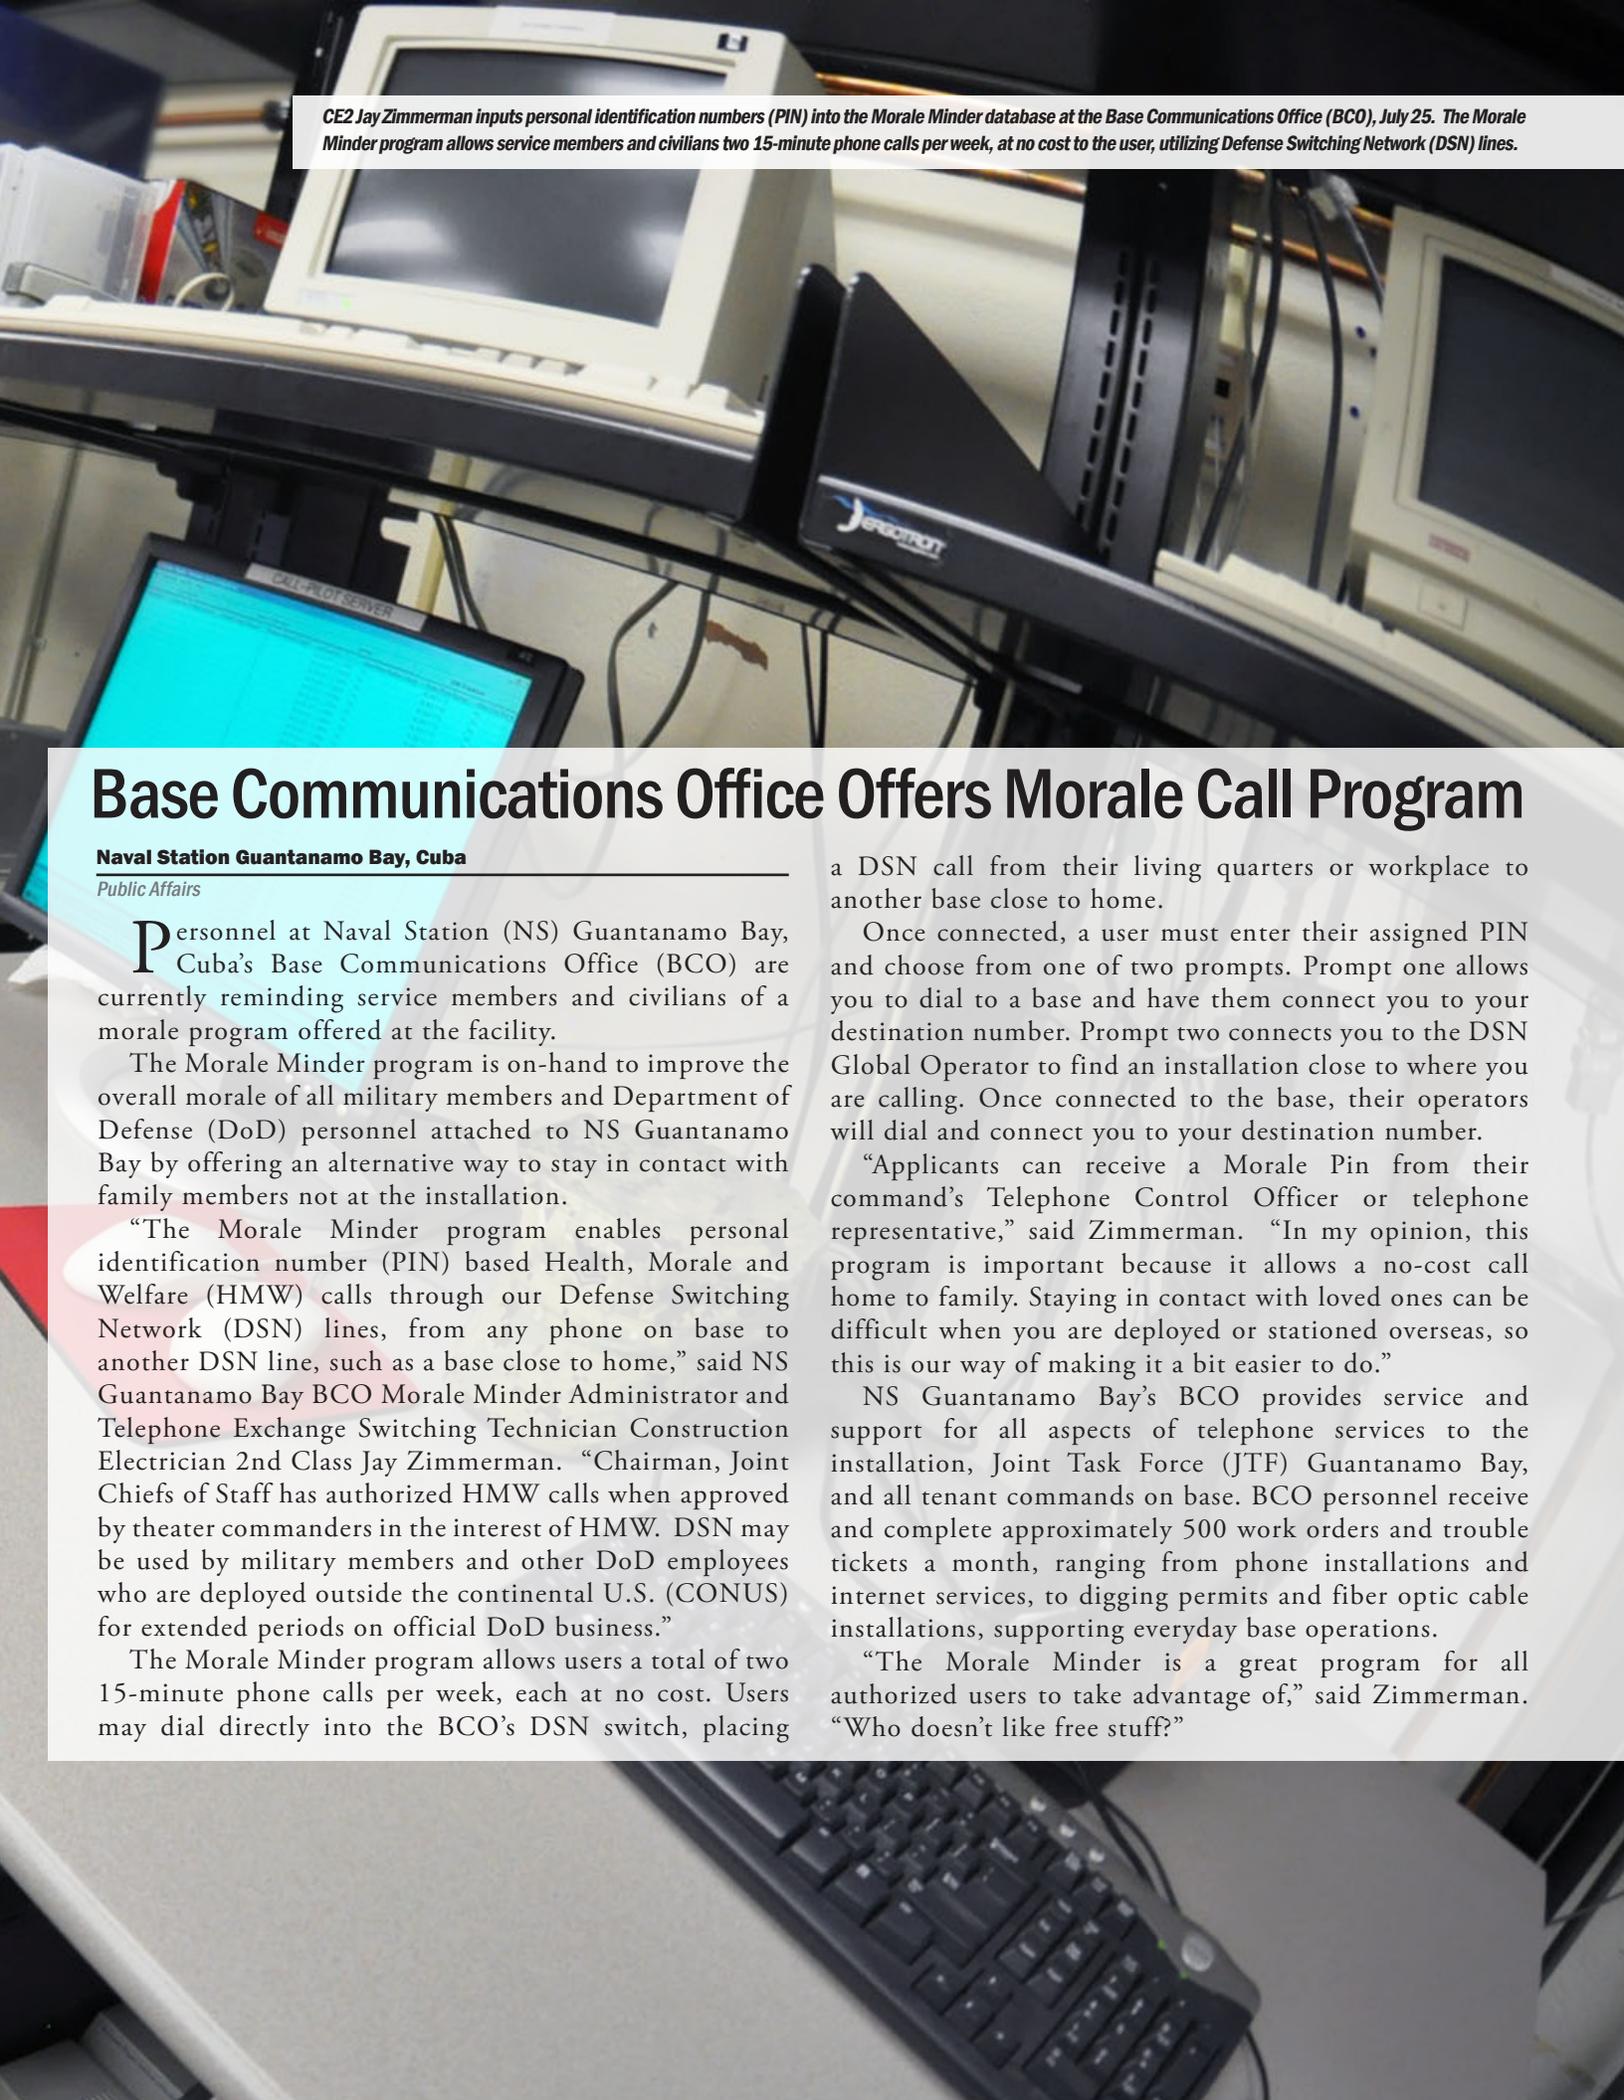

“With programs like Limited Directed Detailing, CPO Early Return to Sea, Voluntary Sea Duty Program, and changes to CMS/ID, we’re aiming to be more aggressive in the distribution process. These actions should reduce the short-notice actions to man high-priority billets, such as cross-decking and diverts...”

CE2 Jay Zimmerman inputs personal identification numbers (PIN) into the Morale Minder database at the Base Communications Office (BCO), July 25. The Morale Minder program allows service members and civilians two 15-minute phone calls per week, at no cost to the user, utilizing Defense Switching Network (DSN) lines.

Base Communications Office Offers Morale Call Program

Naval Station Guantanamo Bay, Cuba

Public Affairs

Personnel at Naval Station (NS) Guantanamo Bay, Cuba's Base Communications Office (BCO) are currently reminding service members and civilians of a morale program offered at the facility.

The Morale Minder program is on-hand to improve the overall morale of all military members and Department of Defense (DoD) personnel attached to NS Guantanamo Bay by offering an alternative way to stay in contact with family members not at the installation.

"The Morale Minder program enables personal identification number (PIN) based Health, Morale and Welfare (HMW) calls through our Defense Switching Network (DSN) lines, from any phone on base to another DSN line, such as a base close to home," said NS Guantanamo Bay BCO Morale Minder Administrator and Telephone Exchange Switching Technician Construction Electrician 2nd Class Jay Zimmerman. "Chairman, Joint Chiefs of Staff has authorized HMW calls when approved by theater commanders in the interest of HMW. DSN may be used by military members and other DoD employees who are deployed outside the continental U.S. (CONUS) for extended periods on official DoD business."

The Morale Minder program allows users a total of two 15-minute phone calls per week, each at no cost. Users may dial directly into the BCO's DSN switch, placing

a DSN call from their living quarters or workplace to another base close to home.

Once connected, a user must enter their assigned PIN and choose from one of two prompts. Prompt one allows you to dial to a base and have them connect you to your destination number. Prompt two connects you to the DSN Global Operator to find an installation close to where you are calling. Once connected to the base, their operators will dial and connect you to your destination number.

"Applicants can receive a Morale Pin from their command's Telephone Control Officer or telephone representative," said Zimmerman. "In my opinion, this program is important because it allows a no-cost call home to family. Staying in contact with loved ones can be difficult when you are deployed or stationed overseas, so this is our way of making it a bit easier to do."

NS Guantanamo Bay's BCO provides service and support for all aspects of telephone services to the installation, Joint Task Force (JTF) Guantanamo Bay, and all tenant commands on base. BCO personnel receive and complete approximately 500 work orders and trouble tickets a month, ranging from phone installations and internet services, to digging permits and fiber optic cable installations, supporting everyday base operations.

"The Morale Minder is a great program for all authorized users to take advantage of," said Zimmerman. "Who doesn't like free stuff?"

make a final fix to this problem.”

During the initial repairs, Sailors attached to the installation's Calibration Laboratory volunteered to provide technical support.

“I was at Saturday's premier showing of ‘Amazing Spiderman’ when they experienced the audio issues,” said Electronics Technician 1st Class Rolando Roblesnavarro, Air Operations Department and Calibrations Facility Leading Petty Officer. “Being an Electronics Technician, I was curious to see if I could help out. The following Monday, Electronics Technician Master Chief Michael Callaway asked if I wanted to assemble my team to join the troubleshooting efforts. My men and I jumped on the opportunity to help the community and learn a new electronic system.”

Electronics Technician 2nd Class Christopher Whitlow, Electronics Technician 2nd Class Larry Alexander, and Construction Electrician 2nd Class Jay Zimmerman (Base Communications Office) supported Roblesnavarro during the repairs.

“We started the troubleshooting process by reverse engineering the system to identify how the components were connected to each other and establish a basic flow of signals through the system,” said

Roblesnavarro. “After developing a system diagram, we were then able to logically and systematically isolate the faulty components.”

According to Roblesnavarro, offering technical assistance was an easy choice to make for the electrician team.

“As military members stationed here, we are direct beneficiaries of MWR events and facilities,” said Roblesnavarro. “We are not only involved in our military duties, but also the community. My kids were so excited to hear that daddy was helping to fix the movie theater. They are equally excited to see the movie theater back to full operation. GTMO is a small island community and limited in some things, but it's a community who has overcome many obstacles by pulling resources together to accomplish tasks. The people involved in this repair are an example of just that.”

According to the aforementioned press release, “The Dark Knight Rises” will be shown at 8 p.m. followed by “Chernobyl Diaries” at 11 p.m., July 27. The event will also feature music, free hotdogs, popcorn, sodas, bottled water and promotional giveaways from 7 p.m.-8 p.m. (while supplies last), kicking off the “Summer Blockbuster” weekend.

DoD Aims To Improve Voluntary Education Safeguards

Lisa Daniel

American Forces Press Service

The Defense Department is nearing completion of an agreement with post-secondary schools to ensure service members have the best possible experience in continuing their education, a senior Pentagon official said today.

The department will release later this summer a memorandum of understanding to be signed by colleges, universities and technical schools to make costs, schedules and other particulars transparent to service members, Charles E. Milam, principal deputy assistant secretary of defense for military community and family programs, said. He made the comments at the Department of Defense Worldwide Education Symposium in Las Vegas, held every three years to improve and expand voluntary education for service members and their spouses.

An online draft of the new instruction says all schools providing high school completion and post-secondary education through the DoD Tuition Assistance Program must agree to the multi-agency memorandum of understanding and have a signed copy on file with DoD prior to service members receiving approval of tuition assistance. Each service determines eligibility for tuition assistance, which is capped at \$250 per credit hour, or \$4,500 per year, DoD officials said.

DoD developed the memo with the departments of Education, Veterans Affairs, and Justice, as well as the Consumer Financial Protection Bureau as part of an executive order President Barack Obama announced at Fort Stewart, Ga., in April to ensure that service members, veterans and their families can get the information they need about the schools where they spend their education benefits.

The executive order “will make it easier for military members and veterans to make informed decisions about financial aid and paying for college,” Milam said, and “it takes a number of steps to protect our personnel.”

“The memorandum is meant to ensure service members have the widest variety of choices for their continued education,” he added. “It puts important educational protections for service members and

government oversight into writing.”

The Las Vegas symposium shows the department's commitment to higher education for service members, Milam said, and is important for building relationships between the military and educational institutions. “We've set ambitious goals for this symposium, and hope to use this time to develop ideas that are imperative for delivering quality education programs and forming critical partnerships across multiple sectors. Together, we will explore strategies to effectively deliver voluntary education programs that complement a service member's capacity to serve, while accomplishing their educational goals.”

Milam referred to a pledge made by Defense Secretary Leon E. Panetta who has said that when it comes to benefits such as continuing education, the department “will not break faith” with service members and their families even during tight economic times.

Service members enrolled in more than 860,000 graduate and undergraduate courses in fiscal 2011, Milam said, and most of those were online. “Our military community will not always have the ‘normal’ college experience of living on campus and attending classes but thanks to online courses and other distance learning methods, our service members have been able to pursue educational goals regardless of their location.”

As the military draws down in Afghanistan, the department is embarking on a new chapter after 10 years of war. “We are at a point of transition where we are resizing our military, where we face competing budget priorities, and where we are facing a new type of technical warfare.” All will require a well-trained, well-educated force, Milam added.

Air Force Master Sgt. Brian Nelson, a supervisor of academics at the Community College of the Air Force who attended the symposium, said continuing education is one of the most important benefits to airmen. “I think education is at the forefront, as far as voluntary things they can do to go to school and get certifications.” He said 23 percent of airmen have at least an associate's degree and the Air Force would like to see every airmen have at least that level of education before they transition out.

Port Ops Personnel Conduct Basic Boat Coxswain Course

Naval Station Guantanamo Bay, Cuba

Public Affairs

Service members attached to Naval Station (NS) Guantanamo Bay, Cuba's Port Operations and Security departments facilitated a Shore Installation Management Basic Boat Coxswain (SIM BBCC) course, July 23-27.

The course was held to provide a standardized Shore Installation Management (SIM) program for the training and qualification of basic boat coxswains and crewmembers.

"This training supports mission requirements by teaching coxswain's the proper techniques and safe-of-boat handling so there is no damage to equipment or loss of life," said NS Guantanamo Bay Port Operations SIM BBCC Instructor Boatswain's Mate 2nd Class Christopher Pullon. "This class

provides an in-depth coverage of the 'rules-of-the-road' when applied to operating small craft on the water."

In coordination with classroom training, six service members participated in hands-on training during the week-long course, including anchoring procedures, alongside towing, astern towing, man overboard drills, and port and starboard pier-side landings.

"After completions of this course, the students will be expected to participate in on-the-job training, gaining more experience and a better understanding of the basic knowledge as a coxswain," said Pullon.

As a coxswain, small boat operators are responsible for basic seamanship, an advanced knowledge of all aspects of their vessels, and all safety procedures when operating a craft.

BM2 Christopher Pullon instructs BM2 Corey Henry and MASN Justin Cook on the safe handling and proper anchoring procedures for a small craft during the Shore Installation Management Basic Boat Coxswain Course, July 25. The week-long course featured hands-on training covering the basics of small boat operations and seamanship.
