

SHELL PESTICIDES MEET THE NEEDS OF FARM AND INDUSTRY

How can they serve you?

SHELL Chemical Company, in cooperation with federal, state and local agricultural specialists, is continually striving to help farmers reach higher agricultural goals. Products such as aldrin, dieldrin, endrin, methyl parathion, Phosdrin® and Vapona® Insecticides have been of major assistance to the farmer, homeowner and industry. So have D-D® and Nemagon® Soil Fumigants and Aqualin® herbicide, slimicide, biocide.

These products have proved their effectiveness and versatility by solving many of the economic pest problems confronting the farmer. Shell insecticides are prov-

ing equally useful in a growing number of non-agricultural applications in industry and the home.

The never-ending search for additional uses of established Shell pesticides and for new, improved products to help you, is a welcome assignment at Shell Chemical Company — chemical partner of agriculture and industry.

Get full details about the Shell pesticide that fits your needs at your nearest Shell Chemical Co. District Office, or write: Shell Chemical Co., Agricultural Chemicals Division, 110 West 51st Street, New York 20, N. Y.
