

Every pest has its day—

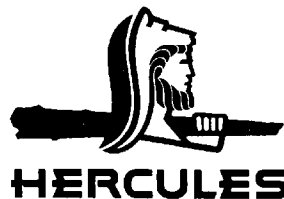

Some won't last that long!

And the days are numbered for a lot of other weed and insect pests when Hercules® pesticides are used. Delnav® miticide protects citrus and livestock. Toxaphene puts an end to a perfect day for boll weevils and many other cotton pests. And Metadelphene® insect repellent makes a frustrating day—or night—for biting insects.

Some pests will never see the light of day. Like crabgrass. The seeds can't germinate . . . that is if Azak* is used. Azak* is one of Hercules Powder Company's new pre-emergence herbicides.

Hercules has a variety of pesticides. The kind that won't let pests reach an old age. For more information or help for you or your customers' everyday pesticide problems, contact the nearest sales office listed below or write Hercules Powder Company, Wilmington, Delaware 19899. Hercules is ready to help . . . day after day after day.
