

HAS AN IDEAL PESTICIDE FOR EVERY PURPOSE

INSECTICIDES

MALATHION—provides truly broad-spectrum control, with exceptionally low mammalian toxicity. Available in all popular formulations for application in any type of equipment.

THIMET[®] phorate—provides systemic control of many pests attacking corn, peanuts, potatoes, sugar beets, wheat, alfalfa, ornamentals and other crops.

CYGON^{*} dimethoate — controls house flies up to 8 weeks or longer. Also used to control many pests attacking fruit, vegetables and ornamentals.

THIOPHOS[®] parathion—one of the first, and still highly effective and widely-used organic phosphates.

FUMIGANTS

AERO[®] liquid HCN—controls all common insects infesting stored grain.

CYANOGAS[®] calcium cyanide—controls rodents (A-Dust) and stored grain pests (G-Fumigant).

FUNGICIDE

CYPREX[®] dodine—effectively

*Trademark

combats a wide number of diseases attacking fruit, nuts and ornamentals.

WETTING AGENTS

VATSOL[®] — useful in reducing the surface tension of water in order to increase the effectiveness of insecticide and fungicide sprays and dusts. Available in powder, pellet, paste and liquid forms. A 70% liquid formulation is marketed under the trade-name of SUR-TEN^{*}.

HERBICIDES

AMINO TRIAZOLE—provides outstanding control of Canada Thistle.

CYTROL[®]—a liquid form of AMINO TRIAZOLE which is also highly effective against quackgrass.

AERO CYANATE—provides outstanding weed control in onions.

GROWTH REGULANT

CYCOCEL[®]—produces more compact red poinsettias with brighter colored bracts and deeper green foliage. Also useful on lilies, geraniums, chrysanthemums, camellias and carnations.

Before using any pesticide, stop and read the label.
