

SPARTAN HOLD NOTRE DAME TO 2-2 DRAW

NOTRE DAME AND SPARTAN played to a 2-2 draw in a football match at Kensington Oval yesterday. Keith Walcott and Desmond Johnson scored one each for Spartan while L. Gill, who played at centre forward for Notre Dame, netted both goals for his side.

Tennis Captain Back Home

Eric Taylor, Captain of the Barbados tennis team in the Brandon trophy back yesterday from Trinidad, told the Advocate that he and his partner, Ralph Lee, had played exceptionally good tennis and he appreciated the spirit in which Leitch and Carter played throughout the series.

The game began with Spartan defending from the southern end of the pitch. Spartan played with one man short. McCollin on the right wing for Notre Dame centred across the Spartan goal area just after play began, but Cozier playing his first game since his arm was broken two seasons ago, collected the ball and kicked it out into mid-field. Notre Dame started to press and F. Daniel, their left winger, made two good tries at the goal, but Cozier was always there to clear.

At this stage most of the play was concentrated in the Spartan goal area as Notre Dame pined on the pressure. About 20 minutes after play in the first half, Mandeville ran down unmarked into the Spartan goal area and kicked the ball as the cross bar. The ball rebounded into play but before Cozier could collect and clear, centre forward Gill kicked the ball into an empty goal to put one up for Notre Dame.

With the score one-love in Notre Dame's favour, Spartan renewed their efforts and about five minutes after Notre Dame had scored their first goal, Keith Walcott equalised for Spartan. Jemmott at left wing made a try for the second goal but Lord, the Notre Dame goal-keeper saved.

Notre Dame scored their second goal when L. Gill, still at centre forward position, on receiving a long low pass, ran down unmarked in the Spartan goal area and kicked the ball into the left corner of the goal out of the reach of Cozier. Notre Dame did not slacken their efforts and when Referee Coppin blew for half time they were still pressing.

After half time Notre Dame still continued their attacking game, but a corner kicked by Boyce gave Spartan their second goal as Johnson headed the ball into the net.

Both teams were still "fighting" for mastery when the whistle sounded.

The teams were—Spartan: Cozier, Medford, Giltner, Cadogan, Boyce, Walcott, Johnson, Chase, Griffith and Jemmott.

Notre Dame: Lord, Straughn, Brown, Archer, Daniel, Roberts, McCollin, Mandeville, Gill, Parris and F. Daniel.

The Referee was Mr. O. S. Coppin.

Shin-kicking Contest

LONDON, April. Two men wearing steel-tipped, heavily nailed high shoes are scheduled to take part in a shin-kicking contest as part of the Festival of Britain celebrations this summer.

This strange combat will be staged in the town of Chipping Campden, in Gloucestershire. There are no rules and no referee. No kicks are barred if they land on the target—between the knees and the ankles.

The winner will be the man still standing at the end of this modern version of an old English "sport"—it was once staged along with prize fights and bull-baiting matches.

Thirty-four-year-old farmer Ben Hopkins, and Joe Chamberlain a 28-year-old druggist's assistant, both of Chipping Campden, are the contestants.

The two men are close friends and they are now in training for the contest. Hopkins, 5 feet 8 inches tall, lithe, square-shouldered and weighing 154 pounds, is favourite.

He is married, has two children and plays for the local football club. He wears size eight in shoes.

Chamberlain, who is about the same height, wears size nine shoes. He is of slighter build and believes that his nimble feet will win the contest. He is married and has one child.

Mrs. Chamberlain refused to comment on the kicking match but Mrs. Hopkins said: "I shall not go to see them. I have enough trouble when Ben comes home from football matches with bruised shins."

U.K. Soccer Results

LONDON, April 19. Results of Soccer matches played in the United Kingdom on Wednesday follow:

ENGLISH LEAGUE DIVISION I. Huddersfield Town 2, Chelsea 1. Newcastle United 0, Bolton Wanderers 1. Sheffield Wednesday 4, Derby County 3.

DIVISION II. Barnsley 1, Sheffield United 1 (tie).

DIVISION III (NORTHERN). Bradford 2, Gateshead 0; Scarborough United 0, Bradford City 0 (tie); Wrexham 0, New Brighton 1.

DIVISION III (SOUTHERN). Brighton and Hove Albion 0, Newport County 1, Bristol City 2, Ipswich Town 1, Crystal Palace 0, Norwich City 5, Exeter City 1, Southend United 5, Notts Forest 2, Swindon Town 1, Plymouth Argyle 2, Gillingham 0, Reading 0, Bournemouth and Boscombe Athletic 0 (tie).

SCOTTISH LEAGUE DIVISION A. Hearts 4, Aberdeen 1. DIVISION B. Albion Rovers 1, Queen of the South 4.—C.P.

TECHNICAL TRAINING WILL HELP BARBADIANS TO FIND EMPLOYMENT

THERE IS A PRESSING NEED for provision for Vocational and Technical Training in Barbados. That is what the Advocate was told yesterday by leading citizens of the island.

Mr. C. G. Crawford, M.I.Mech.E., M.I.Mar.E., Mr. R. B. Moulder, B.A., Mrs. G. H. Adams and Mr. H. F. Alkins who were all members of the Select Committee appointed in 1946 to study the problem of Vocational and Technical Training in Barbados, still share this view.

There was a general cry here, Mr. Crawford said, that there were very few outlets for Barbadians who were trained in American and Canadian markets but the answer to that was the fact that business concerns were unwilling and did not have the time to train grown men of 19 and 20 before employing them.

If these men could be given a combination of technical training and practical training in their particular craft he was sure that they would be accepted at once.

At the Central Foundry they had a system whereby a trade apprentice served for five years. They were planning by this method to turn out three hundred boys every year and that would mean something to the problem of supplying skilled technical labour in Barbados.

The idea of the Committee was that Combrenere could be used for the purpose of re-training. He had found that workmen here could always read blueprints or build furniture from photographic models.

The talent was here, he was sure, but it had to be developed. He had had reports from some of the neighbouring islands that they preferred Barbadian workmen when they could get trained ones, and he was sure that a system that was turning out trained men regularly would pay dividends.

When an apprentice came in he was given a few months to "look around" and be generally useful and at the end of say four months he has then shown whether he can be trained as a fitter, a machinist, or in some other department of the Works.

The present method of bursary examinations were held every year and bursary apprentices, examinations were held their stewardship during the year. In the case of bursary apprentices examinations were held every year and bursary apprentices, examinations were held their stewardship during the year.

Mr. Crawford, who is Technical Manager of the Central Foundry his own establishment for an example. He said that during his time they had trained at some expense hundreds of craftsmen who had found positions in the neighbouring islands as well as large countries overseas.

They were handicapped in this work, in that they were unable to train workmen practically in their own branch of craftsmanship and at the same time teach him arithmetic, elementary mathematics and the general science underlying the use of precision instruments, metals, and maintenance of modern machinery.

For example they worked frequently at one inch and often it was found that apprentices before they were actually instructed could not find as much as sixteenths of an inch on an ordinary rule.

On the other hand, he had developed there during the years and he was sure that if there was a system of technical training instituted that these men would be equally as capable as the skilled craftsmen found in the workshops of bigger countries.

Land Rates Go Up In St. Lucy Employees Will Get Pay Rise

Dr. Malan's racial and segregation policy in South Africa was one of the incidents that arose when the St. Lucy Vestry held their meeting yesterday evening. The Vestry was dealing with the rates and Dr. Malan was mentioned when members were considering the item "Wine" for the parochial churches.

Mr. J. E. T. Branker, M.C.P., counselled the Rector not to purchase the South African product as there was a strong feeling amongst the taxpayers of the parish, as well as the island as a whole, against buying South African goods, in view of Dr. Malan's racial and segregation policy. The Rector promised to note this advice.

The Auditor's Certificate was received and was decided to supply twelve copies. In this way each member will have a copy.

The Building Committee's Report, which recommended the allocation of \$4,000 this year for repairs to parochial buildings, was read and adopted.

Application from the Poor Law Inspector, Mr. Campbell, for increased emoluments and to increase his travelling allowance from \$12.90 per month to \$18.00 per month, was granted.

On the motion of Mr. J. E. T. Branker and seconded by Mr. J. R. Alleyne, and in view of the greatly increased cost of living, provision was made, in laying the rates for the following increases: All employees up to £100 per annum, 10%; between £100 and £150 per annum, 7½% increase; between £150 and £250, a 5% increase.

On the motion of Mr. E. L. Ward, Churchwarden, and seconded by Mr. C. H. Yearwood, a token increase of £25 per annum was granted the Parochial Medical Officer, Dr. A. C. Kirton.

On the motion of Mr. W. L. Greaves, seconded by Mr. J. R. Alleyne, rates were fixed as follows: for land \$9 per acre as against \$4.90 last year. On a similar motion by Mr. W. L. Greaves, seconded by Mr. J. R. Alleyne, rates on trade were fixed at \$1.50 in the £1 as against \$1.44 last year.

Mr. Branker moved that the Vestry recommend to the Poor Law Guardians that they consider the advisability of advertising for tenders for the supply of necessary goods for the Almshouse. Mr. O'Neale accepted this motion and same was passed.

Members present were: Rev. Pestaina, Chairman, Mr. E. L. Ward, M.C.P., Churchwarden, Messrs. F. A. Greaves, D. E. M. Webster, J. E. T. Branker, M.C.P., C. H. Yearwood, J. R. Alleyne, W. L. Greaves, K. C. O'Neale, and I. C. Sobers.

work, and furniture the need for technical training.

When the Advocate visited Mr. Moulder a customer was returning a chair for faulty construction and he remarked that technical education would have prevented the craftsman in question from having made the mistake that made it necessary for the customer to return the chair.

The talent was here, he was sure, but it had to be developed. He had had reports from some of the neighbouring islands that they preferred Barbadian workmen when they could get trained ones, and he was sure that a system that was turning out trained men regularly would pay dividends.

The idea of the Committee was that Combrenere could be used for the purpose of re-training. He had found that workmen here could always read blueprints or build furniture from photographic models.

When an apprentice came in he was given a few months to "look around" and be generally useful and at the end of say four months he has then shown whether he can be trained as a fitter, a machinist, or in some other department of the Works.
