Les Miserables

by G. B.

ONCE AGAIN, Victor Hugo's vast novel, LES MISERABLES has been filmed and is showing at the Galleria Theatre. Though it is a new edition of the story about twenty years since it was presented to me when I saw it. This directing is under the expert hand of Lewis Milestone, who seems to read it might be termed "big subjects" and he certainly has one.

WHAT IS A FUNGUS By Arthur

It seems that a fungus is a plant-like organism which is not a true plant. Fungi do not have chlorophyll and cannot make their own food. They obtain nutrition by absorbing organic matter from their surroundings. Fungi can grow almost anywhere and are not limited to soil. They are some of the most common and diverse organisms on Earth. Fungi play an important role in the decomposition of organic material and are essential for the health of ecosystems.

POULTRY NOTES

On this page from our news notes... (Continued on page 3)

Man - to - man talk

"Well, I've seen a lot of life, and I've seen a lot of things, but I've never seen anything like this. It's a real eyeful."

"Yeah, it's pretty good, isn't it?"

"Yeah, it's pretty good."

ewe..."
