New Workflows and Tools for ETD Support at the University of Florida

Christy Shorey (UF) and Mark Sullivan (Sobek Digital)
Contents

• Introduction to IR@UF & SobekCM
• Tour of public functionality
• Workflow overview
• Related projects and future considerations
Introduction to UF@IR and SobekCM
Brief History of IR@UF

• 2006 – created IR@UF as collection within UFDC
  – mediated deposit
• 2008 – start of RDS project, files into IR@UF
• 2009 – self-submittal tool via myUFDC
• 2009 – began hosting PILOs
• 2011 – began hosting supplemental data
• 2012/2013 – systemize ETD ingest into IR
• 2013/2014 – harvest earlier ETDs into IR
IR@UF Today

• Content
  – 41,972 items in 28,329 titles
  – Over two million pages
  – Over 15 thousand theses and dissertations

• Usage
  – Over 14 million views
  – Almost 1 million visits
SobekCM

• Open source, integrated workflow, tracking, management, and presentation for digital resources of all types.
  – Photographs
  – Books
  – Newspapers and serials
  – Aerial imagery with geographic searching
  – Museum objects
  – Theses and dissertations
# Brief History of SobekCM Development

| 2006 | SobekCM First Released  
• Display layer over Greenstone Digital Library  
• Written in C#, served by Windows IIS  
• Based on MODS/METS |
| 2011 | Version 3.0 Released  
• Second major rewrite  
• No longer dependent on Greenstone Digital Library  
• Integrated tracking and workflow  
• SobekCM Released as Open Source |
| 2013 | Version 4.0 Released  
• HTML5 / CSS3  
• Online Quality Control |
| 2014 | *Sobek Digital Hosting & Consulting* created to offer hosted solution |
SobekCM Today

- Over 10 million pages
- Housing content from over 100 institutions
- Over 200 million hits
- Approximately fifteen independent instances

Tour of Public Functionality

Sobek image created by Jeff Dahl and is shared under the GNU Public License
The University of Florida Digital Collections (UFDC) hosts more than 300 outstanding digital collections, containing over 8 million pages, covering over 78 thousand subjects in rare books, manuscripts, antique maps, children's literature, newspapers, theses and dissertations, data sets, photographs, oral histories, and more for permanent access and preservation. Through UFDC, users have free and Open Access to full unique and rare materials held by the University of Florida and partner institutions.

The UF Libraries encourage and support faculty collaboration on digital collections and digital scholarship.

UFDC is constantly growing with new resources, new scholarship, and system enhancements to the Open Source SobekCM Software. The search box above searches across all the digital resources in all the collections. By clicking on the icons below, you can view and search individual collections.

**ARTS, HUMANITIES AND SOCIAL SCIENCES COLLECTIONS**

- Arts Collections
- Baldwin Library of Historical Children's Literature
- Book Arts
- Center for the Humanities & the Public Sphere
- History and Heritage Collections
- Literature Collections
- Samuel Proctor Oral History Program (SPOHP)

**SCIENCE AND TECHNOLOGY COLLECTIONS**
The University of Florida Theses & Dissertations Collection within the Institutional Repository at the University of Florida will eventually include all theses and dissertations from the University of Florida. The collection currently includes:

- Open Access Theses & Dissertations, originally submitted electronically (ETDs)
  - Data, data sets, and supplementary data related to theses and dissertations
- Projects in Lieu of Theses, submitted electronically but which would otherwise not be available online (submission help)
- Retrospective dissertations, digitized from print-only dissertations (information on this service for dissertation authors)
- UF Undergraduate Honors Theses (new in 2013/2014)

Usage statistics for each ETD are available under the "description," and overall usage statistics are available here.

For dissertations not covered by the Retrospective Dissertation Scanning Policy, thesis and dissertation authors can grant permissions to have their theses and dissertations added to the University of Florida Theses & Dissertations Collection. For print-only theses and dissertations, the permissions form and mailing address are available here. Authors can also grant permissions and submit electronic theses and dissertations through the online self-submittal form here.
Quick Tips

- **Boolean Searching**
  Use * or **and** between terms to find records with **all** the terms.
  Use - or **or** between terms to find records with **any** of the terms.
  Use ! or **and not** between terms to exclude records with terms.
  If nothing is indicated, **and** is the default.
  EXAMPLE: natural and not history

- **Phrase Searching**
  Placing quotes around a phrase will search for the exact phrase.
  EXAMPLE: “natural history”

- **Capitalization**
  Searches are not capitalization sensitive.
  EXAMPLE: Searching for **NATURAL** will return the same results as searching for **natural**

- **Diacritics**
  To search for words with diacritics, the character must be entered into the search box.
  EXAMPLE: Searching **Précédent** is a different search than **Precedent**

TRYIN’ TO MAKE A DOLLA OUTTA FI’TEEN CENTS: WHY THE AFRICAN-AMERICAN CANON HAS WRONGFULLY EXCLUDED POPULAR URBAN LITERATURE

By

RACHEL A. ROBINSON
Background

The Digital Repository project of the Jane Bancroft Cook Library was designed to create a digital library of locally produced materials for use by the broader scholarly community. The project goal is to build an electronic platform for depositing, accessing and archiving institutionally produced materials. These materials include archival materials, teaching objects, research papers and articles, and data in the form of digital text documents, images, sound recordings, and other digital assets created by members of the New College community through their research and teaching. These materials will represent the intellectual and cultural output of Florida’s public honors college.

Theses

The first collection loaded into the NCF Digital Collections was the New College Student Theses Collection from a legacy system. From 1967 through 2008, students only turned in print theses, which the library has bound and housed in a dedicated thesis room. From 2009 on, students are also required to submit an electronic thesis in PDF format in addition to the print version. These digital objects are loaded into the repository. From 1967-2008, the thesis database only contains citation information. From 2009 to present, it also includes the electronic PDF theses.

Additional Content

In addition to the thesis collection, the NCF Digital Collections also collects materials from the library’s archives including:

- Student Publications
- Photographs
- Commencement Programs and Addresses
The New College Student Theses Collection contains citation information and some full-text of theses. From 1967-2008, the theses collection only contains citation information. From 2009 to present, it also includes the electronic PDF theses. Access to full-text theses is only available for current New College students, faculty, and staff.

520 3 |a Principal bundles have a well-known description in terms of nonabelian cocycles of degree 1 with values in a sheaf. A more general notion than that of a sheaf on a space X is that of a lien on X. A lien on X is an object that is locally defined by a sheaf of groups, with descent data given up to inner conjugation. Equivalences classes of gerbes with a given lien L are classified by nonabelian degree 2 cocycles. In his work, Lawrence Breen has given a similar classification of 2-gerbes using nonabelian degree 3 cocycles that take values in a family of group stacks. In our work, we defined the notion of a 2-lien on a space X. It is an object that is given locally by a group stack, with 2-descent given up to inner equivalence. We have proved some theorems about 2-liens of 2-gerbes which correspond to well known results about liens of gerbes. Also, Deligne has shown that any strict Picard stack G corresponds to a 2-term complex of abelian sheaves K. In this case we proved that $H^3(X,G)$ is isomorphic to the hypercohomology group $H^3(X,K)$.

A. Aggregation behaviors
B. Aggregation-specific Item Reports
C. Item Metadata
D. Item Embargo Date

(Currently students cannot change their embargo date in the online system .. must email )
The University of Florida Theses & Dissertations Collection within the Institutional Repository at the University of Florida will eventually include all theses and dissertations from the University of Florida. The collection currently includes:

- Open Access Theses & Dissertations, originally submitted electronically (ETDs)
  - Data, data sets, and supplementary data related to theses and dissertations
- Projects in Lieu of Theses, submitted electronically but which would otherwise not be available online (submission help)
- Retrospective dissertations, digitized from print-only dissertations (information on this service for dissertation authors)
- UF Undergraduate Honors Theses (new in 2013/2014)

Usage statistics for each ETD are available under the "description," and overall usage statistics are available here.

For dissertations not covered by the Retrospective Dissertation Scanning Policy, thesis and dissertation authors can grant permissions to have their theses and dissertations added to the University of Florida Theses & Dissertations Collection. For print-only theses and dissertations, the permissions form and mailing address are available here. Authors can also grant permissions and submit electronic theses and dissertations through the online self-submittal form here.
SubCollection Administration : UFETD

Basic Information

The information in this section is the basic information about the aggregation, such as the full name, the shortened name used for breadcrumbs, the description, and the email contact.

For more information about the settings on this tab,

Parent Code(s): ufr

Name (full): University of Florida Theses & Dissertations

Name (short): UF Theses & Dissertations

Description:

Contact Email: IS6212_22901@is.instantservice.com;ufdc@uflib.ufl.edu

Collection Visibility

The values in this section determine if the collection is currently visible at all, whether it is eligible to appear on the collection list at the bottom of the parent page, and the collection button used in that case. Thematic headings are used to place this collection on the main home page.

For more information about the settings on this tab,

Behavior:

- Active?
- Show in parent collection home page?

Collection Button:

To change, browse to a 50x50 pixel GIF file, and then select UPLOAD

Thematic Heading:
Below is the list of all items linked to this aggregation which are either private (in process) or dark.

There are a total of 978 items in 975 titles.

"Tryin' to Make a Dolla Outta Fi'teen Cents"

How were people making a dollar out of fifteen cents? Was it by selling a lemonade stand at school? Was it by selling cookies at a bake sale? Was it by selling tickets to a concert? Was it by selling a book on eBay? Was it by selling a painting on Etsy? Was it by selling a t-shirt on Amazon? Was it by selling a movie on Netflix? Was it by selling a song on Spotify? Was it by selling a podcast on Apple Podcasts? Was it by selling a recipe on Pinterest? Was it by selling a recipe on Pinterest?

Manage Pages and Divisions (Quality Control)
Reorder page images, name pages, assign divisions, and delete and add new page images to this item.

View Work History
View the history of all work performed on this item. From this view, you can also see any digitization milestones and digital resource file information.

Manage Download Files
Upload new files for download or remove existing files that are attached to this item for download. This generally includes everything except for the page images.

Manage Geo-Spatial Data (beta)
Add geo-spatial information for this item. This can be as simple as a location for a photograph or can be an overlay for a map. Points, lines, and polygons of interest can also be drawn.

6. Automatic Unembargo

A. When embargo date is reached, material is automatically made public by the SobekCM Builder service.

B. Notification email is sent to collection manager(s)

C. Hidden metadata is loaded over “scrubbed” METS and reprocessed
Related projects and future considerations
RDS — Retrospective Dissertation Scanning Project

• 2006 – started scanning print dissertations upon author request
  – scanned in-house
  – Items hosted in IR

• 2008 – began RDS project in earnest
  – Scan majority with vendor
    • Items hosted on vendor site, and ingested into IR
  – Special items scanned in-house
    • Items hosted in IR
RDS — Retrospective Dissertation Scanning Project

Metadata is collected from print records

• Sent to vendor
• Create catalog record for digital copy
• MARC records pulled to match to files ingested from vendor
Terminal Projects of Different Flavors

ETDs
• Permissions granted at submission, via GIMS
• File from GEO
• Metadata from GIMS
  – Into IR
  – To Cataloging to create MARC Record for ALEPH and OCLC
• May contain supplemental files
• May include embargo or other restriction period

RDS
• Opt-Out policy
• Scanned at vendor, or in house
• Metadata from print catalog record
Terminal Projects of Different Flavors

PILOs

• Permissions granted at submission, collected by departments
• File from department
• Metadata entered based on file
• May contain supplemental files
• May include IP restriction

Honors Theses

• Permissions granted at submission, by student
• File submitted by student
• Metadata entered based on file
Terminal Projects

The goal is to get all terminal projects in the IR and manage them using the same tools. Looking at ways to normalize the metadata, and the workflows, so the user experience will be the same for all scholarly works.
Supplemental Materials

Data    Videos    Audio    Code    Etc

• Self-submitted by graduate students into IR
• Student adds metadata and uploads file(s)
• Submission creates PURL which can be added to the body of the ETD

• Take advantage of hosting within robust digital library infrastructure
