In business we could see great Negroes at the head of construction companies such as (Petrona & Croes), (Nahar Steel Construction) and many others. These great men have advanced the standard and principles of the race.

When we look back over 40 years this achievement is an asset to the Antillian Negroes; Through Labour we have distinguished ourselves, and put a standard in craftsmanship as great as the greatest the world over.

Now let us examine these facts. 40 years ago we see Shell company coming to Curacao and Lago Oil & Transport Company coming to Aruba respectively. With these companies we see a mass immigration from neighboring Islands and far off lands taking place. People from all over the world, of different races and creeds made their appearance, and competed for the best positions available.

The Antillian Negroes were in the back-ground filling up last and least positions. Lack of higher education and professional training had handicapped our progress.

Until these companies started vocational and trade schools, later on the government granted scholarships abroad and set up more trade schools, which were successful in attracting brilliant young men and women. Today Educated

Antillians are filling top positions thourghout the Antilles. Therefore we could join with countless others, young and old, in saying "LABOUR CONQUERS ALL THINGS."

Emancipation Proclamation is 101 years old and we are truly progressing.

Dear Mr. Editor;

Please allow me space in your much read paper "The Windward Islands Opinion" for the following:

1st. July 1863 - 1st. July 1964

Fellow Windward Islanders of African decent: Its fitting for us first, to give thanks to Almighty God, and to rejoice on this Our one Hundred and First year of our Emancipation from slavery, since the shackles of tyranny, hate floggings and shameful humiliation were removed from our foreparents, however not before the price of one hundred guilders per slave was paid to their slave-masters, were they reluctantly allowed to breath free air;

Let us all rejoice today, as free men and women, and be proud of our heritage, learn and study our History and always remember that as Africans,
