SMDC/ARSTRAT Training Conference educates military, civilian employees

SMDC/ARSTRAT Public Affairs

REDFON ARSENAL, Ala. — The U.S. Army Space and Missile Defense Command/Army Forces Strategic Command Training Conference was held Oct. 27-31 at the Von Braun Complex here.

The conference covered a variety of topics of interest to both military and civilian members of the command.

Speakers from both within and outside the command presented on issues such as electronic warfare, computer network operations, exercises and wargames, and the Army Space Cadre.

The third day of the conference, which focused on civilian employee development, covered topics such as the Civilian Education System, the Human Capital Lifecycle Strategy and the Army Knowledge Online Portal training opportunities.

This conference provided an opportunity for our Senior Leaders to receive current briefings from subject matter experts, which will help us remain on the cutting edge of emerging DA civilian and military training systems and requirements.

Beat tobacco addiction: be Army Strong!

Brad Taft, Registered Nurse
U.S. Army Center for Health Promotion and Preventive Medicine

As a Soldier, you are part of a team that is not just strong, but Army Strong. You have physical strength, mental strength and emotional strength. You are “strong enough to get yourself over” and “strong enough to get over yourself.” This strength can help you win the fight against the fiercest addiction you may ever face — tobacco addiction.

Tobacco addiction comes on gradually. You try a few cigarettes and think it isn’t too bad. You feel more alert, ready for anything. It is not that expensive either. Just a few bucks a day to feel good.

But soon, you smoke whenever you can, at whatever the cost: not just in money, but in time and in relationships. Now, you don’t want to feel good by smoking; you just want to avoid the bad feeling that comes when you don’t smoke. This is addiction, and it only takes about 100 cigarettes to go from “trying it out” to addiction.

You probably feel the addiction in the time it takes you to go outside for a smoke, or in your personal relationships, or in your wallet. What’s worse, you may feel it physically in your performance and readiness.

According to the surgeon general of the United States, smoking has negative effects on nearly every organ of the human body. Smoking is directly linked to the two leading causes of death: coronary heart disease and cancer. Cigarette smokers are two to four times more likely to develop coronary heart disease than nonsmokers. The risk of dying from lung cancer is more than 23 times higher among men who smoke cigarettes and about 13 times higher among women who smoke, compared with those who have never smoked.

In addition, recent onset smoking has been linked to a serious and sometimes fatal illness called acute eosinophilic pneumonia, which has occurred among young servicemembers in Iraq.

Maybe smoking is something that would concern you. Tobacco use negatively affects your health. Why not fight tobacco addiction? For many Soldiers, fighting tobacco addiction is the hardest fight they will ever have.

Nov. 20 is the Great American Smokeout, a day when smokers are encouraged to go without smoking. If you can’t stop smoking for just one day, then you probably are addicted to tobacco. If that’s the case, let your healthcare provider know you need help to begin fighting the addiction.

Members of SMDC/ARSTRAT prepare to receive a briefing from Maj. Gen. Robert P. Lennox (standing in uniform), the U.S. Army’s Assistant to the Deputy Chief of Staff, G-3/5/7, during the SMDC/ARSTRAT Training Conference at the Von Braun Complex on Redstone Arsenal, Ala., Oct. 28. Lennox addressed issues such as Army Force Generation — the necessity to reset and retrain the forces.

Command Sergeant Major

This month, we finish discussing Army values and their importance to the Soldiers and civilians who serve in the United States Army. The letter “P,” marks the end of the acronym K-S-M-D-R-I-S-H-R-I-P. It reminds us of the importance of personal courage, both physical and moral, as a core Army Value. Army Field Manual 6-22 defines Personal Courage: 

**Face fear, danger or adversity.**

Personal courage takes two forms: physical and moral. Both forms are important components of this Army Value. Physical courage means having courage in the face of physical pain, hardship or threat of death. Moral courage on the other hand, means having the courage to do the right thing in the face of popular opposition, shame, scandal or discouragement.

Physical courage is a concept we are all well acquainted with. We consider a person physically brave when the person is able to overcome the fear of pain, suffering and even death in order to do one’s duty. Such courage, Aristotle noted, is a virtue. Aristotle further went on to note the two vices of courage, where “vice of deficiency is cowardice and its vice of excess is recklessness.”

Moral courage is the willingness to stand firm on the values, principles, and convictions that define who you are. It enables the Soldier or civilian to stand up for what he or she believes is right, regardless of the consequences. People who take full responsibility for their decisions and actions, even when things go wrong, display moral courage.

An extreme example of moral courage comes from the story of Warrant Officer Hugh C. Thompson Jr., a helicopter pilot during the Vietnam War. On March 16, 1968, he and his crew were supporting Task Force Barker in a reconnaissance capacity. During his mission, Warrant Officer Thompson spotted the My Lai Massacre as it was going on. His initial attempt at stopping the massacre was ignored, but through diplomacy and the threat of force, he and his gunners were able to stop the murdering of civilians.

When news of the massacre reached the United States, Warrant Officer Thompson testified before a closed session of the House Armed Services Committee. Chairman Mendel Rivers (D, SC) publicly stated that he felt Thompson was the only Soldier at My Lai who should be punished (for turning his weapons on fellow American troops) and unsuccessfully attempted to have him court-martialed.

The cost of Warrant Officer Thompson’s moral courage was exceedingly high, but he had the courage to follow his convictions. Thirty years after the massacre, Warrant Officer Thompson and his two crewmen were awarded the Soldier’s Medal, the Army’s highest award for bravery not involving combat. “It was the ability to do the right thing even at the risk of their personal safety that guided these Soldiers to do what they did,” then-Maj. Gen. Michael Ackerman said at the 1998 ceremony. The three “set the standard for all Soldiers to follow.”

Much less dramatic examples occur on a daily basis. They include the Soldiers and civilians who speak out against inappropriate actions or orders and people who take action to stop sexual harassment or other forms of abuse. Not because someone told them to, but because they saw a wrong and had the moral courage to take action.

Many of us will never be afforded the opportunity to demonstrate physical courage, but each of us will have many opportunities to display moral courage.
Rally ‘round the flags

Sharon Watkins Lang
SMDC/ARSTRAT
Historical Office

Although U.S. Army Space and Missile Defense Command/Army Forces Strategic Command is one organization, the command is authorized two separate and distinct flags. These represent our relationships with the U.S. Strategic Command and the U.S. Army. No changes are currently planned for the Army Forces Strategic Command flag. The familiar SMDC/ARSTRAT flag, however, will soon be changing.

Under General Order 37, issued Oct. 16, 2006, SMDC/ARSTRAT was officially designated as an Army Service Component Command, or ASCC, of STRATCOM reporting directly to Headquarters, Department of the Army. As a result, the command is no longer a Major Army Command (MACOM) and the SMDC/ARSTRAT flag will be changing.

As defined by the rules of heraldry, the current colors designate the organization as a MACOM. These flags are “national flag blue” with a yellow fringe on three sides. The Coat of Arms of the United States and the command’s shoulder sleeve insignia are centered on the base. A scroll beneath the coat of arms states the command’s name. [Army Regulation 840-10 entitled “Flags, Guidons, Streamers, Tabards, and Automobile and Aircraft Plates” addresses flag heraldry and etiquette.]

The current SMDC/ARSTRAT flag dates to 1997, when the U.S. Army Space and Missile Defense Command was created and assigned as a MACOM. Nevertheless, SMDC/ARSTRAT is still authorized a distinguishing flag. And, the new design is very similar to our current flag. The base remains the national flag color blue, trimmed with a yellow fringe on three sides. Centered on the flag is the command’s shoulder sleeve insignia. This flag represents the command’s relationship with DA.

The Institute of Heraldry is currently developing the official documentation and design for the revised flag. No timetable has been set, but the new flag is coming.

What We Think

The Eagle asks:

Now that elections are over, what “words of wisdom” do you offer to those of voting age and of upcoming voting age?

Isn’t it good that we have absentee ballots, so we don’t have to stand in line for five hours! We should always fill out the forms for absentee ballots.

Celeste Gainey
IT Staff
U.S. Army Kwajalein Atoll

Instead of looking at it as if it was a popularity contest, voters should know more about the candidates.

Graham Shaw
Firefighter
U.S. Army Kwajalein Atoll

Our democratic voting process allows your voice to be heard. It allows you to express a choice among candidates and taking the time to vote reflects personal pride in our nation. Failure to vote is equivalent to saying you just don’t care about the issues out there.

Maj. Pamela Tingle
Headquarters and Headquarters Company Commander
Redstone Arsenal, Ala.

This past election is only another example of the strong principles this country was founded on. For us to continue we must be able to adapt, and overcome all obstacles that we as a country may face. In order to do this we must make sure that our voice is heard, that the one right that our country holds high, that of the right to vote, is continued today, tomorrow and for our future generations.

Pfc. Benjamin Maye
Administrative Clerk
100th Missile Defense Brigade
Peterson Air Force Base, Colo.

Voting for our leaders is the most patriotic thing one can do and a very important part of being an American citizen. SO GET OUT AND VOTE!!!

Staff Sgt. Kristine Bombard
Supply Sergeant
105th Missile Defense Brigade
Peterson Air Force Base, Colo.

We are one of the few nations that have an orderly change in government every four to eight years. A lot of nations hold “elections” but the outcome is pre-determined or is determined through violence or physical intimidation. Our right, as Americans, to vote should not be taken for granted. If you believe your vote doesn’t count look at some of our last elections’ tallies. And remember, if you don’t vote you can’t complain if you don’t like the way things are run.

John E. Upp III
Chief, TeleComm Branch
CIO/G6
Redstone Arsenal, Ala.
Army astronaut scheduled for first flight

[Source: NASA] Countdown to liftoff officially began Nov. 11 at 10 p.m. for NASA’s 27th shuttle flight to the station. Army Astronaut Lt. Col. Shane Kimbrough and fellow crew members arrived at NASA’s Kennedy Space Center on Nov. 11 for final launch preparations before liftoff of Endeavour scheduled for Nov. 14.

In the few days before launch, the crew must review mission tasks, check the fit of their flight suits, make final pad inspections and attend weather, payload and safety briefings.

Astronaut Chris Ferguson commands the seven-person crew, including Pilot Eric Boe, Mission Specialists Donald Petitt, Heidemarie Stefanyshyn-Piper, Steve Bowen, Kimbrough and Sandra Magnus. Space shuttle Endeavour’s STS-126 flight will feature important repair work and prepare the International Space Station to house six crew members for long-duration missions. The 15-day flight with its four planned spacewalks will primarily focus on servicing the station’s two Solar Alpha Rotary Joints, which allow its solar arrays to track the sun. (The starboard SARJ has had limited use since September 2007.) Endeavour will carry about 32,000 pounds, which will include supplies and equipment necessary to double the crew size from three to six members in spring 2009. The new station cargo includes additional sleeping quarters, a second toilet and a resistance exercise device. The shuttle also will deliver a new crew member and bring back another after more than five months aboard the station.

Civilian News

OPM announces FEHB premium hikes

The Office of Personnel Management on Sept. 25 announced the 2009 premium rates for the Federal Employees Health Benefits program. Overall, an average enrollee’s share of the premium will increase according to the agency. OPM said enrollees with self-only coverage will pay, on average, $4.83 more each pay period (about $125 per year) next year. Family coverage will cost an additional $12.2 more per pay period (about $296 per year). OPM said 20 percent of FEHB enrollees would see their share of premiums rise by less than 5 percent, based on 2008 enrollment data. However, enrollees in the Blue Cross Blue Shield Standard Option, the most popular FEHB plan, would see their share of the premium increase 12.9 percent for self-only coverage and 13.4 percent for self and family coverage.

Civilian health benefits season now open

The annual Benefits Open Season will run from Nov. 10 through Dec. 8. During this period, employees will have the opportunity to make elections or changes in three benefits programs: FEHB, TRICARE and the Federal Credit Union. Employees may enroll, change or opt out from one plan or option to another (i.e., high/standard, self only/self and family), or cancel their FEHB enrollment during the open season. Web site is www.opm.gov/insure/health/. FEHBIP: During the open enrollment period, employees may enroll in supplemental dental and/or vision coverage, change from one plan or option to another, or cancel their enrollment. Web site is www.opm.gov/insure/dentalvision/. FSAs: An FSA allows employees to set aside pre-tax dollars for out-of-pocket health care and dependent care expenses, thereby reducing the amount you pay in taxes. Web site is www.fsafeds.com.

Military News

DOD develops Compensation and Benefits Handbook

The Department of Defense announced Oct. 6 it has developed a comprehensive handbook describing compensation and other benefits servicemembers and their Families would be entitled to upon separation or retirement as a result of active duty or illness. The handbook describes the disability eligibility process, various program qualifications, application procedures, and numerous resources with associated contact information. Web sites and toll-free phone numbers are provided. The electronic version includes hyperlinks. The electronic version of the handbook will be updated frequently, and the hard copy of the handbook will be updated annually. The electronic version of the handbook can be found on the five Web sites: http://turbotap.org; https://www.aw2.army.mil; https://www.nko.navy.mil; http://www.npc.navy.mil; https://www.my.af.mil/ecs2taf/USAFAFPAP40A/1073755238/files/C6&HNHandbook.

Mortgage difficulties and the Servicemembers Civil Relief Act

The Servicemembers Civil Relief Act (SCRA) provides a wide range of protections for servicemembers. Whether these protections are available generally depends on when the servicemember bought the property in question. That is, did the servicemember become obligated under the mortgage before or after entering active duty? Many SCRA protections only apply when active duty military service has had a “material effect” on the servicemember’s ability to pay. “Material effect” generally means the servicemembers are less well off financially because of active duty. That could be because they make less money or have more expenses. Servicemembers who are having any financial difficulties with their mortgages — or are having any legal problems — are strongly encouraged to seek free legal assistance at a military installation right away. A locater service can be reached at this Web site: http://legalassistance.law.af.mil /content/locator.php. (Source: www.militaryonesource.com)

Federal hiring of military spouses made easier

President Bush signed an executive order in early October that will make it easier for spouses of servicemembers to get federal jobs. The order authorizes noncompetitive hiring of spouses and should make the hiring process easier and faster for those in this category. The order will allow spouses to walk into any personnel office of any federal agency and get a job. To be eligible, individuals have to be the spouse of an active-duty member or of a reservist on active duty called on to relocate. Also eligible are the spouses of servicemembers listed as 100 percent disabled and separated or retired, as well as widows or widowers of servicemembers who died on active duty and who have not remarried. This authority gets spouses in the federal job door. It doesn’t waive the qualifications for the job.

Military pets have opportunity to fetch $1,500 AAFES shopping spree

The Army & Air Force Exchange Service is giving military pet owners the opportunity to crow and bark about their four-legged friends and what they mean to them. The “Patriot Family Pet Photo Contest,” which runs through Dec. 15, allows pet owners to submit a photo of themselves or Family members with their pet along with a 50-word or less description of their furry friend. The grand prize winner will get their paws on a $1,500 AAFES shopping spree. Additional prizes include a $1,000 shopping spree for first place, two second place $500 awards and two third place $350 shopping sprees. In addition to the monetary prizes, the winning photos will be featured in future AAFES advertisements as well as on Exchange TV, AAFES’ in-house television network. To participate in the Patriot Pet Photo Contest, shoppers can send entries to PatriotFamily@AAFES.com with “Patriot Family Pet” in the subject line. Entrants must include their name, address, phone number, rank/occupation and pet’s information (name, breed or type of pet) in the e-mail. More contest details can be found at www.aafes.com.

HR flexibilities available to assist federal employees affected by severe weather

Recent events in the Midwest have clearly demonstrated the impact severe weather conditions can have on communities across the country. Many parts of the United States must occasionally cope with hurricanes, tornados, severe storms and flooding, snow emergencies, severe icing, wildfires, or other emergency situations, frequently with little warning. These emergencies are often dangerous and extremely disruptive to those who live in the affected communities. The U.S. Office of Personnel Management published a memorandum June 17 with attachments on this subject. It will be updated and published annually to remind agencies of the various Human Resources flexibilities currently available to assist federal employees affected by severe weather conditions and their aftermath or other emergency situations. The entire memorandum can be found at www.opm.gov.oca/COMPmemo/2008/2008-09.asp. Pay and leave benefits — OPM’s Handbook on Pay and Leave Benefits for Federal Employees Affected by Severe Weather Conditions or Other Emergencies discusses a general summary of the pay and leave benefits available to federal employees prevented from working, or required to work, in an area affected by emergency situations. The handbook is available on the various agency’s intranet sites (www.oca.opm.gov). Employee and Family support benefits — Benefits for federal employees and eligible Family members remain unchanged during emergency situations. Information about employee and Family support benefits and policies is available at www.opm.gov/policy/agencyh6-federalbenefits.pdf.
Command employees celebrate Hispanic Heritage

By Sharon L. Hartman
SMDC/ARSTRAT Public Affairs

PETerson AIR FORcE BASE, Colo. — Celebrating Hispanic Americans, past and present, who have enriched our nation and the Army, members of U.S. Army Space and Missile Defense Command/Army Forces Strategic Command conducted their annual Hispanic Heritage Observance, Oct. 14. The event was held in the Building 3 training rooms with Col. Kurt Story, deputy commander for Operations serving as host and Lt. Col. Anthony Chavez as the guest speaker.

In his remarks, Story recounted the inspiring tale of Spec. Alfred Rascon, one of 43 men of Hispanic Heritage who received the Medal of Honor. Rascon put himself in harms way in Vietnam when his platoon came under attack as it was trying to reinforce a sister platoon. With several of his comrades injured, Rascon, a medic, exposed himself to enemy fire to get to them, drag them to safety and provide medical attention. Covering their bodies with his own during the attacks, Rascon suffered serious wounds from grenade blasts and fragments and nearly died that day.

Originally nominated for the Medal of Honor, Rascon was only awarded the Silver Star at that time. It was not until a 1985 reunion with his old platoon members that his comrades realized he had not been awarded the Medal of Honor and fought until Rascon was given the prestigious and well-deserved award Feb. 8, 2000.

After Story’s and Chavez’s rousing words, the audience enjoyed a game of “Guess Who?” using a slideshow presentation put together by Frances Sanchez-Jones, Tier 1 Tech Support for the Command Information Office.

Hispanic members from around the command had previously submitted younger photos of themselves and clues for the presentation. Based on the photos and the clues, viewers had to match the photos with a list of names as to which Hispanic member of the command they thought was.

By Diane Schumacher, SMDC/ARSTRAT Public Affairs

SMDC/ARSTRAT participates in JEOM program

The Joint Educational Opportunities for Minorities program, or JEOM, is a Department of Defense sponsored program designed to increase opportunities for students from underrepresented groups who are in college pursuing studies in science, technology, engineering and mathematics (STEM) disciplines. JEOM focuses on students who have an interest in computational science and high performance computing challenges that are important to the DOD. To help students and the DOD, JEOM provides work experiences for the students as interns and provides them an introduction to the DOD’s supercomputers and applications.

The U.S. Army Space and Missile Defense Command/Army Forces Strategic Command is a member of the JEOM program.

Dr. Claudette Owens, chief, Information, Computational and Engineering Division, Future Warfare Center, SMDC/ARSTRAT and Lisa Vann, high performance computing lead, IE&C Div., FWC, and JEOM point of contact, serve as mentors in the JEOM program. Both women seemed excited about the program and about Kara Pleasant, SMDC/ARSTRAT’s JEOM intern.

“I have been interested in computer science since middle school,” Pleasant said. “I decided to major in computer science because working with DOD is our first line of defense.”

Pleasant holds a 3.5 GPA at the Florida Institute of Technology where she is working on her master of science with concentration in information technology. She said that as a teenager her interests were in theater and business, never computers.

“When I started my undergraduate degree I realized how the STEM world plays an important part in the development of the United States,” Pleasant said. “It’s important that we become more involved in science, technology and engineering because working with DOD is our first line of defense.”

Pleasant worked as an intern for SMDC/ARSTRAT in the information, computational and engineering division, shadowing Vann and spending time at the ARC. She also got to see various kinds of research in terms of HPC and got a feel for the different types of problems that are being solved with large scale computers, not just evolutionary algorithms but computational fluid dynamic structures and different areas also, said Owens.

The JEOM program for Pleasant extended from May to August.
Mental safety: Tips for managing stress

SMDC/ARSTRAT Public Affairs

- Plan ahead to avoid stress - learn to plan ahead and space events and activities to allow yourself breathing room.
- Learn and practice time management skills - Taking a good time management seminar — and then practicing what you learn — can help prevent stress. Keep a daily “Top 10” list of the things you need to do, in order of priority; then complete each item in order before you move on to the next item. That way, the most important tasks will be finished first.
- Take appropriate action - Learn to obtain and use the right tools. Make sure you’re dealing with root problems and not just symptoms of problems. Don’t wait to be motivated: take a first step. Action can lead to motivation.
- Put things in perspective - Ask yourself, “Tomorrow, will this really matter?” In a month, will this really matter?” If the answer is “yes,” take appropriate action. If the answer is “no,” why are you worrying and getting stressed about it?
- See changes as opportunities rather than threats - Whenever there’s a major change in your life, it can seem threatening; but try to turn things around and look at the opportunities the new situation creates for you.
- Work toward realistic goals - Goal setting can be helpful in managing stress; but always remember to make your goals both challenging and realistic. If they’re not challenging, you don’t feel a sense of accomplishment when you complete them. On the other hand, unrealistically high goals can never be met and will lead to a sense of failure and low self-esteem. Be goal oriented, but not goal dominated.
- Get up and do something - walk, bicycle, swim, play. In other words, be active. Work off that stress, and build resistance at the same time. Do things that are fun and that you’re willing to do for the rest of your life. Try to get at least 20 to 30 minutes of physical activity a day, at least five or six days a week. Be more active every day. Take stairs instead of elevators. Walk to the corner store; walk your dog, or take a walk with your family.
- Eat regular, healthy meals - The stress response can trigger hunger; and many people turn to food or alcohol as methods of coping with stress. That can lead to weight or alcohol problems. When you’re under stress, it’s important to keep your body and its immune system strong.
- Think about your values - Strong values help you to cope with stress. Think about what’s really important to you, and develop a foundation of values and purpose in life.
- Talk out your troubles - It really does help to talk to someone. Build a network of supportive family and friends. If you don’t feel comfortable talking to anyone close to you, talk to a counselor.
- Become a good listener - Being a good listener is one of life’s important skills; it helps prevent misunderstanding and helps build friendships. Poor communication is a major cause of stress, so learn how to talk, write and listen effectively.
- Take breaks and vacations - Remember, stress is often called the “fight or flight response.” It’s probably not a good idea to flee from problems; but it is often a good idea to take a break. Research shows that people who take regular breaks and vacations are more productive than those who work straight through without any breaks.
- Learn to relax or meditate - Relaxation doesn’t come naturally, especially when you’re under stress. Tension is part of the body’s natural response to stress. You can significantly reduce the impact of stress by learning relaxation skills such as progressive muscle relaxation, meditation, massage, mental imagery, deep breathing or certain types of yoga.
- Get a good night’s sleep - A good night’s sleep is also important for managing stress. Try to relax before sleeping to improve the quality of your sleep.
- Use your creativity - Yesterday’s solutions probably won’t solve the problems of tomorrow. We need to be creative — try new ways of solving problems. There is creativity within all of us. Bring out your creativity by experimenting, asking lots of questions and playing around with ideas.
- Laugh, develop a positive sense of humor - Laughter may not be the “best” medicine, but it is a powerful tool for reducing stress and having a better quality of life. Laugh with people, not at them.
- Put FUN back in your life - This tip summarizes all the above advice. When you were a child you played and had fun. Those are important traits for life; don’t lose them. Put fun back in your life! (Source: Delaware Health and Social Services)
The Army Ten-Miler is America’s largest 10-mile race, held every October in Washington, D.C., and sponsored by the U.S. Army Military District of Washington. There were about 26,000 participants in this year’s run. The 1st Space Brigade sponsored two teams, the Space Sentinels and Mercury’s Minions, and the 100th Ground-based Midcourse Defense Brigade sponsored six individuals in an unofficial team named Team America.

The SMDC/ARSTRAT Commanding General’s mission, vision, and responsibilities to visitors from the Army and other organizations around the world. In this task, the Soldiers and civilians did a superb job of telling visitors what SMDC/ARSTRAT does to contribute to the Army, both in space defense systems.

The SMDC/ARSTRAT team participants and their respective times for the Army Ten-Miler are as follows:

**Team America** — Maj. Martin Bortolutti - 1:16:34; 2nd Lt. Jeremiah VanDorsten - 1:16:43; Capt. Chris Berisford - 1:17:59; Capt. Orlando Cobos - 1:21:16; Cpl. Grant Henne - 1:23:19; Chief Warrant Officer 3 Matt Betzmer - 1:26:39

By Maj. Mike Russell, 1st Space Battalion Executive Officer

WASHINGTON, D.C. — U.S. Army Space and Missile Defense Command/Army Forces Strategic Command showed its colors well this year in Washington, D.C. More than 20 Soldiers assigned to the command ran in the physically challenging 24th Annual Army Ten-Miler race on Sunday, Oct. 5.

The Army Ten-Miler is America’s largest 10-mile race, held every October in Washington, D.C., and sponsored by the U.S. Army Military District of Washington. There were about 26,000 participants in this year’s run. The 1st Space Brigade sponsored two teams, the Space Sentinels and Mercury’s Minions, and the 100th Ground-based Midcourse Defense Brigade sponsored six individuals in an unofficial team named Team America.

The SMDC/ARSTRAT Commanding General Lt. Gen. Kevin T. Campbell and Command Sgt. Maj. Ralph Borja were both present at the Redstone Arsenal Hooah Tent to wish the team members a speedy race. Borja and a few other members of the command also ran as individual entrants in the event.

Race Day was a beautiful day in Washington, D.C., with a slight chill in the air at the 8 a.m. start time and warm temperatures throughout the race. The SMDC/ARSTRAT runners demonstrated great drive and motivation for the train-up and performed well during the actual event, as they ran the 10-mile course surrounded by one remarkable monument after another.

The three team captains, Maj. Martin Bortolutti, Maj. Michael Russell and Maj. Randy Wheeler, encourage and challenge others within the command to come out next year and represent the command as well.

In the week following the Army Ten-Miler race, eight Soldiers and a dozen government civilians and contractors staffed the SMDC/ARSTRAT exhibit at the Association of the United States Army Annual Meeting and Exposition at the Walter E. Washington Convention Center in D.C. The SMDC/ARSTRAT team was responsible for conveying the commanding general’s mission, vision, and responsibilities to visitors from the Army and other organizations around the world. In this task, the Soldiers and civilians did a superb job of telling visitors what SMDC/ARSTRAT does to contribute to the Army, both in space defense systems.

The SMDC/ARSTRAT team participants and their respective times for the Army Ten-Miler are as follows:

**Team America** — Maj. Martin Bortolutti - 1:16:34; 2nd Lt. Jeremiah VanDorsten - 1:16:43; Capt. Chris Berisford - 1:17:59; Capt. Orlando Cobos - 1:21:16; Cpl. Grant Henne - 1:23:19; Chief Warrant Officer 3 Matt Betzmer - 1:26:39

A smiling Lt. Col. (P) Joseph Gaines, SMDC/ARSTRAT commanding general’s executive officer, spends time with his wife Diane Reed after completing the race.

A smiling Lt. Col. (P) Joseph Gaines, SMDC/ARSTRAT commanding general’s executive officer, spends time with his wife Diane Reed after completing the race.

**Team America** — Maj. Martin Bortolutti - 1:16:34; 2nd Lt. Jeremiah VanDorsten - 1:16:43; Capt. Chris Berisford - 1:17:59; Capt. Orlando Cobos - 1:21:16; Cpl. Grant Henne - 1:23:19; Chief Warrant Officer 3 Matt Betzmer - 1:26:39
MDC/ARSTRAT represents at DA Best Warrior Competition

FORT LEE, Va. — U.S. Army Space and Missile Defense Command/Army Forces Strategic Command was well represented during the 2008 Department of the Army Best Warrior Competition.

The event, in its seventh year, took place at Fort Lee, Va., from Sept. 29 through Oct. 3, and pitted the top noncommissioned officers and Soldiers from 12 commands against each other, in the quest for the titles of Department of the Army Noncommissioned Officer and Soldier of the Year. Representing MDC/ARSTRAT was Staff Sgt. Christopher Barber as the command’s Noncommissioned Officer of the Year, and Spc. Michael Moore as the command’s Soldier of the Year.

At the end of the weeklong competition, Staff Sgt. Michael N. Merino, a U.S. Army National Guardman, was named the 2008 Department of the Army Noncommissioned Officer of the Year, and Spc. David R. Obray from U.S. Army Reserve Command was dubbed the 2008 Department of the Army Soldier of the Year.

Army Secretary announces 2009 will be ‘Year of NCO’

By C. Todd Lopez  
Soldiers Media Center

WASHINGTON — The Army will recognize the value of its enlisted leaders at all levels of command as it observes ‘The Year of the Noncommissioned Officer’ in 2009, Army Secretary Pete Geren said Oct. 6.

Geren made the announcement during his keynote address at the opening of the 2008 Association of the United States Army Annual Meeting and Exposition here.

“At the front of every Army mission in the United States or overseas, you’ll find a noncommissioned officer,” he said. “They know their mission, they know their equipment, but most importantly, they know their Soldiers.”

The secretary said that during the year the Army will develop new initiatives that enhance the training, education, capability and use of the NCO corps, showcase the NCO story to the Army and the American people, and honor the sacrifices and celebrate contributions of the NCO corps, past and present.

“Today’s NCO operates autonomously, and always with confidence and competence,” he said. “Our NCOs are empowered and trusted like no other NCO in the world, and most advanced armies in the world today are going to school on our model.”

Geren noted he came to the Pentagon late in the summer of 2001, and that he was in the building during the Sept. 11 attack.

“And for seven years, I’ve watched Soldiers go off to war, and watched their families stand with them,” he said. “I’ve been inspired by the service of our Soldiers, and humbled by the sacrifice of their families — spouses and kids, moms and dads. And it’s the privilege of a lifetime to work with and for Soldiers and Army families.”

The Army’s first priority, Geren said, are the loved ones in harms way. “They are front of mind 24 hours a day, and we’re committed to meeting with urgency the ever-changing, life-and-death needs and demands of our Soldiers in Afghanistan and in Iraq,” Geren said. “And not just meet their needs and meet the evolving threats, but anticipate, and do everything we can to get ahead of the threat. And care for those who have borne the battle, and their loved ones. These are moral duties of the highest order for our nation and our Army.”

The secretary also talked about an often unseen portion of the military — those who deliver goods and services to the fighting force: the Army logisticians. “We have 250,000 Soldiers in 80 countries, and we’ve been at war for seven years, with 140,000 Soldiers in theater today,” he said. “Nobody ever asks, ‘Who feeds those guys?’

“Our logisticians are victims of their own success,” he continued. “Their work is so good it is invisible — it’s a given. Wherever our Army goes, whatever our Soldiers need, whenever they need it, they get it — the miracle of Army logistics.”

Geren said the Army logistics community repairs more than 14,000 vehicles every year — a number equal to the number of yellow cabs in New York City. They also move more than 700,000 personnel in and out of theater, equal to the entire population of Charlotte, N.C. And each day, he said, Army logisticians provide 750,000 meals in Kuwait, Afghanistan, and Iraq. They also dispense enough fuel in the combat theater to fill up 750,000 cars — nearly four times the number of vehicles registered in Washington, D.C.

“We talked much about the surge — 15,000 more Soldiers in Iraq — but nobody ever mentioned that Army logisticians would serve 45,000 more meals each day, and ship 120,000 more gallons of water each day,” he said. During Operations Iraqi Freedom and Enduring Freedom, 619 sustainment and support Soldiers have given their lives, the secretary said.

Geren also pointed out the historic anniversaries the Army has celebrated in 2008, including the 25th anniversary of the Army Family Action Plan, the 30th anniversary of the disestablishment of the Women’s Army Corps, and the 60th anniversary of the integration of the U.S. military.

“Sixty years ago, our Army did not stand as one,” he said. “It was not a single band of brothers, rather, a collection of bands of brothers divided by race.”

The policy then, he said, was that the Army was separate, but “hardly equal.” “[It was] a cruel irony of our nation sending Soldiers to fight for freedom against the Germans — yet affording privileges to white German prisoners of war held in the United States that were denied to the African-American Soldiers who guarded them,” the secretary said.

On July 26, 1948, President Harry S. Truman signed Executive Order 9981, declaring “there shall be equality of treatment and opportunity for all persons in the armed services without regard to race, color, religion or national origin.”

“With the stroke of a pen, President Truman launched the Army on the path to the color-blind institution we know today,” Geren said. “The Army moved slowly and stubbornly at first, but now stands as the model for equal opportunity in our nation. Today, we have an Army where the only colors that matter are red, white, and blue.”

Geren also took time to reiterate another priority of the Army — the elimination of sexual assault within the ranks.

“The brothers and sisters of our Army must be able to count on each other, wherever they are, in the battlefield or in the barracks, and whenever, on duty or off, no matter the cost,” he said. “We will create a climate of zero tolerance for gender-based misconduct — in attitude, word, and deed, and become fully, as our values demand, a band of brothers and sisters.”
Customer Support priority for 53rd Signal Battalion

By Sharon L. Hartman
SMDC/ARSTRAT Public Affairs

COLORADO SPRINGS, Colo. — Key players and policy makers from the satellite communications community were invited to the 53rd Signal Battalion’s annual Operations Conference Oct. 15-21. The event, conducted at the ITT and ARINC facilities and the Global SATCOM Support Center, allowed attendees to discuss and review current policies, as well as look at the roadmap for the upcoming Wideband Global Satellite activations.

According to Sgt. 1st Class Robert Lewis, 53rd Signal Battalion Operations noncommissioned officer and facilitator for the conference, the occasion was an opportunity to focus on improving the battalion’s customer support to the SATCOM community.

Germany Proficiency for Charlie Company Soldiers

Charlie Company
53rd Signal Battalion

LANDSTUHL, Germany — Three Control Warriors from Charlie Company, 53rd Signal Battalion, tested their skills on several German weapon systems Sept. 10.

Capt. Pedro Sanabria, Charlie Company commander, Staff Sgt. Corey Wilson and Sg t. Guy Jackson were invited along with several Soldiers from the 21st Theater Support Command to compete for the prestigious German Schützenschnur on a German rifle range just outside the city of Kastellaun, Germany.

The Control Warriors were tested on their marksmanship skills on the German P8 9mm pistol, the MG 3v 7.62mm machine gun, and the German service rifle (G36/G3). The Schützenschnur is the German weapons qualification badge which is close to the U.S. Army weapons qualifications badge.

and create a greater bond with their German military partners.

The Schützenschnur is a silver-colored rope with a round metal badge on a flat end near the top of the rope. The center of the badge displays the German eagle surrounded by a wreath of oak leaves, which is a symbol of the Bundeswehr, the Armed Forces of the Federal Republic of Germany.

“Even though the name has changed several times, the importance of having a weapons qualification to test the proficiency of your Soldiers weapon skills is very important.” Wilson and Jackson earned a Bronze badge while Sanabria earned Gold.

1st Space Battalion celebrates the Harvest

By DJ Montoya
SMDC/ARSTRAT Public Affairs

PETERSON AIR FORCE BASE, Colo.—Children and their parents from the U.S. Army Space and Missile Defense Command/Army Forces Strategic Command’s 1st Space Battalion got a head start on Halloween during the battalion’s annual Harvest Party. The event took place in the training rooms of Building 3 here, on the evening of Oct. 24. Members of the battalion’s Family Readiness Group took charge of the coveted event with help from Soldiers from the 1st Space Battalion.

Children, dressed in various costumes, were lead through a maze of spooky Soldier offices as part of a Trick-or-Treat event lead by Battalion Commander Lt. Col. Thomas James. The action then moved back to the training room for pizza and refreshments. Crafts and traditional games, such as bobbing for apples, were on tap for the youngsters. And a parade of all those in costumes was conducted with prizes awarded.

Members of Charlie Detachment, 1st Space Company undergo combatives training, a vital skill in which every Soldier should receive training.

Bravo Company runs for humanity

By Bravo Company, 53rd Signal Battalion

FORT MEADE, Md. — On Sept. 20, seven Bravo Company Soldiers participated in Habifest, Habitat for Humanity of Howard County's largest fundraiser of the year. The proceeds help fund construction for two single-family homes in Howard County, Md., near Fort Meade. The run is a nationally certified 5K course bringing in many very talented runners. Of the 175 runners, the winner was Nicholas Kurgat of Chapel Hills, N.C., who ran an astounding 14 minutes and 43 seconds.

Habitat is the third community service event participated in by Bravo Company’s Operations Platoon Fourth Squad in the past five months. In May, fourth squad organized a clothing drive, making a large donation of clothing to a local Women’s and Children’s Shelter. Shortly after that, they spent time at an Assisted Living Facility with 15 veterans of WWII, Vietnam, and the Korean War. Each event has been well supported by the entire company, all benefiting the surrounding community and representing the United States Army.

“As Soldiers we are organized and equipped to do more than any other group. We have established leaders, hard workers, motivation, and an ingrained sense of servant-hood,” one noncommissioned officer put it. “When others see us serving they see us, but also the U.S. Army. It gives them a sense of pride for our military. That makes me proud of what I do.”

The next community event being organized is time with a local elementary school class. The details are not yet planned.

Combatives training for JTAGS Korea

By Sgt. Jeremy Latorre

Unit reporter

OSAN AIR BASE, Korea — Proficiency in hand-to-hand combat is a vital skill that all U.S. Army Soldiers should possess. Recently, members of Charlie Detachment, 1st Space Company, JTAGS-Korea, went through both Level I and Level II combatives courses.

Sgt. John Hardegree, Sgt. Charles Menard, Spc. Brian Fisher and Spc. Christopher Pond completed the Level II certification course that was offered through coordination with Master Sgt. Xavier Hardegree, Spc. Patricia Menard, Spc. Nicholas from Headquarters and Headquarters Battery, 355th Air Defense Artillery Brigade. The Detachment has an outstanding relationship with 355th ADA Brigade and the benefit is obvious, as 86 percent of its Soldiers are now Level I certified and 26 percent are Level II certified. While each course was intense and strenuous, the attendees felt the knowledge and confidence they gained would be invaluable to them during their Army careers.

Hardegree said Level II will help during combat because “I would probably know more than the other person and be able to take control of the situation … this, along with building the confidence that it takes to defeat an opponent.” These are two very important points of the Army Combatives program; it tries to instill the fighting spirit in Soldiers and to train them so they have other options should they need them in actual combat situations.

Warrant Officer 1 Cleveland Butler, the Level III trainer, oversaw the Level I course in which Staff Sgt. Baron Godfrey, Sgt. Jesse Jacka, Sgt. Jason Whitley, Spc. Robert Swain, Spc. Jerome Williams, and Pfc. Albert Almas trained hard and earned their Level I certification. Throughout the week they learned different dominant body positions, defensive postures and submission moves. While difficult at times, the course gives valuable training to these Soldiers that they will use throughout their Army careers. According to Whitley, “It was difficult at times, but well worth it. It was a good break from the normal routine.”

The Level I course concluded with a championship match to determine the class champion. In the first match, Godfrey went wire to wire with Jacka before finally winning on points awarded for achieving various dominant body positions. In the second match, Williams defeated Almas by achieving the rear-mount position and applying a rear naked choke. In the championship match, Godfrey used his strength and newfound techniques to secure a win over Williams using a cross-collar choke.

Modern Army Combatives is an excellent way to build unit cohesion, while at the same time offering training on vital skills that every Soldier requires. Charlie Detachment will continue to incorporate combatives as part of its regular physical fitness program. This will ensure Soldiers stay proficient on what they’ve learned and will allow them to introduce new techniques as well.

355th ADA coordinators Whitehead and Nicholas gave outstanding support and offered their off-duty time every week to train Soldiers and Airmen at Osan Air Base in Modern Army Combatives. Their efforts have had a direct impact on the success of Charlie Detachment which hopes to continue this strong relationship for many years to come.
The Fort Detrick Combatives team. (Left to Right) Spc. Jacob Hackenberg, Sgt. Buddy Blackham competed at 155 pounds, Staff Sgt. Gary Grooms and Spc. Jacob Hackenberg competed at 170 pounds, Spc. Nicholas Smith competed at 185 pounds and Sgt. 1st Class Jared Roy competed in the 205-pounds weight class.

The tournament was designed to reflect the three levels of the Army Combatives Program. It begins at Level 1 where grappling is legal but strikes are not allowed. Points are awarded for takedowns and dominant body positions. If a competitor is able to string together enough wins, he moves into the Level 2 portion of the tournament where slaps to the face, body punches, and body and head kicks are all legal. In the final match that takes place between the top four ranked fighters after the first day of fights, punches to the head are allowed. The finals are televised and held in a full-size ring.

Of the five competitors, one was able to rise to the top. Roy dominated his first fight with a superb kimora to an arm bar transition. His second fight was a tale of a challenge. Both competitors grappled for the first five minutes with no victory. The match went into overtime where Roy was able to pull off a duck under and take his opponent down, scoring the first point of the match and being declared the winner. His next fight went in the same manner, a tense Greco-Roman grappling match in which he was able to score the first point of the match with an arm drag takedown. With his third win, Roy secured a spot in the semi-finals.

After a two-hour intermission, it was back to the grind. Roy’s first semi-final match found him facing a fighter about the same height as his own 6’3” frame. After a furious bout exchanging slaps, kicks and punches, his opponent was awarded the decision. After having his arm raised, the winning opponent limped off, collapsing and being tended to by his fellow team-mates and medical personnel while Roy nonchalantly walked off to find out about his next fight. In his last semi-final fight, he was able to pull off a submission from his back. After a grueling day, Roy was into the finals fighting in the consolation match for third place.

In the final day, after demonstrating outstanding physical fitness through five intense, hard-hitting fights, Roy was to face his last challenge. Both competitors grappled for the first five minutes with no score and Roy was able to pull of a submission out of his back. After a grueling day, Roy was into the finals fighting in the consolation match for third place.

In the final day, after demonstrating outstanding physical fitness through five intense, hard-hitting fights, Roy was to face his last challenge. Both competitors grappled for the first five minutes with no score and Roy was able to pull of a submission out of his back. After a grueling day, Roy was into the finals fighting in the consolation match for third place.

The five outstanding Soldiers from Alpha Company displayed amazing personal courage while representing their unit and Fort Detrick. Their motivation, dedication and incredible physical fitness has set the way ahead for the future by showing the Army what Signal Soldiers really have to offer.

The best exercise for golfers is golfing

Commentary by Spc. Michael Clifton

CAMP ROBERTS, Calif. — Free time can be sparse when living the military life. How each person may choose to enjoy that time off shows a lot about them. It shows what that person values in life and themselves. Some choose to sleep or play video games as their outlet. While I enjoy both on occasion, I prefer to be active and outdoors during “my” time. I prefer an activity that incorporates physical skill, mental concentration, social interaction and good old Mother Nature. I am a golfer.

Golf is such an old sport that its origins are unknown. Debate ranges from whether the roots are Roman or Chinese. The form of the game that is most common today comes from Scotland dating back before the 15th century.

Golf is a game as simple as this. You take a set of clubs and a ball. You use the clubs to hit the ball through a series of 18 holes while attempting to do it in the least amount of hits or “strokes.” I’m sure most have played miniature golf or “putt putt” and get the basic idea.

While the game sounds easy, the coordination and strength needed to achieve the lowest scores possible are immense. Golf can be so precise that mere seconds in your timing and a single degree in your club angle can create an errant shot. Golf takes a few minutes to learn and years to master.

I’ve been playing golf since I was eight and have progressed to a stage where I’m merely mediocre. That is one reason the sport is great. While tournaments and competition are common in the game, it is a sport where self improvement is easily measured.

Golf is a great way to interact with other people. In a game with a slower tempo like golf, conversation is inevitable. Take into account that over the full 18 holes you walk approximately 3.5 miles and play for a few hours, and there is a lot of talk time. The game is a great way to bond with other Soldiers from your unit. Not only do you share the high times of a great shot, but you also share the low times and gripes of errant shots.

Golfers get to enjoy Mother Nature. You get the smell of the grass, the feel of the breeze, fresh air unfiltered and plenty of sunshine. In a job where you work indoors for long shifts, the ability to enjoy the gifts that nature provides is priceless. My home course is the lovely Hunter Ranch Golf Course, located in Paso Robles, Calif., and a short, easy drive from Camp Roberts. The course provides rolling hills, old oak trees, beautiful lakes and streams, and is surrounded by wine vineyards on all sides. Not only is it a gorgeous course, but it is a gorgeous view as well.

Not too many sports and hobbies provide a scene as lovely as I experience every time I put on my golf shoes and grab a driver. The golf experience changes on every different course you play throughout the world.

Golf is a fantastic hobby to have. It provides the enthusiast with the opportunity to try new things, enjoy the scenery and challenge your body and mind. It may not be the easiest thing in the world, but the satisfaction received after even a bad day is immeasurable. Sure I may get frustrated when I have a bad shot, but the thrill of hitting a hole in one is literally a feeling of a lifetime. Just ask me, I know! So don’t sleep your life away without friends, get out and get busy living. See you on the links!
Public affairs specialist keeps proving her mettle in martial arts

By Marco Morales
SMDC/ARSTRAT Public Affairs

People who have met Dottie White, the public affairs specialist, and who don’t know much else about her also don’t have a clue about her warrior side. Her quiet demeanor and glowing, fair-haired, youthful appearance give the impression that she wouldn’t hurt a living insect much less a human being. However, people who have trained with Dottie in martial arts, have a clear understanding of her fierce, warrior side.

Dottie is an 11-time world champion in women’s black belt martial arts fighting. She is also the 2008 World Champion, ages 30 and above, in the women’s black belt weapons category and the 2008 World Champion, ages 30 and above, in the women’s black belt fighting category. During four recent competitions which were conducted from early July to mid-October in Orlando, Fla., Atlanta, Ga., Washington, D.C., and Minneapolis, Minn., she won 1st place in the women’s black belt weapons, forms, middleweight fighting, and as the age 30 and above overall grand champion.

“I believe training along with knowing Tae Kwon Do with a passion is the key to being the best during competitions,” said Dottie. “I have spent many long hours in training facilities focusing on forms coupled with building up my physical stamina and endurance,” she said, adding, “It’s a regimen that doesn’t lend itself to shortcuts.”

When she isn’t at work as a civil servant in the U.S. Army Space and Missile Defense Command/Army Forces Strategic Command public affairs office or focusing on pursuing a bachelor’s degree at Athens State University, she is training or teaching martial arts at the River City Karate Studio in Decatur, Ala.

The sensei at the studio, Chase Russell — a 3rd degree black belt and owner/instructor — assists Dottie in her preparation for each tournament.

“Chase is a great sensei. All of the students there learn from his structured and disciplined style,” Dottie said. Dottie is a 4th degree black belt. “I still ‘learn’ from Chase during sparring sessions to best prepare me for competitions.”

But one would wonder how much more Dottie can actually ‘learn’ after achieving so much and winning so many martial arts tournaments.

Initially influenced by her brother-in-law to try the martial arts experience when she was 20, Dottie’s preparation for competing in tournaments reflects personal dedication and discipline. “When I first started I thought maybe I was too old and clumsy,” she said. “My self-confidence was so low that I avoided eye contact with people.”

Then she was introduced to Wilburn King, owner and instructor of King’s Southern Karate Studio, which used to be located in Decatur, Ala., and no longer exists. The late Mr. King taught Dottie to be the best in martial arts, “Through martial arts training I have overcome my shyness and have also gained a great deal of strength and self confidence, thanks to Mr. King,” Dottie said. Her training warm-up session includes doing some 200 side-straddle hops, 75 push-ups, numerous rigorous abdomen crunches and a series of stretching exercises.

“Tae Kwon Do is a passion I take seriously,” she said. “It is like a shining light inside of me that never flickers or dies.”

Anderson scores pair of aces during single round of golf

By Dottie White, Editor, The Eagle

Barry Anderson of the SMDC/ARSTRAT G3 stands at the 13th tee box at Point Mallard Golf Course in Decatur, Ala., where he scored one of two holes-in-one Oct. 13 during a single round of golf.

The first one came on the 152-yard 11th hole when Anderson sank his tee shot using a 7-iron. The next one came two holes later on the 192-yard number 13 tee where he made an ace using a 4-iron.

He finished the round with a 77. He said he will have a commemorative plaque and display case made for the scorecard and the Titleist NXT Tour golf ball, which he used the entire round that day.

Anderson was golfing with three friends — Preston Lucas, Jim Cominsky and Keith Walsh — who witnessed the holes-in-one. Anderson said his playing partners were as excited as he was.

In keeping with the tradition of buying your playing partners a round of drinks for witnessing the holes-in-one, Anderson treated his friends to chicken wings and drinks at a local restaurant.

Anderson received two certificitates from Point Mallard for making the holes-in-one. Also, his name was added to a plaque with a list of others who have aced holes at the course.

Since the aces, Anderson said his confidence is higher, and he has been playing pretty good.

Golf Digest magazine hired Francis Scheid, Ph.D, the retired chairman of the math department at Boston University, to compile the odds of making a hole-in-one. Some of Scheid’s results were:

- Professional tour player making an ace: 3,000 to 1.
- Low-handicapper making an ace: 5,000 to 1.
- Average player making an ace: 12,000 to 1.
- Average player acing a 200-yard hole: 150,000 to 1.
- Two players in the same foursome acing the same hole: 17 million to 1.
- One player making two holes-in-one in the same round: 67 million to 1.
- One player making three aces in a single round: 2 trillion to 1.
HUNTSVILLE, Ala. — A group of employees from the U.S. Army Space and Missile Defense Command/Army Forces Strategic Command volunteered to assist with the 41st Special Olympics at Milton Frank Stadium here Oct. 14.

More than 350 special-needs athletes of Madison County competed in events such as a 50-meter run, a long jump, a softball throw, and other track and field events.

“These kids and adults are bubbling over with joy just to have an opportunity to do their best, no matter what the outcome,” said Phil Patterson, a volunteer from the Future Warfare Center, SMDC/ARSTRAT. “They love life, and their joy is contagious.”

Each competitor was teamed with at least one volunteer escort to make sure the athlete made it to his or her scheduled event on time. The escorts also cheered for their athletes and gave hugs or high-fives upon completion of events.

At the end of each event, the athletes were all recognized by taking their place on the winners’ platform and receiving a ribbon for their accomplishments.

“Special Olympics is a wonderful opportunity to give your time and share a lot of fun and excitement with special athletes from the surrounding community,” said one of the escorts, Michelle Smartt of the Future Warfare Center, SMDC/ARSTRAT. “Every year I volunteer to help with this event, my heart is touched by the determination and joy all these athletes possess. I enjoy being able to cheer for the athletes and share this memorable time with them. I am honored to give my time, and I look forward to helping out next year.”

“Helping others, especially those with special needs, is very rewarding,” said Patterson. “Special Olympics is an eye-opening, incredibly enjoyable, yet humbling experience which can only be truly appreciated by attending and being actively involved; everyone should do it at least once. I enjoy supporting Special Olympics every year.”

SMDC/ARSTRAT employees support Special Olympics

By Dottie White
