THE CONSISTENCY OF THE RELIGIOUS CHAMBER

The inconsistency of any paper in this connection is that, while it maintains that the Established Church in this State is a benefit except when used against free trade, the same paper, in its editorials, declares that it is right to set restrictions upon trade from the country where the Established Church exists. To be consistent, one should either support free trade everywhere or restrict trade from the country where the Established Church exists. The inconsistency of the religious chamber is that it supports free trade in its editorials but opposes it in its editorials.

VICTORIAN TRADE

The Victorian trade with our northern neighbor under the Established Church is not favorable to our interests. The paper states that the Established Church is a benefit except when used against free trade. However, it also states that the only remedy for the Victorian trade is to set restrictions upon it. This inconsistency makes the paper's position on this issue unclear.

HOLIDAY NOTES

Fur-trimmed costumes are in favor. A young woman making a party on Monday, who had been to Canada, brought a coat with a fur trim for the occasion.

QUININE PILLS

We have handled only the pills of the well-known manufacturers for the last few years, and have found them to be reliable and of high quality. We still sell them at prices that are lower than they can be bought elsewhere in the city. We are confident that they are the best pills available for the reason that we purchase directly from the manufacturers.
