ACKNOWLEDGEMENTS

This program was supervised by Dr. R. K. Irey, to whom I express my gratitude for his guidance and advice throughout the work. I also thank Dr. R. B. Gaither, Dr. C. C. Oliver, Dr. T. A. Scott, and Dr. L. Janos for their service on my advisory committee.

I would like to thank Dick Tomlinson and the men of the Mechanical Engineering Laboratory for their valuable assistance in the fabrication of the experimental apparatus and for the innumerable problems they helped solve. Also, I would like to thank Frank Ebright, who aided me in the performance of the experimentation.

My appreciation is extended to the National Aeronautics and Space Administration for their financial support throughout this period in the form of a NASA Traineeship.

Finally, I want to especially thank my wife, Peggy, for the support and encouragement she has offered me during this entire period.
