Figure 26. Possible recombination between recombined bt2-7503s and between recombined bt2-7503 and Bt2-like. A: Schematic representation of recombination between bt2-7503s. B: Schematic representation of recombination between recombined bt2-7503 and Bt2-like. Open block: exon sequence; spotted bar: intron sequence. Duplicated sequences are distinguished for illustrative purpose by solid block. Other symbols are described in the legend to Figure 22.
