Meta-Objects in the IR: Using Sample Works as Training Tools

Christy Shorey
Manager of the UF Institutional Repository

SMIRC 2018
April 26, 2018
2017 Fictional Conference for IR Example Works

Each work of the “conference” shows how to load that type of item into the IR@UF
Steps on how to load a conference poster, including best practices for metadata, are presented in the poster.
Conference Poster

The metadata for the fictional conference poster follows the guidelines set out on the poster, and thus also serves as an example users can follow when they upload their own conference posters.
Conference Paper and Conference Presentation
Conference & Symposia tab is the main way users are directed to the example conference works.
Usage Statistics
May 2017-March 2018

<table>
<thead>
<tr>
<th>Item</th>
<th>Views*</th>
<th>Visits†</th>
</tr>
</thead>
<tbody>
<tr>
<td>Conference Paper</td>
<td>275</td>
<td>240</td>
</tr>
<tr>
<td>Conference Poster</td>
<td>345</td>
<td>271</td>
</tr>
<tr>
<td>Conference Presentation</td>
<td>255</td>
<td>230</td>
</tr>
</tbody>
</table>

* **Views:** The total views per item. This is equivalent to hits.

† **Visits:** The number of unique visitors. This is always smaller than the number of views, a single visit will normally include multiple views.
