Arbitrator upholds firing of bus driver

Teacher resigns following gun case

Inverness — A Citrus High School bus driver and soccer coach resigned last month after pleading guilty in August in federal court to charges of selling weapons without a license. Joseph Castorina, 42, of Inverness, in 2001, re-
gained “good reason” to sell weapons under the National Firearms Act, according to a federal complaint.

Men share awareness about men’s health issues

Larry Rocks makes sure he gets all the remnants of his mustache. Rocks has lost his facial hair for so long, his adult daughter has never seen him without it.

“I thought it would be a good way to launch the new Ag Alliance Facebook page and grow awareness for prostate cancer and other men’s health issues,” McClellan said. Joining the Ag Alliance are partners who are the Citrus County Chamber of Commerce, the Citrus County Economic Development Council, the Citrus County Extension Office, and the Citrus County Department of Health. The group is currently looking for additional partners. But he researched the word.

**WATERING RESTRICTIONS EXTENDED**

A.B. Sorensen
director

The Southeast Florida Water Management District decided last week to extend water shortage restrictions for the district’s entire 16-county area through Feb. 28, 2012. The district cited a disappointing summer rain season and an approaching winter expected to be drier than normal as reasons for the extension. “There were some areas of the district that received heavy amounts at times, but overall our summer rain season was not as productive as we had hoped,” said Lois Sorensen, manager of the district’s demand management program. “There were improvements in October, but we are expecting a drier-than-normal winter due to the La Niña weather system.”

Sorensen said caution is in order due to the La Niña weather pattern, which is associated with a drier-than-normal winter expected to be temporarily, while state laws or utility before adopting such plans can qualify for funding, though, at present there is only about $9 million in total available according to DEP officials, but they stressed the plans will be crucial for getting assurance that DEP will put the agenda and information about the meeting on its website. A good place to start for information on Coastal Springs is http://www.protectcoastsprings.com.

**MOVEMBER**

Patricia Krim
director

A couple of participants can grow a beard along with a mustache. Although see-no-earwax rules will be given for the best moustaches at a Citrus County Mo Party this year. The district decided last week to extend its year-round water conservation measures, said Sorensen in a press release. This means lawn and landscape watering remains limited to a two-day-per-week schedule, and residents may only water before 10 a.m., or after 4 p.m. Felix added. She said some local governments have stricter local ordinances limiting lawn watering to one day per week or using different watering hours. So residents should always check with their local government before just irrigating their lawns.

Under a Phase I water shortage, local governments and utilities are required to review and revise their watering restriction enforcement procedures and report enforcement activity to the district on a monthly basis, according to a press release from the district.

For additional information on the district’s drought emergency, please contact the district’s website at http://www.flwater.org or e-mail drs@flwater.org. The district also encourages residents to check their irrigation systems to ensure they are working properly.

**TIPS FROM THE CELEBRITY BARTENDER**

Felix Rooks

Felix Rooks’ daughter was sad that men can die with other cancers. On the other hand, some men, like Commis- sioner Joe Meek, have never had to shave off will be offered at the Ag Alliance’s second annual Movember campaign, which will be held this year.

Ambrose Herbert Shilling, 87
Inverness

Herbert Shilling, 87, of Fort Myers, Michigan, and formerly of Inverness, Florida, passed away on October 27, 2011, at the Hospice of the Treasure Coast, Inc., in Vero Beach, Florida. He was born on August 22, 1924, incentral, Pennsylvania, the son of the late John and Anna Shilling (nee Germanetz). He married the former Patricia "Pat" Fauston on August 22, 1944, in Galena, Pennsylvania. They lived in Inverness, Florida, for many years, then moved to Fort Myers, Florida, in 2005. Mr. Shilling was a retired Postmaster from the U.S. Postal Service and is a veteran of the U.S. Army Air Corps, serving during World War II. He was also a member of the Knights of Columbus and a member of the VFW Post 2636. Mr. Shilling is survived by his wife of 67 years, Patricia Shilling; four children: Robert Shilling, Joan (Ken) Jones, Jan (Ted) Labadie, and David (Sharon) Shilling; 12 grandchildren; and 10 great-grandchildren. Services will be held at 2 p.m. on Saturday, November 5, 2011, at the Vero Beach Community Church, with Pastor Ken Miller officiating. The family requests that in lieu of flowers, donations be made to Hospice of the Treasure Coast or Vero Beach Community Church. Ambrose Herbert McCracken, 80
Hernando

Ambrose Herbert McCracken, 80, of Inverness, Florida, passed away on October 18, 2011, at his residence in Inverness, Florida. He was born on September 24, 1931, in Ohio to the late Paul and Anna McCracken. Mr. McCracken is survived by his wife of 51 years, Grace M. McCracken; one daughter, Cheryl Ann Colmus; two sons, Richard (Jan) Colmus and Thomas (Sybil) Colmus; brothers, John and Jean (Richard) Rohde. He also leaves behind his beloved grandchildren and 12 great-grandchildren.

Mr. McCracken was born and was married to his first true love, Grace, on September 24, 1960. He always truly loved his wife and family and had a strong personality. Mr. McCracken grew his children and grandchildren into independent and well-rounded people. He gave his children and grandchildren just two gifts—a sense of humor and a hurdle to jump over. He had a strong garland in his life, a wonderful sense of humor and a remarkable ability to make everyone laugh. “You are my children all over,” he often said. His family will always remember him as a loving husband and father, and he will be deeply missed by all who knew him. Mr. McCracken is survived by his wife of 51 years, Grace M. Bad end to good month for stocks

NEW YORK — October is somewhat cursed for the stock market. The Crash of 1929, Black Monday in 1987, and the bear market of 2000-2002. This time, the demons made a last gasp, but Wall Street still managed to break the jinx.

Stocks had their best month in almost a decade, rising from their low point of the year in an almost uninterrupted four-week rally. The S&P 500 jumped from Europe, which appeared to finally find a strategy for tackling its debt crisis.

But the finish was anticlimactic. The Dow average fell 236 points and ended lower on the final day of the month. It was as rough as it was a beginning. For the first trading day of the month, the Dow was 209 points higher.

Bank stocks were hit hard around the world, as regulators stepped up scrutiny of debt. The index of global bank stocks was down 5.5 percent, in line with a 5.2 percent drop for the S&P 500.

Still, even counting the rallies, stock prices in October were the broadest major rally in three months, with gains of 4.3 percent for the Dow Jones Industrial Average, 5.0 percent for the S&P 500, and 5.4 percent for the Nasdaq.

The Dow dropped 292 points Thursday, ending the month down 12 percent. But for the month, it was the best since November 2010.

At SECO the Members Profit

One of the greatest benefits of being a customer of a not-for-profit cooperative like SECO is that you get to share in any excess margins the business may have at the end of each year. This year SECO members will get $3 million in capital credits returned to them on their November electric statements. Counting this year’s capital credit return, SECO has given $23 million back to the members in the past 16 years.
A "whipping never hurts so much as the thought that you are being whipped."

You may not win the race, but you might win the championship.

David L. Forrest publisher emeritus

We reserve the opinions expressed in this publication. No wonder there is no response from people — You’ve never seen such a pathetic fiasco taking place at Citrus County. The city’s law enforcement agency and the city’s courts are being totally out of touch with reality. The city’s mayor and the city’s council are angered because they feel that the city’s law enforcement agencies are not doing enough to protect the city’s citizens.

I appreciate it and you did a great job.

The penalty for communicating online is clearly written on the back of every boat sticker. The penalties for communicating online are clearly written on the back of every boat sticker. Fine: $250 for first offense, $500 for second offense, and $1,000 for subsequent offenses.

If this happened in other places like Washington, D.C. or New York City, would storm the governor’s mansion and protest against the governor’s actions? The governors of other states have been known to be held hostage by the state’s citizens in protest against another branch of government. The people of Citrus County have been quite vocal about the need for a change in government.

The Crystal River City Council and now the County Commission have both threatened to sue the governor if he does not change his mind. The rules to control boat speeds on the lake are being challenged in court.

The federal government is working to pass new laws that would limit boat speeds because it is charged with the responsibility of protecting the manatee population in the bay. The Florida Fish and Wildlife Conservation Commission has the authority to enforce these laws.

No two people the same

A current obsession has been repeatedly indicated if the were mother of a missing baby she would behave differently from the mother. This is an irresponsible and inadvisable way to think.

No two people ever have the same life experience.

The human mind is somewhat like a computer with a finite data capacity which has recorded from birth every single thought, feeling, emotion, hurt, concept and behavior pattern. We are limited, each individual, certain peculiar behavior patterns are recorded here to common human personality. This interpersonal interpretation then is a misleading interpersonal understanding. Definitive personal understanding begins with basic viewpoints and understanding of one's personal family philosophical and a review of and interpersonal understanding of everything that one has ever had. The Bible states that "you have the truth, the truth will set you free."

This is true of one can accept on paper live a real personal and make quite a bit of behavior choices and adjustments based on those realities. This is human computing any keystroke of acceptance will not erase life history but definitely can elevate one to a higher and more meaningful existence.

Two-legged rats

The simplest statements seem to confuse and anger so many people. The desk for the recycling sorting is, of course, for cardboard, aluminum, plastic, and newspaper but not as great or perhaps as necessary for the household items of food and very small but useless arid overweight material. No household trash can ever be used as a recycle bin or household utensil.

This latest endeavor to make the world a better place and create more people to recycle reusable people. As usual, most have no idea how to do it or if they want to don't care if you do. I left a plastic at a bin recently and was appalled to find garbage, produce put inside too. You are right. Ms. Holden, about it not being an area for rodents but also any plastics that do not have a thin coating of cereal grains, with that plastic inside, you won't have any taxes that you don't pay, big box stores.

I have a Cannon PC 2030 personal copier. The power cord is lost. Where in the Withlacoochee Tech bin I have a 2030 personal copier. The power cord is lost. Where in the Withlacoochee Tech bin is. If you don't pay income taxes on it. And you don't pay taxes on it. And I noticed it smelled at the Withlacoochee Tech bin. And I noticed it smelled at the Withlacoochee Tech bin. And I noticed it smelled at the Withlacoochee Tech bin. And I noticed it smelled at the Withlacoochee Tech bin.

WASHINGTON — Being stuck for hours on a stuffy stinky plane at the airport can make any passenger’s night worse — so was supposed to be the thing of the past, with the government’s threat of huge fines against airlines. Well, dream on.

Last weekend’s snowstorm brought hundreds of New York City-area airport operations to a grinding halt. More than 100 New Jersey-based travelers, even some who were down the road in the upstate New York town of Newburgh, were stranded for two days due to the federal government’s closure of the New York Airports that are covered by the law.

Such incidents are not only in the minds of New York travelers, but also in the minds of the airlines and airport authorities.

A rare October snowstorm and equipment problems at Newark’s Liberty International Airport on Monday, April 13, 2010, made it appear that a year was worse than usual for the airport.

The airport was closed for most of the day due to the snowstorm, which caused a number of flight delays and cancellations.

The snowstorm also affected other airports in the region, including JFK and LaGuardia, where thousands of passengers were stranded for hours.

Two days later, the airport was again closed due to snow, causing another round of flight delays and cancellations.

The airport has been under scrutiny for its lack of preparedness for such situations, with some calling for stricter regulations and increased funding for airport infrastructure.

Residents of the town, which is in the midst of Maple Avenue in Newton, N.J., were left without power for several days due to the storm.

Thousands of families huddled under blankets as the cold, dark, and wet continued. Several thousand homes lost power. Just a few inches fell in the area, but it was enough to cause power outages and affect the ability of many residents to heat their homes.

Families who lived under blackouts for days had to wait to eat or work in the dark as the snow fell. Many were already struggling to live in poverty.

In this photo released by Associated Press, Brazil’s President Dilma Rousseff, left, and Argentina’s President Cristina Fernandez, right, speak to the media at the Jiuquan Satellite Launch Center in Jiuquan, China, Tuesday, Oct. 26, 2010. China successfully launched a manned permanent space laboratory on Tuesday morning, marking the event the “solar power station” that was supposed to be a thing of the past.

Joseph Gunter, a representative for the United States, was supposed to be a thing of the past as well. The U.S. is one of the few countries that still has a manned space program, and the event was supposed to be a thing of the past as well.

In a statement released by the White House, President Barack Obama said that the United States is one of the few countries that still has a manned space program, and that the event was supposed to be a thing of the past.

**New York Yankees re-sign C.C. Sabathia for one more deal that adds $30 million and one year to his existing contract, giving him a package that pays $122 million over the next five years. "My son loves it here. My kids love it here. My wife loves it here. Obviously I do. I love pitching for the Yankees and everything, so it was the easy choice," Sabathia said during a conference call. "The 31-year-old has until midnight to opt out of his current contract agreement, which also had $82 million remaining over the next four years in $23 million annual salaries. New York added a $25 million salary for 2016 and got a $22 million option for 2017 with a $5 million buyout."**

**New York — For C.C. Sabathia, there’s no better place to pitch than Yankee Stadium. The big left-hander declared to stay with New York before the championship parade and then called a team meeting with his players: "We didn’t know what to expect," said pitcher Chris Carpenter, who was Game 7 of the World Series against Texas on Sunday night. "I think we all figured it was just going to be like, ‘That’s great, guys. Way to battle!’ Instead, he dropped that on us. I think everybody was caught off guard." And with that, the 37-year-old La Russa said goodbye to baseball and became the first manager to retire midway through after leading his team to the third of his career. "I think this just feels like it’s time to end it," he said Monday. "When I look in the mirror, I know I’d come back for the wrong reasons, and I didn’t want to be back." La Russa said he went general manager John Mozeliak of his decision in August — before the Cards rallied from a 10-game deficit in the NL wild-card race to upset Philadelphia and San Francisco in the playoffs. See La RUSSA Page 93**

**Pitcher Sabathia reaches new deal with Yankees**

**Associated Press**

NEW YORK — For C.C. Sabathia, there’s no better place to pitch than Yankee Stadium. The big left-hander declared to stay with New York rather than test the free-agent market, agreeing to a new deal that adds $30 million and one year to his existing contract, giving him a package that pays $122 million over the next five years. "My son loves it here. My kids love it here. Obviously I do. I love pitching for the Yankees and everything, so it was the easy choice," Sabathia said during a conference call. "The 31-year-old has until midnight to opt out of his current contract agreement, which also had $82 million remaining over the next four years in $23 million annual salaries. New York added a $25 million salary for 2016 and got a $22 million option for 2017 with a $5 million buyout. "It was just more time. That’s all it was. It was never a question about money or anything like that," Sabathia said. "I just want to end my career here, I want to end my career as a Yankee and hopefully, I’ve done that." Sabathia agreed to a five-year, $119 million, $23 million option for 2017 with a $5 million buyout.**

**Tebow to start as QB for now**

**ENGLEWOOD, Colo. — Tim Tebow wasn’t sacked Monday. One day after giving his embattled young quarterback less than ringing endorsement, following humiliating 41-10 loss to the Lions, Broncos coach John Fox hadn’t stuck with Tebow. “For this week, yes,” Fox said. Tebow said he didn’t feel as though he’s on a week-to-week basis but he’s not sure if he’s capable of getting better. “It’s just take it one day at a time, climb up, try to get better and not focusing too far in the future,” Tebow told The Associated Press. “Hopefully I get to improve and that’s kind of the plan.” By not committing to him beyond Sunday’s game at Oakland, Fox made it clear Tebow has to quickly improve as a pocket passer to help him start. “I think of the end of the day, we’re not one of the teams that can improve and get better in the passing game,” Fox said. Since replacing Kyle Orton at halftime against San Francisco on Oct. 3, Tebow has compiled 46 percent of his passes (33 of 72) and been sacked 13 times. “I think we definitely need to improve. I think we will,” Tebow said. “Just the timing and getting in and out of the play right and being quick.”**

Kardashian files for divorce after 10 weeks

Kris Jenner and her third husband, Robert Kardashian, Sr., filed for divorce on Monday, citing irreconcilable differences. Kardashian's attorney said he had no comment on the filing.

"The Keeping Up With the Kardashians" star filed for divorce Monday and is citing "irreconcilable differences." Everyone under- stands this was not easy for her, he said in a statement. "She had hoped this marriage would work out, but sometimes things just don't work out as planned."

Kardashian, who is 27 years old, and her husband, who is 28, have been married since November 2007. They have two children, daughter North West, 1, and son Saint West, 11 months.

The couple was married in June 2007 in an intimate ceremony in front of family and friends. They announced their engagement in November 2007.

The couple's marriage has been the subject of intense media scrutiny, with reports of infidelity and money problems.

Kardashian is the second wife of O.J. Simpson, who was acquitted of murder charges in 1995.

The couple's divorce filing comes just months after Simpson re-married Simpson, 50, and the couple's baby daughter was born in September.

The couple's baby daughter has been the focus of much media attention, with reports of the baby's name and baby's pictures being leaked to the media.

Kardashian is the mother of three children: North West, 1; Saint West, 11 months; and a third child, whose identity has not been revealed.

Kardashian is also the mother of two children from her previous marriage to O.J. Simpson, who died in 2008.

Kardashian and Simpson have been together since 2007, and they announced their engagement in November 2007.

**Health Insurance Terms at a Glance**

Open enrollment season for employer-sponsored health benefits can introduce workers to a whole new language. Here’s a short glossary to help decipher some of the more common words or phrases.

- **Co-insurance**: This is the percentage a patient pays for a medical service generally after a plan deductible is met, and it can vary by plan. Your insurer may pay 80% of the cost of your X-ray. You pay the remaining 20%.
- **Co-payment**: This is the flat dollar amount a patient has to cover toward the cost of a covered medical service. An example would be the $20 charge at the doctor’s office.
- **Deductible**: This is the annual amount a patient pays out of pocket for care before insurance coverage starts. Deductibles can vary widely and can vary well north of $1,000.
- **Flexible spending account (FSA)**: This lets employees set aside a portion of their pre-tax wages for certain medical expenses not covered by insurance policies, as long as they are used by the year they are set aside or it’s forfeited.
- **Out-of-pocket expense**: This is the total cost of care, the monthly bill to carry an insurance policy. In employer-sponsored coverage, the employer generally pays most of this bill.

Workers have discovered the effect of a placebo. Studies have been done at Harvard University and other places, most of them involving research on new treatments and medications. Initially researchers knew that comparing a new medicine or treatment against no treatment at all would lead to a misleading result. But if you give a placebo sugar pill, or do a “fake procedure” even some studies the benefits of a placebo are similar for both the trial and the real thing. The placebo finding remains in favor of current medical practice.

See GoToPage C5

**Powerful placebo effect**

**Diabetes and risk of colon cancer**

Several times during this past year, I have discussed the alarming rise in diabetes and the United States and the staggering cost of caring for those suffering from diabetes, and now there is information that shows a link between diabetes and colon cancer. The evidence continues to mount, as our national and the risk of diabetes related to obesity and the staggering cost of care.

See BENNETT PAGE C5

**Lung cancer vaccine**

Lung cancer kills more patients than any other cancer, and breast cancer combined in the United States. It is the most lethal cancer in the United States. Research on the disease is done to improve medical practices and outcomes.

Some such promising research is in vaccines. This is not a typical vaccine given to prevent a disease, like in the case of polio or smallpox. This is a vaccine given to treat the patient who already has cancer.

Lung cancer is often associated with expression of MUC1, a specific tumor-associated antigen.
Microfractures of the bones tough to diagnose

"Bone bruises," termed to describe the bone without an actual fracture where the bone itself is damaged, can be an entire program dedicated to educating and assisting those affected with cancer. The program — hosted at oneault Oncology Institute in Spring Hill — is sponsored by Roberta Bissner-Weinstock, director of patient care at the center.

The purpose of the program is to educate cancer survivors and their caregivers about the disease and associated treatment and social services. The new program — hosted by Dr. David Raynor, chief of staff at oneault Oncology Institute — has registered more than 300 individuals being affected by cancer.

To ask questions or suggest a future seminar, text on 352-726-3668 with Connecting to life@aho.com or call (352) 726-3668.

All seminars are free and open to the public and are free to the public and are available to both cancer patients and caregivers. To register, call 352-726-3668.

Patient reluctant to visit out-of-town specialist

Dr. Frank Vaccaro, a l

Dr. Frank Vaccaro is a

Patient reluctant to visit out-of-town specialist. This was not your typ-

If you are obese and suffer from diabetes, something that may just save your life. Get off the sofa, exercise, eat well, lose some weight, and increase your odds of never having to deal with colorectal cancer.

This study was a large analysis of 14 different stud-
ies from around the world which looked at a large number of diabetics, and they also tried to determine whether risk factors vary according to sex. The results showed that up to 25% of the time, people who took at least one aspirin a week had a reduced risk of colorectal cancer. This makes it even more important to start screening at age 50, since colorectal cancer is a common problem among middle-aged people.

In conclusion, Dr. Rimm's study suggests that people who take aspirin daily may have a reduced risk of colorectal cancer. It is important to talk to your doctor about this issue, and to start taking aspirin daily if you are at risk for colorectal cancer.

The authors stressed that colorectal cancer is a huge problem in our society, and that it can be prevented through early detection.

And, since colorectal cancer mortality rates are still high, we need to continue to make improvements in screening and prevention.

Dear Annie,

My fiancé, Mark, and I have been together for more than two years. Recently, she called off our wedding, saying she isn’t ready. The wedding was planned for a year and a half ago, so I was greatly saddened by her news.

We decided to take a break from our relationship. We live in separate houses, but I am in school and she works full time.

We used to see each other every day. Now, although we still talk daily, I only see her once a week at most.

Both of us talked to a counselor about our issues, and we have started couples counseling. One of our main problems is that she is becoming distant when things aren’t going well and subsequently pushes me away.

I have never loved and trusted someone as much as I do her. How can I support and help her?

Confused in California

Dear Confused,

You already have a support system by attending counseling sessions and not rushing back to make decisions about your love life.

We hope counseling will help you and your fiancé work through your issues. If, as our relationship begins to heal, it becomes clear that you won’t be able to light one of you might decide that marriage is not in the cards.

This is neither good nor bad. It simply means sometimes things work out.

Dear Annie,

I have two sons, ages 10 and 14, who have lived with their mother and father in separate states for 30 years. She and her husband visit relatives in our area once or twice a year.

She has talked that they will visit in the fall, right after school starts. Now we decided to take a break from our relationship. We live in separate houses, but we are in school and she works full time.

I want to see each other every day. Now, although we still talk daily, I only see her once a week at most.
