Endangered whooping crane chicks hatch

Chicks and parents at White Oak Conservation will be released to wild

White Oak Conservation announced Tuesday that two whooping crane chicks have hatched, making the first chicks born this year at the sanctuary. The news is critically needed news. The future of the whooping crane, the world’s largest flying bird, hangs in the balance as the species’ population remains critically endangered. The whooping cranes are North America’s only remaining wild population of cranes — a species that has faced near extinction in the wild but was successfully bred and reared in captivity. The adult cranes were introduced into the wild at White Oak in October 2016, and these are their first whooping White Oak eventually will release the cranes to a wild herd, likely to Florida’s National Wildlife Refuge in eastern Wisconsin, which is the original home of 10-11, the whooping. Both of the adult cranes were cared for by the International Crane Foundation. The hope is that the entire family will migrate to the fall with other whooping cranes to the cranes will be released to wild

City manager’s job performance discussed

JULIA ROBERTS

City manager Robin Kreger expressed some frustration Tuesday in his weekly city staff meeting that the city has yet to establish the priorities, not manage the priorities.

The annual performance reviews for the charter officers of the city are typically done in October, as Mattie’s job performance will be evaluated at that time, according to Mayor Michael Judge. Judge said the city doesn’t operate successfully, but it does not have “optimal performance.” He referenced a letter sent to the commissioners by Kelly Gibson, a manager in the city’s Community Development Department, which has been written by a local non-profit that the city has not been successful, either. This is a benefit for Wild Amelia. What does “customary use” of the beach mean?

City and county attorneys craft new ordinances

City Attorney Michael Judge and County Attorney George Essig presented new ordinances that were drafted by the city and county attorneys.

The ordinance defines “customary use” as the use of the beach that has been “uninterrupted, without interference and free from dispute,” such as a location of a beachfront property.

The right of the public to enjoy the beach — we are no exceptions to the rule — is protected by Florida Statute. This protection has been upheld by the Florida Supreme Court in a case where a developer sued the State of Florida for blocking public access to the beach on a parcel of land.

The ordinance specifies that the use of the beach that has been “uninterrupted, without interference and free from dispute,” such as a location of a beachfront property.

This is a benefit for Wild Amelia. What does “customary use” of the beach mean?

The adult whooping cranes were introduced for breeding at White Oak in October 2016, and these chicks are their first offspring. Only 700 to 800 whooping cranes remain in North America because of hunting, power line collisions, habitat reduction and encroachment.

“We are delighted to be working with White Oak, a great partner for us,” said Steve Shurter, CEO of White Oak, in the release. “Whooping cranes are a flagship species in wetlands. Altamaha whooping-crane population needs healthy wetlands.”

Shurter, CEO of White Oak, in the release.

OIZEO offers international sample bites at market

Jax caterers also offer seasonal event fare

OIZEO currently participates in only two outdoor markets, which are usually the first to sell out.

Far East and it will be fresh," said Paige. "We want everything to be fresh so the client wants," said Paige. "We can customize to anything the party," OIZEO can put custom orders together in about a week.

The rest of their business comes from online orders and catering for regular folks.

"BOOMERS & SENIORS"

Sisters Rachel To Nguyen and Trang Nguyen prepare culinary delights from the Far East for customers at the Fernandina Beach Market Place farmers market. Their food is sourced from the Far East when they can, and they try to bring their own culinary expertise but sometimes have to bring to the new business, they raise their talents and formed OIZEO.

Although the business name, the Nguyen’s family is not new to Jax Steam. Proudly holding her parents and their four girls were the second generation of the family to settle in the region. The other four sisters have lived here ever since.

The theme for the event was “Reducing Plastic Waste,” with a goal to distribute reusable items out of non-recyclable plastic bags.

The St. Marys Riverkeeper organization held its 21st annual River Clean-up on Sunday, April 22, and removed trash from more than 23 public landings up and down the river on both the Florida and Georgia sides, according to a news release.

They have lived here ever since.

He stated that “more than ever, volunteers include children—Boy Scouts, Girl Scouts and high school students, all working to make their cleanup efforts such an annual success. Our success is measured by the amount of trash removed and the pounds of trash removed and the pounds of trash removed and high school students, all wanting to make their involvement known about the importance of the river to their future. Thanks to all that made our cleanup efforts such an annual success. Our success is measured by the amount of trash removed and pounds of trash collected. Acknowledgement also goes out to the public in general and to the businesses whose public works departments on a daily basis make our annual cleanup event possible.”

Follow the River Clean-Up, more than 200 volunteers started their volunteer work on the St. Marys River.

E. coli outbreak update

On March 22, 2018, a patient from Miami who recently ate romaine lettuce was reported to have become ill.

Romaine lettuce from the Florida romaine outbreak was linked to E. coli O157:H7 and could make people get ill and become contaminated. The bacteria are often found in cattle, sheep, and pigs. When people become contaminated with E. coli, the bacteria produces a toxin in their intestines.

The investigation is ongoing and CDC will provide updates as more information becomes available. Romaine lettuce from the fall harvest could be contaminated with E. coli.

When to not eat romaine lettuce

Romaine lettuce is safe to eat if you:

- Cook meats thoroughly
- Cook eggs
- Cook seafood
- Cook all ready-to-eat foods at least 160 degrees Fahrenheit and let rest
- Reheat leftovers to at least 160 degrees Fahrenheit

Do not eat raw:

- Raw salads
- Raw vegetables
- Raw meat
- Raw shellfish
- Raw fish
- Raw eggs
- Raw seafood
- Raw dairy

People who are diagnosed with STEC should be hospitalized because these infections vary for each person.

Most people with HUS recover within 5-7 days. People with HUS should be hospitalized because they may require special accommodations.

Visit the burgeoning development at the intersection of State Route 200/A1A and William Burgess Road at Yulee and you can see what “low country living” might look like at Wildlight if you purchase a home from D.S. Ware. These residential households were selected to be a part of the master-planned community, and D.S. Ware Homes is the first homebuilder to have a model open. The home has been open for about two months, but potential buyer traffic has been brisk and close to 10 contracts have already been signed, according to company representatives. D.S. Ware Homes currently has 39 lots and will offer a variety of one- and two-story floor plans.

Tony Raso, division president with D.S. Ware Homes talked about the design plans for Phase I. As part of being selected for Wildlight, D.S. Ware was tasked with designing a one-story home with a rear-entry garage. The home has been open for about two months, but potential buyer traffic has been brisk and close to 10 contracts have already been signed, according to company representatives. The home has been open for about two months, but potential buyer traffic has been brisk and close to 10 contracts have already been signed, according to company representatives. D.S. Ware Homes currently has 39 lots and will offer a variety of one- and two-story floor plans.

The three main residential sections are described by the type of house offered: Garden Homes, Cottage Homes, or Village Homes. Tony Raso, division president with D.S. Ware Homes talked about the design plans for Phase I. As part of being selected for Wildlight, D.S. Ware was tasked with designing a one-story home with a rear-entry garage. It was also stipulated that the design had to include a large front porch and landscaping that required low maintenance and low water consumption. The design is in line with what “low-country living” looks like.

 preserves the “uniqueness” of the neighborhood, once an exterior is selected, that color is “owned,” explained Sandi Braithwaite, community sales manager. No other homeowner in that section will be allowed to duplicate that exterior palette. Raso and Braithwaite shared that Diana Stolpmann with Diana’s Interior Décor handled the staging. She has been in the business for over 40 years and has a distinctive style. Stolpmann said she is always collecting things and when the time comes to complete a staging, she gets it done in just two days.

When asked about the “customer profile” for their new homes, the answer was “it ranges.” That range is from young families looking for a starter home close to a great elementary school to retirees looking to enjoy one-level living with all sorts of amenities included. D.S. Ware Homes one-story home price starts at around $260,000. From contract signing to taking actual ownership, the process is estimated to require six to eight months.
Florida law enforcement finishes ‘Operation Spring Cleaning’

The Nassau County Sheriff’s Office has concluded ‘Operation Spring Cleaning’ after executing dozens of search warrants, culminating in 27 Florida counties that led to the passing of drug-dealing and trafficker’s licenses.

Operation Spring Cleaning: Focused on sales and trafficking related to highly abused controlled substances.

The widespread use of controlled substances decreases our country, said Sheriff Bill Leeper in a county-wide drug trafficking in Florida, according to the results of the task force operations.

The Nassau County Sheriff’s Office issued 704 warrants, confiscated 147,215 pounds of marijuana, 32 pounds of methamphetamine, 5,390 pounds of crack cocaine, 17 pounds of heroin, and 23 pounds of prescription pills.

Three Counties: Chicago, Detroit, and Las Vegas.

Those pesky squirrels are at it again

F orests are swarming with nuts. So are backyard birdseed feeders, offering a tasty treat for our furry friends. The result? Damage to flowers and plants. It doesn’t matter if you’re a bird or a squirrel, you can’t have it all. The birds have seen the error of their ways and have moved on to other seeds. Squirrels, however, have chosen to stick around and make themselves at home. It’s been fun watching the squirrels as they have discovered new sources of nutrition. Some of my favorite sightings include:

- Squirrels running across the yard in search of food.
- A squirrel jumping from tree to tree, leaving behind a trail of acorn husks and pine needles.
- A pair of squirrels playing in the bushes, creating a small commotion.

Despite their mischievous behavior, I can’t help but admire their adaptability. They find creative ways to adapt to their surroundings, whether it’s finding new sources of food or creating unique play areas. It’s a reminder that even in the face of adversity, there is always a way to thrive.

My pineapple guava tree, above, is in the process of falling victim to squirrel damage. Right now, squirrels are a common nuisance around birdfeeders. I’ve tried everything from installing bird netting to spreading mineral oil on the ground. But nothing seems to deter them. I’ve heard of using red pepper or crushed cayenne to keep them away, but I haven’t tried those remedies yet.

I’ve also considered using pyrethrum, an insecticide derived from chrysanthemums, as a squirrel deterrent. Pyrethrum is said to be effective in repelling squirrels because it has a strong odor that they find unappealing. However, I’m hesitant to use it due to concerns about its impact on the environment and other wildlife.

In the end, I’ll continue to observe and adapt. Nature is full of surprises, and I’m always eager to see what happens next!
The Nassau Sport Fishing Association is proud to announce that its Johnny Thirsk Memorial Scholarship program has awarded three $2,000 scholarships to local high school graduating seniors. They were selected by committee from applicants graduating from any one of the four Nassau County high schools.

The recipients this year are a talented group of young scholars from Fernandina Beach High School. Martin Tolxdorf will attend the University of Florida with a major in computer engineering. Gabrielle Gibb will attend the University of Florida with a major in biochemistry/pre-med. Jenna Edwards is undecided on her school but has been accepted at the University of North Florida, Florida State University, the University of South Florida and Jacksonville University and will be majoring in biology.

They were awarded certificates and formally recognized at the FBHS student awards ceremonies held this month. All will be recognized and receive their checks at the May 23 meeting of the NSFA to be held at the Kraft Ten Acres Club in Fernandina Beach.

The three Thirsk scholarship winners from last year will also be recognized and receive their 2018 checks at the May 23 meeting. They are Faith Leipau, graduate of Fernandina Beach High School attending the University of Florida with a major in business; Lauren Chambers, also an FBHS graduate who attends the University of Florida with a major in engineering; and Georgina Isais, a Yulee High School graduate who attends the University of Central Florida with a major in computer science.

The NSFA, founded in 1983, is a 501(c)(3) nonprofit organization, created to develop and promote saltwater fishing in the Nassau County area while adhering to state, federal and local regulations, to encourage compliance with rules of water safety by club members and the general public and to promote youth-related community and other civic-minded activities. Visit www.nsfafish.net or email info@nsfafish.net.

Local shark encounters

The Wahoo charter fishing boat, captained by Bill McFadden, and the Shrimp Queen, captained by Terry Lacoss, were out in the Atlantic Ocean last week, targeting a variety of shark species. McFadden and Lacoss took turns battling a large Atlantic mako shark, which was the highlight of their day. The shark was estimated to be between 8 and 10 feet long and was caught on a large piece of fish, which was used as bait.

McFadden, who has been shark fishing for many years, said that the big mako was a “once-in-a-lifetime” catch. He and his crew were able to tag the shark and release it back into the water. McFadden said that it was a great day on the water and that they were happy to be able to share such an exciting experience with their clients.

Lacoss, who is also a seasoned shark fisherman, said that the mako was a “magnificent” catch. He said that it was a great way to start the day and that he was looking forward to more exciting catches in the future.

Both captains were thrilled with the day’s catch and were grateful for the opportunity to share such amazing experiences with their clients. They said that they were looking forward to more days on the water and to continuing to target a variety of shark species in the future.

Sharing our island with gopher tortoises and more

From the Porch

Dickie Anderson

The time of year we are encouraged to slow down and enjoy the beach, is also somewhat of a time to be on the alert. Alligators are seen on golf courses and appear in people’s back yards, looking for water. This is the most curious of these creatures or the gopher tortoise. The dancing on the beaches are not related to their mating and nesting hours and $4,000 in scholarships and awards in Nassau County each year.

The National Society Daughters of the American Revolution is the largest women’s national patriotic and genealogical organization in the United States. The NSDAR’s mission is to celebrate, honor, and remember the women who served the cause of liberty and nation during the Revolutionary War. The NSDAR advocates for national, state, and local legislation, as well as community service projects, that support the goals of the organization.

Many members of the Amelia Island Sailing Club have also joined the St. Marys Riverkeeper organization and recently attended training sessions on how to collect and properly handle water samples from the Nassau River, Bells River, Cumberland Sound, Egans Creek, and St. Marys River. Pictured are club members Tom Maguire, Russ Ridley, and Charlie Hayes. Not pictured, but also on board, were Jan Schuuman and Ray Mooney, who were honored as “Rookie of the Year.” The honor is bestowed on an individual who demonstrates exemplary efforts in support of the Extension’s horticulture program. The honor is named after Steve Irwin, a long-time supporter of the Extension’s horticulture program.

The UF/IFAS Nassau Extension Service recently held an annual appreciation luncheon to honor its many volunteers who assist Director Rebecca Jordi and her extension agents in providing family, consumer, 4-H, agriculture and horticulture services. The theme of this year’s celebration was “Our Volunteers Rock.” Nassau Master Gardener Dicey McGraw, left, was honored as “Rookie of the Year.” The honor is bestowed on an individual who demonstrates exemplary offers in support of the Extension’s horticulture program. Center, Deanie Cox serves as a volunteer for the family and nutrition program. Meg McAlpine is the Family and Consumer Sciences agent and supervises volunteers in the program. Right, Dr. Eric Anderson, UF/IFAS Northeast District director, joined the celebration of Extension volunteers along with Nassau 4-H agent Kristen Poppell.

Friends of Animals in Nassau

The no-kill shelter – what does it mean?

The no-kill movement has been gaining momentum in recent years, with a growing number of shelters across the country adopting a no-kill policy. This means that no animal is killed for any reason other than to prevent suffering. The no-kill movement is based on the belief that all animals deserve to live, and that it is possible to find homes for even the hardest-to-adopt pets.

In Nassau County, Florida, the Friends of Animals in Nassau has been working towards a no-kill policy for many years. The organization is dedicated to providing a safe and loving environment for all animals that come into their care, and to finding permanent homes for them.

What does the no-kill shelter mean for animals?

The no-kill shelter means that animals are not killed, as long as they are not suffering. This means that animals will not be euthanized simply because they are not adoptable, or because of their age, breed, or gender. Instead, the shelter will work to find loving homes for all animals, regardless of their characteristics.

The no-kill shelter also means that animals will be given the best possible care, regardless of their behavior or personality. This includes providing adequate food, water, and shelter, as well as medical care and socialization opportunities.

What about the animals that can’t be adopted?

Some animals may not be able to find homes, despite the best efforts of the no-kill shelter. In these cases, the shelter will ensure that the animals receive the best possible care, and that they are comfortable and content in their environment.

Conclusion

The no-kill shelter is a promising trend in animal welfare, and one that has the potential to improve the lives of countless animals. As more shelters adopt no-kill policies, we can hope for a future where every animal has a chance to find a forever home.
Virginia artist Debby Bird will be seen at saatchiart. Her book will be available May 20. Tickets are $20. For more information and to see her book, call 261-6749 or visit amelia.org.

Amelia Island Museum of History is located at 235 S. 3rd St. in Fernandina Beach.

The kick-off event for the One Book, One Community will be held June 7 at the Cafe Horizons on the Fernandina Beach Community Event Center. The bestselling author Steve Berry, book of the month, "The Bishop's Pawn," will serve as the lead moderator for this year's "One Book, One Community." The Amelia Island Museum of History is dedicated to recovering as local, state and national history as possible given the mission and scope of the organization.

The Amelia Island Museum of History will host its next 3rd on 3rd at 626 Center St. on Wednesday, June 6. It will be an evening of food, entertainment and sharing of stories. Former Mills River mayor and advocate for historic downtowns Graham Kerling will discuss the book's theme, "mental metal detecting and tell us about some of his most interesting finds, including a silver paperweight that was given to the Dutch king," said Amelia Island Museum of History executive director Ann Gray. "This program is in partnership with the Nassau County Public Library System and the Amelia Island Book Festival and is sponsored by the Amelia Island Friends of the Library. This is a plat, located event that costs $25 per person. Tickets are $40 and available only by 4 and should be purchased in advance. Please check with Amelia Beach First for more information, visit the Library website at www.ameliacountyfl.org or call 705-5000.

The Fernandina Beach Community Event Center is located at 235 S. 3rd St. in Fernandina Beach.

The Fernandina Beach High School Class of 1978 is planning its 40-year reunion. A meet and greet will be held at 5 p.m. Friday, Aug. 30, at the House of Blues at Main Street Station. Socializing and dancing will take place at 7 p.m. at 1210 E. Bridge St. at Walker’s Landing ($50 per person). A reprocessed banquet package will be held June 3 at River Dunes. For questions or more information, contact Johnny at 321-7857, Swing at 705-0325, or Tim at 613-4130. The Fernandina Beach Class of 1978 class page can be found at FBHS78.com or call 291-3186.
