Owners and Patentees of the

## “NEAL THERMOMETER”

### The Greatest Improvement of the Age in the Distillation of Turpentine

By using these Thermometers, the proper degree of temperature is maintained throughout the entire process of distillation, thereby producing absolutely the best results obtainable, both in quantity of Spirits and grades of Rosin. The many operators using these instruments have sent us numerous testimonials to this effect, and we shall be pleased to furnish them on application. Write or call

Manufacturers of the

### Herty Turpentine Cups and Gutters

(Approved by the United States Bureau of Forestry)

*General Offices: Jacksonville, Fla.*

*Factories: Daisy, Tenn., and Atlanta, Ga.*

Some of the reasons the Herty Cup and Gutter System is superior to the old box system and to all other cup systems.

Minimum Damage to Timber  
Maximum Yield  
Simplicity of Installation  
Cheapness of Price

Rapidly Growing in Popularity among all up-to-date and conservative Naval Stores Producers
