WHAT IS IT THAT THE TAILOR?

The tailor has been with us ever since man began to weave cloth of wood and vegetable fibers and fashioned the same into garments. Ryle has changed, names have become more varied, materials have increased, and it has been a matter of great regret to see that this very fine tailor and his tools have been almost entirely forgotten. It is not, however, only a matter of forgetfulness but of neglect and lack of appreciation. The tailor is the last link of the chain of people who have contributed to the development of our civilization. He is the one who has made it possible for us to wear clothes, and yet he is the one who is most often overlooked.

TO THE PLACE TO BUY YOUR

The case was a complete failure. The tailor, who had given the woman a few orders for a small amount of money, decided to make everything as cheap as possible. He took the woman's measurements, and when he had finished, he said, "That will be a dollar." The woman was astonished. "A dollar!" she said. "That's a lot of money!" The tailor explained, "That's the price for the materials and labor." The woman was still surprised, but she agreed to pay the price. The tailor then began to make the suit, and when he was finished, he delivered it to the woman. She was amazed at the quality of the work, and she paid the tailor in full. The tailor was pleased with the result, and he continued to make more suits for the woman. He had found a new customer, and he was able to continue his work.
