The Beahrs Environmental Leadership Program is a training program at the University of California, Berkeley, that links environmental and sustainable development professionals around the world with state-of-the art interdisciplinary perspectives on environmental and natural resource management and policy analysis. The Beahrs ELP offers a summer certificate course, membership in an Alumni Network, and post-training collaborative research opportunities.

Presenter Contact Information:
Robin Marsh, Univ of California, Center for Sustainable Resource Development, 101 Giannini Hall, Berkeley, CA 94720, PH: 510-643-1042; FAX: 510-643-4483; EMAIL: rmarsh@nature.berkeley.edu

The tool bazaar presentation will consist of a laptop-based demonstration of the software Smile©. The approach aims at investigating the economic viability of smallholder irrigation schemes in a context of rehabilitation and management transfer. The software allows for easy and flexible data capture and storage on infrastructures and equipment, cropping systems, farmers’ practices and strategies, water demand and supply. A module allows for testing options on a water charging system. Finally, simulations can be run, focusing on scenario-testing and participatory investigations on the schemes’ prospects and the sustainability issues.

The demonstration links up with an oral presentation on November 18, at 11:20 AM, on the same topic.

Presenter Contact Information:
Sylvain Perret, CIRAD & University of Pretoria, Department of Agricultural Economics, Extension & Rural Development, 0002 PRETORIA, Phone: 012 420 5021; Fax: 012 420 5023 or 3748; Email: sperret@nsnperl.up.ac.za

The International Farm Fellows Program offers training in three different areas: dairy, equine and swine. Each area is a program within itself. Interested applicants must have at least a university degree (or currently working on a university degree), must understand oral instructions in English, and be between 20 and 30 years of age.
