Electricity.

The electrical properties of amber were known to the Greeks before the Christian era. Electricity takes its name from the Greek word for amber. Gilbert in 1000 was the first to employ the terms "electric force" and "electric attractions." In 1748 Franklin's electrical researches had progressed so far that he killed a turkey by the electric spark and roasted it by an electric jack before a fire kindled by the electric bottle, and in 1752 by means of the kite experiment he demonstrated the identity of electricity and lightning. The first magneto-electric machine was made at Paris by Pixil in 1832; the first telegraph line in the United States was set up between Washington and Baltimore in 1844; the first submarine cable was laid between England and France in 1850. As early as 1802 Sir Humphry Davy produced an electric light with carbon points on almost the same principle as that now employed. The first electric railway on the continent of Europe was built by Siemens at Berlin in 1881, the first in England was constructed in 1882, and in America the first electric line was built in 1885.

The Tip of the Alligator's Tail.

A great delicacy in Florida, according to the Cleveland Leader, is the tip of an alligator's tail. It tastes like frogs' legs, though a bit more gamy. Alligator tails are best just after the ricebird season. The big alligators float in the water with only their eyes showing. When they see a flock of these fat, juicy little birds they dive to the bottom. Their long, wide snout scoops up some of the loam, and they float to the surface again with just the rich soil showing. The birds think it is an island. They alight upon it. When the whole family is there the big reptile turns suddenly. Just as the birds scramble off he opens his mouth once. They are gone. The birds are neat little feeders, and the alligator is an epicure at this time of the year. The ricebird diet makes the tip of his tail, of which he is most vain, tender and sweet.

Startling but True.

People the world over were horrified on learning of the burning of a Chicago theater in which nearly six hundred people lost their lives, yet more than five times this number or over 3,000 people died from pneumonia during the same year, with scarcely a passing notice. Every one of these cases of pneumonia resulted from a cold and could have been prevented by the timely use of Chamberlain's Cough Remedy. A great many who had every reason to fear pneumonia have warded it off by the prompt use of this remedy. The following is an instance of this sort: "Too much cannot be said in favor of Chamberlain's Cough Remedy, and especially for colds and influenza. I know that it cured my daughter, Laura, of a severe cold, and I believe saved her life when she was threatened with pneumonia." W. D. WILCOX, Logan, New York. Sold by Ed Greene and all druggists.

Atlantic Coast Line.

THE THROUGH CAR LINE FROM FLORIDA To the East all Rail. Over its own rails to Savannah, Charleston, Richmond, and Washington, thence via Pennsylvania Railway.

International Tailoring Co Tailors to the Trade.

New York, Apr. 13th, 1906

Messrs. Gore & Scott,
 Arcadia, Fla.

Gentlemen:-

The past six months were the banner six months of our history.

We established a world's record--we made to individual order and shipped 500,000 garments.

The next six months we shall do even better--at the rate our tailor shops are going at present, our shipments for six months will reach the enormous total of 750,000 made-to-measure garments! Just think of it, at the rate of one and a half million garments a year!

But it isn't the quantity that counts--it's the quality. We wouldn't be the largest custom tailoring house in the world if we did not give the best satisfaction!

Any of those 500,000 garments that we have made for any of your customers, in which the linings did not give satisfactory service, please return, and we will reline free of charge. Or if any coat front has failed to hold its shape, we will gladly remake at our expense.

Only a concern like the International, whose reputation is sewn into the label on every coat, can afford to make such a sweeping offer as this.

Very truly yours,
 INTERNATIONAL TAILORING CO.
 J. L. Reiss, President

Bonfoey & McCormick Engineers and Architects

Tampa, Florida and Arcadia, Florida
