Dear Farris:

I am attaching list for Committee assignments.

Naturally Appropriations is No. 1 with me and I have listed some others. Of course if you give me other committees, I will do the best job I know how. I would like to have Chairman Appropriations, but if you have some one else that you are obligated to for this place, I will naturally take any assignment you give me and work just as hard as I asked no promises from you when I supported you for speaker. I supported you because I thought you was the most capable man in the race.

With kindest personal regards,
