LUCY MAHON, JR.

THE SPYER BUILDING
JACKSONVILLE 2, FLORIDA

Oct. 21, 1952

Honorable C. Ferris Bryant
Representative
Monroe & Chambliss National Bank Bldg.
Ocala, Florida

Dear Ferris:

Enclosed you will find the list of Legislative Committees with my preferences indicated thereon in accordance with your request. I realize the magnitude of your task in making these assignments so I will make my explanatory remarks as brief as possible and let you use your own judgment in making my assignments.

1. Public Roads and Highways.

As you naturally realize, Ferris, the present road building program here is of great economic importance to Duval County. I also feel that since Jacksonville is the geographic gateway to the State of Florida the state wide road building program is of particular importance to us.

2. Rules and Calendar.

In that I am the only attorney serving in the Duval House Delegation this session, I feel that I would be of more service on this committee than I would be on either of the other so-called "big committees".

3. Railroads, Telegraph and Telephone.

I believe that I would particularly enjoy and be of benefit on this committee in that both myself and my father have legal background in this type of work.

4. Motor Vehicles and Carriers.

On this committee I can also cite the same reason as above and I also feel that the work involved is of particular importance to Duval County as one of the centers of motor vehicle transportation in the state of Florida.

In addition to the above reasons I have also tried to indicate as my preference committees in which I believe I would be interested and enjoy the work. I am of course leaving a great deal to your own judgment due to my lack of experience and limited knowledge of the committee functions.

With kindest regards, I am

Very truly yours,

Lucy Johnson, Jr.
