Public Health

In the ten years that Mr Bryant was a member of the legislature he voted for no less than 35 major bills dealing with this important subject, including such ~~as~~ things as, regulation of narcotic drugs, penalty for ~~and~~ unauthorised practice of medicine, establishment of sanitation districts, suspension of medical license for malpractice, reports by the State Bd of Health on state of communicable diseases, control of poisonous reptiles, prohibition the dumping of garbage, and prohibiting for hospital service for the indigent.

14 controlled ~~the~~ bills for the purchase of Salk vaccine ~~controversial~~, established the North Florida Mental Hospital, & voted for the bill that established the Florida State Hospital for Alcoholism.

These are merely examples of his fight for a good Public health program, ~~and~~ significant in his ~~also~~ general philosophy ^{of} ~~to~~ his vote & petition the President & Congress to oppose socialized medicine.
