

January 11, 1967

Dear John:

I was delighted that President Johnson appointed you to the new Commission on Marine Science, Engineering and Resources.

Opening up "marine science for the benefit of mankind" has been a long-standing interest with me, as it is a professional pursuit to you. I know your great drive and ingenuity will bring memorable and lasting contributions to the work of the Commission.

Please accept my warmest congratulations and best wishes for success in this important task.

Sincerely,

Farris Bryant  
Director

Mr. John H. Perry  
Palm Beach Post Times  
Palm Beach, Florida 33480
