Better Houses In Bay Land

In 1967 the Barbados Investment purchased the Bay Estate Tenancy for £4,500 and despite some difficulties the program has been in operation for three years. The tenancy lands lie in St. Michael and St. John, near Bath and St. John's. The average size of the tenancy is 3.26 acres. The development of the tenancy has been under the supervision of Mr. F. W. E. W. Drakes, the Development Officer. The tenants are provided with electricity, water, and drainage facilities. The tenancy lands are divided into three sections: A, B, and C. The houses are being erected in each section in a systematic manner. The houses are of two types: A and B. Type A houses are one-storey buildings with one bedroom and a kitchen. Type B houses are two-storey buildings with two bedrooms and a kitchen. The houses are being erected in a well-planned layout to ensure that the tenants have access to all the necessary facilities. The development of the tenancy is progressing well and it is expected that the tenants will be moved into their new homes by the end of the year.
