At The Cinema

**STORY OF COURAGE**

By C. B.

PLAYS at the Empire Theatre "NO GAD SONGS FOR ME" is a film with an unusual theme, sympathetic in manner and powerfully acted. The underlying notion is not how long we live, but how we live. The story of a young girl and her struggle to become a star is told with respect and understanding. The screen is never dull and the dialogue far from exaggeration.

The story concerns a small actress named Natalie Wood who is considered a failure in her own profession. Her personal life is a complete contrast to her professional state and she dreams of a better life. The character of Natalie Wood is well-developed, with a strong sense of determination and self-belief. The supporting players, including the actress's father and her mentor, add depth to the story and their performances are superbly executed.

In conclusion, "NO GAD SONGS FOR ME" is a film that captivates the audience with its powerful narrative and well-crafted performances. It is a story about struggle, determination, and the pursuit of one's dreams, making it a must-see for anyone who appreciates well-told stories.

Gardening Hints

For Amateurs

**Anturism**

The cultivation of Anturism is simple, providing the plants are not overcrowded and are subject to good ventilation. The tests for Anturism are as follows. The plants should be placed under normal conditions and the leaves should be examined daily. The leaves should be checked for any signs of yellowing or browning.

**Position**

Anturiums should be grown in a warm, humid place. They require a lot of light and should be placed in a bright window. The soil should be kept moist at all times, but not waterlogged.

**Propagation**

Anturiums are propagated from the mother plant. Cuttings can be taken from the base of the plant or from the leaf axils. The cuttings should be planted in a mixture of soil and sand, and kept in a warm, humid place until they have rooted.

**Exposure**

Anturiums require a lot of light, so they should be placed in a bright window. They also require a lot of humidity, so they should be sprayed with water regularly. The soil should be kept moist at all times, but not waterlogged.

**Maintenance**

Anturiums are relatively easy to care for, but they do require some attention. They should be watered regularly and the leaves should be checked for any signs of yellowing or browning. The plant should be kept in a warm, humid place.
