T. S. ELIOT
A Christian Poet
By Douglas Jerrold

The function of the poet, according to T. S. Eliot, is to
be a kind of priest, a director of society, rather than a
mediator between man and God. In his early poetry,
Eliot was that which he described as "the experience of
a vanished intellectual world and hopes which are
achieved". He was the singer par excellence of cafés
and attic rooms, of the two things which strike the
imagination and the anxiety to transmute the
"boredom and despair of the world and the wonder
how it can be redeemed."

The early poetry of T. S. Eliot, although written in
the style of the Romantic and Victorian poets,
showed the influence of the future. In his poems,
there was an atmosphere of brooding spiritual
malaise which is quite different from that of a vanished
intellectual world and hopes which are achieved.
