In February, when the United States Government announced plans to retire heavy cruiser Portland, Vice Admiral Harold E. Stansfield, the tactical commander of heavy cruiser Portland, was awarded the Distinguished Service Medal by President Roosevelt.

The United States Navy was in the process of cutting its ships' size to conserve steel and other resources in the struggle against Japan. The cruiser came to the Pacific during World War II. After the war, in February 1946, she was placed in reserve, but was reactivated in January 1945.

Vice Admiral Stansfield, who was awarded the Distinguished Service Medal by President Roosevelt, said that the cruiser had performed well in the Pacific.
