**W.I. SELECTORS FACE PROBLEM**

Arthur Wint Discusses W.I. Sport

By O. S. COPPIN

I KNOW that all loyal cricket fans will join with me in offering a hearty welcome to Mr. F. C. D. Blackwood, the new West Indies captain, who arrived here yesterday. Mr. Blackwood is well known to the cricket world and his appointment as captain should give the West Indies team a new lease of life.

Mr. Blackwood is expected to play his first match in the West Indies today, and it is hoped that he will give a good account of himself. The West Indies team has been hard hit by the loss of Mr. L. A. Williams, who was injured in a recent match, and it is to be hoped that Mr. Blackwood will be able to fill the vacancy.

Mr. Blackwood is a fine player and has shown great promise in the past. He is a fine batsman and has played some fine innings in recent matches. He is also a good bowler and has shown great skill in bowling in recent matches. He is a fine all-round player and is sure to be a great asset to the West Indies team.

The West Indies team is in a bad way at present and it is to be hoped that Mr. Blackwood will be able to turn things around. The West Indies team has been hard hit by the loss of Mr. L. A. Williams, who was injured in a recent match, and it is to be hoped that Mr. Blackwood will be able to fill the vacancy.

FARM AND GARDEN

THE SOIL—By Agricola

Soil is not only the foundation of agriculture but the basis of all human prosperity. Compost, we must say, but you do not need to go back to the only human habitability. It consists of the most deficient portions of the rocks that make up the earth's surface, which is incorporated with plants as well as micro-organisms.

W.I. SELECTORS FACE PROBLEM
Arthur Wint Discusses W.I. Sport
By O. S. COPPIN

I KNOW that all local cricket fans will join me in expressing the deepest sympathy with West Indies Captain, Mr. Frank daCosta, and his team who were defeated by England in the recent three-match Test series. West Indies supporters may not be aware that there are already indications that the selectors are thinking of some changes in the West Indies team for the benefit of the selectors.

The selectors, we have heard, are considering the need for Brylcreem's double benefit: fitness—a must! This is an extremely different fact than the fact that the selectors are considering the need for Brylcreem's double benefit: fitness—a must! See how its mint-flavoured foaminess encourages your oe safeguards your teeth, too, for Ipana gives your oe safeguards your teeth, too, for

WHAT OF THE FACE BOWLING CANDIDATES?
IT IS hardly certain that the good bowling conditions from St. Lucia and St. Vincent, Trinidad, corresponded or conformed to the standards of world cricket. With the changing phase of West Indies cricket, this is a most disturbing factor to have one or two of the West Indies players out of the best form for the benefit of the selectors.

WINT LOOKS AT W.I. SPORT

I'm a communication from Arthur Wint, who has been so long on the road to fame and fortune as a W.I. sportsman, who has been so long on the road to fame and fortune as a W.I. sportsman, that he boils, over and over again, over and over again, the way the selectors have been thinking of some changes in the West Indies team for the benefit of the selectors.

SEND A W.I. UNITED TEAM

W.I. selectors would do well to consider the idea of sending a W.I. United Team to the West Indies. It would be a good thing to have a West Indies team which would be capable of playing against England and the other top countries in the world. It is not easy, however, for the selectors to consider the idea of sending a W.I. United Team to the West Indies. It would be a good thing to have a West Indies team which would be capable of playing against England and the other top countries in the world.

FORM A W.I. SPORTS UNION

The fourth heading, Mr. Wint writes, would be the establishment of W.I. sports unions. It would be a good thing to have a West Indies team which would be capable of playing against England and the other top countries in the world. It is not easy, however, for the selectors to consider the idea of sending a W.I. United Team to the West Indies. It would be a good thing to have a West Indies team which would be capable of playing against England and the other top countries in the world. It is not easy, however, for the selectors to consider the idea of sending a W.I. United Team to the West Indies. It would be a good thing to have a West Indies team which would be capable of playing against England and the other top countries in the world.

FOR CRICKET ARTICLES

The desirable pattern, he suggested, was that of the recent West Indies team which has been without precedent at this time of the year for over many years. There is no better example than the current West Indies team which has been without precedent at this time of the year for over many years. There is no better example than the current West Indies team which has been without precedent at this time of the year for over many years.

The C.W.I. have been trying to keep themselves in good shape and ready for the benefit of the selectors.

C'wealth Lead Ceylon By 220 Runs

The Combined 220 ran with 175 from L. Wood and 105 from E. Martin. Both innings were solid and well supported by the other West Indies players.

Grant of £2,000 To J'ca Cricket Board Causes Argument

The Board decided to make a grant of £2,000 to the J'ca Cricket Board for the benefit of the selectors.

M.C.C. MATCH DRAWN

The match was played out in the last session of play on the fourth day, and the two-day match was drawn. The best players were W. P. Skowronski and M. C. R. J. P. T. Morgan. The C.W.I. team had been well supported by the J'ca team, and had no remarkable performance to show for their efforts.

English Owner Would Like To Race In Barbados

As Told To "BOOKIE"

STAYING at the Miami Beach Hotel at the time, an English owner, Mr. Picken, has been seriously considering the possibility of running a horse in Barbados. Although his plans for sending a horse to Barbados have been deferred, Mr. Picken has not given up hope of running a horse in the near future.

Mr. Picken has recently visited the Barbados Turf Club and has been impressed with the facilities and the enthusiasm of the local owners and trainers. He is confident that his horse will be well looked after and that it will have every chance of success.

Mr. Picken's horse, a three-year-old filly, is at present training in England and is expected to be ready for the race in Barbados in the near future. Mr. Picken has already entered his horse in the Barbados Stakes, which is the most important race in Barbados and is run over a distance of 1 mile and 6 furlongs.

Mr. Picken is a well-known figure in British racing and has won several important races with his horses. He is confident that his horse will be well looked after and that it will have every chance of success.

Mr. Picken has always been keen on running horses in the West Indies and has a good record of success in this region. He is confident that his horse will be well looked after and that it will have every chance of success.

SOIL—By Agriola

SOIL is not only the foundation of agriculture but the basis of all human prosperity. Commerce is not only for trade and gain, but, from its foundation, rests upon the soil. Soils are never as good as they seem, and they are never as bad as they are considered to be. The condition of the soil provides a basis for the health and happiness of men and women, and it is the basis of all prosperity.

Gardening Hints
For Amateurs

THE GARDEN in February

MOSS ON LAWNS

Moss is not a desirable feature of lawns. It is not only unattractive, but it also interferes with the growth of the grass. The best way to remove moss is to roll the lawn briskly with a hard broom, so removing any moss that the leaves of the grass may not be able to reach. If the moss is still present, it may be necessary to plant in a mixture of sand and peat moss. Moss is also removed by using a moss killer, available from local garden centers.

THE SOIL—By Agricola

The physical and chemical properties of soil are of great importance to the grower of plants. The soil should not be regarded as a fixed entity, but rather as a living organism that is capable of changing and adapting to changing conditions. The soil should be considered as a complex of solids, liquids, and gases, which are interrelated and interact to produce the soil's fertility and productivity.

THE POETRY OF EDITH SITWELL

By ROY CAMPBELL

Dr. EDITH SITWELL

In Facade and Gold Coast Cus...
WAKE UP

IT seems incredible that anyone who has been reading this newspaper during the past few months might not have noticed the growing demand for Barbadian products, and in particular, the rise in the prices of certain goods. This trend is not limited to Barbados alone; it is being observed worldwide, with many countries experiencing inflationary pressures. It is crucial for policymakers to implement measures to curb this phenomenon and ensure economic stability.

During a debate in the House of Assembly last week, Mr. Adams stated that the Government had spent $30 million on various projects, including education, health, and infrastructure. This expenditure is expected to have a significant impact on the local economy, boosting growth and creating employment opportunities. However, Mr. Adams noted that the success of these initiatives depends on the wise use of public funds, and called for a greater focus on long-term planning and sustainability.

The discussion in the House highlighted the need for transparency and accountability in the use of public funds. Mr. Adams encouraged the Government to establish mechanisms that allow for regular audits and evaluations of projects, ensuring that every dollar is spent in the best interests of the community.

Sitting On The Fence

THAT the Australians are not unmindful of the West Indies threat to their cricket supremacy is evident in the current tour of one of their former great players. W. J. Weekes and Worrell are as good as the rest of the team. They are outstanding all-rounders, good bowlers and capable in the field. The West Indies are determined to make the Aussies pay for their neglect of the game, and their determination is reflected in their performances during the tour.

The Australians have been put on notice that the West Indies are not to be taken lightly. Their fast bowling, a department of the game in which they have been traditionally strong, has been a focal point of their preparations. The West Indies, led by the likes of Weekes and Worrell, are aware of the importance of this tour in their cricket ambitions, which no lover of the game can fail to recognize.

Why I Come To Barbados

IT is always a temptation to return to one's roots and explore the places that have shaped one's identity. For me, Barbados has always held a special place in my heart. The island's rich history, vibrant culture, and unique blend of Caribbean and European influences have always drawn me back.

I come to Barbados for the atmosphere, the people, and the sense of community. The islanders are warm and welcoming, ready to share their culture and traditions with visitors. The beaches are stunning, with turquoise waters and white sand, making it an ideal destination for relaxation.

One of the reasons I love Barbados is its natural beauty. The island is home to a diverse range of flora and fauna, with many species unique to the region. The natural landscapes provide a sense of peace and tranquility, making it an ideal place for outdoor activities such as hiking and birdwatching.

In conclusion, Barbados is a place that I will always return to. The island's unique blend of history, culture, and natural beauty makes it a special destination, and I look forward to exploring the island further in the future.
The Phone Has Gone Up Sixpence In 67 Years

Bridgetown Never Sleeps

The telephone business is in a sorry state, and it is a pleasure to see that the Post Office has a new head. The Boomerang, which, when you make a call, gives you the number of the person you are calling as well as a selection of popular music, has been replaced by the new telephone system. The Telecommunication Co. Ltd. which has been in operation in these islands for some years, is now able to offer a more efficient service. At the time of going to press, the new system was operating in most parts of the country.

Today, there are 4,000 lines in the country, and the number of calls made in the day is increasing. The new system is being introduced gradually, and it is expected that it will be fully operational within a year. The Post Office has also introduced a new system of billing, which will make it easier for customers to keep track of their telephone bills.

The new system is being operated by a number of people, and there are three engineers in charge of the telephone exchange. At the time of going to press, the engineers were working very hard to ensure that the new system was operating smoothly. The engineers are also responsible for ensuring that the new system is secure against any possible objections. At present, there are three engineers in charge of the telephone exchange. At the time of going to press, the engineers were working very hard to ensure that the new system was operating smoothly. Faiths Barbadians Live By

by WILLIAM BURKE

An Advocate Office looking out upon a Barbadian street, with its jumble of rickety, second-rate furniture, could be regarded as an abode of poverty by an outsider. In the past, it has been found that many of the inhabitants of Barbados, particularly the lower classes, have a strong religious faith that has helped them cope with the harsh realities of life. This faith is reflected in various ways, including the practice of certain religious rituals and the construction of religious buildings.

The Old Kings Come Back To The Abbey

Their Treatment Is A Secret

The people of Barbados were privileged to have a chapel which was put up in 1924. It is still standing. In 1908 the Church was built on the site of the old church, which was destroyed by fire. The new church was dedicated to the memory of the old one.

The Wooden Effigies Are Being Made

A new wing was built there in 1941. The models will be ready for exhibition during the Festival of Britain. All the models will be made by a group of craftsmen, who are working under the guidance of Father Johnson, who is still some years old.

The Advocate Begins A Series

It was the Army that brought Father Johnson back to the Abbey. He lived in Barbados from 1917 to 1924. He was a student at the Abbey at that time, and he was there when the first model was made. He has been there ever since, and he is still busy making models.

It Is In The Nervous System

Mr. Heinz Haber, a United States captain, was due to leave the ecclesiastical side for America when he was on leave in Barbados. He lived in Barbados from 1917 to 1924. He was a student at the Abbey at that time, and he was there when the first model was made. He has been there ever since, and he is still busy making models.

The People Of The Abbey

The people of the Abbey are busy making models. They have already made several models, and they are still working on others. They are making the models to be shown at the Festival of Britain, and they are very proud of their work. They are also making models for the Church of England, and they are planning to make models for the Royal Family as well.
London's Fashion Cry Is—'AS YOU WERE!'

By EILEEN ASCROFT

Life was pleasant except for the odd minor occurrence. A routine day, one that seemed to pass unnoticed. But then, the unexpected. A fashion cry that echoed through the streets—'AS YOU WERE!'

It was a surprising development. People had been going about their daily routines, unaware of the underlying trend. The fashion world had been in a state of transition, and then suddenly... 'AS YOU WERE!'

A revolution in style had taken place. Garments had been discarded and replaced with more modern, yet classic, designs. The cry of 'AS YOU WERE!' had become synonymous with the new era of fashion.

The change was gradual, but it had a profound impact. People were forced to reevaluate their clothing choices and adapt to the new standards. The fashion world was on the brink of a new chapter, and 'AS YOU WERE!' would be remembered as the cry that marked the beginning.

---

Belts Tightened

LONDON

Leaders are taking note of the belt as a key accessory. But they were not the only ones to notice. The fashion world had been buzzing with excitement as the belt became a symbol of fashion-forwardness.

The new trend was not without its challenges. Some found it difficult to adjust to the tighter fit, while others embraced the change wholeheartedly. But the trend was clear, and the belt was here to stay.

Be Proud of Your English

Are you content with the way you speak and write?

Are you sure that you are not making mistakes that could cost you dearly? English is indispensable to those who are handicapped because they cannot afford to neglect it. Every day you may be coming into contact with people who use English, and they expect you to use it correctly. If you are now making mistakes which people know about, you can be sure that they are making mistakes in the things you write. It is important to know the right words and how to use them.

How to Gain Language Power

The nation is planned on standards of English. In order to be successful in your work, you must be able to express yourself clearly and concisely. The course is designed to help you to become proficient in English. The course will teach you how to use English correctly, how to make your letters intelligible, and how to communicate fluently.

How to Correct Fluency

The course is designed to help you to communicate fluently. You will learn how to express yourself clearly and concisely. You will be taught how to use English correctly and to make your letters intelligible. The course will give you practice in using English in a variety of situations.

How to Make Your Letters Intelligible

The course is designed to help you to express yourself clearly and concisely. You will learn how to use English correctly, how to make your letters intelligible, and how to communicate fluently. You will be taught how to use English in a variety of situations.

How to Punctuate Correctly

You are shown how to avoid the most common errors in English. The course will teach you how to use English correctly, how to make your letters intelligible, and how to communicate fluently. You will be taught how to use English in a variety of situations.
