GARDENING HINTS FOR AMATEURS

The Garden in June

Rose Cultivation

Four months from the time you plant your rose bush, you should have blooms. They should be about three to four inches across and very fragrant. It should be planted in a good loam soil with plenty of humus and a good dose of bone meal or other good fertilizer. The plants should be watered well and kept well supplied with water. They should be protected from the hot sun and should be in a sunny location. The plants should be pruned every year and the flowers should be picked off. This will encourage the plant to produce more flowers.

Best Period

The best period for rose planting is in mid-April. The rose bushes should be planted in a well-drained soil and should be watered well. The plants should be pruned every year and the flowers should be picked off. This will encourage the plant to produce more flowers.

Flowering Season

During the summer season, the rose bushes should be kept well supplied with water and should be pruned every year. The flowers should be picked off to encourage the plant to produce more flowers. The rose bushes should be kept well supplied with water and should be pruned every year.
