**Film Unit Makes Second Documentary**

The film is in the making to be entitled ‘THE ONE AND ONLY’ and is a documentary on the Government Film Unit. It is a 120-minute feature film and will be released in January. The film deals with the working of the Film Unit, its equipment, techniques, and the many aspects of film making. It will give a detailed account of the work of the Film Unit and will be distributed to schools and other educational institutions.

**Producers and Camera Men** (Mr. Chas. C. and Mr. E. B.) have prepared the daily shooting before they begin the actual shooting. This makes it easier for the camera men to locate the scenes and move about more freely.

**The Importance of Being Earnest**

THE GOVERNMENT FILM UNIT started its work in December 1950 and released its first documentary in January 1951. Since then, the Government Film Unit has produced many documentaries, including those on the “One and Only” series. The unit has been financially supported by the Government and has been able to produce high-quality documentaries.

**The World of Tomatoes**

GLASSWARE
- GLASS MATS
- SALT & PEPPER SETS
- ICE CREAM GLASSES
- MEASURING CUPS
- SALAD DRESSINGS
- BOTTLES
- TUMBLERS

The Government Film Unit has been responsible for the lighting on the film “The One and Only.” Mr. B. Thorp, the lighting technician, is in charge of the film’s lighting. The lighting technicians have to be skilled in the use of lighting equipment and must have a good understanding of the principles of lighting.
